homecoming, students and football fans converged on the North Dakota University campus weekend to record the largest homecoming attendance in university history.

Starting off the weekend was the Friday morning dedication at the Engineering Hall where attendance exceeded the 1,200 seating capacity.

More than 300 dignitaries attended the dedication ceremony at the Engineering Hall. Friday evening more than 3,000 students attended the Friday night concert. Saturday morning more than 275 alumni and university officials joined the alumni dance at the Lapp Memorial Union Ballroom at the same time. Eight hundred alumni honorees were honored the banquet.

Kappa Kappa Gamma sorority, most humorous: A record attendance of more than 11,000 fans attended the football game Saturday afternoon between NDSU and the University of North Dakota to surpass all previous attendance records for a sports event in North Dakota.

The Homecoming Dance attendance has been assessed at more than 750 people. Final ticket sales have not yet been tabulated.

This year’s Homecoming has been called the most successful and best attended,” said Beth Rochefort, coordinator of the 75th Anniversary celebration and advisor to Homecoming. “There were many things to do, and interest in the Bison brought more people to the campus than ever before.”

The University of North Dakota alumni association of the two honored classes were established by Lynn R. Leavens.

North Dakota State University students and those at most colleges and universities in the state will probably pay another $5 into the building fund before the Supreme Court rules on the constitutionality of the proposed $5 million state-backed bond issue. Last May, the Board of Higher Education established a special student fee of $15 per semester to provide $15 million for the building fund to amortize the proposed funds.

At that time Commissioner Kenneth Raschke informed the Supreme Court that the constitutionality would be tested in June. The issue has not been decided as yet and a decision will not be reached this month.

Harold Shaft, Grand Forks attorney for Dr. Oscar C. Nord, who is filing the friendly suit, said papers will be filed this week.

Two or three months could elapse before the Supreme Court rules on the constitutionality of the bond issue.

North Dakota’s Supreme Court does not meet at regular intervals; only when an emergency case is on the docket or calendar. In cases like this one, they might have a special session to deal with the issue because of the public interest.

Over $100,000 has already been collected for the fund (19,279 x $5 = $96,395 plus an undetermined amount collected from summer school students). Another $60,000 will be collected at the start of the next quarter from college students on the quarter system.

Student Housing Is Discussed

President H. R. Albrecht was authorized to enter into contracts for two nine-story residence halls by private enterprise. The Bison of North Dakota was also approved at the first day meeting.

The proposal was brought to the board by Robert Dahlene, a representative of the Northwest Mutual Life Ins. Co. of Milwaukee.

Approval was given for construction of a trade and technical school building at Wateton State School of Science.

Installation of an air-conditioning system in the educational television studio in Ceres Hall at a cost of $29,277 was authorized by the board.

The mall at UND was saved as the board overruled Dr. George W. Starcher, UND president, who recommended that a physics laboratory be built on the mall.

During the meeting questions were raised by the board members concerning the wheat research project; NDSU; Dr. Albrecht replied that NDSU is among the leading wheat researchers in the nation. At the board’s request he will arrange a demonstration on wheat research at the next board meeting.

President H. R. Albrecht was authorized to enter into contracts for two nine-story residence halls by private enterprise.

Plan to Okay Longhorn Wins in Texas

Legal case still pending

President H. R. Albrecht said that the break will begin on Saturday, Oct. 12.

The second highest increase is in the College of Agriculture, with a jump from 335 to 547, or an increase of approximately 61 percent.

Pharmacy has increased from 323 to 418 students, or 25 percent. Agriculture from 523 to 770, or 47 percent, and the College of Chemistry and Physics from 131 to 183 students, or approximately 40 percent per cent.

This five year period was picked as a sample to determine trends because of availability of figures.

The comparison shows a total gain in enrollment of 742 students. Arts and Sciences alone increased by 454.

University Senate Okays Vacation Change; Action Means Thirteen Weeks Without Break

Easter vacation will be a reality this year at the University of North Dakota as a result of University Senate action Monday, Oct. 18. The week off, usually coming at the end of Winter Quarter in March, will fall on the week of April 3-10 instead.

Dr. Muriel Vincent, the pharmacy department chairman, who attended the Faculty Senate meeting that the break be moved to Spring Quarter break, and part to Easter vacation. However, Dr. Frederick Walsh, chairman of the speech department, was not in agreement with the proposal.

The vacation time will conform to other schools in the state and it will also mean that NDSU students will have to wait 13 weeks from Christmas for time off.

Increasing Enrollment

by Jim Glynn

Year in North Dakota colleges and universities swelled to 19,279 for the 1965-66 academic year; this is an increase of 2,104 full-time students over the 1964-65 total. Early projections had shown an enrollment of 20,000 students for the nine institutions of higher learning.

Another increase of 2,000 students is expected by the end of the year, according to Kenneth Raschke, North Dakota commissioner of higher education. This will mean an enrollment increase of about 7.5 per cent in just two years, nearly three times comparable to Minot State.

Increase in the individual institutions arranged in the order of increase as follows:

<table>

These figures compared with the stable population of North Dakota show that citizens of the state are demanding more and better education for themselves and their children.

If North Dakotans desire more education, as the figures show, then the state government has to respond. This is an issue that they want? To shed some light on this question the Supreme Court has brought on the ballot a constitutional amendment to the state constitution so that NDSU into the individual colleges to compare the largest breakdown of the enrollment five years ago.

In 1960, NDSU had a total enrollment of 3,419. The College of Engineering at that time was the largest with 1,003 students enrolled. The number of engineering students in the five year period has increased by only 46 or less than 5 per cent.

Five years ago the college with the second highest enrollment was Arts and Sciences with 993 students. This college in the past five years has doubled its enrollment. It now leads the enrollment totals with 1,388 students.

The second highest increase is in the College of Agriculture, with a jump from 335 to 547, or an increase of approximately 61 percent.

Pharmacy has increased from 323 to 418 students, or 25 percent. Agriculture from 523 to 770, or 47 percent, and the College of Chemistry and Physics from 131 to 183 students, or approximately 40 percent per cent.

This five year period was picked as a sample to determine trends because of availability of figures.

Excluding Arts and Sciences, the comparison shows a total gain in enrollment of 742 students. Arts and Sciences alone increased by 454.
HAPPY BIRTHDAY GREETINGS are given to Dr. O. A. Stevens, professor emeritus of botany at NDSU, on his 80th birthday. At left is Adrian Fox, who was one of Steven's students back in the 1920's, and at right is Patricia Hardt, PH 1. They were among more than 100 students, faculty members and alumni who attended the party.

"Influences of Climate on Crop Production" was the title of the speech which won Jerald Bergman, AG 4, the opportunity to participate in the National Agronomy Student Speech Contest to be held Oct. 30 in Columbus, Ohio.

Bergman won the local agronomy speech contest Oct. 17, competing against three other local students. Bergman was awarded $50 toward expenses at the national contest.

**Eleven New Members Elect To Orchesis Dance Society**

Election of eleven new members to the Orchesis Dance Society was announced Wednesday morning by Marilyn Nass, Orchesis advisor.

Orchesis is a performing dance organization open competitively to all students through tryouts before the Orchesis elective members, officers and advisor.

This organization gives men and women who are interested in creative dance an opportunity to express themselves in a length dance show and in dances for clubs, television, other community affairs. Newly chosen members are Terry Coleman, DeBrec, Janet Eckland, Jan Elion, Diane Gamble, Diane Larin, Sue Gamble, Diane Offerdahl, Shirl Fords, Betty Rutherford and Jo Yurcet.

EATON PAPER CORPORATION, PITTSFIELD, MASSACHUSETTS
Dr. Robert C. Brasted, University of Minnesota; Dr. William C. Cook, Beloit College; Dr. Robert W. Parry, University of Michigan; and Dr. Jay A. Young, King’s College.

Conférence objectives are:

- To provide an open forum for discussion of problems challenging the field of chemistry education.
- To aid in the development of awareness of problems in chemical education that may be unique to the North Central geographic area.
- To develop specific recommendations for curriculum improvement in the North Central area.
- To explore ways to more effective communication among teachers of the North Central area.

This conference is open to college chemistry teachers and interested administrators. Attendance will be limited to approximately 100 participants.

Arrangements for accommodations are being made through the College of Chemistry and Physics.
Letters to the Editor

Dillon Letter Termmed Presumptuous

To the editor:

With reference to a letter by Mrs. Dillon in the UN , it is true that the whole truth has not been told, but it is not necessary to exaggerate and baseless claim that those who opposed the protest movement was no serious rebuff to her first letter, most people agree that it was not an exaggeration.

When a person is grossly uninformed about a subject, he may be hurt and screams loudly, the best course for all is to ignore him. This is especially true in the case taken by most people regarding Mrs. Dillon's letter, unfortun­ately, it is impossible to dis­cuss and communicate with individ­uals who strongly believe that they know the absolute truth, when they know all about everything.

To me, the letter was a deliber­ate distortion of facts concern­ing the United Nations. An indi­vidual who is committed to this organization is incapable of evalu­ating it fairly. An individual who is committed to the "facts" everything trusts nothing is always unable to see goodness. An individual who hates people without ever knowing them has lost the ca­pacity to love. An individual who is selfishly concerned only with himself has no chance to be desired by others. An individual who is deeply fearful of change has lost all hope for ad­vancement.

Although I have little hope that Mrs. Dillon will enlighten her readers with the following facts about the UN, I feel it is my duty to point out the mis­understandings, and intentional distortions of the facts. Mrs. Dillon's first so-called "fact" is that "Russia is the most cold blooded, brutal and tyrannical nation, that her first action, and her second is to see goodness. An individual who hates people without ever knowing them has lost the ca­pacity to love. An individual who is selfishly concerned only with himself has no chance to be desired by others. An individual who is deeply fearful of change has lost all hope for ad­vancement.

While I have little hope that Mrs. Dillon will enlighten her readers with the following facts about the UN, I feel it is my duty to point out the mis­understandings, and intentional distortions of the facts. Mrs. Dillon's first so-called "fact" is that "Russia is the most cold blooded, brutal and tyrannical nation, that her first action, and her second is to see goodness. An individual who hates people without ever knowing them has lost the ca­pacity to love. An individual who is selfishly concerned only with himself has no chance to be desired by others. An individual who is deeply fearful of change has lost all hope for ad­vancement.

To the editor:

Despite the attempts of many individuals in the all too frequent scene, we are still caught in the middle of a conflict between ideologies and the commitment of money and human lives in a period when the world is in the midst of revolutions and changes, a knowledge of what is going on is imperative.

It is our hope that the Model United Nations will provide the UN with the new human being and who is deadly fearful of any change has lost all hope for ad­vancement.

Mrs. Dillon's second so-called "fact" is that "the Under-Secretary of Political Affairs is a relative minor and unimportant position in the UN. The most important positions in the UN are those of the Secretary-General, P r e a l dent, Commanders of all military operations conducted by the UN (including UNIf, UNIFAC and UNIFEC) have always been occupied by n o -Communist countries. The basis of these facts I would accuse Mrs. Dillon of not clearly telling half-truths.

Her third point is, "If the UN is interested in human rights and I to individuals, why doesn't it stop the suppres­sion of people in various parts of the world?" Anyone who has read the literature of the function of the UN knows that the UN has no resources to support demonstrations or to change governments. However, it cannot be said that the pressure of opinion against the oppressor and the real casualties of guns and bombs.

Finally, I sincerely hope that Mrs. Dillon apologize to Nickerson, in whom she has shown no respect and role also unfair. I doubt that it can be an overtament if I say that Mrs. Dillon will need ano­ther 40 years before she can come close to possessing the tolerance and depth of judge which Dr. Nickerson has.

The most important fact is that the UN has been wronged, not that it has been misunderstood; it has always made up the job of being a human being.

Gayle Melby, AS

MUN Participation Urged

To the editor:

Despite the attempts of many individuals in the all too frequent scene, we are still caught in the middle of a conflict between ideologies and the commitment of money and human lives in a period when the world is in the midst of revolutions and changes, a knowledge of what is going on is imperative.

MORE INFORMATION ASKED ON BUDY

To the editor:

It was very interesting to listen to the reaction to the letter for the Model United Nations MUN, which was printed in the Oct. 13 issue. However, the figures quoted do not seem to be given the state North Dakota State University's complete picture of the status of the Model United Nations MUN.

The most important fact is that the UN has been wronged, not that it has been misunderstood; it has always made up the job of being a human being.

Gayle Melby, AS
Stability Of Christianity Is Praised

In response to the letter on Christianity in the Oct. 5 Spectrum, I would like to express my feelings. Yes, Christianity is not for all, and with it comes a responsibility to live a life of faith and service to God.

Most people will agree with me that all men are sinners. Biblical Christianity states that all men are sinned and fallen short of glory of God - Rom. 3:23. This also states that the sin of man is death - Rom. 6:23. There is no forgiveness of sins to be had without the shedding of blood - Heb. 9:22.

The people in Old Testament times used animal’s blood to atone for their sins. This practice of sacrificing animals was replaced by sacrificing a perfect lamb on the cross, Jesus Christ - Heb. 9:26.

For a person to become a Christian until he comes to personal friendship with Christ, He must accept Jesus as his Savior. This is the basic truth that we should toss out everything that makes us feel uncomfortable at times. That’s ridiculous. Let’s be rid of such ridiculousness about Christianity.

I’m glad that God is the same yesterday, today, and forever, instead of being a fad that changes with the whims of people.

Bill Miller, AG 4

Alumni Honored At Homecoming

North Dakota State University honored eight of its former students during its 75th Anniversary Homecoming with the presentation of Alumni Achievement Awards.

Receiving the awards were The Hon. Milton R. Young, U.S. Senator from North Dakota; Eugene Fitzgerald, long-time sports editor of the Fargo Forum; Col. Orville E. Bloch, a Congressional Medal of Honor winner; Mrs. Elsie Stark Martin, a professional home economist; James W. Moore, a prominent pharmacist; Adrian C. Fox, head of the educational relations section of the U.S. Soil Conservation Service; Lawrence B. Hall, special assistant with the division of Bioscience Programs of the National Aeronautics and Space Administration, and Dr. Howard R. Hegbar, assistant chief engineer with the NASA's Goodrich Aerospace Corporation.

The awards were made Monday night at an Alumni Awards Banquet in the NDSU Memorial Union. Although the Alumni Achievement Awards have customarily been made at Commencement, they were moved to Homecoming this year in the belief that it is a more appropriate time. The number of recipients was also increased this year in conjunction with NDSU's 75th Anniversary.

SENATOR MILTON R. YOUNG was born at Berlin, N.D., and attended secondary schools at Moore. He attended NDSU (NDAC) and Graceland College, Lamoni, Iowa. He was a farm near Berlin until his appointment to the U.S. Senate in 1932. Prior to that he was active in local and state politics in North Dakota, being elected to the State House of Representatives in 1922, and the State Senate in 1924.

EUGENE FITZGERALD is a native Fargoan and attended Fargo Public Schools and NDSU. He joined the sports staff of the Fargo Forum in 1926, became sports editor in 1931. At NDSU he was a member of Alpha Kappa Phi Fraternity (now Alpha Tau Omega) and sports editor and later editor-in-chief of the Spectrum.

COLONEL ORVILLE E. BLOCH was born at Big Falls, Wis., grew up in Streeter, N.D., and attended the 41st Infantry Division of the Washington National Guard. He is currently Senior Army Adviser to the 41st Infantry Division. He attended NDSU and the College of Pharmacy, earning a degree in Pharmacy.

JAMES W. MOORE was born at Crary, N.D., and went to school and worked in a store at Powers Lake. He went his way through the NDSU College of Pharmacy, earning a degree in Pharmacy.

Sharivar Jobs Are Available

Anyone interested in working on Sharivar this spring should contact the Commission of Campus Affairs, according to commissioner Bob Hendricksen. He said that very few applications for the Sharivar Steering Committee have been turned in. He would like to see more interested students apply for a job on the committee. The only criterion for a position is that the applicant be familiar with, or interested in, Sharivar. Any past experience on Sharivar or Homecoming greatly enhances an applicant's chances of getting a job.

The applicants will be interviewed by the Commission of Campus Affairs before any positions are filled.

the test. The test consisted of two parts, including an objective test on knowledge of the attitudes of the potential homemakers toward domestic science and an essay on marriage calls for preparation.

In addition, last April she received an expense-paid trip to Luxembourg. They will be the first to find out that she had won the state contest. "I knew, but didn't think I found out at a school assembly."
Here's the shortest line between graduation and a "go-places" career.

It's the one you sign on at your placement office for an interview with IBM November 18-19

Want growth—with a difference? Career excitement—with stability? New frontiers in all technologies—with the leader in the nation's fastest-growing major industry? IBM can offer you extraordinary growth opportunities in Research, Development, Manufacturing, Programming and Administration—throughout its network of labs, plants and technical centers.

If you want the facts about these careers, you'll want to talk to the IBM interviewer.

Certainly, he wants to talk to you about these key jobs. They're jobs with technical responsibility. Where you can put your ideas to work and earn superior rewards.

In a growth company like IBM, responsibility and advancement come rapidly. In fact, during the next five years IBM expects to appoint approximately 6,000 new managers. A wide range of training and education programs will help you meet the challenge of growth.

So visit your placement office now for a line on IBM. Sign it for your interview. If for any reason you can't arrange an interview, visit your nearest IBM branch office. Or write: Manager of College Relations, IBM Corporate Headquarters, Armonk, New York 10504.

IBM is going places. Why not come along?

Whatever your area of study, ask us how you might use your particular talents at IBM.

Job opportunities at IBM lie in eight major career fields:

(1) Research and Development,
(2) Engineering,
(3) Manufacturing,
(4) Finance and Administration,
(5) Marketing,
(6) Field Engineering,
(7) Systems Engineering,
(8) Programming.

IBM is an Equal Opportunity Employer.

Bison Gridders Reclaim Nickel Trophy

The Nickel Trophy changed hands legally on Saturday for the first time since Oct. 25, 1952, as the North Dakota State University Bison defeated the University of North Dakota Sioux 63. Bison gridders earned sole possession of first place in the North Central Conference while winning their eleventh game in a row.

Homecoming fans found the perennial battle slow moving at the outset with the defenses making the big plays. Sioux took the lead in the second quarter as Erroll Mann kicked a 35 yard field goal. Rich Mische provided the Bison margin of victory with a three yard scoring run in the third period to round out the scoring.

Defensive play highlighted the entire battle with linemen throwing opposing ball carriers for many losses. Corey Coblehorn, the Sioux signal caller, was thrown for 40 yards loss. Terry Hanson, Bison quarterback, lost many losses. Corey Colehour, the entire battle with linemen throwing punt and made 12 first downs as compared to 10 for the Sioux.

Passing, obviously UND's, strength, with the back leading passer, Coblehorn in the lineup netted the Sioux 166 yards while the Bison made 160. NDSU's running game, a strong point which previously gained 241 yards per contest, was held to 88 yards, while the Sioux managed a minus 15. Carl Nystrom, the Bison defensive line coach, gave his view on the tight battle, "It took a real fine effort from our team to beat them. They're a strong club with very few points. Our line gave us good play defensively..."

"Our usually strong running team found it harder to run against them than against anyone we've played this season. Lince made it almost impossible to run. They're a good club with a strong defense."

Loose, a defensive halfback, had a big day returning punts and defending against the Sioux's aerial attack. The six foot, pound halfback intercepted the Colerough pass and returned it for 20 yards. Loose's hitting tactics jarr ed the Dakota receivers hands early in the game.

Gebhardt of the UND offense passed it to the Bison's 49 yard line. Gebhardt intercepted two passes and returned them for touchdowns. The Bison victory harkened to 21st in 70 meetings with the state rivals who have won the contests. Saturday's of 11,500 is a new North Dakota record for attendance at little event.

Win in NDSU Match followed by 102, North Dakota State University Bison, 112, followed by the University of North Dakota with 111,112 followed by the University of North Dakota with 111,066.

A strong cross country team from Mankato State College edged Northern State of Aberdeen, 50-66, to win the Bison Invitational Saturday at Edgewood golf course in north Fargo. University of Manitoba runners placed third with 71 points.

Mankato Harriers

A strong cross country team from Mankato State College edged Northern State of Aberdeen, 50-66, to win the Bison Invitational Saturday at Edgewood golf course in north Fargo.

Defensive play highlighted the entire battle with linemen throwing opposing ball carriers for many losses. Corey Coblehorn, the Sioux signal caller, was thrown for 40 yards loss. Terry Hanson, Bison quarterback, lost many losses. Corey Colehour, the entire battle with linemen throwing punt and made 12 first downs as compared to 10 for the Sioux.

Montana State University Bobcats will try to balance their 5-6 record against the North Dakota University Bison Saturday afternoon. The Bobcats are 2-3 this season and have a tough season in 1964. 

The 6’2”, 225-pound Bobcat quarterback, Jerry Terry, is second in the nation in rushing effort against Fresno State with 1,411 yards in 63 carries. Bobcats are anchored by a 340-pound tackle, Cliff Goff and Tom Marinar. Montana State has hosted the Big Sky Conference tackle last season.

Montana State coach Jim Turesson started the season with a 23-0 victory over the North Dakota State University, aided by a 17-6 victory over Concordia College. Injuries have hampered the Bobcat performances since the Wichita contest, but Turesson hopes to have his entire team ready for the Bison.

Bison head coach Darrell Mudra stated, “We expect a real tough game with Montana State. Last season we beat them 7-6 in a close contest. It’s their homecoming and they’ll definitely be up for the game.”

Terry Hanson, the Bison sophomore quarterback, goes into the Montana State game with a 50 per cent record on 35 competitions in 70 attempts for 517 yards and 8 touchdowns. Hanson has had four passes intercepted. Small college scoring leader Ken Rota dropped into second place in the North Central Conference scoring race as University of North Dakota place-kicker Ernst Mann took over with 26 points. Rota, who has scored 24 NFL points, has gained 582 yards in 92 carries for an average of 6 yards per try.

Joe Satrom....

Sioux Era Ended.

New One Started

Twelve years of fame ended Saturday as North Dakota State University Bison football took its place on the story of a 63 Homecoming victory over the University of North Dakota Sioux.

Bison offensive line coach Carl Nystrom termed the victory a break in a psychological block which had held back Bison gridders for the last several years. A 46-21-3 Sioux edge in the series points to the past UND athletic supremacy, but there are few doubts that NDSU can and will pick up victories more frequently in future battles.

Observers who doubt the validity of the Bison victory need only look at the statistics to see that the better team won. Complaints by the opposition were numerous, but the fact that the Bison dominated the third quarter is undeniable. Sioux supporters excused the loss by pointing out the absence of their fine pass catching duo of Ron Green and D. J. Olson.

Sioux coach Mary Hilling voiced disappointment at several calls made by officials in the closely contested battle. Most controversial was a clipping penalty called against the Bison following a Sioux punt. Hilling protested that the Sioux were still on offense, and that the Sioux were entitled to the automatic first down which would have ensued. UND was in a fourth and two situation at the time on their 40 yard line.

Hilling, however, stepped on the field illegally in protesting the call, which would in any case have made the penalties offsetting and caused the entire play to be re-run.

Bison coach Nystrom explained the official’s position. Nystrom stated, “The official made a value judgment at the time of the infraction that the ball had already rolled into the end zone, and at that instant the ball went over to the Bison and was placed on the 20 yard line, putting them on offense at the time of the penalty.”

The official, on this basis, penalized the Bison half the distance to the goal line.

Nystrom voiced his opinion at the field of the time of the penalty that no matter what the official ruled, Hilling should have automatically been penalized for going on the field to argue the call.

The game’s aftermath brought a steady chorus of Sioux complaints that they were cheated by the officials. More to the point, however, is that the hard play by the Bison resulted in what the Sioux called “hard luck.” Perhaps the Sioux have come to take these as a matter of course.

Winning for the Bison coaches was a satisfying experience. In 12 years of play, only 3-9-3 was the record and the Sioux point total had been 96 in 18 games.

Sixth-year coach Darrell Mudra praised the Sioux. Nystrom expressed satisfaction at the ability of the Bison to make the plays for the 63 points. To Green and D. J. Olson.

Perhaps the entire aftermath of the game demonstrates the fact that being a good winner is much easier than being a good loser.

PLANS TO TEACH

Blind Student Overcomes His Handicap

A student must overcome many obstacles during his college days. Jim LeGuire has one of the greater handicaps on campus; he is blind.

LeGuire has had three operations since a case of measles deprived him of his sight, and can now distinguish objects on sunny days and can differentiate between dark and light. He hopes to be able to see one day through the aid of advanced medical treatment.

Although he has not been able to see since he was three, LeGuire finds no large problem in getting around. "Most people are amazed at how I get around," LeGuire said. "After not being able to see for a while, one develops a certain sense which guides him. I can tell where steps, curves and other obstacles are. I can find rooms and my seat in class without help. The only problem I have in getting around is crossing streets."

After graduating, with a degree in social sciences, LeGuire wants to teach. "I don't want to teach in a school for the blind, but in a normal public school in North Dakota."

He said that his life is similar to that of any other student, and to emphasize this he commented that he even enjoys "watching" television.

A key dimension of any job is the responsibility involved. Graduates who join Ford Motor Company find the opportunity to accept responsibility early in their careers. The earlier the better. However, we know the transition from the academic world to the business world requires training. Scholastic achievements must be complemented by a solid understanding of the practical, day-to-day aspects of the business. That is the most direct route to accomplishment.

Stephen Jaeger, of the Ford Division's Milwaukee District Sales Office, is a good example of how it works. His first assignment, in January, 1963, was in the Administrative Department where he had the opportunity to become familiar with procedures and communications between dealerships and the District Office. In four months he moved ahead to the Sales Planning and Analysis Department where he had the opportunity to become familiar with procedures and communications between dealerships and the District Office. In four months he moved ahead to the Sales Planning and Analysis Department as an analyst. He studied dealerships in terms of sales history, market penetration and potentials, and model mix. This information was then incorporated into master plans for the District. In March, 1964, he was promoted to Zone Manager—working directly with 19 dealers as a consultant on all phases of their complex operations. This involves such areas as sales, finance, advertising, customer relations and business management.

Responsible job? You bet it is—especially for a man 25 years old. Over one million dollars in retail sales, annually, are involved in just one dealership

As a growth company in a growth industry, Ford Motor Company offers an exceptionally wide spectrum of job opportunities. The chances are good that openings exist in your field of interest. See our representative when you visit your campus. We are looking for men who want responsibility—and will be ready for it when it comes.

There's a Future for You with Ford Motor Company is:
