Half department

Biochemists going to moorhead

By Jim Glynn

The biochemistry staff will be reduced by half this summer when the report of two of the department's professors go into effect.

Dr. Fathi Salama, assistant professor, resigned during the fall quarter effective Aug. 31, 1966, and Dr. Dewey Brummond, associate professor, resigned winter quarter effective June 30, 1966.

Both professors plan to join the staff of Moorhead State College.

This will reduce the department staff to the Chairman, Dr. Harold Koslerman, who commented, "We have no replacements as yet, and the replacement job will not be simple."

And Dr. Roger Moeller, associate professor who had considered resigning this month. His only explanation of his future was that he would still be here next fall, nothing more.

Both resigning professors said that they thought highly of NDSU.

Dr. Brummond, who has been on the staff for one year, said that he did not care to comment further. He considers it unprofessional to express departmental dissatisfaction in the press.

Dr. Salama, who has been on the staff for three years, said that he found the administrative structure of the department difficult to work with. He believes that part of the problem is due to the position of the department.

The biochemistry department is administratively under the College of Agriculture. Yet, it is located in the third floor of the new chemistry building and they teach primarily chemistry courses and chemistry students.

The staff of six teaching salaries arises through the College of Agriculture, which makes up about one third of their total individual salaries. The remaining two teaching associates come from the Agriculture Experiment Station for research.

Tenure and advancement in rank comes from the College of Agriculture.

Approval of research projects goes through the department head and Experiment Station.

The departments of Botany and Agricultural Engineering operate under a somewhat similar division.

Chairman Koslerman explained that the department difficulty began last spring when the value of certain research work was questioned.

A counter-question was raised as to the ability of people on campus to judge the value of research projects.

Chairman Koslerman stated that the experimental fi-nance method makes evaluation on campus unnecessary.

He explained that an approved research report must account for each dollar of Experiment Station money spent. Also, promotions and tenure depend particularly on research reports.

He also explained that the alternative to the Experiment Station system would be entire reliance on grant funds which would present new problems.

Concluding, Dr. Koslerman remarked, "If you like the set-up you'll be happy, if you don't like it you won't be happy."

State board member says education pays, not costs

In following up this statement Conrad used statistics compiled by the Chase Manhattan Bank which revealed that for every dollar spent on higher education four dollars are earned.

Conrad's speech pointed out present problems confronting North Dakota's higher education system and also included an annual economic problem.

He stated, "Last year the state planning committee had to turn back federal funds for building higher educational facilities because no state funds were available."

He estimated that this year $673,000 will go unused because of lacking matching funds.

As a future problem he pointed to the increased enrollment, "Tuition enrollment in the past five years has almost doubled every six years. It used to double every twenty years."

Conrad is a past president of the state board of higher education and is presently the president of the state planning committee on higher education.

He explained that the state board is planning a master plan of certain research work was questioned.

He explained that the state board is planning a master plan which will outline higher education activities in the coming years.
Congratulations

MISS JOYCE NELSON

North Dakota State University

North Dakota College Queen

Congratulations Joyce. The results are in and you've just won the statewide competition for the right to represent North Dakota in the National College Queen Pageant.

We're proud of you . . . and we wish you the best of luck at the National Finals in New York City next month.

We're also proud to be one of the Sponsors of the Contest and have the opportunity of offering—as first prize to this year's winner—a new 1967 PLYMOUTH SPORTS FURY CONVERTIBLE.

Your Local Plymouth Dealer.

Efforts of early graduate built entrance

By Ben H. Barrett, guest writer

Of the many thousands of people who have passed through the main gates of North Dakota State University, perhaps but few have stopped to study them. But a few have admired them, a few have even criticized them as symbolic of a prison entrance and some have characterized them as so much scrap iron.

Perhaps one in a thousand has realized that the gates have stood there for more than half a century, that they were the product of young minds, that they were conceived in the imagination of a young man who wanted to show his appreciation in a way that would be long remembered and who little realized in just how few short years he would be just a memory. "We regret to inform you."

The graduating class of 1912 consisted of 22 young men and women, a fairly sizable number in those days, a scarcely noticeable number now. As was the custom of the times, there was a Senior Class play. When the smoke had cleared away, there was a sum of 40 dollars left after expenses.

Forty dollars even then was not much to become excited about. However, something had to be done with it. One of the class members, Mark Heller, proposed that it be used towards construction of a suitable entrance to the college grounds.

Mark Heller had joined the class at the beginning of its sophomore year. He came out of Wisconsin, possibly because he had a brother who was a practical dentist in Fargo or possibly because of his great interest in chemistry to which he devoted much time. He was small of stature but tough and wiry. He was a speedy runner as was evident when he took part in interclass contests. No doubt, he would have made a mark in athletics but for his greater interest in chemistry and an intense desire to earn his own way. He did teach a gymnasium class at the downtown YMCA.

In the spring of 1911 he learned that Concordia College was looking for an athletic coach, so he made an application and was given an appointment for an interview. Being on a very close schedule as he always was, he found he couldn't make the appointment by street car.

Automobiles were few and far between, but my father had a team of horses, so Heller asked me to take him over to Moorhead for the interview. I hitched the brown mare to the buggy for the rapid transportation needed. He was hired as coach, which position, I believe, he held until graduation.

After graduation, I lost track of Heller for a time. It was during World War I that I learned that while serving as a Captain in the U. S. Infantry, he had lost his life in an attempt to save one of his men lying wounded on No Man's Land. Knowing him as I had, I could readily vision his grim determination in that last supreme effort.

To the Editor:

I should like to rise to the defense of our beleaguered administration! In your editorial of May 4 you take our administration to task for overemphasis on football and undergraduism. The College of Arts and Sciences and the Library is this reflect- ing the opinions expressed by several staff members who are resigning and whose story was only opaqued quietly on your front page of the same issue.

As for the College of Arts and Sciences: I have been, but as for the Library, I am a member of the Faculty Committee and can speak with at least some authority.

There is only so much that an administrator at the top level can do, given a faculty and administration under him. I personally am convinced that there is much more money available to the Library if it were to be used in the most profitable way possible.

At 1 I quite am that the president and vice president are perfectly aware of the problems with regard to the Library and are eager to improve the situation as soon as possible.

In my two years of service on the faculty, I have not had anyone else as a chair of my committee and my fellow committee members have been continuously frus-

Professor defends library and football

trated and I am eager to improve the budget and services of the Library. This is in spite of the fact that we have an administra-

tion willing to back us.

With respect to a football situation, I take cue from Dr. John Harris at Michigan State University. When he took the reins of the organization in the early 50's he made it his mission to develop the Nation's number one library and this has been a great international attraction which must have been a source of pride to the people of the world. Therefore, I would also like to see the Library and the Library is that necessary a strong athletic program is to be desired. It becomes more and more necessary for libraries to maintain a strong academic atmosphere. Therefore, in order to improve the Library, it will unquestionably help us.

Robert M. Pitch

Professor of Chemistry

Apathy is inadmissible to campus activities

The academic year has nearly run its course. Talk of leisure vacations in Europe, New York and at home on the farm has begun to replace draft dodging, processing, and the paperwork that keeps us all busy inside. Class attendance drops as the restless students seek the occasional ray and the far more frequent ales at the park or at some secluded spot in the country. The summer pace is weak, and apathy prevails.

The groups who usually do nothing decided that this course was the most fitting one to accomplish nothing. A number of those who sometimes took action decide procrastination was a better idea. Student complicity infected their elders and many instructors and administrators began to leave their daily problems for someone else to worry about next year, while they moved away.

Apathy is hindrance to progress. It takes courage, we tend to blame our faculty as a whole and not by a repre-

sentative or two on the Faculty Affairs Committee and can speak with at least some authority.

Many of the problems we face are complex and cannot be solved immediately. The current budget situation is not the only one that is in the minds of our students. The future of our institution is the very reason for the existence of the College of Arts and Sciences.

It is incomprehensible that with the wealth of talent and the resources available to our institution, we cannot be competitive in the academic world. How can we justify the difference of funds available to our University and that of the finest institutions in the country.

I sincerely hope that it is not going to be taken for granted that the Senate, this Faculty, and the students will feel secure in their jobs.

I wonder who could judge when a teacher has crossed the limits of his area of competency.

We already are afraid to give our opinions to others. I think that the most important change that the administration can do is to make NDSU "free academic community".

SPEECH QUARTER

University regulations come under attack when they force skiers to give up their dreams of a club. The Spectrum crucifies for refreshments, students, and the administration for nothing again.

The Union displays a semi-nude painting and the administration makes up campus on campus. It is removed when a critic slams it.

The football board, is held at a student-staff meeting. A second attempt is scheduled. The attendance is up ten-fold. Pierre Salinger attracts 30 people. Apathy has registered another victory.

The groups who usually do nothing decided that this course was the most fitting one to accomplish nothing. A number of those who sometimes took action decide procrastination was a better idea. Student complicity infected their elders and many instructors and administrators began to leave their daily problems for someone else to worry about next year, while they moved away.

FALL QUARTER

A record number of new students came to campus for fall quarter as enrollment surges past the 5,000 mark. Freshmen are greeted by discussions on a dull novel by Camus, "The Plague," which most of them had not bothered to read.

In contrast, Max Lerner addresses the students with a stimulating lecture discussing world problems in this the "Age of Overkill." The English and Science students are greeted by the news of a cut in the number of credits needed to graduate. Plans are laid for the construc-

tion of two high-rise dorms.

The question of the constitutionality of new fees is raised. More parking lots are paved but a student disappears into the mud behind Minor.

Plans are announced for the undefeated football team to meet Grambling College in the Pecan Bowl. President Albrecht suspends the students for a day. Hopes that they will be completed by next fall fade as winter sets in.

SPRING QUARTER

University regulations come under attack when they force skiers to give up their dreams of a club. The Spectrum crucifies for refreshments, students, and the administration for nothing again.

LATE NEWS

Sharivar chairman states position

To the editor:

It is the right of an editorial staff to criticize; however, with this right comes the responsibility of knowing the facts.

This year there was not a high school day during Sharivar! High school students were invited to attend the University on any of the three days of Sharivar. If parents did not see the "total University" on Parent's Day, the Sharivar committees are not responsible. If a parent attended all the events planned for him throughout the day, he still had time left to see the campus. I resent the implication that a parent attending classes, eating at the Food Service Center, and attending the convocation would not see the University.

There are no facts available as to the long range effect of Sharivar on the viewers; however, many Sharivar visitors write to the campus after their visit telling of the favorable impressions they received during Sharivar. Although some students, faculty members and administrators criticize Sharivar, many more people in these three groups do all in their power to promote Sharivar and I do not think they consider it "a pain".

I agree that Sharivar, like all organizations, needs some re-vamping. Every year some changes are made in the structure and planning of Sharivar with the hope that it will be bigger and better and please more people. Who knows—maybe some year they can even please the Spectrum editorial staff!

FOR DOUBLE-RING CEREMONIES

Here brides and grooms have created more than 50 million rings. Likely, they will create yours.

ArtCarved®

FOR DOUBLE-RING CEREMONIES

As you contemplate one of the most important decisions you have yet had to make, we suggest you consider joining us at Pratt & Whitney Aircraft. Like most everyone else, we offer all of the usual "fringe" benefits, including our Corporation-financed Graduate Education Program. But, far more important to you and your future, is the wide-open opportunity for professional growth with a company that enjoys an enviable record of achievement and stability. You will be working on challenging new problems of propulsion.

And make no mistake about it...you'll get a solid feeling of satisfaction from your contribution to our nation's economic growth and to its national defense as well.

Your degree can be a BS, MS or PhD in:

- Mechanical
- Aeronautical
- Electrical
- Chemical Engineering
- Physics
- Chemistry
- Metallurgy
- Ceramics
- Mathematics
- Engineering Science or Applied Mechanics.

For more specific information (and immediate action) concerning a career with Pratt & Whitney Aircraft, write today (or use coupon) to Mr. William L. Stoner, Engineer­ ing Building 1-A, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

Sororities honor high scholars

A scholarship recognition service was held May 9 at North Dakota State University. This event is sponsored each year by the Panhellenic Council to honor sorority women who have high academic averages.

To start the program all those present recited the Panhellenic Creed. Each sorority sang one song in response to roll call.

A scholarship bracelet was awarded to the cord with the high scholastic average in each of the sororities. Those who received the awards are as follows: Sheryl Qualey, HE 4 - Alpha Gamma Delta; Barbara Ronningen, HE 2 - Gamma Phi Beta; Kristine Callenbach, AS 3 - Kappa Alpha Theta; Gail Nursuen, PH 1 - Kappa Delta; Karen Dietrich, AS 4 - Kappa Gamma; and Pauline Rasmussen, AS 4 - Phi Mu.

The Gamma Phi Beta sorority had the plaque previously.

A bracelet was also presented to Carmen Johnson, HE 3, for being the woman independent student with the highest average at the University. She has had a 4.00 average for fall and winter quarters.

LaRitta Johnson, HE 1, received the Matilda B. Thompson Scholarship.

Mrs. Loren Hendrickson, Grand Forks, spoke on scholarship and sorority membership. She emphasized the importance of education for women. Mrs. Hendrickson is the Kappa Alpha Theta district president.

Jennifer Roden, AS 3, was the presiding officer. She is the new president of the Panhellenic Council for 1966-67. The other new officers are James Cresey, HE 3, secretary, and Marilyn Mathison, AS 3, treasurer. Mrs. Betty Salter, dean of women, is the advisor.

The Danny-Paul Trio provided the entertainment. The trio is composed of three Sigma Alpha Epsilon fraternity members.
I d when a representative from school year. The Bison won SU during the 1965-66 year. Students from NDSU will partake in the US policy in Viet Nam marches were products through SUAB. It is the one with the big red roof.

Who is your ideal date? Thousands use Central Control and its high-speed computer for a live, flesh-and-blood answer to this question.

Your ideal date - such a person exists, of course. But how do you get acquainted? Our Central Control computer processes 10,000 names an hour. How long would it take you to meet and form an opinion of that many people?

You will be matched with five ideally suited persons as perfectly matched with you in interests, outlook and background as computer science makes possible. Each of the five will be completely localized. Hundreds of thousands of vigorous and alert subscribers, all sharing the desire to meet their ideal dates, have found computer dating to be exciting and highly acceptable. All five of your ideal dates will be delightful. So hurry and send your $3.00 for your questionnaire.

Coed enters peace corps

Florence Bernard, HE 4, will learn a new way of life in the Dominican Republic when she joins the Peace Corps after graduation.

Miss Bernard said her training in the Peace Corps will begin on July 6 at the University of Los Angeles. She will learn Spanish, history, and sociology of the Dominican Republic as well as United States history and civics.

After training at the university, she said she will spend ten days at home and then will go to Puerto Rico for a period of intensive physical training.

She will work in a community development program with 11 other volunteers, all with different skills. They will observe and study the needs of the people and then begin work.

The salary they receive is equal to that of a middle class person in the United States. Of their salary, $75 is kept in the States and given to them at the end of the period. All medical, travel and clothing expenses are paid for before they leave. Volunteers may also receive financial help for advanced schooling upon returning to the States, Miss Bernard explained.

Miss Bernard will be in the Dominican Republic for two years. During that time she will get 60 days vacation. Peace Corps workers are encouraged to take at least 20 days their first year and travel in the country. This is another means of learning more about the people there.

"This is no sudden decision," Miss Bernard said. Her interest began about six years ago when she gave a speech on the Peace Corps for 4-H. She said, "I must have talked myself into it."

There has been enough idle talk about these faults, she said, but it is the duty of teachers to point out faults in society then, causing students to become dissatisfied, hoping that these students will take corrective action in the future."

Responsibility, engagement and meaning were the last three points emphasized by Dr. Barnes. "We all have to learn how to accept responsibility, we all have to learn to commit ourselves to worthwhile objectives and we all have to ask ourselves 'What gives meaning to my life,' in order to become worthy adult citizens," he stated.

In his closing statements, Dr. Barnes said, "If Greeks, as individuals and as a group consider these points; curiosity, awareness, independence, dissatisfaction, responsibility, engagement and meaning—the Greek system will undoubtedly survive and grow."
New officers elected

Rajah Club president Lynn Ferrin announced that the Rajahs will elect a mascot tonight at 6:30 in the Memorial Union for the 1966-67 season. The mascot will receive $50 for traveling expenses.

The newly elected mascot will be allowed to take the Bison suit home over the summer to practice in it.

All interested persons should stop at the information desk in the Memorial Union to find out where the election will be held.

The newly elected Rajah officers are: Lynn Ferrin, president; Dean Kelsch, vice president; Lionel Estenson, secretary; Chuck Nelson, treasurer and Carlton Thygesen, social chairman.

The following order: SAE and YMCA and the Wesley Foundation with 8 each, Theta Chi, Kappa Psi and TKE with 4 each, ATO and the Newman Club 1, and SPD and Reed Hall with .

The intramural track team will be held today at Dacotah Field at 4:30. Some field events can be run earlier to save time so competitors who are entered in field events may go up earlier and enter.
McCowell was the meet winner after a fine second place finish in the NCC last year, the Bison are composed of MacLaren, Dave McDowell, Russ Wallin, and Dave Lokken, who finished in a three-way tie for first place in the pole vault.

This Friday and Saturday the Bison will compete in the North Central Conference track and field meet at Sioux Falls, South Dakota.

The Bison track team grabbed the top place at the Bemidji State track meet next week. The Bison football team had it’s greatest season ever, achieving a number one ranking nationally for small colleges. Bison football should again be a bright light on the NDSU campus next year. The team will feel the loss of eight seniors but replacements from this year’s freshman team can be found. If the Bison can get off to a good start and sustain it through the season, the Bison should receive another high ranking nationally.

National observers will be watching early performances closely and if the Bison can off their season batting average currently below .200. Next year’s team will lose eight seniors and if replacements cannot be found, the prospects for improvement appear rather dim.

With the loss of two of the top four point getters on this year’s track team, Bison football should again be a bright light on the NDSU campus next year. The team will feel the loss of eight seniors but replacements from this year’s freshman team can be found. If the Bison can off to a good start and sustain it through the season, the Bison should receive another high ranking nationally.

The Bison basketball team is currently in the league cellar. Bison pitching has been the strongest point of this year’s team but the hitting has been the disappointment with the team batting average currently below .200. Next year’s team will lose eight seniors and if replacements cannot be found, the prospects for improvement appear rather dim.

With good years from the regulars and help from the freshmen the Bison should finish no worse than second or third in a race which looks to be one of the closest ever. Defending champ UND will probably repeat as champs but look for the Bison as a definite darkhorse.

Coach Bucky Maughn’s wrestling crew should enjoy a better season next year with the help from some fine wrestlers who were on the freshman team this year. The loss of consistent, winning captain Joe McCormick will be felt but if his spot and the remaining classes can be filled adequately, the Bison wrestling team should be in contention for first place laurels in next year’s conference tournament.

After a fine second place finish in the NCC last year, the Bison baseball team is currently in the league cellar. Bison pitching has been the strongest point of this year’s team but the hitting has been the disappointment with the team batting average currently below .200. Next year’s team will lose eight seniors and if replacements cannot be found, the prospects for improvement appear rather dim.

The loss of consistent, winning captain Joe McCormick will be felt but if his spot and the remaining classes can be filled adequately, the Bison wrestling team should be in contention for first place laurels in next year’s conference tournament.

After a fine second place finish in the NCC last year, the Bison baseball team is currently in the league cellar. Bison pitching has been the strongest point of this year’s team but the hitting has been the disappointment with the team batting average currently below .200. Next year’s team will lose eight seniors and if replacements cannot be found, the prospects for improvement appear rather dim.

With the loss of two of the top four point getters on this year’s track team, Bison football should again be a bright light on the NDSU campus next year. The team will feel the loss of eight seniors but replacements from this year’s freshman team can be found. If the Bison can off to a good start and sustain it through the season, the Bison should receive another high ranking nationally.

The Bison should finish no worse than second or third in a race which looks to be one of the closest ever. Defending champ UND will probably repeat as champs but look for the Bison as a definite darkhorse.

Coach Bucky Maughn’s wrestling crew should enjoy a better season next year with the help from some fine wrestlers who were on the freshman team this year. The loss of consistent, winning captain Joe McCormick will be felt but if his spot and the remaining classes can be filled adequately, the Bison wrestling team should be in contention for first place laurels in next year’s conference tournament.

Hiring instructors is "a simple process"

"Hiring a college instructor is actually a very simple process," stated Frank C. Mirgain, dean of engineering and architecture. Interested persons are contacted by either the head of the department or by the dean of the particular college. His credentials are reviewed by the department head, the dean of the college, the University president, and finally by the State Board of Higher Education, which does the actual hiring," Mirgain added.

"Seeking out new faculty members is a continual process," commented Home Economics dean, Caroline Budewig. "During the entire year we make contacts with members of our profession who might be interested in assuming a faculty position at NDSU," she added.

Faculty members, not previously mentioned, who have resigned and will require replacement are Harold D. Hickel, department of horticulture; Dr. R. L. Bryant, department of poultry science; Arthur W. Hawn, department of art; Roy W. Cook and Dr. D. Vikor.

department of social and behavioral sciences; and Eldon E. Walk-er, department of speech.

Resignations of faculty members result from a variety of reasons, most prominent of which, are graduate work opportunities, retirement, family ties, advancement in teaching and research positions and higher salaries at other institutions.

Commenting on faculty resignations, Dean of Chemistry and Physics James Sugihara replied, "A certain amount of faculty turnover is healthy for the University and particularly for the student. Students might be able to grasp more knowledge, simply because a different personality is presenting the lecture."

Banquet honors two retiring arts and science professors

Miss Jessie Phillips, professor of English, and Rudolph Otterson, professor of history, were honored at a banquet Thursday evening May 13 which was attended by over a hundred faculty members and friends.

Leonard Sackett, associate professor of English and long time friend of Miss Phillips, delivered a personal tribute to Miss Phillips and commented on her contributions to the University, Following the speech, Seth Russell, dean of the College of Arts and Sciences, presented Miss Phillips with a painting by Charles Beck as a gift from the group.

Dr. Eugene Pettee, professor of economics, read a poem which he had written in commendation of Prof. Otterson. He was given a pair of binoculars which were purchased by his family and friends.

Prof. Otterson commented that he plans to spend much of his time at his lake cottage which he purchased by his family and friends.
