Universities Get Tallest Tower

by James V. Glyn

Title to the tallest man-made structure in the world was formally transferred to the North Dakota Board of Higher Education last Thursday night.

The structure is the KTHI-TV broadcasting tower, 2,069 feet high. This was the final step toward the proposed joint television programming originating from North Dakota State University and the University of North Dakota.

For more than three years committees of the two universities have worked to set up the joint television station. They have explored programming and have already worked out applications for a license and federal grant.

Word is that the Grant planning transmitting equipment is expected by Jan. 1, 1967, from the United States Health, Education and Welfare Department.

The proposed station, channel two, would presently cover a geographical area roughly the same as KTHI-TV's present coverage.

According to C. H. Logan, director of education broadcasting at NDSU, about 46 per cent of North Dakota's population would be served, as well as residents of northwestern Minnesota. Radius of the area is approximately 85 miles.

Logan continued, "With the granting to the Universites of channel two and the height of the antenna, there could be no other television station with any more potential power than this one."

In television the lower the channel number, the higher the potential signal power. As channel one is reserved for the military, channel two is the most powerful channel available to civilian broadcasters.

ETV is projected to develop in operation on a state wide basis, according to Logan.

J ohn Penn, chairman of the UMD speech department, said that programming initiated from the two campuses might begin as early as the fall of 1967.

University radio station KUMD will be used as a pilot project for the development of this new medium, according to Logan.

Books And Other Items Stolen At Record Pace

"In the last 12 month period the Varsity Mart has lost a conservatively estimated sum of $3000 worth of merchandise to shoplifters," stated Richard A. Kasper, manager of the Varsity Mart.

These thefts, along with the many reports of stolen books and other articles from the food complex, have led me to believe that stealing on campus has reached its peak for at least the nine years that I have been here," Kasper continued.

Laurie Nichols, secretary to food service director Frank Bancroft, reports that in the last two weeks 25 students from Red-Stock and Stockbridge halls have come to her seeking books, brief cases or coats which they discovered missing from the food service center.

Keith Martin, men's residence hall counselor-coordinator stated that "25 is probably a conservative figure seeing that some students do not bother to report their missing articles."

He added that the reasons for the increase in thefts in the last two weeks is "probably because at the end of a quarter students are required to buy new books and supplies for the upcoming quarter and that the cost of this stealing, rather than buying, is more beneficial."

John Radke AS 1, who lost a brief case full of books from the food center, states, "Two days before final exams my books were apparently stolen. Therefore, I had to borrow books from classmates or else not study for final exams."

According to Bancroft the problem is nearly ineradicable for the remainder of the year, and he advises students to leave their books in their rooms while using food service facilities.

"However, next year," he adds, "the cloak rooms will be converted into efficient check rooms, which will provide considerable security for students' belongings."

A system for intercepting stolen books has been devised in the Varsity Mart. When a student sells a book back to the bookstore, (Continued on Page 12)
There was a mistake in the placement notices this week; one firm was left out. The notice should have read: "Coming to campus this week, head of the largest domestic employer, will address the public. His presence displays the benefits — private jet, business units provided (and they aren't even bankers blue). Easy promotion, chance to travel to exotic foreign lands.

Any male may apply provided he doesn't like to think for himself, likes to do nothing, but is basically hostile and doesn't mind working under retarded junior bosses. Applications accepted at any local draft board or at your friendly neighborhood rotary department."

**New Coeds Get Classified**

The collegiate paper at the University of Illinois recently ran a break-down of the different types of coeds on their campus. Taking this idea, which has never been attempted on this campus before, we ran our own research program and the results proved to be the following:

1. **The Beat** — these chicks are easily recognizable by their dress, usually inside-out sweatshirt, dirty levis and old worn-out tennis shoes. They can be found anywhere except in sorority houses.

2. **The Bored** — Members of this set can be observed sitting in the Union anytime from dawn to dusk. Because of some sort or another complex, they are afraid to appear interested in the world.

3. **The Greek** — this class does not include all girls who are pledges and actives in a sorority. Members of this sect speak so they don't risk pollution via their mouths. They can be found anywhere. They sit there with an eyes straight ahead "I wish I weren't here."

4. **The Activity Jack** — They're usually seen somewhere on the second floor of the Union oblivious to everything except their four thousand or so activities which provides them some sort of thrill.

5. **The Farm Girl** — This brand is normally housed in the Pig Palace. All wenches from an agricultural upbringing are not members of this set, only those who: 1) walk, dress and act as if they were still home on the range; 2) look as if they belong in the stalls or 3) think that east Galilee is the biggest most exciting metropolis in the world and would not live elsewhere.

6. **The six-year-old** — In abundant supply on campus, they dress like eight-year-olds, talk like eight-year-olds and act like eight-year-olds.

7. **The Queens** — This group can easily be confused with the Mortar boards but, for all practical purposes, are one and the same. They can be found representing their school for everything and normally have close ties with their patron saint in Old Main. In the classroom they can not be surpassed for their overall knowledge of the course and equally slow wits. Outside they are lost except when they are studying, which is almost always.

8. **The Bitch** — She is the "cor- dial, but then..." type. Best left alone, members of this set speak only to people whom they feel have prestige enough to speak to them and take any kidding as an insult. They wait for their equal so they don't risk pollution via social association with members of the proletariat.

9. **The Quiet One** — She is amiable enough but just never has anything to say. She can tell you what she did last summer in four words, what she has been doing recently in three and what she thinks of life death and the universe in two.

10. **The Space** — She has plenty to say except none of it is worth listening to. Spaces can be fun in social situations until they open their mouths. Never get stuck with a member of this category in any situation except the type where only a perfunctory hello is all that can be squeezed in.

11. **The Emancipated Women** — These feminine mistique fans are better than any male and let every member of the opposite sex know it whenever they can. They talk too much; they talk about the wrong things; they talk in the wrong way. It would be best for everyone if they were drafted.

12. **The Boy-Girls** — These were the girls encountered during the research who first appeared to be boys but turned out to be girls. They act like boys, they dress like boys, they talk like boys. The only question which they leave unanswered is whether they're homosexual.

13. **The Campus Crusader** — She accosts her fellow females in the halls of any building and gives them her little line, "Hi, has Christ come into your life recently?" If they admit that they haven't seen Him around recently she invites them to meet her for a Coke later where they can talk about the right things; they suffer from some very severe problem and need to be understood.

14. **The Elementary Education Major** — She speaks to everyone as if they were third graders. Life to her is as simple as it is for Dick and Jane.

15. **The Others** — These are girls that don't fit into any of the other categories. They're O.K.
Tom Sawyer Is Season's First Children's Production

Tom Sawyer, the legendary hero of Mark Twain's "The Adventures of Tom Sawyer" is adapted for performance by Charlotte Charpentier, director of the play. The Lit tle Country Theatre presents its first children's play of the season. "The Adventures of Tom Sawyer" is produced by John Lientz and Norman Davidson AS 4.

According to Clive Rosengren, producer of the play, children's musicals have been successful in preceding years and are good "crowd pleasers." The plays, he adds, are enjoyed by both children and adults.

In the play, Tom and his blood brothers witness the murder of Old Joe. The boys then hunt for buried treasure and reveal the hideout of Injun Joe, Larry Remele 3, by Injun Joe, Larry Remele 3. According to Clive Rosengren, producer of the play, children's musicals have been successful in preceding years and are good "crowd pleasers." The plays, he adds, are enjoyed by both children and adults.

The boys then hunt for buried treasure and reveal the hideout of Injun Joe, Larry Remele 3, by Injun Joe, Larry Remele 3. According to Clive Rosengren, producer of the play, children's musicals have been successful in preceding years and are good "crowd pleasers." The plays, he adds, are enjoyed by both children and adults.

Additional characters are portrayed by Rou Salveson AG 3, as Paul, and Pat Ersin AG 3, as shop, by Jim Lientz and Norman Davidson AS 4, as Ben and the Sheriff and Feigum, as Doc and Mr. Thatcher. Performance are scheduled for 4 p.m. December 16, and 4 and 6 p.m. on December 17 and 18. Tickets will be available at the door, $3.50 children and $5.00 adults. Reservations may be made by calling 237-7105.

Do you have any last words?

If after all this time you still don't know what a Uniroyal is, you've been using in 150 countries. But what's wrong with the good old-fashioned name of U.S. Rubber? The answer is--we have neither been cold feet, or exclusively U.S. nor exclusively rubber for a very long time. Just look at some of the exciting non-rubber products we make:

Royales®, a thermoplastic for auto and truck bodies which is not only harder to dent than steel but, if dented, pops back as good as new under heat. Sexy Eski-look® boots for the ladies, and kids® the famous line of soft, colorful family shoes that are as easy to look at as they are to wear. Wet suits for aquanauts. Poly-crest®, our new olefin fiber, that's more stain resistant than any other kind of carpet fiber alive. Alanap®, our new olefin fiber, that's more stain resistant than any other kind of carpet fiber alive. Alanap®, a smart weed killer for weeds that are too smart for other weed killers. SCR®, a synthetic rubber from which we make our Rain Tires™ and Tiger Paw™ that's tougher, safer and longer-lasting than natural rubber.

Now you can see why we had to change our company's trademark--we needed a new trademark to better suit our derring-do. But we're never going to forget our forebear, the U.S. Rubber Company. Never! In fact, some of us here would feel a great deal better in our hearts if our new world trademark read, "Uniroyal, the son of U.S. Rubber."
Letters to the Editor ...

Condemned By Coeds

Campus Compared To Penal Colony

To The Editor:

Your article had enjoyed our dorm life and regarded it as a home — that is, until Wednesday evening when this management program to the local level and particularly to the individual legislators when they leave campus for Christ- mas break. It is conceivable that every North Dakota legislator could be visited by a NDSU student body or adjutant général in their dormitory. In their visit to the legislator, students should make several points. First, the legislator should realize that the Field House is a necessity now and that putting it off another two, four or six years will only raise the cost to $4.5 million or more.

Fieldhouse Ferry has advertised itself. No NDSU stu- dent who is involved in physical education or men's ROTC, intramurals, intercollegiate athletics or other projects occurring in the immediate area from one's dorm must realize the present lack of facilities.

Second, the legislators should be informed that the Field House is not the only building needed and therefore a method by which buildings can be financed and built now is of extreme importance.

While not detracting from the top-priority Field House, legislators should know that all dorms currently in use and those currently un- der construction will be filled and overflowing next year; classrooms are in shortage and married students have fire-trap housing.

Because of the need for a Field House and a number of other buildings across this campus and on other campuses in the state, the problems confronting higher education at NDSU or in North Dakota will be further compounded in the appropriation of money for one building.

North Dakota has gotten behind in construction on its campuses and now needs a funding program which will allow, on a long-term basis, for the state's institutions to catch up on their needs.

Student action is needed now because the problem will grow in magnitude by multiples as the number entering our institutions rise.

JAS

Holiday Dreams Sleep From Editorial Board

It is nearly time to have a merry white Christmas but for many of us this time of year would be much merrier if:

We had not received so many Vs on the new grading system.

We were just returning from Mexico with a beautiful sun burn and Louis Armstrong would come to NDSU.

Custer had beaten the Sioux at the Little Big Horn.

Johnson's Great Society wasn't taking more of our hard-earned money than were the local merchants.

Our home towns weren't so big and exciting that we would have time to relax over vacation.

Our campus hadn't really gotten lost in the yearly postal avalanche.

The new regulations weren't about to get lost in the Old Main regulatory department, was handled with a crisis by impulsion and immured with their representatives. His action is the result of two very striking things: 1) his lack of manners, and 2) the antiquated regulations which he is employed to enforce.

had this incident occurred in a women's penal institution, in which matrons are employed to keep order among the inmates, the action taken by this blackguard is a necessity now and that putting it off another two, four or six years will only raise the cost to $4.5 million or more.

The incident, which was our first encounter with the campus regulatory department, was handled with a crisis by impulsion and immured with their representatives. His action is the result of two very striking things: 1) his lack of manners, and 2) the antiquated regulations which he is employed to enforce.

The second thing that disturbs me is the total waste of money, time and energy for many people.

That means that each student who did not attend lost one day, if he had gone, that cost four or five dollars.

The second thing that disturbs me is the total waste of money, time and energy for many people.

"... Is nine hours off? THAT bad?...

Louie Armstrong

Concert Attendance Is Student Fiasco

To The Editor:

Last Thursday evening a tra- gedy occurred at our University. No buildings were destroyed; no one was mutilated; nevertheless, a tragedy did occur.

What was this tragedy? The fact that only 900 people attend- ed the concert of one of America's foremost musical personalities, Louie Armstrong, is the tragedy.

There are two things which dis- turbed me about this showing. The first is that students fail to take advantage of opportunities which are unique to the University.

Where else except at a univer- sity can a person have one of the best concert shows in the country appearing less than a quarter mile away at a reduced rate with the chance for a front row seat? Some answer — no where! A front row seat at a money-making ven- ture for Louis Armstrong would cost four or five dollars.

Undoubtedly, the logical argu- ment is that Louis Armstrong just isn't that popular with the college crowd. On the contrary, the University of Iowa sold out for "Satchmo" two weeks prior to his concert.

For what it's worth: the 900 who attended here were highly pleased and delighted with the concert. If he weren't a college attraction, Armstrong wouldn't be going around on the college concert circuit.

The second thing that disturbs me is the total waste of money, time and energy for many people. Primarily, all students lost around $4000 because of a lack of in- terest.

That means that each student who did not attend lost one day, if he had gone, that cost four or five dollars.

The second thing that disturbs me is the total waste of money, time and energy for many people. Primarily, all students lost around $4000 because of a lack of in- terest.

To The Editor:

In the Spectrum for December 7, Mr. Tanfield Miller comments that the students were without books for the better part of the Thanksgiving. It is impossible to close the window.

The only solution was to remove the screen.

Shortly after this, we were watching the campus protection (cop) harassing a group of Reed- Johnson students who had em- parted outside outside the main entrance of the campus. After the pro­ tection had completed his dictate, he circled the oval drive and de­ verted his powerful s.p.o.t light directly into our room.

We had been informed that it is a cardinal offense for the screen to be removed from the window. This is the only evident cause for the action taken by the patrolman.

The incident, which was our first encounter with the campus regulatory department, was handled with a crisis by impulsion and immured with their representatives. His action is the result of two very striking things: 1) his lack of manners, and 2) the antiquated regulations which he is employed to enforce.

Had this incident occurred in a women's penal institution, in which matrons are employed to keep order among the inmates, the action taken by this blackguard is a necessity now and that putting it off another two, four or six years will only raise the cost to $4.5 million or more.

Veteran Discusses Military Duty

By The Editor:

"Times have changed" — "This is different" — "I would like to stop but — "I don't want to be killed and I don't want to call." This, and other commentaries, is what have been heard recently from a campus from men who are just to leave the protection of our campus for fear they might be drafted into the service of their country.

Having grown up during the Second World War and served in the Korean conflict, this is a shocking contrast to the thinking of many in my age group. Upon leaving high school during the Korean War, it was more my fear that wouldn't be accepted as one of the boys to serve my country rather than how I might escape this chance to pay in some small way for the opportunities with which we lucky few have been blessed.

It appears to me that too many males view military service only as an imposition on personal life rather than an opportunity to serve their country, a nation, a continent. It is true there aren't a John Glenn, Sgt. York, a chief to the rank of General; and heroes and great leaders are not as good as those who follow.

As President J. F. Kennedy said: "The courage of life is often a less dramatic spectacle than the courage of a fatal moment; but it is no less than a magnificent mixture of triumph and tragedy. As a man does what he must — in spite of personal consequences, in spite of obstacles and dangers and pressures — and that is the basis of all human morality."

In the thousands of years of history man has only once built a nation and society as free and abundant as our United States of America. The things we have will never be fully paid for and in our shrinking modern world this means defining our way of life far beyond our own shores. If most of our men are not willing or able to understand the need for self-sacrifice to perpetuate a democratic society this society will not long endure.

It would make me most proud to know that every young man in this school recognizes his responsibility as a man and an American; by looking at military service as an opportunity to do for himself and his country as much as possible, and willingly gives of himself. As long as most of us feel this way, we have not to fear; but if we have large numbers looking for a way out, looking for an escape, then the job, or thinking only "what is in it for me" then we will become weak both as a nation and a society.

We are supposed to be living in a land that gives rewards more for what we put in than from just what we take out. Just paying taxes and voting is not enough — we must be willing to give of ourselves just as our forefathers did.

We may not always agree with the decisions of our leaders, but in a democracy the majority elects and we all agree to follow at least for the term of election. Just as it isn't fair for a few to pay taxes, it is not fair for only a few to serve in the military.

If however, a person can only view the service in a selfish manner, look at the advantages to be gained for a young male.

1. Training in a skill (even infantry soldiers). Training during free time in anything — all the way to a Ph.D. (free)
2. Travel (besides Viet Nam). Billions of men have traveled to places they never before would have seen otherwise. Travels they may talk about the rest of their lives.
4. A chance to work and live with people from all walks of life.
5. Cultural development.
6. Physical development.
7. Entertainment — theaters, swimming pools, athletic teams, libraries, hobby shops, gym.
8. Time to mature and discover what a person wants out of life.
9. A chance to develop leadership and take direction.
10. Most important a chance to say I've done my share for my country willingly.

If my words should be doubted, approach any male of an older generation and ask "Have you served in the military?" Even those who said they didn't like it will be eager to answer yes, and you will at once sense the pride the vets have to be able to say I did it. I gave of myself to my country!" Note, if you should have a chance any group of men who might be talking over old war stories, then note the individual in the group who did not serve; he will be easy to pick out.

It is true that many of us do not agree with the way in which the war is being handled but regardless, your democratic government? We elected these men, and we can't leave them to go it alone because we don't agree on this point, if a policy needs to be changed we have many ways to get it done without running from our duty.

Let's push to show our strength in unity not our passive weakness in dissunity. As another great man once said, "We have nothing to fear, but fear itself." Anonymous

TRADEHOME

On Campus

(By the author of "Bally Round the Flag, Hoop" "Dodie Gilks," etc.)

'TIS THE SEASON TO BE JOLLY

I know how busy you are—studying, going to class, helping old grads find their dentures after Homecoming—but, hark, the Yuletide is almost upon us and it's time we turned our thoughts to Christmas shopping.

We'll start with the hardest gift problem of all: what to give the man who has everything. Well sir, here are some things I'll bet he doesn't have: 1) A dentist's chair. 2) A Mach number. 3) A street map of Perth, Australia. 4) Fifty pounds of chicken fat. 5) A pack of Personna Super Stainless Steel Blades.

What? you exclaim, your eyebrows leaping in wild incredulity. "The man who has everything doesn't have Personna Super Stainless Steel Blades? What arrant nonsense!" you scoff, making a coarse gesture.

But I insist. The man who has everything doesn't have Personna because everyone in the dorm is always borrowing them. And small wonder! Wouldn't you be there with an empty razor and a supplicating sidle if you heard somebody had super-blades that were super-sharp and super-durable; that scrape not, neither do they nick; that shave you easily and briskly, quickly and slickly, scratchlessly and matchlessly; that come both in Double-Edge style and Injector style? Of course you would!

So here is our first gift suggestion. If you know a man who shaves with Personna, give him a safe.

Next let us take up the thorny problem of buying gifts when you have no money. Well sir, there are many wonderful gifts which cost hardly anything. A bottle of good clear water, for example, is always welcome. A nice smooth rock makes a charming paperweight. In fact, one Christmas back in my own college days, these are exactly the gifts I gave a beauteous coed named Norma Glebe. I took a rock, a bottle of water, a bit of ribbon, and attached a card with this tender sentiment:

Here's some water
And here's a rock.
I love you, daughter,
Around the clock.

Norma was so moved, she seized the rock, smashed the bottle, and plunged the jagged edge into my sternum.

Here now is a lovely gift for an American History major—a bronze statuette of Millard Fillmore with a clock in the stomach. Mr. Fillmore, incidentally, was the only American president with a clock in his stomach. James K. Polk had a stem-winder in his head and William Henry Harrison chimed the quarter-hour, but only Mr. Fillmore of all our chief executives had a clock in his stomach. Franklin Pierce had a sweep second hand and Zachary Taylor had 17 jewels and Martin Van Buren ticked but, I repeat, Mr. Fillmore and Mr. Fillmore alone had a clock in his stomach. Moreover, Mr. Fillmore was the first president with power steering. No wonder they called him "Old Hickory!"

But I digress. Returning to Christmas gifts, here's one that's sure to please—a gift certificate from the American Society of Chiropractors. Accompanying each certificate is this fetching little poem:

Merry Christmas, Happy New Year,
Joyous sacro-iliac!
May your spine forever shine,
Blessings on your aching back!
May your lumbar never grow number,
May your backbone never dislodge,
May your caudal never dawdle.
Joyeux Noel! Heureux massage!

And greetings of the season from the makers of Personna Super Stainless Steel Blades, Double-Edge or Injector, and from Personna's partner in shaving luxury, Burma-Shave, regular or menthol.
student help could be an important factor in bringing North Dakota State University a new physical education building. Jerry Lingen, vice president of the board of higher education and the director of physical education, says that the building is needed to accommodate the growth of the university and the increase in student enrollment.

"In the 60 day meeting of the legislature, it is hoped that a method by which buildings for the state institutions of higher learning can be financed," said Lingen.

It is hoped that this method will enable the legislature to appropriate the money for the new building. Lingen continued.

The committee's working for the physical ed. building felt that students could play an important part in the campaign to gain approval and funds for the building by contacts with their local legislators.

Lingen added that the University of North Dakota has used student in-home campaigns for buildings on their request list.

"Students are well aware of the handicaps of the present outdated athletic facility," Lingen commented. "However, they may not have the facilities that would be made available to them with the new physical education building."

Lingen disclosed the following list of facilities which would be included in the new facility: a 10-lane indoor swimming pool, two cross-courts, baseball and badminton courts, auxiliary gym, swimming pool, field house, a new studio, body building and weight machines, research laboratories in four classrooms, steam and dry-heat rooms, rifle range, indoor track and a number of other facilities.

"Student support could add the finishing touch to this program that would provide the incentive and board of higher education approval," Lingen concluded.

Speaking at the annual confer-ence of the North Dakota Cooperative Extension Service, which ended a four-day session Friday, Albrecht said that the request for the expansion of the biological sciences building, a new Field House, a new and additional classroom space and other necessary campus improvements had not been included in the budget.

The University, the President said, last year instituted a program whereby classes began at 7:30 in the morning, run through the lunch hour and on until 3:30 p.m. He reported that two additional classroom hours each day had been picked up by doing this and saved the University the necessity of new several classroom buildings.

"But where can we go from here?" he asked.

Albrecht told the group the expansion enrollment had made it necessary to "chop up some classroom space" to provide offices for additional staff members. As a result, he said, there is less classroom space available now than there was a few years ago, and apparently enrollment had about 2,000 fewer students.

"We have probably been asked that we don't need to enlarge our physical education building. But does North Dakota want an educational program limited to one that is reaching that critical point. "

"If we don't educate them well enough so that business elsewhere will want them, they aren't going to be much good to North Dakota when they stay."

In answer to those who argue North Dakota schools of higher education merely educate North Dakota youth so they can find high paying jobs in other states, Albrecht said: "If we don't educate them well enough so that businesses elsewhere will want them, they aren't going to be much good to North Dakota when they stay."

"In equipping our young people, we must train them for a place in international programs in agriculture, not as a temporary diversification, but as a main line of work," said Albrecht. "In short, we must help to educate students who will be professionals in international agriculture."

The Need for a New P. E. Building - MORE THAN ACADEMIC FROSTING

By Jerry Kaisser

Acting Director of Communications

There are those who regard physical education as a bit of superstition meatling in the academic diet. These people view physical ed. as just another class in the college curriculum, with football, basketball, sports, schools of pedagogy, and departments of education, as something to be left for the athletic department.

There's another side of the coin. Nowadays, most agree, more and more states have put physical education on the same educational plane as other subjects. This is because many states have realized the importance of physical education and that it is necessary to educate the whole man.

Physical educators argue that physical education is just that - an education of the body, mind and soul. "And because of the unique nature of physical activity," they argue, "whoever and wherever students are involved in any physical activity are learning something."

The present field house was completed in 1931, and enrollment was the 1,480 banner. Today, that same facility serves an enrollment of 5,479. "Three years from now, the number possible to us from the Greeks. There is no logical reason to doubt that, with the continued development of our education, we shall have many more students than ever before."

Proponents of physical education argue that the field house should be a multi-purpose building for all purposes. This is because physical education is a multi-purpose activity, and that it is necessary to educate the whole man.

Kaisser continues, "If the field house is not to be used for our football stadium, it should be the main basketball arena. It should also be used for all athletic events, social events and other extracurricular activities.

"And because of the unique nature of physical activity," he argues, "whoever and wherever students are involved in any physical activity are learning something."

Kaisser concludes, "The present field house is not adequate for the needs of the university. In order to accommodate the growth of the university, a new physical education building is needed."

The Need For a New P. E. Building.

The house and both conduct classes and drills there daily. "These classes," he says, "are not merely education of the body, but education of the mind. In the field house, students learn how to conduct classes and drills, how to develop new or improved exercises, and how to apply them to the needs of the students."

Kaisser concludes, "The present field house is not adequate for the needs of the university. In order to accommodate the growth of the university, a new physical education building is needed."

Inter - fraternity Council

Greeks Request Further Rule Changes
by Tanfield Miller

The Inter - fraternity Council approved a series of measures Sunday which reflected the increasingly liberal student social philosophies which are developing on the campus.

The group which regulates the ten fraternity houses on campus adopted an open house policy similar to that approved by Student Senate. In a unanimous vote they ratified a 2-10 p.m. period every Sunday for visiting hours in houses.

Following the passage of this recommendation the Greeks went on to approve a motion to allow men 21 years or older to drink on fraternity property. In order to control minor consumption the measure also stipulated that any person not of age may be held to approve a motion to allow sufficient attendance by the necessary administration approval.

The fraternity council also voted to ask that beginning next Fall they may be released from their contracted house contracts up to two weeks into the quarter. It was felt that with the completion of the new high rise dormitories there would be enough people eating at the food service center to allow for such a move.

When pledges must eat at the complex they have more trouble being assimilated into the house, and the various groups suffer financial troubles.

In a final move the Greeks unanimously passed a resolution introduced by Student Body President Rodger Wetzel calling on the group to announce its support of the rule change accepted by Student Senate last week. These proposed changes are currently under study by the administration.

Dean D. Scott, advisor to IFC, was not present at the meeting for he felt his presence might tend to stifle debate. The results of the meetings will be reported to him this afternoon along with the requests by them. Before any of these measures can go into effect they must secure the consent of the administration.

Faculty and Legislators Will Discuss Problems

State legislators and University faculty members will meet to discuss mutual problems in trying to provide the best education possible for students at North Dakota State University.

The University's position on one of its most pressing needs, finances, will be presented by Comptroller H. Don Stockman. Representative Gordon S. Aamoth will respond. A question and answer period will follow these talks.

John Hove, president of AAUP, describes the purpose of the meeting, as an attempt to establish a dialogue which will identify problems in education and help to negotiate a more sympathetic to NDSU and its anxious to do what they can to help us solve our problems," Hove said.

Twenty-first district legislators invited to the noon luncheon were Senators James E. Butler, Har-ward W. Goldberg, C. Warner Lill and Dr. William A. Nafis, and Representatives Aamoth, A. G. Bunker, Russell Dunsan, M. Donaldson, Peter S. Billing, Clark J. Jenkins, Omer S. Math-son and Thomas J. McDonell.

Display Of Photos Is Hanging In Union

A collection of photographs by members of the University Photographers Association of America will be on display in the Union through December 20.

The exhibit of more than 40 color and black and white salon prints was compiled last spring at the 1966 UPAA convention, held at Ohio University, Athens, Ohio.

Each year members of the organization submit examples of their work for judging at the convention. A traveling exhibit is compiled from among the best entries.

This year's traveling exhibit illustrates a broad range of photographic applications to higher education - architectural photography, informal portraiture, photojournalism, graphic arts, and small organization, founded in New England in 1961, in an effort to upgrade the quality and professional standards of campus photography.

It currently has some 200-300 members, most of whom are in the New England and South-eastern States. North Dakota's two universities recently joined the UPAA but have not yet entered the print competition.

The UPAA is a relatively new

ENGINEERING GRADUATES

Continued expansion of our military and commercial business provides openings for virtually every technical talent.

As you contemplate one of the most important decisions of your life, we suggest you consider career opportunities at Pratt & Whitney Aircraft. Like most everyone else, we offer all of the usual "fringe" benefits, including our Corporation-financed Graduate Education Program. But, far more important to you and your future, is the wide-open opportunity for professional growth with a company that enjoys an enviable record of stability in the dynamic atmosphere of aerospace technology.

And make no mistake about it . . . you'll get a solid feeling of satisfaction from your contribution to our nation's economic growth and to its national defense as well.

Your degree can be a B.S., M.S. or Ph.D. in: MECHANICAL, AERONAUTICAL, CHEMICAL, CIVIL (structures oriented), ELECTRICAL, MARINE, and METALLURGICAL ENGINEERING • ENGINEERING MECHANICS, APPLIED MATHEMATICS, CERAMICS, PHYSICS and ENGINEERING PHYSICS.

For further Information concerning a career with Pratt & Whitney Aircraft, consult your college placement officer-or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

Dean Honored Nationally

Frank Mirgain, dean of the College of Engineering and Architecture, has received a certificate of appreciation from the American Society of Civil Engineers meeting in St. Paul, Minn.

Mirgain was honored for his service as chairman of the committee on professional publications for the society. He has served on the committee for the past four years.

The publications committee is responsible for screening articles submitted for publication in "The Journal of Professional Practice of the American Society of Civil Engineers."

Mirgain has been dean of the NDSU College of Engineering and Architecture since 1954 and served as president of the North Dakota Society of Professional Engineers in 1961-62.

The college has added a 2-million dollar engineering complex and more than doubled its enrollment since he joined the University.
North Dakota A.A.U. compulsory leges and high schools in the area have been invited to attend.

Gymnastics Clinic to be held on Saturday, Dec. 17. Col­tion Department, with Mrs. Hegstad at the Women's Physical Education Department.

Named to this year's Little All-American at middle guard which allowed only 36.8 yards per game rushing and 171 yards total defense per game this past sea­son. The big senior was best known for his ability to stack up the running plays up the middle and his tremendous pass rush on the opponent's quarterback.

Volleyball Began gymnastic routines will be demon­strated at the clinic. A new gymnastics organisation for coeds is being proposed. Any­one interested can contact Mrs. Hegstad at the Women's Physical Education Department.

Walt Odegaard Named To Little All-American

Walt Odegaard is caught studying in his room.

LITTLE ALL-AMERICAN Walt Odegaard is caught studying in his room.

While in high school, Odegaard was both all-state and honorable mention prep All-American at Devils Lake Central.

He was also third in North Dakota heavyweight wrestling compet­i­tion. Last winter he lettered as a member of the Bison mat squad.

Ken Rota, Bison junior half­back was selected on the honor­able mention list after making the second team last year as a sopho­more.

Injured most of the season, Rota placed ninth in the NCC statistics with 275 yards and a 4.5 average per game.

GET A HEAD START...

As you leave school and begin your working career, you will be hearing about the changes that have been taking place at Allis-Chalmers. New products! New markets! New growth!

But why not GET THE WORD NOW, from our represen­tative who will be on campus. Perhaps you can get a head start—be part of the action.

Today, Allis-Chalmers has professional career opportunities for all engineering graduates with emphasis on Electrical, Industrial, and Mechanical backgrounds. Also available are unexcelled oppor­tunities for the Business Administration graduate.

Far from stereotyped but close to graduation?
The man from Ford Motor Company would like to talk to you if you have a yen to join the people who come up with better ideas in almost everything from automotive marketing to steel-making to basic research.

Whatever your major—arts, science or business—if you want to work on a better idea team, we may have a place you'll like at Ford Motor Company.

Call your placement office right now for an appointment.

Dates of visitation: January 18, 19

People in love have a crazy way of getting wrapped up in each other and forgetting about everything else. So, unless you want to make a mistake, forget about love when you're buying a diamond ring.

If you'd like some expert help, in fact, go see your ArtCarved jeweler. He has beautiful diamond rings from $150 to over $1000. Every one has a gemologist’s evaluation inscribed on the inner band. Every one is guaranteed.

So don’t get emotional at a time like this. Get careful. If you don’t know anything about diamonds, see your ArtCarved jeweler. He does.

Tough Mankato State Defeats Bison

The Herd's wrestling team lost ground in the National Intercollegiate Championship. The Bison wrestled for two decisions and five points with a forfeit, while losing 24-11.

Saturday's match evens the tie with captain John Hollman, in the Jack Skjonsby, who wrestled in the final round out the scoring.

This Saturday the Bison wrestlers will enter a quadrangular at Brookings, S. D., involving the University of Minnesota, South Dakota State University, the University of South Dakota and the Bison.

"This is going to be the best competition that NSU has ever been in. South Dakota State has won the North Central Conference two years in a row and the University of Minnesota is big ten," stated coach Bucky Maughn.

"We want our kids to get experience against some real good competition at Brookings. I think we'll surprise them in a few places," coach Maughn went on.

At the_start of the season Maughn had praise for some of his wrestlers. He stated, "Herb Schmidt and John Hollman have done good jobs. Of course we expect it of Hollman. Schmidt is not a big heavyweight but he's a tough heavyweight. Larry Mollins has improved a lot. He's the current bright light on the squad.

I've been pleased with some of my wrestlers. He stated, "Herb Schmidt and John Hollman have done good jobs. Of course we expect it of Hollman. Schmidt is not a big heavyweight but he's a tough heavyweight. Larry Mollins has improved a lot. He's the current bright light on the squad."

At this point of the season Maughn had praise for some of his wrestlers. He stated, "Herb Schmidt and John Hollman have done good jobs. Of course we expect it of Hollman. A better idea never came out of a crystal ball

At Ford Motor Company we're always looking for better ideas. But not with a crystal ball. We do it with background and brain. And people travel in the year 2000? Haven't been faced till now. Problems such as: Is an earth question such as: Should a profitable central city dealership be relocated to a growing suburban location? What's the sales potential for a new personal car?

And we do it by seeking answers for down-to-earth questions such as: Should a profitable central city dealership be relocated to a growing suburban location? What's the sales potential for a new personal car?

For more information, write our College Recruiting Department. Or better yet, schedule an appointment through your placement office to talk with our representatives. He'll be on campus soon--looking for better people with better ideas.

President Explains Report On Recent Trip Overseas

H. R. Albrecht, president of North Dakota State University, and four members of a Rockefeller Foundation team which he headed have recommended that a U. S. Agency for International Development (AID) proposed loan of possibly more than 4 million dollars be granted to a Nigerian school of agriculture as the result of a four-week visit to that country.

Following his return Sunday, President Albrecht reported the Nigerian political situation appeared highly unstable and that weapon checks were commonplace at road blocks throughout the four states in the military federation.

Despite the instability, Dr. Albrecht said he considered the Nigerian government's request for help legitimate and advised it would be a good idea for the U.S. to follow with it.

"You have to be willing to take a chance on them," said Dr. Albrecht. "Perhaps by doing so we'll help stabilize the situation by showing faith in the central government - a reinforcement of our belief that the federation will remain intact." 

In addition to recommending the developmental loan for the Faculty (college) of Agriculture at the University of Ibadan, the study team was asked to work out suggestions for a cooperative arrangement between the University and the Rockefeller-Ford Foundation International Institute for Tropical Agriculture.

Dr. Albrecht said that the Nigerian government has donated the land on which the institute will be built and has made reasonable requests for cooperation - such as graduate assistantships for some of the agriculture students from nearby Ibadan University. The cooperative agreement is the last step in the establishment of the 50 member institute.

The developmental loan being sought for construction of new agricultural buildings for 5,000 agriculture students at the Ibadan University is not a request for anything free, according to Dr. Albrecht, since they plan to repay it.

Dr. Albrecht and the study team were also asked to help identify strong and less strong areas in Nigerian higher education in agriculture.

"There is some work needed in the area of training people to pursue the problems of agriculture."

said Dr. Albrecht. Additional work in experimentation, development and planning are needed for further improvement of its agricultural agriculture, he concluded.

In addition to the University of Ibadan, the study group visited three other Nigerian schools as a part of the comparative study for some of the agriculture students from nearby Ibadan University, the study team was asked to work out suggestions for a cooperative arrangement between the University and the Rockefeller-Ford Foundation International Institute for Tropical Agriculture.
