Union Gets Face Lift For Efficiency

by Cheryl Ellis

Graciousness was ousted from the Bistro Grill and order is defeating chaos on the second floor of the Union as a result of some impressive summer remodeling.

The Bistro Grill, renowned campus eating place and possessor of THE WALL, is the major make-over of the summer. Wood paneling was added around the lower half of the room, and the walls were painted a warm brown. The YMCA Suit Ends in 50-50 split

Settlement of the law suit brought by the NDSU YMCA against the NDSU Memorial Foundation, NDSU and the North Dakota Board of Higher Education was finally reached last May. The dispute over the legal ownership of the property located at the intersection of University Drive and Twelfth Avenue North (site of Williams Drive-In) ended with a fifty-fifty split between the YMCA and the Memorial Foundation.

The "Y" and the Foundation each received $42,020.50, half of the 1969 appraised value of the land and half of the income on the property while it was leased by the Foundation. The property remained in the possession of the Memorial Foundation.

The suit was the result of two different interpretations of an agreement between the University and the University YMCA in the property formerly occupied by the "Y" before its building was destroyed in the tornado of 1957 in exchange for facilities to be built on campus south of Sheppard Arena.

After the termination of the agreement between the V and NDSU, the Y notified the University that it had not constructed a building or facilities for the V. The Y asked for the return of property and an accounting of the rental receipts.

When negotiating committees failed to reach an agreement out of court, the case was tried. The court awarded the V and the Foundation each half of the present value of the land and half of the total income on the property since 1960 when Williams Drive-In opened and leased the land from the Memorial Foundation.

The money awarded to the YMCA has been invested until the Y decides whether it will build a new building or lease or buy a building to house its facilities.

At present, the University intends to continue leasing the property to Williams Drive-In, until it is needed for more University facilities.

SPECTRUM VOLUME NUMBERS

Dedicated readers will note some discrepancies between the year's volume number 60 and last year's volume number of 48.

There is doubtless a reason for the discrepancy, but thus far we have been unable to find out what the reason is.

Ben Gross, the head of the bindery at the Library, brought the matter to our attention, and it is through his efforts that we were able to remedy the problem.

Seems that the last volume properly ordered was in 1953-54 (which no doubt confirms ideas some people have that the Spectrum has been messed up for quite some time). That year was volume 69, making this year volume 85. Very simple.

Philosophy Education Upgraded

An entirely new program to upgrade the teaching of philoso-

philosophy has been implemented at NDSU. Operating in conjunc-

tion with the Common Market, the program is designed to bring the undergraduate students the highest quality instruction in the country, according to Dr. Jovan Brikic, program director.

Sponsored by a $7,240 grant from the National Endowment for the Humanities and funded as a pilot project for other small colleges, the new program will feature lectures by national and world-wide experts in special fields of philosophy.

Brikic explains the program has special merit for the Common Market, since the undergraduate faculty at the three schools, NDSU, SDSU and Concordia, is the equal of most large undergraduate facilities at prestigious Schools in the U.S.

"At schools like Harvard and Columbia, most undergrad philo-

sophy courses are taught by grad-

uate students," says Brikic. "We will have all Ph.D's instructing undergraduate students — an op-

portunity granted very few stu-

dents at other schools.

"Using the present faculty as a base, we will be bringing in nationally-known experts in philoso-

phy to lecture on their individu-

al specialties."

Careful selection of the visiting lecturers will, according to Brikic, provide philosophy students with excellent teaching equal to any offered in the country.

Brikic stresses the importance of in-

struction" when speaking about the program. All lecturers, books and the entire course will be evaluated by participating stu-

dents. The aim of such evalua-

tion is to provide guidelines by which the merits of the program may be measured and to guide other programs in the future.

"Our aim in this project," says Brikic, "is to develop instruction in philosophy commensurate with the needs of the twentieth cen-

tury. Teaching has not really changed in 2500 years. We might be able to improve on that.

"We have stressed both academ-

ic qualifications and teaching ex-

cellence in choosing our lectur-

ers," says Brikic. "In this area we have ten men highly qualified in undergraduate instruction. When we add our lecturers to that, we will have a program here second to none."

Brikic is enthusiastic about the application of the technique to other colleges and universities.

"All across the nation, students have been forced into teaching 'irrelevant' courses. Only about ten per cent of mate-

rial in libraries is really worth reading. By having students evalu-

ate all aspects of these courses, we can work to provide relevant education as well."

In addition to instructing classes, the visiting lecturers will be in the area for one or two days. During this time they will work with the faculty at the three colleges in improving their education programs.

While upgrading of instruction is one goal of the program, Brikic also feels that demonstrating ed-

ucation improvement within the present financial structure will provide a benefit to education.

"Money alone is not the an-

swer to educational problems," says Brikic. "The answer is not in developing big departments at a cost of many thousands of dollars annually.

"I feel the taxpayer has been sold a very expensive bill of goods. We want to show what can be done without exceeding the regular school budget."

Brikic points out that the entire (Continued on Page 15)
There are lots of surprises in the great new put-together looks for this semester's separates. Everything adds up when you use your ingenuity and remember that innovations are important in pairing unexpected units of colors, texture and trim. Use layers of separates to achieve the neat and narrowed lines that lead to these fashion "''''

One Man Show in Hultz Lounge

An exhibition of oil paintings and prints by Minneapolis artist Fossum is now on display in the Hultz Lounge Gallery and will be showing through September 29.

Fossum, a native of Aberdeen, S.D., has studied and taught at many institutions and universities throughout the United States and Mexico, including the Minneapolis School of Art.

Consisting of 27 works, the exhibit is unusual due to the variety of materials used. Fossum has combined ink, crayola and acrylic in one work. Also, ink drawings, pastels, water color, color ink and charcoal are used in producing his works.

Fossum will appear in the Hultz Lounge Gallery on September 16 at 8 p.m. for a gallery lecture.

Married Students Protest Housing

Disatisfaction with the new married students' housing complex has prompted some students to take action in a belated attempt to change the units.

A petition drive was begun, but according to Steve Cann, drive leader, it appears that any efforts to make changes will fail.

"It's really too late to do anything," said Cann. "I don't think we can effectively pull off a boycott now, because there would be little financial damage to the university."

Norman Seim, director of housing, said he knew nothing about the petition drive.

"As the construction of the new housing progresses, it seems that students are having a better opinion of the facilities now than they once did," said Seim. "Many of the areas resemble those in the new dormitories."

Protest Housing

Married students are having a better opinion of the facilities now than they once did.

As Students Overflow Dorms

An expected high fall quarter enrollment has caused about 120 women and 12 men to live in rather non-private accommodations.

Overflow costs fill floor lounges and recreation rooms or share a room with two or three other girls.

Lack of space is the main problem causing overflow housing. All students were notified of the predicament by the housing department before they came, so they knew how much they could bring along. Women students have only about two dressers and a locker for storage.

So far overflow students have taken the situation in stride. One girl living in North Weible's basement said she thought it was a "lot of fun" and "a great way to get to know many girls in a short time." She concurred that the girls expected worse than what it is.

Many of the areas resemble barracks - bunk beds, lockers, etc. In Burgum Hall a phone was installed in a dorm room for the girls. Desks and card tables were set up for studying.

Occupants of overflow were informed that some might have to live in the quarters for the entire fall term. In past years, overflow housing was usually emptied in four to six weeks following the beginning of school.

This summer the housing office took measures to reduce the overflow by sending letters asking students to cancel their room reservations if they did not plan to return to school. If done by August 1, students received a full $25 refund, with lesser amounts refunded after that time.

This was done so the college could have the earliest notice of housing cancellations and be able to move students more quickly into regular housing.

Every year the number of registered students not actually returning is decreasing. Students apparently have more definite plans about attending college. Students who do not show up account for less than two per cent of housing requests, or about 20 beds on the entire campus.

An increase in the number of students enrolling in college and a lack of funds available to the college for building bring about many of the overflow problems.

Two years ago SU requested funds to build two high-rise dormitories. Because of lack of funds, the applications were turned down. Another application last summer was also denied for the same reason.

Currently there is sufficient housing for 1351 men and 974 women, an increase in the past six years. Within that time SU has added seven new dormitories, Burgum, Reed-Johnson, North Weible and South Weible, and the Two High Rise dorms.

Overflow is also caused by regulations requiring women students not living at home to move into university housing.

Freshmen men under 21 not living at home must also live in campus housing.

Spectrum Policy

At the beginning of each year it is expected that a Spectrum Policy be established to guide future issues. This year will be no exception.

Many have made of the sensational and controversial happenings on campuses across the nation. There are those who believe that these matters constitute the only "relevant" experiences campuses today.

We don't believe it!

While the importance of the controversial is not to be denied, there are other matters on today's campuses, and here at NDSU, which are equally important. These happenings deserve their play in this paper, and we will do what we can to bring them to your attention.

In the past, papers here at NDSU have been criticized for being too "conservative" or too "left-wing." It is hoped that no one will be able to successfully pin a label on the paper this year.

One of the hallmarks of left and right-wing political movements alike is a reliance on emotionalism as a pervading force in examining changes.

We don't like it!

Rather than attempting to be the exclusive voice of any one political, academic, or social group on the campus, we will strive to be the voice of rationality. Rather than berate, we will examine. Rather than criticize alone, we will attempt to offer constructive alternatives as well.

It is unclear at this point whether such ideals can ever be achieved. We must confess that we really don't know. Nonetheless, it is an interesting starting point for the year's labors.

Not that anyone should get the idea that the policies of the past year will be wholly done away with. They assuredly will not. Rather, under the opening year a development and a furthering of the aims of last year.

It should be interesting.

NEWS COVERAGE

There will undoubtedly be a great deal of gripeing by certain organizations that their activities are not properly covered. See accompanying article on the next page.

WE NEED STAFF!!

Student organizations will find that advertising in the Spectrum brings better results than hanging posters or distributing handbills. We have a special rate for student organizations as well as competent advertising artists to assist you. Contact our business staff for information.

NO POLICY STATEMENT WOULD BE COMPLETE WITHOUT SOMETHING ABOUT ALL THOSE NASTY WORDS EVERYONE KEEPS HEARING ABOUT.

You see such words in print, you may be sure a great deal of thought went into their publication. Such matters as correct usage in contemporary language. Not that anyone should get the idea that the policies of the past year will be wholly done away with. They assuredly will not. Rather, under the opening year a development and a furthering of the aims of last year.

To the Editor:

This is generally the most fun part of the whole paper. You will find (such as this week) that some people are compulsive letter writers — at least the same names keep popping up. Readers are encouraged to write letters, and we in turn will attempt to print as many as possible. Letters should be typewritten, double-spaced and be of no more than 500 words. Names may be withheld if stipulated by the writer, but all should be signed upon reaching the Spectrum office. Unsigned letters will be thrown out! Writers of letters will be responsible for their content, and we reserve the right to comment on any letters printed.

THEOLOGICAL DISCUSSION

To the Editor:

Now that most everyone's inhaled yet another summer, the transition from leisure to studying begins. To most students this is not an exceptionally difficult task. But for the nervous freshman, the transition is fraught with anxiety. Whether or not one enrolled in the program, it was easy to see the fine job done by the NDSU Insurance Committee and its chairman, Larry Henning. Although Larry would be the first one to deny his part in the excellent program, it was he who first came to me and asked to work on some committee to help market students insurance. I salute him in his effort.

Terry Grimm

Student Vice President

NDSU boasts the number ONE institution in the tri-state area. In a direct comparison with that other "college" north of here, NDSU exhibits the air of an important educational institution. Yes, without law and order our nation may remain independent of every other country. Unfortunatley, my knowledge of socialism is quite limited, but I should think they advocate similar practices.

LETTERS to the editor

Walsh Play Earns Praise

To The Editor:

It was my pleasure to enjoy this summer's Little Country Theater production of The Peripatetic Bartholomew Bone. The play was written and produced by Dr. Walsh.

I feel the entire student body would appreciate a chance to see and enjoy this quality product, conceived and executed entirely from within the University. A second run of this show would most certainly be a success.

If anyone should object to a second run on the basis of the forum review, I can at best say that the review was unfair, unfounded and just plain inaccurate.

Dr. Walsh and the Speech and Drama department would do well to present again this truly entertaining play.

Kenne Salig

Hunters Note

To The Editor:

In past years we have had incidents whereby some non-resident students in our colleges and universities have either hunted or fished without permission. This problem has been handled by the Department of North Dakota licenses — with the result that they were processed and not released to purchase non-resident licenses.

We believe it would be in the interest of all your non-resident students if your office would help bring to their attention the fact that they will be required to purchase non-resident hunting or fishing licenses before they engage in hunting or fishing in North Dakota.

North Dakota Game and Fish Department

KDSU launches new talk show

Connie Johnson selected for World Campus afloat

Connie Johnson of Dilworth, Minnesota, a home economics major has been admitted to the World Campus Afloat program of Chapman College for the fall 1969 semester at sea.

Miss Johnson will join 500 other students representing 200 colleges and universities in nearly all the 50 states on Oct. 9, and board the S. S. Ryndam in New York harbor for the study-voyage to ports in western Europe, the Mediterranean and South America.

Students carry a regular semester's units on the shipboard campus. They attend classes six days a week on the vessel. The shipboard campus is equipped with classrooms, laboratories, library, art studio and student union.

Adhere the academic program includes pre-arranged lectures, seminars and field trips directly related to course work.

Connie Johnson

KDSU radio, stereo FM, will present a new audience participatory talk show afloat in early September.

Host Jeff Levy will present special guests discussing items of current interest on a wide variety of subjects, and the listening audience is invited to call in questions or comments on the Hot Line, telephone 237-4215. The show will be aired every Thursday evening from 9:00 to 10 p.m.

KDSU program guides for fall quarter are now available and may be obtained free of charge from the Union Information Desk. KDSU is the broadcast service of NDSU and is operated specifically for the benefit of the community on a non-commercial basis.

KDSU is on the air Sunday through Friday from 3:30 p.m. to midnight at 91.9 on the FM dial.
Columbia, Barnard Initiate Faculty Evaluation

New York, N.Y. — (L.P.) — Probably the most noticeable change in the latest edition of the Course Guide at Columbia and Barnard Colleges, the men's and women's undergraduate liberal arts colleges of Columbia University, is the addition of a series of nine letter grades for each professor and class. The grades are given in areas such as content, interest, clarity, and worth.

Among other innovations in this year's guide are critiques of departments as a whole and a review of all the degree requirements, including individual evaluations of most teachers in the multi-sectional freshman and sophomore general education courses at Columbia College.

"This year we greatly increased the scientific rigor of our survey. For the first time we used Columbia's computer system to sort and digest a lot of our data," Arthur Kokot, who headed the staff of dozens of writers and editors, explained. "The grades we gave are based directly on our statistical results."

Kokot noted that using the computer enabled the editors to check certain correlations. Among the findings: a lack of statistical relationship between the grades students gave their professors and the grades the students received from them.

"This is definitely not a sour grapes project," he said. For example, physics professor, Polykarp Kusch, the Nobel Prize winner who was recently named to Columbia's top academic post, the university vice-presidency, has a reputation as a severe grader. Nevertheless, he received very high marks from his student critics.

The guide noted that Kusch "is living proof that brilliant physicists can be brilliant teachers...His lectures reflect a master teacher of the subject, superb organization and an uncanny ability to communicate difficult ideas."

A reading of the guide's evaluation indicates that students are discriminating and can separate quite precisely different aspects of an instructor's classroom performance.

One professor is "probably the most thoroughly prepared and tightly organized lecturer at Columbia — he is also probably the dullest." He received an "A" in clarity, an "F" in speaking style.

When the students feel that praise is called for, they do not hesitate to supply it. A. E. Bryan Heading, a popular sociology instructor, is called "witty, alive, vibrant, magnificent, nirvana — and organized."

Health Center Schedule Set

New procedures have been instituted in the Student Health Center concerning doctor appointments. Hours and new procedures were announced by health center nurse Myrtle Johnson.

Doctor's hours will be limited to three hours per day. Appointment will be made either by phone or in person for consultations. The nurse will screen patients and refer necessary complaints to the doctors for attention.

In cooperation with the College of Home Economics, special diet counseling is available in Room 220 of the Home Ec buildings. Hours are 10 to 11 a.m., Mondays and Wednesdays, and 2 to 3 p.m. Wednesdays. Appointments will be for a half hour.

Students requiring special diets should see Mr. Bancroft at the Food Center to request special foods.

Health Center hours are as follows: 8 a.m. through 3 p.m. Monday through Friday — Nurses hours, 12:30 through 3:30 p.m. Monday through Friday — Doctors hours, 8 a.m. through 12 noon Saturday — Nurses hours.

After 5 p.m. and Sundays — Emergencies only.

IDEA Conference Explores Educational Problems of ND

Discussion at the Instruction Development - Educational Achievement (IDEA) Conference held in the University September 3, ranged from the inadequacy of North Dakota high schools to the reorganization of the system in North Dakota.

Approximately 150 persons attended the all-day conference. Dr. John Schwartz, assistant professor of the SU '75 project, Dr. L. D. Loftsgard, speaking of the SU '75 project, Dr. Loftsgard explained that its purpose is to assess the present conditions at SU, SU's aspirations, and to make plans in order that these aspirations may become reality.

Loftsgard stated four components of the project: 1) academic accomplishment, 2) human advancement, 3) land grant commitment and 4) physical facilities.

With projects such as the IDEA conference and SU '75, Loftsgard said there will be "a think-tank in progress at NDSU."

After keynote statements by professor Dale Anderson, student president Butch Molin, and academic vice-president David Warden, the conference split into small discussion groups of 20 persons with the assignment to come back with problems of education at SU. This job gave the groups no trouble. Each of the nine groups reported to the luncheon with a dozen problems. Many of these overlapped, pointing to the most serious problems.

Among the wide-ranging topics assigned to the groups were curriculum, student advising and preparation, grading, large classes and teacher self-improvement.

The freshman college was a topic much in discussion through the day. This is a system where all freshmen are placed in the same curriculum for one year. Through this program, it is suggested that the freshman student would be able to explore the many vocational fields available at university. In line with this, grade probation periods were condemned for allowing freshmen to meet with failure up to three quarters before receiving counseling.

Other suggestions and problems brought out by the conference were: SU image, scheduling, expanded use of the "Common Market" program, junior and senior class participation in freshman advising, and advising and counseling procedures and equipment.

"There seems to be one item that appears most frequently — the matter of advisors and the solution of student problems," said Dr. David Warden, acting president for academic affairs, in summarizing the conference. "I hope the students here sensed the concern of faculty for students."

Wooden added that while faculty members would like to send post cards to parents advising them on their son's or daughter's progress and to get together more often with students and other faculty, the mutually limiting factors of time and workload present a major road block.

"The obvious focal point illustrated here for improving our graduate instruction centers on faculty commitment and student responses," Wooden concluded.

Minutes from each group meeting and reprinted summaries will be used by the NDSU Educational Development Committee as the basis for a year-long study culminating in a publication of a set of recommendations and priorities aimed at improving the quality of instruction at NDSU.

618 1st Ave. N., Fargo
Back in 1965 my father worked in Turkey for six weeks as an Engineering Consultant. When he returned, he knew that his knowledge of irrigation was needed in the “Third World” - that is, in Zambia. In March of 1968 he started correspondence with California Polytechnic College in San Luis Obispo for an Agency of International Development contract as an irrigation consultant.

His papers travelled from Fargo to Calgary to Washington to Turkey to Fiji and back to the same route as far as California. In November we started getting passports, shots and all the silly nonsense that one must go through in moving. The family finally left in January of 1969. We got to Zambia in early February after spending a week in Amsterdam getting used to the climate, then a week in Salisbury and it was a real shock. In the shop in Salisbury and it was a real shock. We went to a window inspection station, also figured in the native workingmen on the station lived in the compound. Showers and toilets were public as were the few water taps. They cooked their meals outside and the “rich” ones had beds. A real sign of status! A few minutes walk away were the bush and mud huts with thatched roofs, probably one house for each wife.

Their houses really shocked me at first, until I realized that this was their way of living - at least they have houses! Biafra and parts of India aren’t that good. There’s a housing shortage in the cities, for Europeans, Asians and Africans, but then, where isn’t there?}

Comptroller Appointed University Vice-Pres.

Appointment of H. Donald Stockman as vice-president for business and finance at North Dakota State University has been announced by President L. D. Loftsgard.

Loftsgard made the announcement following approval of the appointment by the State Board of Higher Education, meeting Thursday, Aug. 21, at Bismarck.

The 37-year-old Stockman will take over the new post immediately. He has been comptroller at SDSU since August of 1968.

In making the announcement of Stockman’s appointment, Dr. Loftsgard said the new title more nearly describes the responsibilities and authority that is now vested in the university’s chief financial officer.

The change also “makes it more commensurate with organizational alignment and responsibility,” Loftsgard added.

Stockman becomes the third man to be appointed a vice-president at SDSU in the past 10 months. The other two are Drs. David Warden, vice-president for academic affairs appointed in October, and Kenneth Gilles, appointed vice-president for agriculture last January.

A native of Grenora, Stockman was graduated cum laude from the University of North Dakota in 1957. He holds a master's degree in business administration from UND, conferred in 1965. He is also a certified public accountant. Prior to coming to SDSU, Stockman had been business manager and acting director of the UND-Williston Branch.

Stockman is a graduate of Williston High School, and has also attended the University of Colorado and University of Omaha. During the Korean War he served three years with the U.S. Marine Corps.

Following graduation from UND, Stockman joined his family’s automobile business in Williston. He is the son of F. H. Stockman of Williston.

Stockman is a member of various professional organizations and also holds membership in the Elks, Masons, Veterans of Foreign Wars, American Legion and other fraternal groups. Stockman and his wife, Sonya, have four children, Donna, 15; Stephen, 13; Leslie, 10, and Teresa, 8.

The native workingmen on the station lived in the compound. Showers and toilets were public as were the few water taps. They cooked their meals outside and the “rich” ones had beds. A real sign of status! A few minutes walk away were the bush and mud huts with thatched roofs, probably one house for each wife.

Their houses really shocked me at first, until I realized that this was their way of living - at least they have houses! Biafra and parts of India aren’t that good. There’s a housing shortage in the cities, for Europeans, Asians and Africans, but then, where isn’t there?

Sixty-two Appointed To Post On Faculty And Staff

New 1969-70 academic year faculty and staff appointments have been announced by President L. D. Loftsgard. Effective September 1, unless otherwise indicated, the North Dakota Board of Higher Education has approved the following appointments:

Dr. Steven H. Albrecht, assistant professor of chemistry, formerly of Spear Carbon, Niagara Falls, N. Y., where he served as a research chemist. Albrecht received his B.S. at St. Olaf College in 1961 and Ph.D. at NDsu in 1966.

Dr. John P. Collette, assistant professor of sociology, Ph.B. in 1960 and M.A. in 1963 at the University of North Dakota and Ph.D. in 1969 at Ohio State University. Dr. Jay K. Donaldson, assistant professor of education, psychologist and project director for the Juab School District, Juab, Utah, B.S. University of Utah 1953, and Ed.D. Brigham Young University 1969.

Dr. Allen J. Henderson, assistant professor of industrial engineering, B.S. in 1965 at SU, and M.S. in 1965 and Ph.D. in 1968 at Iowa State University.

Dr. Myron D. Johnston, state leader of personnel and program development in extension and assistant professor in extension, effective July 1, B.S. in 1957 at SU, and M.S. in 1967 and Ph.D. in 1969 at the University of Wisconsin.

Dr. John W. Knoeck, assistant professor of chemistry, a research associate for the National Bureau of Standards in Washington, D.C., B.S. in 1965 at University of Wisconsin, and M.S. in 1966 and Ph.D. in 1968 at Iowa State University.

Dr. Hugh J. McDonald, associate professor of agricultural economics in extension and grain marketing economist, effective July 15, B.S. in 1955 and M.S. in 1960 at Kansas State University, and Ph.D. in 1969 from Ohio State University.

Dr. Donald M. Matheson, associate professor of mathematics, an assistant professor of mathematics at the University of Alberta, B.A. Concordia College 1960, M.A. 1962 and Ph.D. in 1965 at the University of Nebraska.

Dr. Carl R. Miller, assistant professor of physical education and director of physical education, B.S. Wisconsin State University 1940, M.S. Winona State College 1943, and Ed.D North Texas State University 1962.

Dr. Gary Narum, assistant professor of education, a counselor at a senior high school in Laurel, Wyo., B.S. at NDsu in 1964, M.A. Purdue University 1967, and Ph.D. at University of Wyoming in 1969.

Dr. James S. Quick, associate professor of agronomy, effective August 1, formerly an assistant geneticist with the Rockefeller Foundation, B.S. in 1962 at NDsu, M.S. in 1965 and Ph.D. in 1966 at Purdue University.

Dr. K. Nageswara Rao, assistant professor of mathematics, formerly lecturer in mathematics at Sri Venkateswara College in New Delhi, India, B.S. in 1965 at University of Wisconsin, and M.S. in 1966 and Ph.D. in 1968 at Iowa State University.

Dr. Jeannine M. Sargent, assistant professor of soils, effective August 1, B.S. 1962, University of the Philippines, M.S. in 1966 and Ph.D. in 1969 at the University of Missouri.

Dr. Paul R. Rowe, associate professor of mathematics, from post-doctoral work at Harvard, B.S. Brigham Young University 1949, M.S. 1953 at University of California (Berkeley) and Ph.D. 1960 at Washington State University.

Other newly appointed professors are Mrs. June Phelps Mendenhall, assistant professor of English; Carlo DiCicco, professor in architecture; Dusine L. Dods, extension soil conservationist and associate professor of conservation, effective July 1; John W. Firestine, extension agricultural editor and associate professor of communications; William P. Grassmann Jr., assistant professor of public relations; Robert H. Hare Jr., associate professor of mathematics; Vincent W. Hattin, assistant professor of architecture, and Jamshid Khalili, assistant professor of psychology.

Mrs. Patricia Murphy, assistant professor of home economics education; Larry D. Sand, assistant professor of agricultural economics; Mrs. Beverly Slotten, assistant professor of homemaking education, and James F. Storey, assistant professor of homemaking chemistry, October 1.

Newly named instructors are Charlotte A. Amundson, art; John R. Berland, economics; Mrs. Nancy J. Breckinridge, assistant cataloger and instructor in library science; William Brunton, biochemistry; James J. Driscoll, physical education; Jerry S. Ebel, civil engineering; Elliott J. Heu, geological engineering; Martin G. Hoag, instructor and scientific programmer in electrical engineering; and Donald Krogh, speech and drama.

Donald Larew, physical education; Curt T. Miller, chemical engineering; Gary W. Miran, instructor and assistant editor in communications; James M. Mur­ ray, instructor and assistant editor in communications; Landon Nichols, visiting instructor in history; Edward O'Kelley, instructor in economics; David M. Hess, instructor in economics; B. Lou Waters, instructor in communications; Vernon C. Schieder­ feld, geological engineering; Stanley R. Shubila, instructor in mathematics, and John L. Tilton, instructor in communications.

Numbering among newly-named administrative staff members are Donald W. Berger, assistant in agricultural economics; Eugene H. Blumberg, administrative assistant in admissions; Lawrence Dusier, Union program director; Richard Gorgie, assistant Union director, James R. Hetland, chief radiotelephone engineer; Dolores M. Hochmuth, area home extension agent; Miss Phoebe A. Kirmir, assistant cataloger in the library; Terrance D. Lykken, assistant county extension agent; W. Michael Morriss, University Professor of Education; Charles R. O'Brien, counselor in the Counseling Center; Neil R. Biever, associate director of hospital housing; Mrs. Shirley Underwood, clinical supervisor in speech, and Loren B. Willard, computer programmer.

You can say good looks and comfort in one word . . . FARAH. Try a pair of these superb slacks and see,

THE SPECTRUM
September 11, 1969
Violent Student Protest Is Keyed
To Frustration Over Control

Chicago, Ill. — (I.P.) — Three University of Chicago scholars recently related violence in student protests to the frustration over lack of control that students have over their own environments.

Discussing causes of student protests were Joseph J. Schuw, the William Rainey Harper Professor of Natural Sciences in the College and Professor of Education; Dr. Daniel X. Freedman, Professor and Chairman of the Department of Psychiatry, and Charles W. Wegener, Professor in the New and Humanities College Division.

Schwab asked Freedman on the weekly television discussion program, 'The University of Chicago Round Table,' if there were any connection between violence in student protests and the tantrums of small children.

' I think there is,' Freedman said. 'You can get at the tantrum in terms of loss of control by the child over his environment. The trouble with a tantrum is that it escalates. Where structure breaks down, the tantrum is an attention-getting and attention-seeking discharge.'

'Well, then,' Schwab said, 'that begins to fit in because these kids, by virtue of their fantasies about where power lies and how easy it is to grab it and how easy it is to exercise once you get it, have really never developed much power over the environment.'

Wegener: 'That's what I meant by saying that they don't know how you get things done. Almost literally, politically, politically, artistically — they don't know how you get any sort of effective control over the environment except in the simplest kind of physical way: They jump up and down and yell.'

Bison To Open 73rd Season Sept. 13

The Bison are pitted against the Northern Illinois Huskies Saturday night in the opening of the 73rd football season for SU. The all-time Bison football record is 250 wins, 243 losses and nine ties. The Bison won their first opener, 20-4 against UND in 1894. They have now won five straight openers. SU has won five straight openers in six different stretches — but never more.

Last season was the first time Northern Illinois and SU met. The Bison won that contest 31-13 with the benefit of a strong passing attack. Now Northern Illinois has a new coach, Doc Urich, and a new type of passing attack, featuring the roll-out quarterback, rather than a "pocket" passer.

The Bison have four fine linebackers, led by 235-pound converted defensive tackle, Phil Stolzak. Since the Huskies suffered through a 2-8 season last year, they will be pointing toward their game with the Bison as the start of better things.

Bison head coach Ron Erhardt - the perfectionist always — seems dissatisfied as he views last Saturday's scrimmage. (Photo Courtesy Don Kyser)

After you've paid for it, it starts paying for itself.

We didn't want our bug to be a hog. That's why we made it go about 27 miles to a gallon of gas.

And why we persuaded it to take a load of fruit.

And why we gave it an air-cooled engine. (Air is free. Antifreeze isn't.)

And why we put the engine in the back so you get more push from the rear wheels. (And less pull from tow trucks.)

And that's why at trade-in time if things are still the same as they have been, you can count on getting back more of your initial investment of $1998 than practically every other car owner gets of theirs.

Which is only right.

After all, why shouldn't the car that's been saving you money while you own it do the same when you sell it?

Herd Up For Northern Illinois

Saturday night is the night all Bison football players have been working for since August 23. Those grueling two-a-day pre-season workouts are behind them, and now all that hard work must pay off. The Bison are seeking to repeat their success of last year without the benefit of three offensive starters and eight defensive starters who have graduated.

Both offensive starters, the entire defensive line, two linebackers and two defensive secondary men must be replaced. The Bison offense promises to be explosive with the return of the entire backfield, but the defense will be inexperienced.

There are several key players who must answer the question of whether or not the NCAA College Division champion Bison can remain on top. Co-captains Bob Hyland, an offensive guard, and Ed Helgason, middle linebacker, must provide the leadership necessary to keep the team fired up. Both Hyland, returning all-conference performer, and Helgason, leader on the Bison defensive charts last season, have the ability to lead with their actions as well as their words.

All-American halfback Paul Hatchett will be a marked man. Perhaps it is too much to expect him to have a season like he had last year when he became the first runner in school history to rush for over 1000 yards in a single season. With the return to good health of his running mate Mjos, himself an all-conference performer two years ago, the Bison ground game should be excellent.

Quarterback Bruce Grasamke must have another good year in order to take the pressure off the running backs. Record-setting half end Chuck Wald must get more help from the other receivers such as tight end Les Nicholas.

Defensive backs Steve Krumrei and Rick Cover return to give experience to the untried defense. An injury to either one of them could be disastrous.

In fact, injuries could mean the difference in 1969. The Bison are not as deep as they used to be—there are few experienced reserves.

Although there are many "ifs" on the Bison football team, many area coaches would like to have problems such as coach Ron Eberhardt has. SU is likely to be the favorite in most, if not all, of their games.

Football’s An Expensive Game

Dressing a football team involves a large investment. Although no two football players need wear the same equipment, there are certain standards for protection and propriety that must be followed.

When one of our Bison football players steps on the field he may be wearing as much as $180 worth of equipment. Helmets cost $18.95, jerseys are $6.00, pants $16.00, hooded sweatshirts $5.95, bad-weather capes about $25.00, shoes $23.00, face masks $2.00, "pro" socks $3.00, forearm guards $4.95 and hand pads are $4.75.

Equipment that is not visible includes shoulder pads, which cost anywhere from $20.00 to $50.00, depending on whether they have to be specially made; thigh pads are $6.00; knee pads, $4.00; supporters, $7.50; T-shirts, $1.50; gym shorts, $1.50, and sweat sox $1.50.

Multiply this $180 by 11, and you may have as much as $1980 worth of equipment on one side of the line of scrimmage. Multiply this $180 figure by 65 (the number of players on the Bison grid roster), and you have an investment of $11,700 in equipment for the SU team.

Additional investments are sometimes necessary to accommodate individuals, who, because of their recent successes, are in need of larger helmet sizes.
**Cross Country Season to Open Sat.**

The NDSU cross country team will open its season Saturday, September 13, at 11 a.m. with a dual meet against Northern State of Aberdeen, S.D. All Bison home meets are run at the Edgewood Municipal Golf Course.

Coach Roger Grooters has a nine-man squad in this, his third season as cross-country coach. Captaining the squad is Mick Schroeder.

Junior team members are Tom Ellingston and Dick Baldner. Schroeder is a sophomore.

Newcomers to the squad are freshmen Marv Skarr from Fargo and Steve Merkert, from Bismarck.

Lussenden, an outstanding runner at Bismarck High School, is expected to lead the Bison runners again this year. Last season he posted the best time for SU in all meets. His best time for the four-mile cross country run was 20 minutes, 25 seconds.

An eighth-place finish in the North Central Conference meet by Lussenden helped the Bison to place fourth in the conference last season.

Career track bests of 2:08.1 in the mile, 4:42.6 in the two-mile run, as a high school senior at Bismarck. Lussenden ran a 4:20.4 mile, fastest ever for a North Dakota high schooler.

**Cross Country Schedule:**
- September 12, NDSU dual meet vs. Northern State at Edgewood, 11 a.m.
- Sept. 27, U. of Manitoba Invitational at Winnipeg, Man.
- October 4, Bemidji Invitational at Bemidji, Minn.
- Oct. 11, UND Sioux Invitational at Grand Forks, 10 a.m.
- Oct. 18, NDSU Homecoming-Bison Invitational, college and high school, 10 a.m.
- Oct. 21, NDSU triangular, 4:30 p.m.
- November 1, North Central Conference Meet at UNI, Cedar Falls, Iowa, 11 a.m.; Nov. 15, NCAA National at Wheaton, Ill.
- November 23, NCAA National at Wheaton, Ill. (unofficial). The last time an SU game ended in a tie was in 1960, when the Thundering Herd tied USD-

Ron Erhardt, SU’s athletic director, has compiled an amazing, record in his three-year tenure as head football coach. Erhardt’s coached Bison teams have won 27 games while losing only three, and all three teams have gained national ranking.

Erhardt has coached the Bison through two straight unbeaten nine-game regular seasons. Both teams made appearances in the Pecan Bowl and last year’s national champs defeated Arkansas State 23-14. Erhardt’s coaching efforts have won him recognition as the top College-Division coach in the 10-state Sixth District the last two years.

**BOWLING TEAM TRYOUTS**

Tryouts for the SU bowling team will be held September 19-20 in the Union. The two-day roll-offs will enable first-year coach Wayne Brand to choose his eight squad members. Five of these eight bowlers will bowl in meets. Prospective squad members should sign up in the games room of the Union for the 15-game, no-handicap rolloff.

The SU bowling team is a member of the Central Division of the Midwest Intercollegiate Bowling Conference. Last year the team took second place in the Tri-State Conference.

All bowlers must be eligible scholastically and cannot have bowled in a league for money.

**BISON OUT TO PROTECT STREAKS**

Several winning streaks are on the line for the Bison football team in the 1969 season. The Thundering Herd has won 24 straight home games, dating back to the 1963 game with UND. Their current overall winning streak is 10 games, dating back to the 1967 Pecan Bowl loss against Arlington State of Texas.

Perhaps the most impressive winning streak of the Bison is their string of five straight North Central Conference titles—something that no other school in the conference has ever accomplished. The Herd have either won outright or shared in every NCC title since 1964.

The Bison are also seeking their sixth consecutive opening-game victory. Never in school history has the Herd won six straight openers.

Another streak on the line is a string of 82 games without a tie. The last time an SU game ended in a tie was in 1960, when NDSU tied us 14-14.

**CICHY MAKES SWITCH**

Former Bison quarterback Joe Cicly has effectively made the switch to defensive halfback. Cicly, a star quarterback at Shanley High School and on the Baby Bison team, was relegated to a reserve role last season as the backup man to Bruce Gra-samski. Head coach Ron Erhardt decided that Cicly was too good a football player to be sitting on the bench, so the switch was made.

500 Fresh Oriented into SU

By 8:30 last Thursday morning 700 students filled the west side of the Fieldhouse awaiting the beginning of orientation activities.

Les Paviek, dean of students, opened the program by telling a little about NDSU and university life.

Student leaders explained some programs and activities available. Student president Butch Molm explained the operation of student government, vice president Terry Groen detailed the workings of the Student Activities Board, and spectrum editor Dan Hummert introduced the student paper and the Bison Annual.

Registrar Burt Brandrud explained the procedures to be followed at registration the following week. Mrs. Elbridge provided a welcome by vice president Wendorf.

Dean attracted a capacity crowd in the dining center.

By 8:30 last Thursday morning 700 students filled the west side of the Fieldhouse awaiting the beginning of orientation activities.

The dean of the college, each student was assigned an advisor. Individual student advisor meetings were set up for selecting a course schedule and getting to know the student as an individual.

On Thursday evening a boomanzer, featuring Gary Goodrich and Jim Dean attracted a capacity crowd in the dining center.

Friday was devoted to the total process of initial registration for new students. Evening recuparation was encouraged by a dance in the ballroom, featuring Tom Holmer and "The Atlantics."

The two-day schedule followed the same pattern of four earlier sessions held during the summer. Approximately 900 freshmen were welcomed by vice president Wendorf and the total enrollment approximately 950 freshmen were welcomed.

Saturday morning ACT testing was scheduled for those who had not previously taken the test and had no intention of joining the Phi Delta Theta Rush Orientation was held for all new students. During the evening free recreation was offered in the Union games area.

Following a variety of worship services at campus religious centers and local churches, President L. D. Leftzgard held a reception in his home for all new students and their parents.

Sunday evening, a last bit of relaxation before classes began, was provided with two showings of "The Incredible Journey," and a dance in the Fieldhouse, sponsored by the Inter-fraternity Council.

Welcome Married Students
— And Squaws

Welcome back.

Although many of your married students matriculated the last three months, I took the summer off (literally), and now join you in the return to serious studies.

Many things have happened during the summer. Many of our friends have moved (graduated). We’d all like to welcome the new married students and their wives.

Many of you will be happy to know that the University now offers a decent health insurance program. If you were enrolled in the former plan, you know how inadequate it was. The new program has the same benefits as the best Blue Cross, Blue Shield program, but is through the Charles Sexton Co., for a more reasonable rate. We, the NDSU insurance committee, received bids from Blue Cross, Blue Shield that were $30.00 per year higher than the plan accepted from Charles Sexton Co.

Since the insurance company is writing the policy for a large group, rates are much cheaper. A comparable policy for a family in a commercial group plan would cost approximately $30.00 per month. Our new policy offers the plan for less than $11.00 per month. The committee urges everyone to consider subscribing to the new insurance. Contact Lorry Henning if you’d like more information.

Of interest to all married students on campus is the recent repeal of the University ruling against liquor in campus housing. The handbook now states that any married student over 21 will be allowed to have alcoholic beverages in their dwelling. Gosh, we can finally have some parties!

Did you hear about the three squaws who were expecting babies? The first slept on a bear skin, the second on a buffalo skin and the third on a hippopotamus skin. The first had a baby boy, the second had a baby boy, and the third had twin baby boys. Which goes to prove that the sons of the squaws of the hippopotamus equals the sum of the sons of the other two squaws.

The handbook now states that any married student over 21 will be allowed to have alcoholic beverages in their dwelling. Gosh, we can finally have some parties!

If anyone has any news or gripes that they would like aired in this column, please contact me at 235-0914 or drop up to the Spectrum office. Additional material would be appreciated.

The longest word in the language?

By letter count, the longest word may be pneumonoultramicroscopicsilicovolcanoconiosis, a rare lung disease. You won’t find it in Webster’s New World Dictionary, College Edition. But, you will find more useful information than in any other desk dictionary.

Take the word, divide it into its derivatives and an illustration showing U.S. time zones, you’ll find 48 clear definitions of the different meanings of time and 27 idiomatic uses, such as “time of one’s life.” In sum, everything you want to know about time.

This dictionary is approved and used by more than 1000 colleges and universities, isn’t it time you owned one? Only $6.50 for 1760 pages; $7.50 thumb-indexed.

The TOGETHER APPEARANCE

— is created, in large measure, by the right ingredients together in one’s clothing. For example, traditional quality tailoring together with high-quality details, together in turn with boldly stroked contemporary fabrics. Get together with one of our expert fitters for a try-on this week. won’t you?

Construction Lends New Depth to Campus

New additions to the campus include expansion of classroom facilities in the College of Pharmacy, a modern Fieldhouse for athletic use and construction of a new married student housing complex replacing the World War II vintage "temporary" housing of North Court.

PHILOSOPHY-

Use of the building will begin sometime between spring and fall of 1970 if present plans are upheld, according to Erhardt. Along with providing additional classroom space for the athletic department, the building will provide a swimming pool, tartan-surfaced area for outdoor track and baseball, a special activity area and basketball seating for 10,000-11,000 spectators when all of the testing has been installed.

"The new Fieldhouse will be useful to both SU and Fargo," philosophy.

Lends Philosophy

PHILOSOPHY—

Grant of $7,240 is less than what is paid for a good instructor with an M.A. degree. However, using the money in small parcels for each lecturer, Erhardt feels that the best teachers may be hired as lecturers for the short time they are needed.

Plans are to expand the number of courses operating under this concept. Presently, the only course finalized is Philosophy 303, Introduction to Ethics. Lectures will begin October 1 and will be scheduled at all three participating schools. In addition, Philosophy 250, Philosophy of Science, and Philosophy 436, American Philosophy, will be offered, through whose instructor lists are not yet finalized.

said Erhardt. "We will really be able to take care of our student body with this addition.

"However, there will only be about 8,000 seats for basketball when the building is opened because of the lack of funds to install more," commented Erhardt.

MARRIED STUDENT HOUSING

New production is also replacing the 21-year-old "temporary" housing of North Court with modern one and two-bedroom apartments.

Providing 168 two-bedroom units and 79 one-bedroom units, the married students' housing complex is located at the site of the former Cass County fairgrounds east of Highway 81 in north Fargo.

"It is expected that no further assignments will be made in North Court after assignments to new units begin," said Norman Seim, director of housing. "We can't assume that North Court will last much beyond the summer of 1969."

MARRIED STUDENT HOUSING

New production is also replacing the 21-year-old "temporary" housing of North Court with modern one and two-bedroom apartments.

Rent in new units will be about $95 per month plus electricity, and the occupant of a two-bedroom unit will pay about $105 per month plus fuel and electricity. Rents are comparable to other area apartments of the same type, according to Seim.

The $3.2 million complex is expected to fill as soon as it becomes available. "I personally feel that by the time the new units are filled, it is time for the second phase of construction to begin," commented Seim.
