Housing

Continued from Page 1

indicate that something must be done.

A great deal of concern has been expressed by members of student government on the erection of any more temporary hous- ing on campus after the events surrounding the use of North Court as a temporary housing facility for over 20 years.

"I'm not necessarily opposed to the purchase of these units," said Jim Zehren, student senator, "but temporary on this campus often proves to be permanent. I'm against seeing these things become permanent like the married student housing did."

Administration sources empha- sized the need of the portable housing as a temporary measure.

"This is temporary, stop-gap housing until we get permanent housing. Next year the problem is going to be more acute, we need something now," emphasized Pav- ek.

Stockman pointed out that re- quirements for permanent housing have been previously turned down.

"Of course we'd rather have new permanent housing than pur- chase and use these temporary facilities, but we do have an obligation to provide adequate housing for the next three years," said Stockman.

"These would be portable hous- ing units which we hope would be temporary in longevity."

Senator Al Schroeder feels that the type of housing under considera- tion may offer a solution to the demand for additional student housing on campus. He feels that the units would not be classified as permanent housing on the applications for funding, they would not be considered as housing for that purpose.

According to Pavek, this type of housing should not jeopardize the permanent housing program of high rise dorms and a new food service because of the way this program will be presented.

"If we are endangering an ap- plication for money for perma- nent facilities, we may not be finding the best solution to our problems," commented Stockman.

An alternative plan which would allow more women students to live on campus housing may be opening more rooms for occupancy of the remaining students, has been discussed.

"In my opinion, the w omen students have an equal opportunity to live off-campus as the present policy regarding men," said Schroeder. "We can provide them with lists of approved housing, and they would then have a choice with whom they would like to live and associate."

"It should lessen the overflow problem," he added. "It would also help alleviate the financial bind of many students."

"If we could find off-campus housing for a few of the women now, we probably would do it, if they were near the 21 age limit we have."

Pavek also felt that not enough convenient, comparable cost and quality housing could be found in Fargo.

"Something must be done now. I don't care what," said Heringer. "These girls can't stay in these shacks any longer."

Both Pavek and Stockman felt there was a good chance that, af- ter students lived in the portable facilities for awhile, requests for more permanent structures would come from students who would prefer the facili- ties because of their private rooms.

Little is known now about any remodeling which might be done, but Pavek believes a card key system and telephone service would have to be installed after construction.

Boeing has guaranteed the units will be in like new condition after they are completed.

Because of the condition of the soil here, some problem may oc- cur with blocking the trailers, but, according to Boeing, it should present no major problem.

"On the west coast, whole buildings are made out of port- able units. They, so far are on good foundations," commented Stockman.

Stockman also revealed that the University plans to purchase more trailer units for less than 30 per cent of their original value.

The NDSU Ski Club will hold a "slouch" party on the new lounge area of the gym in late February. The club is sponsoring a trip to Courchevel, France, over Christmas vacation.

Financial Aids

(Continued from Page 1)

oral law:

dents on their academic GPA, but we do have that option," said Tesmer.

"We did give preference to in- coming freshmen in our aid awards, however. The screening process used for other students did not apply in the case of fresh- men."

"We did this because freshmen usually have a harder time get- ting FLL since they are higher risks. However, Tesmer did want an award down by about $50 from what we projected their total would be."

It was after all possible rejec- tions had been made that the deci- sion was taken to overcompensate those at $20,000 on National De- fense Loans."

"There is also legislation pend- ing which will give the university more resources to lend to Freshmen. An expansion of the interest ceiling of this program from the present 7% to a possible high of 10% would help alleviate the financial bind of many students."

A COME TO CLIMAX ???????

Students who didn't get a chance to Zip To Zap last spring may be able to this time around. We are referring to rumors of a massive student migration to the small western Minnesota town with an exotic sounding name. The idea for this interesting movement is reported to have come from the Moorhead State campus, although no one is willing to take the credit for its origin. MSCS preferred the slogan Unzip For Zap. Last year's Come To Zap movement was reported to be a tem- porary - so suggestive, in fact, that if the movement gains momentum, it will be interesting to see how the obvious double meaning of "zap" will be interpreted, but if you say it, the double interpretation can produce some hot headlines.

5000 STUDENTS IN CLIMAX, BUT NATIONAL GUARD FORCES THEM OUT

(about deadline to make Playboy's After Hours)

2000 GALLONS OF BEER DRUNK BY STUDENTS

WHILE IN CLIMAX

(sounds like a great circus act)

It would also be interesting to see a mother's reaction when her freshman daughter writes home...

Dear Mom and Dad,

I can't make it home this weekend because this boy I know here has a wedding and I would like to attend. Everybody's talking about it and it sounds like a lot of fun. . .

Because of its geographical location, Climax, Minn., is actually a great place for a weekend college migration. It is only a few hours drive from NDSU, MSCS, Concordia, UND, U of M, St. Cloud State and St. John's University. When Zap, in the midst of a town of students, was not so enthusiastic Come To Climax could possibly involve over 15,000.

At any rate, the town of Climax has all winter to prepare for the possible Climax migration. The organizer of the student migration has said the event will be a totally private time for the mother's Day weekend next spring.

SPECTRA POLICY

With this installment the Spectra Staff returns to your local newspaper for a third year. Our policy is to continue to spout the major trivia and minor obscenities that made us the most read piece of droolings on the North Dakota State Senate floor last year. (We got more laughs in Bismarck than did our rival with his dirty jokes).

THE NEW MORALITY HITS THE SU CAMPUS

The Spectra has not received a single report of a marriage over the summer, and it has received only one report of an engage- ment. What can be the meaning of this? I am sure that by now you have run into friends who claim to have gotten married, but since they did not report it to us, maybe they are not really mar­ ried at all. They are probably only living together. The first thin g you should do is take back the wedding gift you sent them, and then you should report them to the Director of Housing. NDSU does not allow students to live in married housing units any longer.

And the next time you see Colleen Gray or Gary Ostwald on campus, run up to them and congratulate them for doing the ir thing. (sounds like a great circus act)

THE NORTH DAKOTA STATE UNIVERSITY STUDENT NEWSPAPER

"We wish the students who are coming to a good time, but we would like to see a more moderate approach to the "shack-ups," which will soon appear in this paper.

In North Dakota, the problem is not as serious as in other prob- able states," continued Tesmer. "We are the only state with a student owned bank, and because it student-owned, they can make loans as a public service to people in the state."

Many students turned down by their home town banks did receive assistance from the North Dakota State University. They get turned down by their home banks, they then turn to the Spectra, and about one-third of total loan applications in the state.

Looking toward the future, the mer commented it was possible that funds would become available in the near future for students. However, he cautioned that any money that would be available for students would have to be spent on the college and its facilities.

"The only way that money can be tapped for funds which would be used for the college and its facilities would be if the movement grows in momentum, it will be interesting to see how the obvious double meaning of "zap" will be interpreted, but if you say it, the double interpretation can produce some hot headlines.

September 18, 1975

by Bob Olson
Coyle Speaks To SDS Meeting

The Students for a Democratic Society (SDS) meeting was attended by 45 prospective members. During the meeting, Brian Coyle, former MSC assistant instructor, spoke on the history of SDS and this summer's convention in Chicago.

Coyle said that since 1965, SDS has moved from being a left libertarian to a militant organization. "We've come from trying to do our own thing in the democratic party to being anti-establishment revolutionaries." Coyle pointed to a new urge for ideological answers, and he feels that SDS is providing these answers and ideological discussions of problems.

He explained some of the factions at the SDS convention. He described the conflict that existed within the convention as being primarily between a Maoist group, the Progressive Labor (PL), and the national office of SDS. "PL," he said, "is a Mao-split from the communist party, with a trade-union outlook." They are opposed to the "all-organized group" which is quite conservative in its terms of action. The national office on the other hand, is commonly advocating open conflict.

In order to combat this highly-disciplined group within SDS, at the convention the national office adopted a "we are Mao than they are" attitude. Coyle described some of the action plans of the national office at the Chicago convention. They are a great deal oriented toward street gang fighting.

We spoke of a plan called "Jailbreak" where Chicago high schools will be surrounded by SDS speakers and the national office adopted a "we are Mao than they are" attitude. Coyle described some of the action plans of the national office at the Chicago convention. They are a great deal oriented toward street gang fighting.

Jean Primeau, an NDSU student, spoke briefly on ROTC and upcoming projects for the area. SDS and resistance groups. She commented that ROTC supplies officers for the Viet Nam war. ROTC programs supply 50% Army, 35% Navy, and 30% Air Force officers. For this reason, it is felt that the elimination of ROTC programs would effectively hurt the Viet Nam war effort and yet not treat national security. Primeau expressed SDS's need for greater participation in picketing, marching, guerrilla theatre, etc.

Some of the activities announced by Primeau at the meeting were demonstrations on: November 3-4 when a Dow Chemical recruiter will be present on campus; September 27 seminar on Viet Nam and Sprow Agnew's appearance at a banquet honoring Sen. Milton Young; National Moratorium student strikes; November 15 march on Washington.

Marcella Andre then spoke on the Viet Nam war, explaining the difference between the Viet Nam war and previous conflicts.

Dave Brawbiter, editor of the Independent newspaper Mystic, at MSC, announced that his publication was developing into a student magazine including political essays and news.

We really don't need the proposed addition to the Union. Of course there will be a few who will express a feeling that doubling college classes for a few extra students will be better than the present plans for the 4-H addition to the Union. I would not disagree that the study which grew into plans for the addition began in 1964. At that time SDSU had a difficult time enrolling a sufficient student population that it does now. An agreement was reached that the state 4-H Foundation would contribute $200,000 towards the building to merge with the Union. To be built on the site of the present parking lot, the building would provide the 4-H activities at a convention site and housing. The site and housing would be used for a state convention and for the continuing education extension centers.

Needed in this building would be, according to the 4-H, dormitory housing for 200 persons, an auditorium, meeting rooms and eating facilities for 200-300 people. The venture further proposed that when the 4-H wasn't using the facility, then students would be able to make whatever use of the rooms and auditorium they needed, but the 4-H would retain certain parts of the structure.

The 4-H idea was looked upon at the time as a great idea. The 4-H would have what it needed, the Union would get increased facilities and everything was worked out for the best. But that was five years ago.

In the ensuing five years, the center of the student population on the campus has shifted to the north end. Present plans call for construction of future dormitories in the same area. Marled dormitory housing is expected to be completed within a year.

There is a crying need on this campus for the evening center. It would be very useful to build a nighttime center in the present Union, but let's forget we live in North Dakota. During the winter, the subzero temperatures, howling winds and drifting snow present a formidable barrier to those who wish to walk the quarter mile from the High Rises to the Union.

Would it not make a great deal more sense to construct a satellite Union in conjunction with the Food Center? Certainly the financial problems could be worked out - merging with the Food Center would provide a multitude of benefits.

This plan would provide a much needed evening center for those who do not complete their work during the day. Such a center could include an evening snack bar - maybe even one that stays open after 6:30, a piping hot hot dog and French fries, perhaps a few meeting rooms or organizational areas, a lounge and two or three study or conversation rooms.

This all sounds very idealistic, but it is well within the scope of possibility. As in all plans, the main ingredient needed is money. The present plan for merging with the 4-H for the Union addition does not allow money for such a program.

The amount needed for the 4-H addition is $750,000 each from the Union and the 4-H. To float a bond issue for $750,000, plus the remaining balance still owed on the Union, would effectively tie up Union financing until 1975. This is well beyond the time when new Union facilities would be needed near the dorm complex.

This fact should also be remembered the present Union could use a few extra things. Enlargement of the Ballroom over the patio, central air conditioning for the entire building, perhaps some organizational offices would all fill the needs of the student population.

With the present facilities (two Fieldhouses, Askana Hall, Stevens Hall and the proposed University auditorium recommended by the SU '75 student body) we certainly do not need another auditorium on the Union. Even if the University were to enter the venture and build the University auditorium on the Union addition, there is a more attractive alternative, to be mentioned later.

Dormitory housing in the Union would not do students no good whatever. Parents and recruits would not prefer to stay in a dorm (due to state law prohibiting liquor on campus) where an evening cocktail wouldn't be available. Maintenance and laundry problems for such housing would not be available nor suitable for student dorms.

It is to be noted that a great deal of work and time has gone into this project by many, many people. Special enabling legislation was passed by the legislature to allow the addition to be built, but the legislation requires that the building MUST be built with the Union, only that it MAY be built.

There lies the solution to the problem. We do feel that the 4-H is important to North Dakota and that it certainly need a center around which to conduct its activities. However, due to the changing needs of the University student body, the 4-H Union merger would not be wise from the viewpoint of the student body. We feel it is in the best sense for the University and the 4-H to make the joint venture.

The Union could build the University auditorium and the 4-H center together. They would then have the best of two worlds - the University could have its replacement for Festivale and the 4-H its convention site and education center. The Union would then be free to remodel its present building and to work toward a satellite in the north dorm complex. Everyone would benefit.

Considerable work will be done this year toward finalizing the plans. The three groups - 4-H, University and Union, might find that a realignment and change of plans would solve the problems unique to each.

The long standing and justifiable criticisms of student groups is their reluctance to take part in long-range planning. Too often students haven't expressed their only responsibility is for this year, maybe next, but certainly not after graduation.

This issue is one which could use, indeed needs student opinion and participation. Letters on this issue will be printed and forwarded to the Union Board of Directors. It would be well to discuss this with your student government leaders - that's what they are elected for. At any rate, if you have opinions, let them be heard!

Letters to the Editor
from the Other Side
by Michael J. Olsen

All I'm going to do in this week's column is tell a little story. And you do it with it's own business. I'm telling it mainly for a freshman I overheard talking in the Union the other day. The comment that concerned me was, "The only reason I'm here is because my parents want me to be. Boy, I sure give up a lot for them."

For all I know, Dave is still at the Air Force Academy. He was one of the first to make sure I got into it. The fact that the South Dakota politicians and the whole town were waiting. You see, no one had really ever anything. It was a matter of being before. It certainly need a center around that kept that place alive. He was one of the few people who really kept that place alive. He was one of the few people who really kept that place alive.

That's why Dave isn't at some teacher's college learning to be a history teacher and a coach. Instead he is at a place he never wanted to be, doing things he never wanted to do. By rights Dave should be the most miserable, unhappy kid there. And quite logically he should never raise a chance for us to hate him. But, as you've probably guessed by now, one of things that kept that place alive. He was one of the few people who really kept that place alive.

At five-fifteen every morning we'd be out scrubbing the north hallway. I'd come out of my room swearing and slump to the Wooden Head. Dave would just look up, smile, and say, "Aw, it's not so bad." If this whole column could be put into one sentence for that freshman I met in the Union the other day, that would be it. Because it is, "It's not so bad."
Temporary Housing Proposal

Questioned As Impractical

William L. Pethy

Once again the University proposes a marvelous piece of nonsense with which they intend to decorate our beautiful campus. Please refer to the pieces of the proposed temporary housing units on this page.

Admittedly there is quite auben trying to squeeze 120 new students into overflow housing and no one should be forced to live outside during a North Dakota winter. Under the direction of Vice President Donald Stocker, a plan is in order to purchase temporary housing in the same way that trailers can be attached and ready to house overflow students. There has been much complaint about the lack of attention to the aesthetics of the architecture on campus, much of which believe it or not, originated in the architecture department. Even the individual living units are eight by ten feet and no enough, the new student housing units have living rooms measuring nine by nine feet.

Two student senators who explained the overflow conditions at Sunday's Senate meeting, said that there is actually more storage of personal belongings and for bathing in the overflow housing in the chemistry facilities than there will be in the proposed temporary housing.

One Senator suggested that the housing become permanent, the trailers could be removed to improve their appearance. This can be equated to a loss of prestige.

A doctor makes a mistake, he can bury it.

A lawyer makes a mistake, he can charge it to his client.

An architect makes a mistake, he can plant ivy to cover it.

While said about the aesthetics of the proposed housing, the fact that every student is comprehended in finances. So they look at the proposal from a practical angle.

While it is recognized that the proposed housing is only temporary, it will recall that the same type of housing was used on our own Tin City during back to WWII.

The proposals for purchasing the trailers is a contract for deed. That rent that rent paid for them will not be considered if in reality used to purchase the units.

The price quoted in last Sunday's Senate meeting the units are rented for the same price as standard dorm room ($90 per semester). Plans call for "renting" the units. After four years, the units paid, with the addition of the units, would complete by pay for the units.

Any businessman who could completely pay off a debt in four years on "machinery" that would last for ten years at a minimum would be foolish to abandon the "machinery" after four years. And if all the university is busi...

Letter From The Editor

Voluntary Subscriptions Urged

TO: All faculty, administration and staff members, and graduate students

SUBJECT: Voluntary Spectrum subscriptions

Last year the Faculty Senate passed a resolution which stated that faculty, administration, staff members and graduate students should voluntarily subscribe to the Spectrum.

It can be easily shown that virtually every member of the specified groups reads the Spectrum when it comes out. Members of the staff have been seen carrying papers to buildings in which the Spectrum was not distributed. Others are known to pick up several copies every week to mail to friends — without availing themselves of the Spectrum subscription service which could save them the trouble.

In the past, the number of papers printed every week has equaled the number of undergraduate students on the campus. The reason for this is simple — since it is only the undergraduates who have paid for the paper, only they should get it.

Needless to say, the thousand or so members of faculty staff, graduate school, etc., took their papers, leaving the total number to be distributed to the undergraduate somewhat short of the required.

This year we are printing sufficient copies for nearly all concerned. This week's press run will be approximately 7500 copies. If more are needed, more will be printed.

Rates for faculty, administration and staff are set specially to allow for ease of bookkeeping. Three dollars per year would be a sufficient sum to offset the cost of printing the extra paper. Rates for faculty-staff member.

This rate allows the member to pick up the Spectrum in the usual fashion each week. It does not and cannot allow for special delivery or mail delivery of papers. Special services can only be handled at our regular rate of $5 per year.

Faculty and staff members are urged to send a check for $3 made out to the Spectrum or to stop by the office in person. Your name will be checked off against a master list of those who are employed by the University.

To be sure, there is nothing to stop members from merely picking up their copies as usual without paying, but it is hoped that University employees are honest and honorable enough to pay for a service of which they have long availed themselves.

Two views of the johns in the proposed temporary women's housing. Worthy of note that the johns are designed for men. Swell.
Dean of Women Betty Salters resigned from the administrative staff here, effective Aug. 1, according to Dr. Les Pavek, dean of students. Mrs. Salters indicated she would return to homemaking.

She was first appointed to the NDSU staff as an assistant dean of students in 1963 and became dean of women in 1966. Before coming to SU, she served four years as residence hall director at the University of Kansas.

While serving as dean of women, Mrs. Salters was responsible for the general welfare of nearly 1,800 women students, serving as a general counselor for individuals and groups, and as a consultant to parents, faculty and administrators on the process of standards development and discipline.

Mrs. Salters served as advisor to Alpha Lambda Delta, a freshman women's scholastic honorary, advisor to the Associated Women Students (AWS), and advisor to Pantehllican Council (sorority government).

She was responsible for five women's residence halls and has held membership on many faculty and university committees. She is the wife of Dr. Leo Salters, dean of men at Moorhead State College, and lives with her husband and a 14-month-old son, Bri-an, at 1022 10th St. S.

Until appointment of a new dean of women, Charles Benton, dean of men, is the acting dean of women.

NOTICE

Baha'i of Fargo and the NDSU Baha'i Club are co-sponsoring the observation of World Peace Day on Sept. 21, 1969, in Melnecke Lounge of the Union. The 2 p.m. program, titled "Youth - Builders of a New World," features speaker Dr. Peter Khan, assistant professor of electrical engineering at the University of Michigan.

Bleep Is Mobile

Engineering Robot Is Under Construction

Bleep, NDSU's robot-under-construction, is now mobile. During the summer the base of the robot was built and is now running without self-contained power unit, and broad plans were designed for the base station.

Professor Ernest Anderson, department of electrical and electronics engineering (EE) and faculty adviser for the project, is quick to point out that the project phases will never show in the final project.

One of the greatest difficulties to overcome is obtaining needed funds and equipment. The B Alpha is nearing the end of fall, and near the end quarter of spring IBM donated a 1650 computer, adding parts valued at more than $3,000. Logic circuits from the computer will be used extensively in both units.

A Shihbiden television camera, donated by the manufacturer, will be converted to run on the mobile unit batteries. Mounted with a 360 degree turning radius and vertical freedom, the camera will provide complete closed circuit visual communication between BLEEP and the base station.

The completed mobile unit will be able to 'talk' and 'hear,' as well as 'see.' Two-way voice communications with the base station allow the person manning the controls to converse with people BLEEP encounters.

BLEEP will be able to travel about six miles an hour, climb curbs, and turn on a short radius. The robot-control base communicated via radio signal, it was necessary to apply to the Federal Communications Commission for construction permits for both units as Amateur licensees to run them, once completed. These applications required completion of project plans, and represented hundreds of hours of work which like many other necessary project phases will never show in the final project.

The whole family will love it!
Michigan Union to Restructure Its Management, Services

Ann Arbor, Mich. (I.P.) — A plan to restructure the Michigan Union has been presented University of Michigan Regents. Changes in management structure, food service opera-

guest rooms are the major features of the plan, based on a

Osterheld, an assistant vice president at the University of

Wisconsin and longtime man-

er of the Union there.

The Michigan Union, Osterheld

s in his report, like similar

stitutions across the country, has been losing money.

"It seems safe to assert that the problems of the country are at an

important crossroad, both finan-
cially and in terms of revision of their

function so that they may

remain vital instruments on their campuses ... We believe that an

combined effort to preserve the Union and make it a meaningful opera-
tion for the Michigan campus is desirable."

Financial problems of the Uni-

er result in part from changes in society, the study report suggests:

"We have tried to indicate that sociological changes — attitudes of students, make-up of the Uni-

sity community, changes within the University community, etc., North Campus, expansion of reside-

ance halls, changes in housing requirements, the growth of the community and the change in

grown-up relationships, the difficulty in access by virtue of elimination of parking, the

enormous change in growth in housing and food facilities in the community which, at one time

presented a veritable monopoly of the Michigan Union which had all combined to produce cataclysmic effects on the opera-
ation and economic life of the Michigan Union."

These forces have brought business
down and been compounded by a steep rise in wages.

Osterheld paints a grim picture of the Union's financial troubles.

The operating fund was $11,000 in the red in 1965-66, $266,000 short in 1966-67, and $217,723

short last year.

Although internal adjustments

— some already under way — will help to blacken the red ink, Osterheld concludes that long-

range solutions lie only in "mass

ive changes, such as those by

operating through top administra-
tion (of the university) can all of

the diverse interests be brought

into a total operating entity."

He suggests organizational and

service changes to help the Union

become a more integral part of the University community. "To continue the pattern of the last

5 years," he adds, "is to fail to

maximize the usefulness of the

physical plant for the University

and to be unnecessarily expensive

in the over-all operation."

The report cites a number of other requirements which are "mandatory" to a revitalization of the Union as a campus

community center.

1. The existing board of direc-
tors and semiautonomous corpor-

ate structure must be dissolved.

2. A two-board system of Union

control should be established in

which there is a policy board,

serving as a general guide and

setting a number of immediate

changes in food service, including

changes in growth in having a student majority with

representation of the Michigan Union. Osterheld, some already under way — student programming function of the

Universities of the country, Osterheld concludes that long-

range solutions lie only in "mass

ive changes, such as those by

operating through top administra-
tion (of the university) can all of

Movie Critic Judith Crist
To Speak In Festival Hall

Judith Crist, well known for her appearances on the NBC Today Show will speak at Festival Hall at 8 p.m., Tuesday, September 23.

Mrs. Crist is an outspoken drama critic and veteran journalist who served as a reporter and editor for arts, associate drama critic and film critic on the New York Herald Tribune from 1945 to 1960. Subsequently she worked as film critic on the Harold Tribune's short-lived successor, the New York World Journal Tribune.

Currently Mrs. Crist is an adjunct professor at the Columbia School of Journalism, where she has been a member of the faculty since 1959. She received a Columbia Graduate School of Journalism Alumni Award in 1961.

Mrs. Crist has made regular appearances on the NBC Today Show since 1963. She is also a film critic and book reviewer for TV Guide and the Ladies Home Journal.

Her devastating attack on the $40 million dollar film, Cleopatra, was widely quoted throughout the United States. An ardent movie fan, she has heartily endorsed some American movies, while lambasting others.

In certain areas the American film is unsurpassed and the potential of American cinema cannot be over-estimated.

A native of New York, Mrs. Crist received a BA at Hunter College, taught at the State College of Washington, served as a civilian instructor with the Air Force and was graduated from Columbia's school of Journalism with an MS in 1945. The Private Eye, The Cowboy, and the Very Naked Girl; Movies from Cleo to Clyde, her book, was published in October, 1968.

NGSU National Youth Alliance President Ted Christianson distributed a White Manifesto calling for more than $2 billion to be collected from America's Negro citizens. This money would be used to pay for riot damage, welfare and integration programs, and Negro damages caused during the Civil War. Christianson said the manifesto is in response to James Forman's recent demand for $500 million for Black reparations.

Christianson declared that "our heritage is from Europe, not Africa," and that the current Black movement represents a "tribal concept." He also noted that Black Power groups are "promoting a racial and class war."

According to Christianson, the National Youth Alliance believes that the "major problem in America is violence in the streets."

To combat the violence, he advocates that the "militant right safeguard itself from the Altoon and burning of blacks."

Christianson stated that, "The N.Y.A. is formed on the NDSU campus to give voice to the silent majority." In a published article, the National Headquarters in Washington, D. C., listed the following goals of its affiliated clubs:

- Opposition to dangerous drugs
- Stop the Black Power movement
- Restore law and order to America by stopping such groups as SDS
- Promote peace by opposing involvement in foreign wars.

Since the club was formed on campus last spring, membership has jumped to over 100 active participants, according to Christianson. Among the members are a large number of ROTC cadets. Christianson feels that the single greatest problem in the NDSU campus is a "possible removal of ROTC classes from the curriculum."

In a surprise move, Christianson stated he would probably resign as president of the club. He accused the National Committee of "anti-Semitism and isolationism." In the past, the National Council has supported the Arabs in the Middle East against Israel and has advocated the withdrawal of the US from Vietnam.

Mr. Bialozor did his undergraduate studies at the University of Wisconsin, studied comparative politics and sociology for one year at the University of Stockholm in Sweden, and received his masters degree in school administration at Northern Illinois.

An avid tennis player, he recently played in the Chicago Open Tournament.

Other staff appointments include Peter Munton as chairman of the Art department and full time instructor in Art; Mr. Charlotte Amundson as instructor in Art and Mrs. Beverl Slotten as assistant professor of Home Economics Education.

Home Economics Appoints Five

President Lofagard has announced appointments of additional faculty members to the Home Economics staff.

Dr. Patricia Murphy is associate professor of Home Economics Education, teaching graduate courses and doing research. She took her undergraduate studies at Iowa State University and received her MA and Ph.D. from the University of Minnesota.

Her doctoral study was of conceptual systems and teaching styles—a study in which some NDSU students participated. Since she considered it a valuable study, Mrs. Murphy will continue and expand it here in Home Economics Education.

"Students here are more open and friendly," she says, "and NDSU is a more flexible university than are the larger ones."

Associate professor and chairman of Child Development and Family Relations is Mr. Robert Bialozor who formerly taught at Wisconsin State University in Osh Kosh, and at one time directed the federal research project at the Institute for Educational Research in Chicago. There he was associated with 29 suburban school districts, researching the teaching of human relations. He has also worked with teacher educators in the development of curriculum materials.

Mr. Bialozor did his graduate work at the University of Wisconsin, studied comparative politics and sociology for one year at the University of Stockholm in Sweden, and received his masters degree in school administration at Northern Illinois.

Bialozor New Chairman of CDFR

A new chairman for the Department of Child Development and Family Relations (CDFR) has been appointed, as announced by Dr. Albert Anderson, former acting associate dean of the College of Education at Concordia College.

Dr. Robert Bialozor, director of the federal project for the Fargo-Moorhead Tri-College University, has assumed the post.

The new position, directed at the coordinating of the project for the Fargo-Moorhead Tri-College University, was made possible through a $70,000 grant awarded to the Tri-College program last March by the Louis and Madeleine Hill Family Foundation of St. Paul.

Local college presidents, Dr. D. Lofsgard of NDSU, Dr. John Knutson of Concordia and Roland Dille of MSC, were appointed to a subcommittee to search for a coordinating provost to help meet the needs of the project.

Dr. Lofsgard, subcommittee chairman, announced Dr. Anderson's appointment, noting, "This represents a real milestone in the University of North Dakota consortium and one that we can move ahead with the dynamic, competent task of putting this into effect." The project, he added, will be a real milestone in the University of North Dakota consortium.

"When one considers the scope of this effort, the resources that these institutions can bring to bear on this educational, professional, cultural life and its economy, one can realize the possibilities the future holds," said Dr. Anderson.

One of Concordia's chief liaisons with the Tri-College effort will be Dr. Jerome Tweton, chairman of the History Department at NDSU, established the cooperative program.

History departments at the University of North Dakota and NDSU have reached agreement on a series of faculty exchange lectures. Exchange lectures by leading history department faculty at each university were scheduled in the summer, fall and spring.

"This is a first step in cooperative programs for the two history departments and we hope it will lead to further cooperation," said Dr. William Reid, chairman of the History Department at NDSU.

NDSU-UND Exchange Profes

The Hewlett Packard Company, Palo Alto, Calif., will display the latest developments in computers, electronic calculators, and electronic instrumentation Friday, Sept. 19, on campus.

The Hewlett Packard vans from the company's Fall Road Show will be parked in the lot north of the Electrical and Electronics Engineering Building from 9 a.m. until 5 p.m.

The vans are staffed with specialists who will answer questions about computers, electronic calculators, and electronic instruments and displays.

Area students, engineers and educators as well as staff members and the general public are invited to visit the vans, according to Dr. Albert Anderson, professor and chairman of the Electrical and Electronics Engineering Department.

Key Check-Out Adopted by U. of N.M.

Albuquerque, N.M. (L.P.)—New hours and a key check-out system have been adopted by the Associated Women Students (AWS) at the University of New Mexico. An AWS pamphlet outlines the regulations and expectations of the "self-determined hours."

Due to the variability of entry times, students will need to observe quiet hours carefully. Quiet hours start at 7 p.m.

An eligible student (one who has an AWS identification card) who wishes to be away from the dorm after hours must check out a key from the main desk of her dorm. Special hours have been designated for key check-out.

Each student will be responsible for checking out and returning her own key. No one may check out or return a key for another girl. It was also emphasized that under the key system, dorm security is left up to the residents.

Immediately upon returning to the dorm, the key will be deposited in the key slot.

All keys must be returned to the dorm by 8:30 a.m. the following day. Any student allowing any other student (including freshman) to enter the hall will be held responsible for an illegal entry unless the other girl has her own key.

Keys will be checked out on a one-night basis only. Any woman who takes an extended weekend must return by closing hours, and overnights are still available.

Loss of keys and identification cards must be reported immediately to the residence halls staff.

Unauthorized duplication of keys to University locks by off-campus locksmiths is a criminal offense subject to fine and jail sentence.

Freshman women are not eligible to check out keys because AWS has designated the first year a period of adjustment. Under the AWS proposal accepted by the Dean of Women’s office and the Housing Committee, freshman women are now allowed to have four weeknights per month.

Dial-an-activity

Dial-an-Activity, newest service of the Union, provides a central location from which information about all daily activities will emanate.

The tape in the Code-a-Phone instrument will play a three-minute recap of the times, events and locations of all events on campus.

Messages must be in the Union Director’s Office (237-8241) no later than 4:30 p.m. the preceding day to be included in the daily tape.

The number to call for the day’s activities is 237-8949.

Science Grads Receive Aid

Six students have received National Science Foundation (NSF) support for graduate programs through a $23,872 NSF Graduate Traineeship grant, according to Dr. Glenn Smith, dean of the Graduate School.

In addition to funds for five basic stipends of $2,400 and one of $2,800, the NSF grant will be used by the graduate school in purchasing equipment.

Named to receive traineeship grants were William Cross, chemistry; Roger Ediger, zoology; Roger Feltell, chemistry; Mark J. Klemele, mathematics; Dennis E. Langer, electrical and electronics engineering and J. Raymond Mewes, agricultural engineering.

Cross, a third year participant, will receive the $2,800 grant. It is the only one of the six working towards a Ph.D.

The traineeships are effective September 1 and renewable for two years towards a master’s degree and for four years on a Ph.D. In addition to the grant, tuition fees and the cost of books for recipients, and $500 is allowed for each dependent.

The NSF has announced $231 traineeships for the 1969-70 academic year at 216 institutions in all 50 states. Trainees must devote full time to advanced degree programs in the sciences during the period of their appointment. Some $1200 is awarded to each of the colleges or departments in which the trainees are enrolled.

Credit Without Classwork, Exams Present Alternative

Iowa City, i.a. (L.P.)—Starting in September, students in the University of Iowa College of Liberal Arts will be able to earn more than one-third of the degrees without going into a classroom.

The reason is that the college faculty has voted to extend the credit-by-exam program, already available for all 32 semester hours of general education requirements, up to 16 hours of credit in a student’s major field, if the department chooses to participate. A total of 126 semester hours are required for the degree.

The program allows students with good academic backgrounds to meet degree requirements by proving their competence on a national exam scale. At the time of its adoption in 1966, Dean Dewey B. Stuit of the college said, "It is conceivable that this new program may prove to be one of the most significant educational developments of the 1960’s."

Dean Stuit stressed that the extension of credit-by-exam is "permissive legislation," allowing each academic department to participate if it wants to. He said the departments would also have the option of granting exemptions from requirements in cases where they did not want to award credit.

Examinations have been a major part of credit-by-exam as operated in connection with the general education requirements in literature, social and natural sciences and historical-cultural studies. When credit-by-exam was first begun, Dean Stuit said it would enable the college to emphasize accomplishment, rather than the satisfaction of rigid credit-hour requirements, as the chief concern of higher education.

Students receiving credits and exemptions are free to devote the time they have gained to their major field or other areas that interest them. The extension of credit-by-exam was recommended by the College of Liberal Arts nine-member Educational Policy Committee.

A-1 OLSON TYPEWRITER CO.
618 1st Ave. N., Fargo
Here's what your first year or two at IBM could be like.

You'll become involved fast. You'll find we delegate responsibility—to the limit of your ability. At IBM, you'll work individually or on a small team. And be encouraged to contribute your own ideas. You'll advance just as fast and far as your talents can take you.

Here's what three recent graduates are doing.

Doug Taylor, B.S. Electronics Engineering '67, is already a senior associate engineer working in large-scale circuit technology. Aided by computer design, Doug is one of a five-man team designing integrated circuits that will go into IBM computers in the 1970's.

John Klayman, B.S. Math '68, began writing programs used by a computer system to schedule every event in the Apollo tracking stations. And when the finished programs were turned over to NASA Goddard Space Flight Center, he was responsible for making them work.

Soon after his intensive training course, IBM marketing representative Preston Love, B.S. '66, started helping key Iowa commissioners solve problems. Like how to introduce school kids to computers, without installing one. His answer: share one in Chicago by phone cable.

The voice department has scheduled a full program of events beginning with a faculty recital on October 15 by tenor Robert Olson.

The Men's and Women's Glee Clubs, under the direction of John and Charlotte Trautwein, have two concerts planned for the year. The first on November 16 and under the direction of Trautwein, is scheduled to be in concert, Sunday, April 15, in Festival Hall.

Under the direction of Dr. Edwin Fissinger, chairman of the Music Department, the Concert Choir will present its concert on March 16. The Choir has travelled extensively in the past two years and is considered one of the finest in the Upper Midwest.

On November 18 and April 12 the Madrigal Singers will perform. This group, also under Fissinger's direction, features madrigal music of complex form.

Five student recitals, including two senior recitals, are planned. The first is January 18, the second, February 23, and the third, May 17. The first senior recital will present Vicki Johnson, a soprano, on April 15. On April 22 baritone Larry Viker will present his senior recital.

The entire music department will combine on December 17 for the Christmas Concert, and again on May 13 for the final large group concert of the year.

For those interested in opera an Opera Workshop will be held February 13-14. Choice pieces of opera will be put together by Robert Olson and sung by music students.

The Red River High School Band and Choir will present a concert on February 5 at 7:30 p.m. in the Ballroom of the Union.

SU hosts two events in the month of October for area high school directors. On October 11 a percussion workshop will be presented by Marvin Dahlgren. A choral workshop featuring Harold Eisenhower and sung by music students.

The Loft Second Floor

Mrs. Crist is hated and adored, albeit from different quarters, for the same reason: she calls the shots exactly as she sees them, immune from all pressures — reputations, big budgets or big companies.
The Herd Conquers NIU, 28-0
Defense Smothers Huskies

Victory over Northern Illinois was not come easy for the Bison Saturday night. Only a tremendous effort by the inexperienced defense made the 28-0 victory convincing. The shut out by the defense was the first for the Bison since their 1967 victory over South Dakota.

The first half the Bison offense was frustrated by the tough Huskies' defense. Most of the holes were not there for Bison runners, and quarterback Dave Grasamke had some difficulty in getting untracked. When Grasamke did find the mark with passes, several were dropped by overanxious receivers.

Late in the second quarter the Bison drove 80 yards for the only half touchdown. The big play was a 30-yard Grasamke-to-Wald pass to the one-yard line with 28 seconds left in the half. Halfback Tim Mjos carried it over for the touchdown on the next play.

In the second half the Bison offense was even more effective. Northern Illinois could not even record a first down until there were less than two minutes left in the game. The Huskies managed only seven first downs for the entire game. Halfway through the third quarter Mjos scored again for the Bison on a 2-yard run.

When the fourth quarter began, the Bison were still not safe with only a 14-0 lead. Then it happened... Little All-American Paul Hatchett fielded a punt on his own 32-yard line and raced all the way for a 68-yard touchdown. Just 16 seconds later the Bison had another touchdown. Cornerback Steve Krumrei intercepted a pass on the Huskies' first play following the kickoff, and returned it 30 yards for a touchdown. Suddenly it was 28-0, and the Bison had their first victory for 1969.

The final statistics reflect the Bison superiority. SU had 376 yards passing. Northern Illinois had only 186 yards in total offense, 143 yards rushing and 43 yards passing.

9900 fans saw the game, which was played in 78 degree weather. The next Bison home game is October 4 against a strong University of South Dakota team.

Krumrei, Hanson
Players of the Week

Halfback Steve Krumrei was named Back of the Week and defensive tackle Dick Hanson was chosen Lineman of the Week following the action of last Saturday's game against Northern Illinois. Krumrei and Hanson were standouts on a Bison defense which shut out the Huskies and permitted only seven first downs.

Krumrei had four unassisted tackles and two assisted tackles in defensive secondary play. He was a big factor in containing the Huskies' passing attack, which accounted for only eight yards. He also intercepted a pass and returned it 30 yards for a touchdown on the game.

Hanson, starting for the first time as a Bison, had seven unassisted tackles and four assisted tackles in defensive secondary play. He also penetrated the Huskies' backfield several times, twice dropping the quarterback for a loss of thirteen yards. He also tackled opposing halfbacks twice for a total of twenty yards lost.

Bison To Face

V. Michigan

On Saturday the Bison football travels to Marquette, Michigan, where they will face the 1970 GTO HARDTOP COUPE

THIS IS THE WAY IT'S GOING TO BE

**GOOD SPOUSEKEEPING**

by Corrine Henning

Misery is starting back to classes, having to wear shoes after a barefoot summer. Blister anyone?

My neighbor is enjoying her gourmet foods class. The only problem is that it meets from 2 to 5 p.m. She finds little pleasure in returning home to prepare dinner for her family after a three-hour lab of concocting and devouring such calorific dishes as crabmeat Gruyere, ham and chutney, and essence of tomato.

The power shortage experienced last week came at such an opportune moment. Professor Richard Lyons was playing recording of short stories to his three-hour creative writing class. Have you ever heard Peter Ettison slowed from 33 rpm to a wavering 16 or 8 rpm and finally sinking to a low nothingness? It was so depressing that Dr. Lyons was forced to dismiss the class, much to the obvious dismay of his saddle-sore students.

If you’ve never experienced empathy, I suggest you obtain a three-month-old rug rat (baby) and take him to the clinic for his first shots. Ever had an overwhelming desire to slug an RN? Our baby laughed through the exam, and cooed lovingly at the nurse in his blind ignorance. He soon learned that she was not so charming.

The first issue of the Village Voice will be published some-time next week. If any married student does not receive a copy, you may contact the editors, Lorry and Corrine Henning. The Voice is a small monthly paper, partially sponsored by the Married Students Association, containing news of interest to married students.

Classified ads and news should be phoned or sent to the Hennings, 49 West Court.

Lyceum Series To Open Nov. 5 With Tolkien

Concert entertainment from England in the form of musical settings of J.R.R. Tolkien’s “Lord of the Rings” comes to NDSU Nov. 5 when Donald Swann and a troupe of three begin offering this show for the first time during the 1969-70 lyceum season.

Byron Janis, concert pianist, appears in concert Dec. 2 in Festival Hall. Janis was the first American pianist sent from this country to the USSR on the Cultural Exchange Program.

The Camerata Singers will present “An Evening of Choral Splendor” Feb. 12. The Bach Aria Group, organized in 1946 to perform the arias and duets from the vocal-instrumental cantatas of Bach, will appear in an evening of vocal-instrumental blending March 17.

Final presentation of the series will be the Minnesota Symphony, under the direction of Stanislaw Skrowaczewski, April 1, at the Fieldhouse. All other Lyceum programs will be presented in Festival Hall at 8:15 p.m.

Season tickets for the 1969-70 series are available for $8 from George S. Matthiessen, director of the Union, at ext. 8241. Individual performance tickets are available in advance or at the door for $3. Students will be admitted free on their activity cards.

NOTICE CAR OWNERS

All students with cars are reminded that Fargo City Police require parking on streets and avenues on alternate days. Cars improperly parked will be ticketed which costs $2 per ticket.

Cars will park on avenues Monday, Wednesday and Friday; and will park on streets Tuesday, Thursday, Saturday and Sunday.

The parking problem is particularly critical during snow removal operations in the winter. Car owners are urged to obey the parking regulations.

HomeEc.Hold Alumni Day

“Family Decisions in a Multi-World” is the theme for the Home Ec. Alumni Association Day, to be held at the Home Ec. Building, announced Mrs. William Johnson, President of the Association.

Dr. Richard L. D. Morse, Kansas State University, will dress the banquet beginning 6 p.m. in the Union Ballroom.

Dr. Morse has been professor of Consumer Economics at KSU since 1955.

He has been president of Council on Consumer Informatics served on the first Council Advisory Council under President Kennedy, and was appointed President Johnson to the President’s Committee on Consumer Interests.

The day’s activities include a panel on “Some Current Trends in Financial Services to Families,” a coffee hour, a movie, “The Con,” and a social hour and evening banquet.

Alumni Day meetings are open to the public, as is the banquet and tickets and reservations be obtained by writing Mrs. Bruce Leinest, 2509 North Fargo.

Clergy and Laymen Discuss Draft

Draft counseling and a history of conscription was given at the September 10, Clergy and Laymen Concerned (CLC) meeting by Joan Primeau.

"Military conscription began in modern times in France in 1793," said Primeau, "and the other European countries adopted it to forestall Napoleon. Many of the immigrants to this country left their homes to avoid conscription, and even in 1917 conscription was not liked. As Carl H. Hayden, a Congressman from Arizona, said, "Much as I dislike to believe it, yet I am convinced that most of the propaganda in favor of selective conscription is founded not so much upon a desire to win the war as it is to accustom the people to this method of raising armies and thereby to establish it as a permanent system in this country."

She said that it is legal to interpret and print draft laws; it is legal to give people immigration laws for other countries, but it is illegal to aid deserters, or to conspire to aid others in avoiding the draft. Discussion arose over the ability of getting conscientious objector (CO) status. Two people who had tried to get a CO status said it was rather difficult and very arbitrary as to what qualifies one for a CO.

Mrs. Thomas McGrath, a member of Friends of Demokritia, a group opposed to the military junta presently in power in Greece, spoke. "The priests are forced to praise the regime at the end of Sunday morning services," she said. "The council of Europe has found Greece in violation of human rights."

The Vietnam Action Committee gave a report on the Vietnam marches to be held later in the fall, and information was given on the October 11 Conspiracy Trial in Chicago.

The next CLC meeting will be Sunday afternoon in the Newman Center, where Bishop Armstrong is scheduled to speak.

CLC will be holding a regional meeting October 14 and 15 at Rapid City, S.D., and plans are being made for representatives from this area to attend.

Where soldiers talk like soldiers. And fight like hell!

NOW SHOWING AT CINEMA 70

"The Lion in Winter" is about love and hate between a man and a woman and their sons. It's also about politics, vengeance, greed and ambition. In other words it's about life.

"Much as I dislike to believe it, yet I am convinced that most of the propaganda in favor of selective conscription is founded not so much upon a desire to win the war as it is to accustom the people to this method of raising armies and thereby to establish it as a permanent system in this country."
Housing

(Continued from Page 5)

dness, isn’t it? This is not to say that plans call for these units to remain in service for ten years, but the possibility is there.

This is just one of many questions that have been raised regarding the proposal. At such a good investment and with acres of flat land available, who is to say that similar “temporary” housing units might not be used to accommodate next year’s overflow of students.

There is the argument that funds should be available soon for the construction of new dormitory facilities, probably in the form of high rise dorms. However, this is just speculation during the present period of inflation and cutbacks in government spending.

It seems, lacking an answer to a probing question, university officials have jumped at the most convenient solution to the problem without exploring the alternatives.

A proposal in Senate’s debate meeting is just one of the possible solutions. However, it is one that has merit. The proposal was that coeds who are sophomores or over 21 be allowed to find off-campus housing. Administrators have been quoted as saying if all sopho-

The status of the Zap Fund, according to Molm, included only one payment, $215 for one cafe operator who previously thought she had signed the agreements. Plans are indefinitely indefinite for the remainder of the $81 fund.

When questioned by Zehren, Spectrum Editor Don Homuth said knowledge of any plans for an anniversary celebration of last year’s festival has been cut short. Many senators who said they had heard rumors of a possible celebration would not even let the off-campus proposal help avoid a conflict along these lines as well.
