President Albrecht Calls Off Classes

On several previous occasions, NDSU student organizations requested that the administration consider granting a holiday, but when academic considerations caused the requests to be denied, students accepted the decisions without complaint.

President Albrecht said that in light of the Bison's undefeated season, and North Central Conference Championships, and a first-place finish in the Associated Press small college rankings and victory in the Pecan Bowl game, a holiday at this time seemed most appropriate. The decision to suspend classes was reached Monday morning at a meeting of the President's Administrative Council.

Catholics Dispensated For Christmas Season

The dispensation of Fridays for the observance of the Tenebrae and vespas vigil which will continue as it has been in the past, however, will still be required to observe the fast and abstinence rules for the vigil of Christmas.

According to Monsignor Allan Nilles, Vicar General of the Fargo Diocese, the decision to grant this dispensation was made by Bishop Leo Dovenschak on December 13.

The Bishop has recently returned from the Ermunical Council in Rome. To the final days of the Council, Pope Paul VI gave the Bishops the go ahead to dispence individually. So it now depends upon each local Bishop, whether or not and almost fell on his way to the head table to receive his award.

Catholics proved to skeptical presence that—as their signs boasted—they were indeed number one.

Noel

The midnight Mass on Christmas Eve was the highlight of an estimated 12,000 spectators, included were several Fargo pizza shops, was given a trophy for being the most loyal Bison supporter; he is honored at the banquet.

Saturday night, tongue-in-cheek, are expected to attend the show. Over 3000 people were expected to attend that day and the own

The warm weather in Abilene was a welcome relief to the Bison players and coaches as well as the 120 fans who made the journey to Texas by car and bus.

In making the announcement, the NDSU president emphasized the students accepted the decisions without complaint.

Institute Publishes Books

by Ann Ludvigson

The leading authority on history of the Red River Valley and surrounding areas is the North Dakota Institute for Regional Studies located in the library of North Dakota State University. The Institute was established in March, 1960 by the librarian North Dakota State University. Studies located in the library of surrounding areas is the North Dakota Institute of the Red River Valley and Arts and Sciences of North Dakota.

Specific aims of the Institute are:
1. To stimulate research into the resources of the northern plains area and the achievements these resources have made possible.
2. To provide location and materials for the research.
3. To encourage artistic expression of life on the plains.
4. To assist in editing, publishing, exhibiting and selling the results of significant scientific, scholarly and artistic works.

All books and pamphlets published by the Institute of Regional Studies issue from the office of Dean Stallings, head librarian. Some of the publications are being sold at NDSU's Varsity Mart, Herbst Department Store and Northern School Supply, Fargo.

New ROTC Program Attracts Cadets

How has the Reserve Officer Training Corps program changed since the mandatory ROTC program was dropped this year?

All first quarter freshmen men are now required to take physical education 111. The advanced Army and Air Force cadets take role and conduct the men out to the Stadium for classes. At the beginning of the second quarter the men can decide to take Air Force training, Army training or more physical education.

Voluntarily, 343 men decided to become Army cadets, according to Capt. George Hall of the Army Department. He notes several reasons for this unexpected large enrollment.

“We have been working to increase the morale of the advanced cadets. Esprit de corps of the upper classmen has increased tremendously,” said Hall.

“By the time this class of freshmen men is seniors, we should have the largest class ever.” We have been going to great lengths in the past years to build a sense of responsibility.

Maj. William Heiser of the Air Force said that 296 freshmen chose to study Air Science. This was also an unexpected high.

Maj. Heiser stated these factors for the enrollments:

“I think that some of the students are not interested in ROTC but have enrolled in it rather than taking Physical education. He, too, said that current world events made the 18 year old think about his obligations.

He said the student went rather quickly in as a commissioned officer than with ROTC. The Air Force program requires four years of extra service and the Army program requires two years.

Catholics Dispensary
(Continued from page 1)

The holiday season.

Father Sherman, drew Saint Paul's Newman Club's attention to the wrong ideas that North Dakota State University students have about the changes in the C.C. Church brought about by Vatican Council.

He commented, “Outside the forms and language, Mass and the sacraments, has been as yet very few that affect the practice of Catholic life.”

Father Sherman cut the rug and conduct the men out to the Stadium for classes. At the beginning of the second quarter the men can decide to take Air Force training, Army training or more physical education.

He, too, said that current world events made the 18 year old think about his obligations.
Plans Made To Procure Art Collection

Works are being made to start making a permanent art collection for the Memorial Union. A permanent art collection has been set.

The committee's goal is to make works representative of different movements of art that are lasting quality. The art will be exhibited in the Union. The committee's goal is to make works representative of different movements of art that are lasting quality. The art will be exhibited in the Union.

Schmidt said the University recognizes the art collection project as worthwhile. Finances for it come from a budgetary request.

Works will be purchased from Rourke gallery exhibitions, an art institute in Minneapolis, and from other exhibitions. Art by North Dakotans will be included, but Schmidt noted that it would not be a North Dakota artists collection.

North Dakota State University will coordinate with the other two area universities, Rourke gallery and the newly formed Red River Valley Art Center. Cooperation with these organizations will make exhibiting and buying art less costly.

Members of the committee are Schmidt; Dr. Catherine Cates, professor of English; James Rourke, representing Moorhead; Thomas Gunckelman, representing Fargo; Leo Johnson, HE 4, of the Student Union Activities Board creative arts committee and Marvin Johnson, AR 4, who was chosen as a representative of the student body by his faculty.

"It will take years to establish a collection of art," Schmidt said. "At an institution of higher learning we have an obligation to the student body to provide them with experiences that aren't ordinarily available to them in the community. One of the ways is to establish a collection."

SUAB Sponsored Christmas Party To Be Held

Free game room privileges, caroling and a fast-moving program highlight the Student Union Activities Board Christmas party. It is slated for Dec. 16 at 8 p.m. in the Ballroom of the Memorial Union.

A Christmas reading, dancing, singing and a skit have been planned.

Following the program in the Ballroom, students are invited to the Alumni Lounge where refreshments will be served. They also will have the opportunity to sing carols around a blazing fireplace.

The children's Christmas party will be held in the Town Hall of the Union during this time allowing the faculty and staff members with families to join in the merriment.

General Electric is an easy place to work.

All you need is brains, imagination, drive and a fairly rugged constitution.

Oh, yes. Something else that will help you at G.E. is an understanding of the kind of world we live in, and the kind of world we will live in.

There's a lot happening: The population is continuing to explode. The strain on resources is becoming alarming. At a time when men are being lured by the mysteries of space, we're faced with the task of making life on earth more livable.

Library Inadequate: More Funds Needed

A library with as many problems as those of North Dakota State University library deserves more consideration. Not from students who realize how inadequate the facilities are, but from the administration, heading adding to the yearly budget.

Figures quoted by H. Dean Stallings, head librarian, showed that last year’s allocation of funds broke down to a per-student average of $0.070 a term. This is less than 116 other two-year and four-year colleges. Many students in technical fields such as chemistry and architecture spend more than $250.00 per quarter on text books. College officials say the university should be able to spend at least a third for library books of what the student does per year for text books.

Spectrum editorials express the unbound periodicals and magazines are in poor condition because the library budget to replace magazines which were unavailable during the war and depression. It should be obvious that unless a sincere effort is made to bring this situation under control, the problems will grow at a progressive rate which will eventually dwarf any possible solution.

The administration is allowed as little as $150 a year to increase their sections of the library. Because this sum is obviously so inadequate, some departments, such as chemistry, have found it necessary to buy books at their own expense.

The service at the library is not good. Here again the reason for failing to provide adequate service is the result of insufficient funds. Students who have busier schedules would save steps for the students and place on Sunday when he received the in- 

Student Involvements Urged; Positive Stands Recommended

Reprinted from RIT Reporter.

"Student involvement" is being practiced on a larger scale than ever before on campuses around the country. Collegians are soliciting and protesting for their rights in practically every field imaginable.

As organized and quasi-organized groups, they are speaking out on everything from their rights to use proflanity to their rights to burn their draft cards. There is some merit, perhaps a great deal of merit, in their actions. There is, however, one disturbing feature concerning the student involvement.

This alarming feature is that the vast majority of student concern and protest is involved in "universitarian" matters. It is against conformity, against administration policy, against current Viet Nam policy. College military draft against almost everything. They are opposed to both major and minor issues and oddly enough they are seldom in favor of anything.

The pattern of student unrest has been a relatively clear one. It began as the small, liberal arts colleges, moved to the larger universities, to the mammoth state universities, and now the movement seems to be manifesting itself in the technical institutions.

RIT, sooner or later, will be involved in the movement, and students will raise their voices on current issues. The voice of a student is, indeed, a loud one; one which will be heard against both state and nation. Not only Berkeley, but other schools as well, have created quite a commotion nationally. The day is not far off when RIT will exert its influence through the voice of its student body.

The Reporter speaks both for itself and the administration when it urges organized student involvement in the issues of the day. But most important, it seems necessary that we and other colleges and universities across the country dispense with the prevailing "negativism" that is becoming synonymous with the college generation.

To be in favor of something is considerably more effective than to be against something. Our editorial staff has a right to demand that the results apply to the whole student body. The results should start picking news of importance and present news of importance and important of more interest to students than who our opponent was. The Spectrum editors have already made copies of the results or that it was even newsworthy. I suggest that in the future, student sentiment of the results or that it was even newsworthy. I suggest that in the future, student sentiment...
Professor Exposes Cheating Student

John M. Jones told his class he had evidence that one of them cheated on a test. "I have quite a bit of experience in this sort of thing and after years have come to the solution that it is best for all if the teacher exposes cheater before his class," he said.

It's a terrible thing to do," continued, "but it makes the单元 involved think twice before doing such a thing again. He is then encouraged to bend, spindle, mutilate, fold, or otherwise mess up the card.

The professor insisted that she be doing such a thing again should illustrate to the rest of the class the futility of trying to get away with a cheat. When the student walks in, he is given an IBM card with a coded number. He is then encouraged to bend, spindle, mutilate, fold, or otherwise mess up the card.

The bitch-in, which started at the University of Colorado, works like this: It is held in an auditorium or another such enclosed meeting place. When the student walks in, he is given an IBM card with a coded number. He is then encouraged to bend, spindle, mutilate, fold, or otherwise mess up the card.

Students speak by the number on the card and each student is allowed to gripe for five minutes on anything he wishes and as loud as he wishes. He can even gripe about other students' gripings.

The object is to find out what students think is wrong with the course, he opened the door and said "good riddance" to her as she hurried out.

Returning to the class, he asked if he had done the wrong thing. Every hand was raised. Then he went outside and brought the accused student in. He told the students they had just witnessed an incident prepared to illustrate how a class can be made to feel shock, surprise, embarrassment, and astonishment.

The students were then asked to write a paragraph on their reactions. In the paragraphs they wrote, most students said they felt the method was cruel and rude. But they also agreed that open exposure would eliminate or reduce cheating.

New Student Trend Develops: The Age Of Bitch-Ins Begins

In the age of teach-ins, sit-ins, walk-ins, kneel-ins and all the other ad-infinitum-ins, a new type of campus mania has developed and is making its way across the country. Now we have the bitch-in.

The bitch-in, which started at the University of Colorado, works like this: It is held in an auditorium or another such enclosed meeting place. When the student walks in, he is given an IBM card with a coded number. He is then encouraged to bend, spindle, mutilate, fold, or otherwise mess up the card.

Students speak by the number on the card and each student is allowed to gripe for five minutes on anything he wishes and as loud as he wishes. He can even gripe about other students' gripings.

The object is to find out what students think is wrong with the course, he opened the door and said "good riddance" to her as she hurried out.

Returning to the class, he asked if he had done the wrong thing. Every hand was raised. Then he went outside and brought the accused student in. He told the students they had just witnessed an incident prepared to illustrate how a class can be made to feel shock, surprise, embarrassment, and astonishment.

The students were then asked to write a paragraph on their reactions. In the paragraphs they wrote, most students said they felt the method was cruel and rude. But they also agreed that open exposure would eliminate or reduce cheating.

Students Helped At Counseling Center

Several tests are available to students. The NDSU Placement Test Battery is given to students in order to place them in courses corresponding to their ability. The results of these tests are given to advisers who plan appropriate programs of study for the student.

The American College Testing Battery, a placement test given to all freshmen students, was administered to approximately 1,050 students last year.

The general tests of educational development can be taken by persons seeking a high school equivalency certificate from the North Dakota Department of Public Instruction. Any student wishing to take one of these tests may meet with one of the counselors and schedule an appointment by telephone or by going to the counseling center.

Dr. Nelson stated, "All inquiries are strictly confidential. No questions are asked of a student when an appointment is made and each student is viewed individually."

The NDSU Counseling Staff includes Dr. David J. Boshier, assistant director; Dr. Verne L. Winger, director; and Mr. Lee H. Bresson and Mr. Lee K. Winger, counselors.

Address to: Counseling and Testing Center, NDSU, Fargo, North Dakota 58105. For more information on how to take these tests, see the NDSU Counseling Center information brochures or consult the campus map to find the Counseling Center located in the Administration building at North Dakota State University. The average weekly load of the center was approximately 30 students.

According to Dr. La Verne Nelson, assistant director of the Counseling and Testing Center, "the function of the center is to help students adjust to life at the University."

He added that the counseling service not only helps students with personal problems but also helps them to choose their vocations.

During the 1964-65 academic year, 443 men and 118 women used the services of the counseling center located in the Administration building at North Dakota State University. The average weekly load of the center was approximately 30 students.

We set out to ruin some ball bearings and failed successfully

The Bell System has many small, automatic telephone offices around the country. The equipment in them could operate unattended for ten years or so, but for a problem.

The many electric motors in those offices needed lubrication at least once a year. Heat from the motors dried up the bearing oils, thus entailing costly annual maintenance.

To stamp out this problem, many tests were conducted at Bell Telephone Laboratories. Lubricant engineer George H. Kitchen decided to do a basic experiment that would provide a motor with the worst possible conditions. He deliberately set out to ruin some ball bearings by smearing them with an icky gunk called molybdenum disulfide (MoS₂).

Swock! This solid lubricant, used a certain way, actually increased the life expectancy of the ball bearings by a factor of ten! Now the motors can run for at least a decade without lubrication.

We've learned from our "failures." Our aim: investigate everything.

The only experiment that can really be said to "fail" is the one that is never tried.
Basketball Team Splits On Road Trip

Cagers from North Dakota State University evened their season record at 2-2 with a split in two games at Milwaukee. The Bison basketball squad dropped a 79-62 game to Marquette University Tuesday night but beat the University of Wisconsin-Milwaukee (Milwaukee) the following night 83-73.

Coach Doug Cowman's Bison cagers hit a cold 32 per cent against Marquette making 24 of 75 shots from the field, Marquette hit on 41.5 per cent of their shots. The Bison fouled 30 times in the contest, accounting for 23 of Marquette's points. MU had 21 personal fouls.

Mechanical errors hampered both teams. Marquette forfeited the ball 30 times on miscues and the Bison lost it 28 times. NDSU had a slight edge in rebounds with 62 grabs compared to 57 for Marquette.

Bob Maier, the Bison 6'4" forward, led Bison scoring with 13 points, followed by Ron Schleiman and Gerry Suman with 12 and 10 respectively. Bob Wolf led scoring for Marquette with 32 points.

Wednesday evening, reserve forward Lowell Cook led the Bison to a victory over UMW with a 21 point performance.

Bob Maier hit on 64% of the field goals for his highest point output this season. UMW mainstay, man-aged 23 points against the Bison. The Bison shot 56.7 per cent from the field but were out-rebounded by the UMW squad who recovered 41 rebounds. The Bison grabbed 34 rebounds.

Coach Cowman praised Maier's defensive work on Reed who last year put on a one man show when UMW played the Bison in Fargo. Reed scored 22 points in the final 10 minutes and finished with 36 points for the night.

The Bison open North Central Conference play this weekend with two games scheduled at the Fieldhouse. Friday night the Bison meet State College of Iowa Panthers and Saturday evening the Augustana College Vikings play here. SCL with 67° all conference center Craig Kneau returning, is a strong favorite to give the University of North Dakota competition for the NCC title.

Inttramural Program Starts Pocket Billiards; Thirteen Teams Entered In Season's Actions

Pocket billiards, intramural program's newest sport, opened regular season play last week with 13 teams participating in two brackets. Director Erv Kaiser initiated pocket billiards as an IM sport last season.

Richard Catullo, games area director of the Memorial Union, supervises the sport which is housed in the games area of the Memorial Union. A billiards game includes one single and one doubles match.

The billiards brackets are

TUESDAY BRACKET:
1. Alpha Gamma Rho
2. Sigma Alpha Epsilon
3. Theta Chi
4. Kappa Psi
5. Sigma Delta Chi
6. Pi Kappa Phi
7. Rushing, is a strong favorite to give the University of North Dakota competition for the NCC title.

WEDNESDAY BRACKET:
1. Values Alpha Epsilon Pi
2. Delta Sigma Phi
3. Wins Alpha Kappa Epsilon
4. Kappa Psi
5. Eta Kappa Xi

The IM ping pong brackets are

TUESDAY BRACKET:
1. Alpha Gamma Rho
2. Sigma Alpha Epsilon
3. Theta Chi
4. Kappa Psi
5. Sigma Delta Chi
6. Pi Kappa Phi

## Bison Optimistic For Next Season

Bison coaches, almost before they caught their breath over Saturday's Pecan Bowl victory, expressed optimism for a repeat performance in 1966. This is a tribute to the football power Darrell Mudra has built at North Dakota State University and could well be realized by next season's gridiron.

Mudra, and his coaches Ron Erhardt, Ruie Nystrom, Walt Weaver and Dick Koppenhaver have built a nucleus and a freshmen squad that could fill the gap left by the seniors. Koppenhaver, a new grid coach this year, did an admirable job as freshmen coach and handled the University's offensive attack that was thought to be the Bison's weak spot. Koppenhaver built a backfield that averaged a score of 31.8 points per game.

Koppenhaver, in a pre-season interview, called his corps of freshmen, "Perhaps the best freshman squad ever assembled at NDSU. With this in mind it would be easy to assume that the Bison are capable of another good you. Linebacking is the only serious Bison loss, although the fullback position will suffer without Rich Mische.

Ardell Weigandt, John Neuman, Ron Hanson, Jim Schindler and Gene Gebhardt will be lost through graduation. Gebhardt played middle guard which is sometimes referred to as the fourth linebacker spot. Although no real fillers for the spots these Bison stalwarts vacated seem evident, this year's freshman team had a number of fine linebackers. This situation is similar to last year's backfield worries.

After last fall's Mineral Bowl performance the Bison were rated only third in pre-season North Central Conference predictions because of the loss of offensive backfield personnel. By the spring drills the Bison coaches had a number of backs in competition for the backfield positions. Ken Rota and Vance Connor got the nod to start and carried the bulk of the rushing load throughout the season.

If the Bison coaches can come up with replacements at linebacker who are as quickly develop as the seniors in the running backs of this year's team the Bison will be on their way to a repeat season of victories. At middle guard, the Bison have Dennis Monack, a sophomore who Coach Erhardt has called the "most equipped player on the team for his particular position." Monack and a few other freshmen could fill the linebacker spots.

Texans were quick to agree that the Bison had a good chance of another performance at the Pecan Bowl next year. Speculators from the host city readily agreed that few teams they had witnessed were quicker or more aggressive. The Bison gridiron seemed to reach a soft spot in the heart of the Texans with their pride and mannerisms, though they were definitely smaller and an underdog in the contest.

While you are here, why not fill up with Apco Super Auto blend gasoline and save 2c per gallon.
Three Programs Available

Financial Aids Center Helps Students

Three major programs of financial assistance are available to North Dakota State University students through the Financial Aid Office. These programs are loans, work-study programs and scholarships.

Each year over $500,000 is loaned to financially needy students. Most of these loans are issued under the National Defense Student Loan Program. The institution operating on this plan must contribute funds amounting to 10 per cent of the money available for loans.

Most loan applications are received in May and processed during the summer. There is no deadline for applications. Wayne K. Tesmer, director of the Financial Aid Office, stated that applications are considered as long as funds are available.

He emphasized that loan funds are virtually exhausted for the remainder of the 1965-66 academic year.

The Federal College Work-Study Program was introduced on the NDSU campus last March. It calls for the same fund matching policy as the National Defense Student Loan Program.

Until a recent change in qualifications for applicants, few NDSU students were eligible for this program. Previously opportunities for part-time jobs were limited to students from low income families. Under the Higher Education Act of 1965 the criterion of eligibility has been changed to permit employment of any student demonstrating need for assistance.

The work-study program required the University to establish new part-time jobs. Many of these jobs remain unfilled. Tesmer predicted that many more would become available as more money is obtained for the program.

The Financial Aid Office makes a definite effort to place students on these jobs related to their fields of study. Tesmer indicated that this will become more difficult as new jobs are created.

The Higher Education Act of 1965 will also provide grants from $200 to $800 for exception­.

ables commercial lending institutions to make loans to students with confidence, because it guarantees the payment of the interest.

The third plan for financial assistance available at NDSU is scholarships. Most of the schol­
