Vol. XLVII, No. 4

Carlson named honored alum for 1967 Homecoming events

John E. Carlson, Jr., has been named the Honored Alumnus of North Dakota State University for 1967. A 1942 graduate of NDSU with a B.S. degree in Architectural Engineering, Carlson is now owner and president of Carlson-Benson Construction Company, Fargo, North Dakota.

Carlson is a member of the NDSU Alumni Board of Directors and a past president of this organization.

Carlson

For the past 12 years Carlson has served on the Student Union Board of Directors and is currently serving his fifth year as President of the Board.

Active in the Teammakers club, he has served as past president and fund drive chairman.

The Honored Alumnus Announcer at the Homecoming game will be Ernest M. Wheeler. A Theta Chi and Blue Key member at NDSU, Wheeler was a Little All-American athlete while competing for NDSU, lettering in football four years, basketball three years, and track four years, as well as a member of Softball Lettermen's Club for three years.

In football, Wheeler was called "triple threat," since he was able

to punt, pass, and kick. In one game against Northwestern he punted 85 yards and ran 65 yards for a touchdown. The 1938 football captain, he was named junior and senior class athlete and all-conference football player for three years. He participated in the first North-South football game, and later played professional football.

After graduating in 1939, Wheeler served in the army during the war, and now teaches with his wife, also a NDSU graduate, at Benson, Minnesota.

Ticket prices for the Mitchell Trio Concert on Wednesday night are: reserved - \$2.50 per person, semi-reserved - \$2.00 per person, and general admission - \$1.50 per person. Admission to the Homecoming dance and the Seven Sons dance is \$1.00 per person. Tickets are on sale at Daveau's and the Union.

There is a package deal for students only: The Mitchell Trio, Seven Sons, and Jimmy Dorsey Dance all for only \$5.00 per couple - reserved, \$4.50 per couple - semi-reserved, and \$4.00 per couple - general admission.

Rahjajs

Student Senate moves to advise probation for pep organization

The Rahjah Club was put on probation by Student Senate until October 22, 1967.

The purpose of the probation was explained by vice-president Mick Anderson. "Probation is the next step to suspension. This will be a watching and waiting period for the Rahjajs. Probation won't restrict their actions, but further complaints by students, faculty, or townspeople could lead to the suspension of the club."

During the Sunday Student Senate meeting, Terry Grim "called for action and extension of the

probation date."

But David Sunderland commented that the Rahjajs are in the process of making several changes, and the Club should have a chance to change.

Donald "Pepper" Walstad, president of the Rahjah Club, commented on the status of the club following Student Senate's probation ruling. "We are trying to shape up the conduct of our members. Presently if a member violates university regulations he appears before the executive board, which may either censor

Homecoming events start with a convocation scheduled for Wednesday morning. Introduction of queen candidates and speeches by President Albrecht and honored alumnus will be given. Students may vote for the queen between 10:30 a.m. and 5 p.m. Wednesday.

Starting at 7 p.m. Friday, there will be a snake dance, pep rally, and a bon-fire behind the High Rise dorms. The Seven Sons Dance begins at 9 p.m., followed by KTHI television spot at 10:30.

A coffee hour at the President's office in the Union is scheduled for 8 a.m. Saturday. The Homecoming parade will start at 9:30 a.m. from the civic auditorium and terminate on the NDSU campus.

The pre-game program starts at 1 p.m. with game time scheduled for 1:30. Half time ceremonies are planned. Homecoming events will be culminated with the Homecoming dance starting at 9 p.m. Saturday evening with the Jimmy Dorsey Band.

The Mitchell Trio will appear in concert at the NDSU Fieldhouse October 18 at 9:15 p.m. 1967 Homecoming Queen will be crowned during intermission at the concert.

SBP announces six new groups for research

Student Body President, Larry Fuglesten, announced the chairmen of the six new research groups formed by senate at their meeting last Sunday.

Academic Affairs Chairman Nelson Berg, Glenda Brown and James Johnson were appointed Sunday. The Academic Affairs committee hopes to work with the faculty in establishing a pass-fail system, developing a system of course evaluation, elimination of night exams during final week, and the possibilities of an honors program. They will also meet regularly to discuss academic problems.

The Business Affairs committee will do research on policy of student salaries, development of an audit procedure, comparison of NDSU's budget with that of UND, other state schools, and the North Central Conference schools. They will also consider fee payment schedules, traffic fines, and other affairs of the business office. Members of this committee are Bob Keogh, Linda Nelson and Chairman Terry Grim.

The Resident Life committee composed of Bob Hanson, Chairman, and Greg Kapaun and Carol Disrud will research all rules and regulations changes as regards university handbook, residence halls, Greek houses, Coops, and private apartments. The committee will be working closely with the housing office and the Dean of Students office on off-campus housing with regard to university responsibility. Further possibilities also include reorganization

Dick Kasper addressed Student Senate Sunday night on the question of senior rings. Senate accepted his recommendation that the rings be sold competitively by two firms.

or expel him from the Rahjajs."

In a letter to Dean Scott, the Rahjah Club stated that "the Rahjah's encourage school spirit by organization, participation and personal example."

"We will have a live buffalo for the UND-NDSU game, but we are looking for a place to stable it," commented Pepper Walstad. The buffalo will be used as a mascot for all future games.

Increased pep participation is expected by having seven Rahjajs act as cheerleaders during the game with the rest of the membership encouraging school spirit while sitting in the stands.

Among the new pep features instituted by the Rahjajs is a traveling trophy for the best player in a UND-NDSU game.

"The trophy is made possible through the combined efforts of the Golden Feathers of UND and the Rahjah Club," said Walstad.

Dave Sunderland commented on the reorganization of the Rahjah Club. "Beginning winter quarter, there will be a maximum of two members from each Greek house. Each house will nominate 4 or 5 men for membership and the Rahjajs will select two members from each houses' nominees. It will be easier to fire up the student body with the club membership being more diversified."

Currently three fraternities total 23 of the 35 members. "With the new membership plans, a more comprehensive organization will exist with both fraternity and independents represented equally," said Pepper.

Student teachers must apply soon

Arts and Science students planning to enroll in student teaching during the Winter or Spring Quarters of the current academic year must apply for placement before Friday, November 3, 1967. The forms for application are available in the Education Office, Room 327, Minard Hall.

Students who fail to file an application for student teaching by November 3 might not be placed during the quarter they desire.

Do you buy a shirt or a label?

If you're looking for a short-sleeved oxford shirt with a button-down collar, that's what you buy. After you've checked the label. Because a good label guarantees a good shirt. It means the shirt is rolled, tapered and pleated in the

right places. And is styled to last. The label on this short-sleeved button-down says "Cum Laude" Oxford. It tells you the shirt is Perma-Iron so it won't wrinkle,

"Sanforized-Plus" and tapered. It comes in canary, green, purple, orange and white. For \$7.00. The good things you're looking for in a shirt are all on the label. And the best shirts have the best labels. They're ours. **Arrow's.**

Social Spectra

by Bob Olson

Caution! Frequenting the SAB Coffee House may be hazardous to your health — or at least drinking the coffee served there may be. Recent studies by our Spectra research staff have uncovered certain startling facts about coffee:

STUDY A

Case histories of past coffee drinkers were studied by our staff. One study shows that among all the coffee drinkers in 1849, there has been a 100% mortality rate.

STUDY B

Almost every person investigated who has drunk coffee regularly for fifty years has experienced loss of hair, loss of teeth, loss of hearing, and a general "over the hill" feeling. Sex drives were also shown to have been considerably lowered.

STUDY C

We also found that 68% of all drivers involved in fatal automobile accidents in 1960 had consumed one or more cups of coffee in the 24 hour period previous to the accident.

All of these findings point up the fact that you're far safer to avoid the SAB Coffee House and instead find some other establishment downtown that doesn't serve this dangerous drink — you'll be healthier (and happier!)

The silence of our crisp autumn nights has recently been broken by sounds of hammering, sawing, laughter, and an occasional "pop fzzzzzzz." The only explanation to these obviously related sounds is that it must be float building time again. Floats mean a parade, and we can only deduce that NDSU's 1967 Homecoming is drawing near. Now's the time to make a date for the Mitchell Trio Concert — a great way to start off the big weekend. At this event the Bison Homecoming Queen of 1967 will be crowned.

Today and tomorrow don't be surprised if you happen to see sorority girls chasing Sigma Chis all over campus. The reason for their popularity is the derbys they are (or were) wearing. The girls must steal derbys to get points for their sorority. It's all part of the annual Sigma Chi Derby Days. In addition to the "derby steal" is Friday night's Derby Darling Dance. (Union Ballroom, music by the Mafia) at which the Darling will be named from candidates representing the six sororities. Derby Day games are scheduled for 1:30 p.m. Saturday. Come and see our Greek girls participating in such goodies as egg-tossing, running obstacle courses, etc. The Sigma Chi sponsored events are open to everyone.

Want to see some "blood-and-guts — good-guys vs. bad-guys" drama? Well, head over to the Union Sunday night at 7:30 p.m. and take in Cinema '67-'68's "M" — a classic among murder mystery movies. It was filmed in 1931, and recent re-release has popularized it again. The film is based on the actual case of the Dusseldorf murder.

Students may apply for three scholarships

Application blanks are now available for Rhodes Scholarships, according to Dr. Leo Hertel, in

Program set for exchange of courses

Students who are unable to take courses because they are not offered at NDSU may enroll in the course at either Moorhead State College or Concordia.

The "Common Market" program was initiated winter quarter, 1966-67 after the three colleges involved had obtained approval from their governing boards.

According to Burton Brandrud, registrar at NDSU, anyone who is a full-time student at his own school may take one course per term at either of the other institutions, provided the course is not offered at his college.

For example, ROTC is offered only at NDSU, but any MSC or Concordia student may take the course for credit under the Common Market program. Fees are charged according to rates of the student's own school.

As yet, the program involves few students. According to Brandrud, this is due to the fact that a two-hour time block is required to enable students to travel back and forth.

Anyone interested in taking courses under the program should contact the registrar prior to registration at his own college.

Minard 317. Anyone wishing to obtain them should pick them up from him.

Rhodes scholarships are open to 32 unmarried male students annually between the ages of 18 and 24.

This stipend covers a minimum two year period at the University of Oxford in Great Britain and in special cases, a third year.

Quality of both character and intellect is the most important requirement. Physical vigor is another important qualification.

Marshall Scholarships are also

available. These scholarships are made possible by the British government for American students as a gesture of thanks for aid given under the Marshall Plan.

The scholarships are granted for a two year period. Any man or woman under the age of 26 is eligible. Twenty-four are granted annually.

Highranking seniors or recent graduates of United States accredited colleges are eligible for Danforth Graduate Fellowships offered by the Danforth Foundation of St. Louis, Missouri.

Fellowships are open to those who are seriously considering college teaching and plan to study for a Ph. D. in a field which is common to an undergraduate college. To be eligible, the applicant must be less than 30 years of age, and have not taken any graduate or professional study beyond the baccalaureate. Applicants may be either married or single. For information see Dr. G. A. Smith, Dean of the Graduate Schools.

Student Body President Larry Fuglesten confers with Student Body Vice-President Mick Anderson (r.) at Sunday's Student Senate meeting. Student Senate meetings are regularly held every second Sunday evening and are open to the public. The next meeting is scheduled for October 22 at 6:30 p.m. in Town Hall.

Annual Notice
Junior and senior pictures will be taken for the Bison annual October 30 and 31 in Room 233 of the Memorial Union. All annual pictures for class and Greek sections must be submitted to the Bison annual staff or Dee Shelton, Dinan Hall, by November 15.

Want to move up fast in aerospace/electronics?

Hughes is where the action is.

You can go forward, go fast, go far... at Hughes Field Service & Support Division. If you are seeking a stimulating assignment where you can get in on the ground floor of the rapidly-expanding aerospace/electronics field, capitalize immediately on your background and training, and progress quickly toward your career goals—Hughes Field Service & Support Division in Southern California will welcome your inquiry.

Some current fields of interest include:

DESIGN ENGINEERING

Openings exist for Electronic and Mechanical Design Engineers in the development of Trainers & Simulators and in the design of checkout and test equipment for large missile and aerospace systems. These responsible positions require interest and/or experience in such design areas as: analog circuits, digital logic, switch/relay logic, electro-mechanical packaging, infrared testing, inertial guidance and Command/Control systems.

Responsibilities will include all phases of design and development from concept to final fabrication and evaluation. M.S. or Bachelor's degree is required in E.E., M.E. or Physics.

FIELD ENGINEERING

The Field Engineer's job ranges from complete contractor maintenance of electronic systems to technical assistance. His primary function is to assist

the customer at operational sites. Responsibilities include: providing maintenance, operational and technical assistance; formal and informal on-the-job training; logistic assistance and the investigation and solution of equipment problems experienced in the field. Requires a Bachelor's degree in E.E. or Physics. Experience with military fire control, radar or communications systems is desirable but not mandatory.

MAINTAINABILITY ENGINEERING

During design phase, positions involve analysis of the feasibility of built-in, self-test features, application of automatic checkout equipment, standardization of circuitry design, minimization of adjustment and alignment requirements and packaging of the product. During system development, assignments will involve production of a complete set of integrated logistics support documents for use as planning guides. Requires B.S. degree in E.E. or Physics.

TECHNICAL TRAINING

Hughes Technical Training prepares both civilian and military personnel to efficiently operate and maintain advanced electronic systems. Technical Instructors conduct training classes at Hughes California sites and work directly with customers to evolve special

training devices, plan field training programs and prepare courses for use at customer bases. Requires a Bachelor's degree in E.E., or Physics. Experience in preparing and presenting technical electronics material in the classroom and laboratory is highly desirable but not mandatory.

ENGINEERING WRITING

Specialists in printed communications convert complex engineering data into simple, accurate, illustrated support publications, including technical manuals, orders, brochures, sales proposals, etc. Fields of interest include: digital/analog computers, display systems, digital and

voice satellite communications systems... and many others. Requires a B.S. degree in E.E. or Physics.

CAMPUS INTERVIEWS November 3

Rahjahs: asset or perennial embarrassment?

The Rahjahs have come under fire many times before. This time, though, they're facing formal action taken by students provoked beyond the point of mere criticism. (See story page 1.)

Certainly the basic purpose of an organization such as the Rahjahs is desirable. A university with a strong athletic program needs spectator support to justify the expenditures made in that area. A male pep organization can provide an element of entertainment and enthusiasm that a squad of six female cheerleaders perhaps can't do alone.

Enthusiasm is a difficult word to pin down. School spirit seems to have a high school ring to it. It is an indisputable point, however, that Rahjah activities in the past have demonstrated a quality which can hardly be

termed enthusiasm — at least positive enthusiasm.

The Rahjahs have proven themselves to be a loud energetic group — both qualities that indicate some potential for their existence as a pep group. Their activities have lacked an ingredient essential to their avowed purposes and that ingredient is direction.

In the past the Rahjahs have been a semi-exclusive (and the term is used loosely) organization of male students wearing a uniform jacket and acting as individuals in search of attention rather than as a group seeking an extra-group response.

Recent criticism and disciplinary action have given the Rahjahs public pressure to examine their organization critically. According to all reliable sources their introspection has resulted in decision

to change their tactics.

Such a change will be warmly received in many circles. The university as a whole will be justified in feeling gratitude toward a group that receives criticism and public consideration with a look toward improvement. A perennial embarrassment to the university will certainly be eliminated if the promised changes are successful.

The inherent value of an organization such as the Rahjahs is recognized by virtually all who must consider their present problem. This in itself should encourage the group in its efforts to uplift itself.

The Rahjahs are undoubtedly faced with a nearly overwhelming task — they must attempt to change not only the image they create to those who must observe their actions, but they must also

change the groups image of itself. The latter could be the group's most difficult task.

To co-ordinate the activities of a group of independent individuals is never an easy task. What the Rahjahs must do is even more difficult. Their improvement can only come from an internal change in attitude, from a personal desire of the green and yellow jacket-wearers to function as a group.

An examination of the Rahjah constitution indicates sincere hope of contributing to spectator spirit at athletic events. An examination of Rahjah activities indicates a complete neglect of their avowed purposes.

The university and the public can only look for improvement in the organization, for if the improvement is not soon in coming there will be

no future opportunities for the Rahjahs to be observed.

The University Activities Committee which has suggested a probationary period for the Rahjahs is giving the group a chance to prove itself. Critical eyes will be upon the Rahjahs. The situation has its encouraging aspects however. A near vote of confidence in the group's ability to reorient its members has been given where none might have been.

A favorable response has at least been indicated by the Rahjahs in a proposed effort to upgrade themselves. We can only hope that the group has the strength to strengthen itself, the strength to realize its potential, the strength to make the positive contributions of which it is so capable.

CJG-MS

Sink or sail, pass or fail

A recent Student Senate proposal is a healthy sign that concern for imaginative programming exists. Colleges and universities throughout the country are inaugurating new programs designed to add flexibility to curriculum scheduling. The pass-fail system is probably the best-known innovation

Student Senate has set up several standing investigative committees, including one in the area of academic affairs. A motion made by Senator Glenda Brown asking senate to investigate the pass-fail system will be reviewed by this committee when it begins its work.

The basic principle of the pass-fail system is relatively simple. Students may elect a designated number of courses and either pass or fail the courses. No graded evaluation is levied. This eliminates the danger of an agriculture student lowering his 4.0 overall grade point average by jumping into an art course in which he has no background and more interest than ability.

The student receives credit for course work taken under the system, but he is not penalized for his inability to compete with accomplished students in a field outside his major concentration.

Pass-fail offers the possibility of electing course work outside one's major field, supplementing the basic curriculum, and still frees the student from the academic pressures of "making a grade."

There are many different possibilities for the scope and administration of such a system — all worth serious consideration by the university and the student body. Even an intense investigation of pass-fail would be a step toward more creative academic programs.

Guest Editorial

"Turn on" to reality of commitment

I'm very pleased that I've been asked to write an editorial for the *Spectrum*. For me this is an extremely challenging task, since I've found myself compelled to narrow many ideas I've had recently into a brief, structured format.

Basically, I'm concerned with the reality of how many students are really "turned on." I don't mean the turn on from drugs, but the turn on to what's happening. You don't have to live in New York or California to be on to what's going on. It's all around you.

Things are happening. You don't have to wear a beard, sandals or a robe to understand. You don't have to be in New York or California to take part. All the elements and potential are here in yourself.

Unlike the hippie movement, I don't think you have to drop out. (Even the hippies are learning this.) Unlike Mario Savio, I don't think you have to throw your bodies on the gears of progress to force a stop of the machine. I think you have to "be in" and force a change of the gears.

Things are happening be-

cause you make them happen. If you would rather resolve your college career and future life to one of being non-committal then I'm afraid you're tuned out of an exciting wave length.

Now I don't mean "being in" is through ego-commitments such as grades, clothing, being seen with the right people, etc. The turned-on student is the one who is putting his education to work and broadening himself.

How many of you have spent an hour or more walking through an art exhibit in Hultz Lounge? How many attend the Sunday night Cinema '67-'68 program? How many of you have asked a professor over to the Union for a cup of coffee? How many have been to a Lyceum program? Have you ever sat down and talked to one of the many foreign students that are here at NDSU? How many of you have a constructive viewpoint of American foreign policy? How many of you belong to a group that is thinking, planning and changing?

Of course I could pose many more questions, but all of the above and more are

available within our college community.

Through my job, I have the opportunity to work with some of the turned-on students and faculty. I meet them outside of the traditional academic curriculum in what might be called the curricular. Of course there are many involved with curricular that I don't meet.

I know of many students and faculty that are trying to set a pace. Being in, commitment, for them is not just an idea, it's all of college life.

To those of you who view NDSU as a place where billions mark time, an area of geographic and intellectual isolation — I bless you with life of unreal domestic tranquility. The beautiful people are those that do not fear commitment and are turned on. I'm naive enough to believe that beauty is within everyone, everywhere as we tune in we can cultivate a better self. Commitment is the study towards becoming real. As we extend our commitment, simple or complex, we move to develop a more beautiful everything, everywhere.

Ray Kril
Student Activities co-ordinator

EXPOSURE '67

by Doc Buchanan

To take a break from the usual corn, my column will vaguely attempt to offer ideas of constructive criticism to the following organizations:

STUDENT SENATE

Perhaps my main objections centered around senate are due to campaign promises. The promises are all great and they include everything from reapportionment of senate (a perennial issue), student discounts (a recent addition of politics, but proved popular last year so expect to see it around from now on), and the possibility of better relations with the alumni so we can get donations from them. In short the candidates state, "I believe in my country, my God, and my mother." And in an array of tearful congratulations, they assume office.

Now time has passed and senate continues to meet, discussing and constantly referring items to committees. They have recently passed a motion to form even more new committees. What about a little action—namely:

Senate could have the power to do anything it wanted and they could if they would regain the respect of the student body and administration. Respect won't come easy, but I am one of the many who are waiting to see a sign from senate showing that they have regained their "campus conscience."

We cannot expect miracles. While other campuses are discussing the Vietnam policy, religious and philosophical problems, we must first start at the basic student freedoms, responsibilities, and duties.

The students on this campus can never expect to be treated like adults — until the campus leaders behave in a sound and sensible manner. This does not mean respectable. We have some of the most respectable looking leaders, but they lack respect. They are too busy being campus heroes to worry about others.

Senate could take one giant step forward if they would only enact their campaign promises.

SENATORS

Senators, how about reapportioning student government before an election, heaven knows

there is enough talk of apportioning during an election.

There are 17 Greeks out of 18 senators. Two members of student government live in a dorm, the rest live at their Greek houses or in off-campus housing. One could assume from this fact that the majority of opinion comes from the Greek houses. What do senators know about present dorm conditions if they don't live in one this year? What do senators know about freshman attitudes if they know only their freshmen pledges who dare not speak their minds because they are too overpowered by the minds of the campus leaders.

For now, world problems will have to be avoided. A campus which can't solve a faculty advisor issue can hardly be expected to solve the Vietnam war.

SAB

How often have members of the Board said "It will never go over here at MOO U." Or how often have you debated not to have an activity because no one you know is interested.

Model United Nations serves as a good example here. Last year the workers of MUN were not campus leaders, Greeks or status-seekers. They were interested students.

There are interested students here, and it isn't a problem of finding them — the problem is letting the students know how to apply for the job.

IFC

Why does IFC allow scumming of prospective actives in the fraternity houses to continue? Is there any sense in keeping a "scummie" up for 24 hours a day for four or five days and having him perform degrading tasks? How can brothers of a fraternity call a pledge "scummie" one day and the next a brother? Brotherhood is nothing, if it is only the ability to withstand mental and physical abuse.

The period of "hell week" could be used to improve upon the fraternity zeal of a pledge by a period of "help" projects designed to improve our campus or community.

PANHELLENIC

I don't quite understand sorority rush when girls can go beg-

ging for a sorority, at the same time, a sorority goes begging for girls.

GREEKS

The Greek community working together could achieve the glory of Rome, if they would work towards it. But too many members seem to be preoccupied in keg parties, card games, and dates to be interested in the problems of the campus or community. The Greek system could be a great asset to a campus by promoting activities designed to benefit the college. What about a Greek Carnival for crippled children with the proceeds going to a favorite charity?

SPECTRUM

If you worked closely with the Students Activities Board, or Senate, miracles could be performed in the areas of student involvement and participation.

ADMINISTRATION

We don't expect you to give away your powers over our lives, but you could be more lenient when we ask for a little authority to govern our own lives. We don't want to be babied — we do realize that the University feels a responsibility to our parents for providing for our moral behaviors, but if some of our parents have never taken care of us, why should you?

Two offices offer jobs for full-time students

Job possibilities for full-time NDSU students are available to anyone who needs one, according to Bryan S. Lonski, assistant financial aids officer at NDSU. Information may be obtained through the Placement Office or the Financial Aids office.

Off-campus jobs are handled by the Placement Office. The Placement Office makes a record of the student's name, the kind

of work and wages preferred, and investigates the availability of such a job. The Financial Aids Office has information on the jobs available on campus. A student who seeks a job through the Financial Aids Office must enroll in the work-study program. Under this program the Financial Aids Office will set up a maximum wage that can be earned.

The Placement Office is located on the second floor of the Memorial Union. The work study program is located at the Financial Aids Office in the basement of Old Main.

Premium deposits deferred until you are out of school.

Members of Gamma Phi Beta are shown decorating their Ugly Man candidate, Lani Blilie. Ugly Man on Campus this year is Don Sinner, who was sponsored by Kappa Kappa Gamma sorority. He was awarded the title at the annual Ugly Man Dance held Saturday night. Approximately 1000 people attended the Ugly Man Dance. According to Fred Witz, Alpha Phi Omega president, this turn-out was the direct result of a larger band, the Churchkeys, and moving the dance to the Fieldhouse. "We hoped to have the Ugly Man contestants on stage in their regalia." A few of the contestants appeared in costume this year.

SBP names new groups

and definition of dorm government.

The chairmanship of the Individual Services Committee is shared by Dan Devlin and Bob Dubord. Researching and recommending improvements in student services will be their task.

Possible improvements which Student Senate could provide through Individual Services are co-operative book exchanges, student discounts, car pools for city residents, insurance plans and travel services. This committee will also research the present student services of the library, Guidance and Counseling, Health Service, Financial Aids Office and segments of SAB.

Mel Nelson is the chairman of the University Activities committee. Also on the committee are Jeanette Ulfers and Don Hager. This committee has the responsibility to act as the student voice in affairs of choir, band, athletic drama, debate, radio, and establishing policies on University recognition, probation and expected conduct for all extra-curricular activities.

Extra-Campus Affairs will work with area colleges to arrange block booking of artists, speakers, art shows and entertainers in order to reduce cost. The committee will also arrange student government seminars, and seminars on state higher education problems with college leaders in the state. Rodney Link is chairman of the committee with Curt Hofstetter assisting him.

Additional appointments to the above committees will be announced at later meetings. Anyone interested in serving on the committees is welcome, and should contact the committee chairman or President Fuglesten.

SYMBOL DEPLETION

We've almost lost a good word, and we hate to see it go.

The movie industry may feel the same way about words such as colossal, gigantic, sensational and history-making. They're good words—good symbols. But they've been overused, and we tend to pay them little heed. Their effectiveness as symbols is being depleted.

One of our own problems is with the word "opportunity." It's suffering symbol depletion, too. It's passed over with scant notice in an advertisement. It's been used too much and too loosely.

This bothers us because we still like to talk about opportunity. A position at Collins holds great potential. Potential for involvement in designing and producing some of the most important communication systems in the world. Potential for progressive advancement in responsibility and income. Unsurpassed potential for pride-in-product.

That's opportunity.

And we wish we could use the word more often.

Collins representatives will visit your campus this year. Contact your College Placement Office for details.

Enrollment increase stops milk sales to Fargo area

Increased enrollment at NDSU forced discontinuation of university milk sales to the public.

Formerly the Animal Science Department supplied the NDSU food centers with milk and milk products and had excess to sell to the public. Since March, 1967, the department was forced to discontinue public sales and exert all efforts to meeting campus requirements because of the in-

creased enrollment.

This fall the university was forced to purchase milk from other sources to supplement that produced by the Animal Science Department.

The milk comes from university-owned cows and is processed in the dairy building on campus. The department formerly produced cheese, ice cream and other dairy products.

Over 450 high school debaters and their coaches attended Saturday's annual Tri-College Debate Workshop in Festival Hall. The workshop is tri-sponsored by NDSU, Moorhead State College and Concordia College speech departments. One of the highlights of the all-day event was a demonstration debate on the national high school debate resolution, Resolved: That Congress should establish uniform regulations to control criminal investigation procedures. Moorhead High School debaters upheld the proposition, while debaters from Jamestown High School took the negative position. A Jamestown debater (l. at podium) cross-examines a Moorhead debater (r.) while his colleague prepares her constructive presentation.

Over-night case

You get one with every bottle of Lensine, a removable contact lens carrying case. Lensine, by Murine is the new, all-purpose solution for complete contact lens care. It ends the need for separate solutions for wetting, soaking and cleaning your lenses. It's the one solution for all your contact lens problems.

for contacts

Solid Connection.

It just makes good sense for the graduate engineer or scientist, contemplating the direction of his professional career, to make sure that he has all the information he needs about every company he is considering—that he has total input information—before he makes a connection.

If you're good. If you're *really* good. If you have learned to use the knowledge you have acquired as a starting point from which to launch new ideas, you probably know already that your talents are in demand. There is always a seller's market for intellect.

But there can be more to your future than buy and sell. Satisfaction is a commodity that cannot be exchanged.

When you are considering where you will start in the complex world of aerospace, while you are gathering input information, we

urge you to investigate the opportunity for a *satisfying* career here at the Pomona division of General Dynamics.

Here are five reasons why it would be a wise move for you now:

1. You will work side-by-side with nationally recognized engineers and scientists who are pioneering advanced concepts in missilery. Your reputation will be balanced by association.
2. Your compensation and fringe benefits will be on a par with the top in the industry.
3. You will pursue your profession in an area where living is pleasurable year 'round—one of the top vacation areas in the nation. Beaches, mountains, desert, a great city nearby, universities and colleges for advanced study, an atmosphere of growth and achievement.
4. Your ability will be applied to

creating universally important products of engineering imagination.

5. Here at the nation's largest facility for development and manufacture of tactical guided missiles, your talents will be evaluated, recognized and rewarded.

For more information, contact your placement officer to arrange a personal on-campus interview with our representatives, or write to:

College of Pharmacy ch

Mass confusion in pharmacology laboratory.

The profession has undergone many changes in the past few years. A two-year course of study is now the curriculum.

The recent changes in the five-year program have been needed as well as requiring for a pharmacist to obtain all of the requirements to broaden one's education.

Several avenues are being explored by the College in the drug store practical experience obtained with theoretical sale and manufacturing positions in research.

An associate membership is available through the completion of this course in drugstore, department buying or merchandising. Opportunities are in the representation of these areas.

A minimum of one year at a university is required to receive this membership.

The Department of Nuclear Medicine consists of the following processes and techniques: radiochemicals, and isotopic

Pharmacy co-ed double checks her unknown sample in organic qualitative analysis lab.

Blood is examined

to meet demands of time

University curriculum has undergone a century. It has advanced from 1902 to the present five-year

from the four-year program to an effort to meet the cultural requirements needed in training. The four-year program included courses, but left little room to add additional electives.

are open to the student entering, including training for retail pharmacy. Positions may be available, employment with wholesale pharmaceutical firms, as well as teaching.

team in cosmetic science is also part of Pharmacy. A student can expect a position with a major cosmetic firm in selling or promoting products. Other possibilities include promotion of products or in a particular cosmetic firm.

number of hours is required by the state degree.

Pharmaceutical Chemistry and Biochemistry work as drug assays, bioassays and synthesis of organic medications.

"Where did I put my unknown?"

150 Army cadets to attend field problem Saturday

On Saturday, October 14, approximately 150 NDSU Army Reserve Officer Training Cadets will attend a field problem at Camp Davis, North Dakota.

This training is primarily for those cadets who are juniors and will prepare them for a six-week military training course to be given this summer.

Training will be held from 7:00 a.m. to 6:30 p.m. in five rotating courses, which will cover firing on 1,000 inch rifle ranges using M1 rifles, bayonet training using drills and hand-to-hand combat, training in small unit tactics as squad battle drills, communication practice in sending messages by radio, and individual combat training in patrolling.

NDSU's Army ROTC program has 263 cadets - 68 seniors, 89 juniors and 106 sophomores. Freshmen can enroll only after the fall quarter, due to physical education requirements by the university. If any freshmen are interested they are invited to attend the field training day at Camp Davis.

Army ROTC is primarily a four-year program with basic training in military tactics, military history, and weapons-handling given the first two years. Application for Advanced ROTC are made by those juniors who show the potential of becoming officers. They will receive special instruction in military law, administration, tactics, logistics, Army branches, and leadership.

In 1901, NDSU's Department of

Military Science was opened with Major Ulio as Professor of Military Science. Presently Colonel Winston E. Wallace heads the department. Lt. Colonel Donald E. Thomson is the Assistant Professor and Major Robert S. Snopak is the Commandant of Cadets.

The Bison Raiders, a crack drill team in Army ROTC, compete in rifle matches all over the nation, and also perform at many civic functions in North Dakota.

Staffs to attend ACPC Convention October 19-21

Eight NDSU students will attend the Associated Collegiate Press Convention at the Conrad Hilton Hotel in Chicago, October 19-21.

Members of the *Spectrum* staff that will attend include Carol Gellner and Marilyn Mathison, co-editors; Daniel Kopp, business manager; Paul Anstett, news editor; and Bob Olson.

Representing the Bison Annual staff will be Nancy Rystad, activities section editor; Rodney Bertsch, sports editor; and John Arnesen.

The *Spectrum* will be edited by the Communication 201 class during the absence of the editors. Mrs. Gerald Richardson, the class instructor, will supervise the October 26 issue.

Small hospital exists on campus

A modern, though miniature, hospital stands near the center of the campus, unnoticed by many who are unaware of the potentialities of this unit.

The newly dedicated Casper I. Nelson Student Health Center is under the direction of Dr. Jean Tillotson, the only resident M.D. for the school. She is assisted by four nurses, a lab technician, a full time pharmacist, part time pharmacy students, and a housekeeper. One of the nurses is in attendance at all hours.

The structural features of the Center are quite complete, with all the conveniences of a small town hospital or medical office yet with the advantage of being near larger, more elaborate hospitals should some serious situation arise.

Housed on the main floor are the waiting room and adjacent nurses office, where records of all patients are kept, and two medical examination rooms, which enable two patients to be treated simultaneously. A lab for blood tests and other routine tasks and a small kitchen are also on the first floor.

A six-bed men's ward and a four-bed women's ward are near the west end of the main floor. Patient's confinement to these wards is free for five days, but a rate of five dollars per day is levied for further hospitalization.

A modern pharmacy is housed in the basement, under the direction of S. J. Sleight. Although the quantity is somewhat limited, Sleight pointed out that since there are few pediatric or high

blood pressure cases, many common drugs are not needed.

Poison control is a special project of the pharmacy department, with a pharmacy senior on call every night to administer necessary antidotes. A direct line to St. Lukes Hospital is available in case of emergency. Sleight noted that approximately 20-25 prescriptions are filled daily, in addition to non-prescription items obtainable at relatively lower prices.

Dr. Tillotson mentioned that "student use of the Health Center varies a great deal, but generally is quite busy this time of year." She noted that "mononucleosis and strep throat provide the largest number of patients as of late, but the flu bug will soon

take its toll."

Many students have been asking the Center for excuses for missing a day of class due to illness. According to Dr. Tillotson this is not necessary unless the student misses up to three days of class. "If such is the case," said Dr. Tillotson, "the student should probably be in the Health Center infirmary anyway."

Since the Health Center is not as well-equipped as a larger hospital, students must go home or to local hospitals for treatment of infectious diseases or minor surgical operations.

Flu shots will be available at the Health Center about October 16 for one dollar per shot, which should provide immunization through the winter.

Dr. Tillotson examines a student's injured foot during office hours at the Health Center.

Placement opportunities

NOTICE: Campus interviewing begins October 12th. Students anticipating graduation during the 1967-68 academic year are urged to register with the Placement Office as soon as possible.

Thursday, October 12 —
Cutler Hammer, Milwaukee, Wis., will be represented by Mr. J. B. Little and C. A. Russ. Cutler Hammer is a pioneer electrical, electronic control manufacturer providing a wide range of products for home, industry, commerce and military. They offer engineering assignments in sales, research, design, development marketing and manufacturing. Citizenship required.

Friday, October 13 —
Geigy Chemical Corporation will interview for field sales positions in the agricultural division of the company. The assignments consist of calling on distributors, dealers and agricultural leaders. Conducting demonstrations and coordinating meetings will be included in completing product performance evaluations. All interested applicants welcome.

Tues. & Wed., October 17 & 18 —
Idaho Nuclear Corporation, Idaho Falls, Idaho, under contract with the Atomic Energy Commission, operates the free worlds largest test reactors and support facilities. They are engaged in basic research in areas of nuclear physics, reactor design, and chemical technology. Citizenship required — no summer assignments at this time.

Tuesday, October 17 —
Jervis B. Webb, Detroit, Mich., design and manufacture industrial conveyor systems. They will interview industrial, civil, electrical and mechanical engineering students interested in the field of material handling systems. The company is heavily involved in the automobile industry. No summer interviewing.

Farmers Union Grain Terminal Association, St. Paul, Minn., offer a variety of career opportunities to economics, agricultural and engineering graduates. Assignments include sales, purchasing grain merchandizing and operation management. All interested students are welcome.

Tues. & Wed., October 17 & 18 —
Minnesota Mining and Manufacturing Co., St. Paul, Minn., will be interviewing students majoring in organic and inorganic chemistry, protective coatings, electrical, industrial and mechanical engineering. Assignments are available in research, product development, manufacturing, industrial engineering, technical services and quality control. Letters of application for summer jobs are requested but not interviews. Citizenship required.

Wednesday, October 18 —
Koehring Company, Milwaukee, Wis., design and manufacture a diversified line of heavy construction equipment including shovels, cranes, earth moving dump trucks and paving machines. Mr. Gregory Detloff will be interviewing civil, mechanical and industrial engineering students

for positions in design engineering, manufacturing and sales. No summer recruiting, Citizenship required.

U. S. Army Material Command, representing 30 civilian research and development laboratories responsible for design, testing and maintenance engineering of all weapons and equipment used by the U. S. Army. Openings are available for a wide variety of technical graduates at all degree levels. No summer interviewing at this time — Citizenship is required for security reasons.

Interstate Power Company, Dubuque, Iowa, seek electrical and mechanical engineering graduates to begin a rotational training sequence. Employees will at a later date be assigned to a district managers staff or engineering department of the company. Summer assignments are available, interviews invited — Citizenship is required.

Thursday, October 19 —
U. S. Public Health Service, Communicable Disease Branch, seek graduates for program work involving public contact and organizational development. Backgrounds in biological sciences, language, journalism, public health administration and social sciences are all excellent. Citizenship is required.

Universal Electric Corporation, Owosso, Mich., will be represented on campus by Mr. Harold Meier. The company is involved in designing, manufacturing and marketing of fractional h.p. motors. These products have a wide variety of applications including home products, auto industry and the military. Electrical engineering background requested.

Minnesota Power & Light, Duluth, Minn., offer engineering graduates professional assignments in a variety of areas including systems work, communications, plant engineering and sales. Summer job interviewing is also welcomed — Citizenship required.

City of Los Angeles, Bureau of Engineering will seek civil engineering graduates for job rotation assignments in public works engineering. Starting salaries range from 776 to 914 dollars per month. Non-design assignments available in estimating. Continued education with tuition reimbursement available to all employees. Citizenship required.

Puget Sound Naval Shipyard, offers engineering assignments with three basic divisions of the facility; Design, Nuclear Power and Production Engineering. Work assignments involve the design of ships structures, electrical and mechanical systems. Summer employment letters of application invited — Citizenship required.

Montana Dakota Utilities offers engineering positions in No. Dak., and Montana. Girls graduating in Food and Nutrition, General Home Economics and Home Economics Education are invited to interview for possible assignments to the Home Service Department of the company. Positions are educationally promotional but do not involve sales. Mail application for summer jobs are invited — Citizenship required.

Peace Corps

Schneider to work in Afghanistan

John T. Schneider, a 1967 graduate of North Dakota State University, has recently been named a Peace Corps volunteer assigned to Afghanistan. The assignment was made after the completion of twelve weeks of training at the Center for Research and Education at Estes Park, Colorado.

Schneider is one of the new volunteers who will work in education, health, agriculture and hydrology programs. He will be working on the agriculture project, working with farmers to introduce new methods, improved seed varieties and chemical fertilizers.

During his training at Colorado, Schneider studied Farsi or Pashto, Afghan history and culture,

and technical methods in the field of agriculture.

The former NDSU student received his B.A. in the college of

Arts and Sciences, specializing in politics and journalism. He was a member of Student Senate, held editorial positions on the *Spectrum*, and was a member of "Who's Who in American Colleges."

Business economics club aims at future of student members

The Business Economics Club is a new program aimed at promoting the future of the student members, according to president Mike Austin.

Based on a Junior Chamber of Commerce structure, the new organization includes twenty-nine directors and a slate of five executive officers.

Although the club closely parallels the established Agricultural Economics Club, Vice President Al Cecil explained that the Business Economics Club (BEC) would be "working on a broader plateau

of activities, with far reaching results, both for the students and the club."

Four seminars are being planned for the express purpose of promoting NDSU's economics department, and each is tailored to a particular group or topic. The fall seminar - banquet will be Tuesday, October 31, with "Business Administration" as the main item of discussion. Other seminars will be divided into groups: (1) for high school students (2) for NDSU students, and (3) to study personnel development and selling. May 13-17 are the dates for a Management Seminar Week, which will include an Awards Scholarship banquet.

A professional economics journal is to be published on a monthly or bi-monthly basis, with a circulation consisting of economics students, graduates, and local businessmen. The publication will cover both national and local events.

Specific products or outstanding business groups in the Red River Valley area will be featur-

ed, along with articles on outstanding economics students, news of the department. Guest writers will be included to give diverse opinions or thought on modern economics. Placement opportunities will also be listed.

Through the journal and other contacts with the downtown merchants the BEC hopes to involve the local businessmen in the intricacies of the economics department. It is hoped that these business contacts will be in a position to exert influence if necessary to promote any needed changes in the curriculum or department.

The BEC is an outgrowth of the original Economics Club. It wasn't until recently that approval was granted for the revamping of the organization. Don Myrold, economics instructor, spearheaded the reorganization of the club.

Cecil commented that the club "will enhance the future opportunities of economics students through the various seminars, speakers and activities, by their own involvement in economics' problems, and by a furthered awareness of economics outside of a certain course."

Membership in the BEC is open to all who are interested in or majoring in economics.

Johnson names judging team

The Meats Judging Team for the American Royal Meats Judging Contest at Kansas City, Kansas has been named by Dr. Verlin K. Johnson, associate professor of animal science. The team includes Jerome Nipstad, Russ Johnson, Miles Groseth, Courtney Brye, and Robert Blasey.

Eighteen teams from Pennsylvania, Ohio, Tennessee, Kentucky, South Carolina, Oklahoma and the midwest will compete.

The team will leave October 11 and have workouts at Morrell & Co., Sioux Falls, S. D., at Sioux Beef Co. and Wilson & Co., Omaha, Nebraska; at George A. Hornel & Co., Fremont, Nebraska; and at Dugdale Packing Co., St. Joseph, Missouri.

The contest will be October 17 at Swift & Co., in Kansas City, Kansas, in conjunction with the American Royal Livestock Show.

The team will tour the show October 18 and arrive back in Fargo October 19.

Baby Bison split in first two games

The Baby Bison dropped their season opener to the Concordia Freshmen Wednesday night, October 4, at Dacotah Stadium by a 18-14 score.

Concordia blanked the Baby Bison in the first half, 10-0. Their first touchdown came early in the second quarter on a 20-yard run.

Later in the quarter an intercepted pass led to a Concordia field goal, making the score 10-0.

The Baby Bison got their offense moving in the second half of play. They pushed over touchdowns in the third quarter and early in the fourth quarter to take the lead, 14-10.

Late in the fourth quarter, a 19-yard touchdown pass gave Concordia what proved to be the winning margin. A two-point conversion made the final score 18-14.

The Baby Bison retaliated last Monday night in a controlled scrimmage game with the Moorhead State College junior varsity. The Baby Bison came out on top 35-6.

The Baby Bison scored early in the first quarter with Jim Twardy going over from the three. A Twardy conversion made the score 7-0.

Later in the quarter Dave Paul fell on a blocked punt in the end zone for a touchdown. Twardy again converted to give the Baby Bison a 14-0 edge.

In the second quarter of play Dennis Preboski pulled in an eight-yard pass for six points. Twardy's kick was good to make the score 21-0.

In the third quarter of play, Preboski scored his second touchdown of the evening on a 16-yard run. The conversion gave the Baby Bison a 28-0 lead.

Steve Gaedke chalked up six points on a two-yard run later in the third quarter. The score was 35-0 following Twardy's conversion.

Larry Duhamel was the only MSC player to hit paydirt all evening. Duhamel's touchdown came on a one-yard plunge. The extra-point kick was no good.

Duane Erickson scored the final Baby Bison talley in the fourth quarter, going in from the one. The conversion made the score 42-6.

The Baby Bison claimed 228 yards rushing to MSC's 30 yards.

In passing yardage it was again the Baby Bison taking the lead, 136 yards to 115 yards. Both teams had identical passing records, completing ten in 25 attempts. The Baby Bison found it necessary to punt only once.

Joe Cichy completed nine passes in 16 attempts for 116 yards. Tom Wertz completed one pass for 20 yards for the Baby Bison.

Gaedke pulled in four passes for 62 yards and Duane Erickson caught two for 29 yards.

Preboski and Gaedke each had 12 points for scoring honors in the game.

Steve Gaedke scores in the third quarter of the MSC - Bison freshman game.

Augustana sports versatile offense

Augustana's homecoming, otherwise known as Viking Days, will be the stage of the Bison's third conference start.

The Bison will have their hands full with a veteran Viking team which sports one of the most exciting offenses in the North Central Conference.

Augustana is quarterbacked by Gary Sandbo, a quick knowledgeable veteran who can run or pass with ease. Sandbo has gained over 1,000 yards offensively in each of his previous two seasons.

Part of Sandbo's success must be shared by his capable receivers. Mike Ratzloff, a three-year veteran end is one of Sandbo's favorite targets. Against the University of South Dakota, Ratzloff caught three Sandbo passes for 45 yards and one touchdown. With that touchdown reception Ratzloff tied the Vikings career record of 10 touchdown receptions.

In the backfield with Sandbo are Steve George, the Augie tail-

back, who was the leading Viking scorer last year, and Roger Olsen, a fullback, who is in a starting position for the first time this year.

George, on his past merits, and Olsen, who is considered a quick, hard-running fullback, should provide the Bison defense with a formidable task this weekend.

Defensively, the Vikings line has shown marked improvement from earlier games and the secondary limited South Dakota to four completions in 16 attempts for a 30 yard total.

The offensive line provided excellent protection for Sandbo in the game with the USD Coyotes allowing him time for nine completions in 15 attempts with two touchdowns. The offensive backfield carried 51 times for 204 yards in that game.

Saturday's game may well prove to be the second crucial obstacle in the Bison's path to a North Central Conference crown.

Augustana quarterback Gary Sandbo

Wrestling notice

There will be a meeting today at 4:00 for anyone interested in participating in Varsity or freshman wrestling in Room 204 in the Fieldhouse.

Bison quarterback Terry Hanson rolls out for a second quarter touchdown.

BISON RECORD BOOK REWRITTEN

Several records were broken last Saturday night in the Bison's devastating victory over the UWM Panthers. School records which toppled were the total points scored in a modern day game, the number of touchdowns scored in one game, net rushing yardage, first downs gained rushing (21), total first downs, and total offense. The five interceptions may also be a single game record, but it is not certain as the records are still being checked.

In the individual record category, Tim Mjos's 177 yards rushing exceeded the previous mark set in 1964 also against the UWM team. It is interesting to note that this yardage was compiled in less than three quarters of play.

Ken Rota established a personal record of 136 yards rushing. Rota, who passed the century mark in rushing yardage gained many times, held a previous high of 132 yards. All of Rota's yardage was chalked up in the first half of the ball game.

As well as rewriting NDSU school records, the Bison have smashed or tied at least eight UWM records for opponents. Records were set in total points scored in one game by an opponent, first downs rushing, total first downs, net yards rushing, total offensive rushing yardage, the most touchdowns scored in one game by an opponent and the most interceptions by an opposing team in one game.

PLAYERS OF THE WEEK

Player of the week honors go to linemen Bruce Nelson and Steve Stephens and defensive back Steve Krumrei.

Nelson and Stephens have played aggressive, inspired ball all season in the offensive line, while Krumrei is a newcomer to the Bison defensive starting lineup. Krumrei was credited with eight unassisted tackles and two pass interceptions. The eight tackles were the high mark in the game for the Bison defense. The starting opportunity was given to Krumrei to strengthen the Bison defensive secondary against the Panther's passing offense.

JUNIOR ROSE BOWL — NOT A RUMOR

Almost everyone on campus has heard the rumor concerning a small college Rose Bowl game. To set the record straight, this is not a rumor but a fact. The Junior Rose Bowl will be played on December second in the Rose Bowl Stadium at Pasadena, California. It has been approved by the National Collegiate Athletic Association and is one of ten NCAA sanctioned post-season bowl games. There has been no mention as of yet concerning team selection, but national ratings are a factor and the Bison continue on a respectable winning streak they should receive consideration.

Bison romp Panthers for fifth straight

The University of Wisconsin - Milwaukee scored a resounding victory in the General Electric College Bowl last Saturday, but that was their only victory of the day as the UWM Panthers suffered a 71-0 setback at the hands of the Bison.

NDSU was not long in pushing across the first tally of the evening. Steve Krumrei intercepted a Jim Skarie pass and carried to the UWM 17 yard line. Five plays later Jack Hagan broke into the end zone on a one yard plunge. Ken Blazei converted and the Bison led 7-0.

Ken Rota was the next Bison player to score. Rota carried from the five to cap a 53 yard drive by the Bison. Blazei's boot gave the Bison a 14-0 lead.

Another Krumrei interception gave the Bison the ball on the UWM 30 yard line. On the seventh play from scrimmage, Tim Mjos crossed the goal line for the third Bison touchdown. Blazei's third conversion gave the Bison a 21-0 edge.

Jim Ferge picked off a John Zimmerman pass on the Panther's 34 and carried to the 19. Rota picked up the touchdown on a two yard dive. Blazei's attempt was wide and left the score at 27-0.

Hagen, Mjos and Rota shared the ball-handling tasks on the next Bison drive to the three yard line. Hanson's bootleg around end gave the Bison their fifth tally and coupled with Blazei's kick gave the Bison a 34-0 halftime lead. Hanson's touchdown was the first he has scored in a Bison uniform.

Del Gehrett downed Brian Garvey in the end zone to add a two point safety to the mounting Bison score.

A six-yard touchdown on a pitchout from Bruce Grasamke to Joe Roller capped a 44 yard drive by the Bison. Blazei converted to make the score 43-0.

A breakaway touchdown run by Mjos gave the Bison a 50-0 lead. A few minutes later Del Gehrett pulled in the fifth Bison interception and ran 15 yards for the score, making the score 57-0.

In the fourth quarter, Grasamke scored on a ten-yard rollout and Blazei's kick boosted the score to 64-0. With 43 seconds left, Paul Hatchett took a Grasamke pitchout and rambled four yards to the goal line.

The Bison racked up 500 yards rushing in a 591 yard total offensive effort. The 71 point scoring total is the second highest output

in the history of the Bison and replaces an earlier record in UWM books as the highest total points scored against the Panthers.

Rota and Mjos combined to amass 213 yards. Rota accounted for 136 of those yards in the first half.

Bison understudies got an opportunity to prove themselves as coach Erhardt pulled a majority of the starters out of the ball game after the first half. Erhardt stated that 58 Bison players saw action in the one-sided contest.

Ken Rota (21) adds a few more yards to his 136-yard first half output.

HC features trio, two bands

by D. R. Buchanan

The Mitchell Trio is slated for the Wednesday night concert during Homecoming Week. The trio which will be appearing October 18, at 9:15 at the Fieldhouse was a financial success when it played for homecoming two years ago at North Dakota State University.

"The Mitchell Trio was a last minute thing," commented Mary Popp, ticket chairman. "Last spring, the Special Events Committee under the Student Activities Board was contacted by a booking agency, who said they could deliver the Association to NDSU for the Homecoming Concert. The committee agreed upon the Association, and that was the last we heard until two weeks before school, when the same booking agency called us back and said they were sorry, but they couldn't get the group," said Miss Popp.

"At the beginning of September it was just too late to have a wide selection of entertainment, as just about every school in our area is having their homecoming the same weekend. But as luck would have it, the Mitchell Trio had an open spot for Wednesday during Homecoming week," stated Miss Popp.

Miss Popp further commented that, "We were lucky in getting such a sensational group as the Mitchell Trio at the last minute."

The queen coronation will be held during the Mitchell Trio Concert on Wednesday evening. In past years the concert has been held on a Friday evening, but this year the concert is Wednesday enabling the Student Activities Board to hold a pep dance on Friday night.

The Mitchell Trio, a sell-out at their last appearance at NDSU, have had such recording hits as "The Reverend Mr. Black," "Lucy Baines," and "Pentagonorrhea."

Gordy Singer, Variety Theater booking agent, commented, "The Mitchell Trio have been around singing a lot of hit tunes and the show they put on is really terrific!"

The Seven Sons, one of the hottest groups in the midwest according to Variety Theater, will be appearing at a tennie-bopper dance on Friday the 20th at the Fieldhouse.

The Seven Sons are being flown in for their one-night stand at the Fieldhouse. The dance will begin at 9:00 p.m. Friday night following a pep rally to be led by the Rahjaks and Cheerleaders.

"The dance will be a chance for the kids to really fire up for the game," according to Mary Popp, tickets chairman for the dance.

The Seven Sons were recently honored as an outstanding dance band by the National Ballroom Operators Association which held its annual convention at Chicago. The association cited the group for their outstanding contributions to the ballroom industry and praised them for having a neat appearance, providing a wholesome form of entertainment and top quality dance music.

The Seven Sons have backed up the Mamas and the Papas,

Mitch Ryder and the Detroit Wheels, Herman's Hermits, The Animals, and the Lovin' Spoonful.

Lee Castle and the Jimmy Dorsey Orchestra will be playing at the annual NDSU Homecoming dance October 21. They have recently completed engagements at the Steel Pier in Atlantic City, New Jersey, and New York's famous Riverboat Room.

The 17-piece orchestra is composed of five saxophone players, four trumpet players, three trombones, a pianist, drummer, bass-violinist, vocalist and Lee Castle, the orchestra leader who plays the trumpet.

The Jimmy Dorsey Orchestra duplicates the sounds of the famous Dorsey brothers who scored with such favorites as "Green Eyes," "I Hear a Rhapsody," "Manhattan," and "Sweet Georgia Brown."

Frank Sinatra commented in an interview that "Lee Castle, whom I have worked with is one of the few musicians who I respect. He can carry out the great tradition of the Tommy Dorsey - Jimmy Dorsey music. His many years of association with these outstanding and brilliant musicians make this possible."

"Reduced prices for the Homecoming weekend will be available for all NDSU students," according to Mary Popp, ticket chairman. Miss Popp explained, "This year we are offering a special plan whereby students can buy tickets for the Mitchell Trio, Seven Sons dance, and Jimmy Dorsey Orchestra for either \$5.00, \$4.50, or \$4.00, whereas, if you bought these tickets separately they would cost you \$9.00."

Tickets are available at the Memorial Union checkroom.

The Seven Sons will play for the October 20 Homecoming dance in the Fieldhouse.
