Student Senate rejects the proposed student government sales tax increases at its meeting last Sunday.

Stan Dardis, finance commission chairman, proposed sales increases for student government officers, SDS and SAB officials. Salaries for senators and SDS and SAB chairmen, presented in the original proposal by Student President Butch Molin, were not included in the finance commission proposal.

Following Dardis's presentation, a motion was made to accept the sales increase as proposed. The motion was tabled at the previous meeting.

Action on this motion was as follows: Senator Larry Hennings moved to amend the motion to accept.

When reasons were given for this, the motion to table the original proposal was adopted, and the motion to accept the original proposal was tabled.

Estimates of time spent per week in senate duty for all the senators ranged from two to 15 hours. Estimates in the ten to 15-hour range were in the majority. Expenses incurred by individual senators during the performance of their duty as senators were said to be nominal and insignificant.

"If a large bill is incurred, reimbursement is always made," explained one senator. Other senators stated that such things as gasoline and car expenses were usually too small to be itemized for reimbursement. A salary wage, if it were being to cover these expenses.

"Because of the responsibility student senators assume, they should receive salaries just as the executive branch does," commented a senator who was in favor of salaries for senators.

A senator averaging ten hours per week in direct and indirect Senate duties would receive about 30 cents per hour, if the 30-cent pay went through. Certainly this is a nominal amount, but senators are worth at least this much.

"Some senators do not do 30 cents per quarter hour of work, but those who do should be paid," stated one senator.

The remark evidently caused hard feelings among members of the Senate.

"We don't deserve salaries," said Senator Ken Schroeder, "but I do, do the job, whatever that means for salaries for the next student government.

SENATE (continued on page 2 column 5)

Walsh Play Gets National Bid

An invitation to compete in a national educational theatre festival has been issued to NDSU's original play, "The Peripatetic Bartholomew Bone.

The play, produced during the summer session of the Little Country Theatre, was attended by H. Beresford Menagh, executive director of the American Educational Theatre Association (AETA) and a personal friend of Dr. Walsh.

To run November 6-9, the play will be attended by a group of judges from the AETA. The judges, from all over the United States viewing plays from 160 colleges and Universities.

Out of the 160 plays, ten will be picked for a special theatre presentation in Washington, D.C. early next year. From the ten, one is picked for a special showing in New York.

"I'm tired of plays that profess to have some great message, but turn out to be only pornography. This play has no great message, except that perhaps we're not laughing enough anymore.

"I think violence has a place in the SPS program, but the violence used by the Weathermen was not specific enough. Too many who saw the production are going to do our best in the theatre."

Student President Butch Molin is presently receiving a salary of $200 per quarter. A raise to $250 was being considered. Senator Terry Grimm is receiving $125 per quarter and an increase to $250 was suggested.

The play, a farce-fantasy, received praise for running, glasses and plastic bags with damp plastic bags with damp

Walsh's Play Sets National Bid

Dr. Frederick G. Walsh is laughed at as he gives a report to the Student Senate. The play which was sponsored by the Student Senate, was attended by H. Beresford Menagh, executive director of the American Educational Theatre Association (AETA) and a personal friend of Dr. Walsh.

Schroeder

Revision and rewriting of the Student Senate Constitution and by-laws were called for at Sunday's meeting by Senator Ken Schroeder.

Early in the meeting, Schroeder asked what happened to last year's committee set up to review the constitution.

Senator Nancy Johnson explained last year's committee had become bogged down and finally disbanded. "We found we could not revise the constitution without rewriting the whole thing," she said.

Schroeder made his motion during the latter portion of the meeting. Included in his motion were specific references to paragraphs which he felt needed review. Most of the passages referred to duties and responsibilities of the senators.

In an interview with the Spectrum after the meeting, Schroeder gave his reasons why he wanted a constitutional review.

"The present constitution does not adequately define the duties and responsibilities of a student senator," Schroeder said. He feels the phrases stating that the Senate may pass laws pertaining to student government and activities are insufficient.

Graduate students presently have no representation on either Senate or Student Senate. Thus, the proposed constitution of the Senate would provide a provision for representation on the Senate by graduate students, there are no voting members presently in either body.

"Ten per cent of the University students are graduate students," said Schroeder. (There are presently 616 graduate students enrolled at NDSU.) "Neither faculty or Student Senate has provisions for their representation, and I think they should be represented somewhere.

Schroeder also feels the present Student Senate Constitution is outdated.

"We have moved past the point where the present constitution will adequately serve our needs," he said. "The present constitution was written for a group trying to supercede both other bodies," said Schroeder.

In addition to revision of structure and duties, Schroeder also sees need for changes in election procedures and duties of the vice chairman of the Senate.

Controversy Continues

Over Housing Preferences

A proposal that veterans be given first choice in the assigning of married student housing has been recently presented to the State Board of Higher Education. A resolution opposing this proposal was passed at the Senate meeting last Sunday.

It was suggested that veterans receive first choice when requesting housing, thereby being able to move into the housing before many couples who may have been on the waiting lists for up to a year. Married Student Senate Chairman Henning moved that veteran married students not be denied preference for dormitory housing. Why should married veterans be able to get into housing immediately after they return unless they have applied in advance as everyone else?

It was also cited that the veterans receive government aid while they attend school, thus offering ample incentive to continue their education after serving in the armed forces.

"No one is begrudging this aid," Henning said, "merely that it is a necessary consideration," said Henning, "pertaining to the waiting list for housing.

Henning went on to say that it wouldn't be fair to the other students applying for married student housing. The administration would be practicing discrimination against civil student veterans.

"Veterans who are not married do not receive their preference for dormitory housing. Why should married veterans be able to get into housing immediately after they return unless they have applied in advance as everyone else?"

A complete change in University government is visualized if present efforts toward closer liaison are effective, Schroeder feels.

A resolution opposing this proposal was passed at the Senate meeting last Sunday.

Run a Government-Not a Charity

Debate on salaries for student legislators and the Student Activities Board has gone on in the midst of great behind-the-scenes comment. At the Student Senate meeting last week, much of the debate came into the open.

It would appear that the Student Senate is unwilling to vote salaries because they do not wish to look bad in the eyes of the student body.

This is all well and good, but in the meantime, the Senate is overlooking the realities of the situation.

The fact is that, compared with the Student Senates of several years ago, the present senate is very much doing its job. Certainly all has not gone perfectly, but then perfection is a bit impossible to expect.

Nonetheless, the powers and responsibilities of the present student government are far greater than they were five years ago. Five years ago, senators were paid exactly what they were worth — nothing. Now times have changed.

Student Senate now debates propositions and initiates proposals which previously were considered outside its field of competence. The administration relies upon the Senate to give knowledgeable reports of student attitudes and desires. Senators sit as representatives on committees of the Faculty Senate — the places where things get done.

It’s refreshing to go to a Senate meeting. Formerly when the chairman called for reports, the usual answer was either “No report” or “Report is still pending.” Now there are five or six meaningful reports at the beginning of every senate meeting.

No, the Student Senate is not perfect. Yes, there are some students who think they aren’t really worth a cent. But this does not deny the fact that there are those who are capable, hard-working people.

Likewise the members of the Student Activities Board. Theirs is the most thankless job of all — attempting to arrange entertainment and activities to satisfy the tastes of 6500 odd (very odd) students.

SAB members have the same multitude of committee meetings, planning sessions and working sessions as senators do. They have their problems, but perfection or the capacity to satisfy everyone realistically does not rest with any group.

It is high time we stopped asking senators and SAB members to be charity workers. The students are those who have campaigned, protested and demonstrated against the war, yet this university has grown, both in mind and attitudes. It has a long way to go, but we can start now.

We urge the senate to vote salaries for both senators and SAB officers and committee chairman.

If a charge of conflict of interest is the greatest factor holding the senate back, then we urge a vote to establish the salaries for the next student government in spring quarter.

Let’s not continue to run student affairs on a charity basis.

Bible Graham On Campus?

It’s amazing when one considers the University’s priorities when it comes time for convocation.

Why are we cancelling classes for one hour so Lane Adams of the Billy Graham Crusade can come to speak on the campus? We must wonder what valuable class time be taken off just so a fundamentalist preacher can come onto campus to spread his own unique “gospel” across the land.

The Billy Graham Crusade does very well financially for itself across the land. With its backers it rents places for rallies and pays a huge staff.

At what point is it the responsibility of North Dakota State University to grant some sort of de facto official sanction to what amounts to a religious service? Would we grant a convocation and call off the bookstore for a religious denomination? Would we give the administration into it, would it be that any movement suggesting a day off from school and forcing the administration into it, would it get a certain number of students agreeing with it solely for the sake of skipping school?

Furthermore, why should those people that disagree with the moratorium method sacrifice a day of school for which they paid?

One of the things that doesn’t make sense to me is why we should strike against the educational system which is supposed to be teaching us to be more open-minded and understanding.

Student Body President, Butch Molm, said in the last edition of the Spectrum, “Over the last few years, millions of Americans have campaigned, protested and demonstrated against the war, yet it continues. Then he says it’s necessary to do more of the same!”

We see that to be a move in the wrong direction. We urge the Senate to vote salaries for both senators and SAB members.

Let’s not continue to run student affairs on a charity basis.

Letters to the Editor

Class-Cutting Motivates Striking Students

To The Editor:

How many students would attend a Viet Nam Moratorium if it would be held on a Saturday rather than a school day? It seems to be that any movement suggesting a day off from school and forcing the administration into it, would get a certain number of students agreeing with it solely for the sake of skipping school.

Furthermore, why should those people that disagree with the moratorium method sacrifice a day of school for which they paid?

I failed to take one forward step which would signify my acceptance. Here and now I am taking pen and paper while awaiting the.y

The Editor:

Dear Editor,

I am an appeal from the imposition of a five year sentence...ed exercise the strength of influence.

The Editor:

The male population of the Olsen family is an even four. The number of hunting enthusiasts in the family is three and a half. I am the half. Because of this, the other hunters in my family will not leave me in a duck blind for more than ten minutes at a time. You see, I fall asleep in duck blinds.

Now I like to go hunting almost as much as the other guy, but my body doesn't always want to cooperate. Anybody who gets up at 5:30 a.m., drives fifty miles in pitch darkness and creeps...muck up to his waist in thirty degree weather waiting for the sun to come up, has got to hate his body just a little bit. Last Sunday was this body-hater's big chance. My younger, but wiser, brother and I fixed our sandwiches Saturday night and set the alarm for 5:30. Being the bum hunter of the family it was just assumed that I would be totally without support. Consequently, my brother made all the other preparations for the trip.

The alarm went off, I fell out of bed and into my clothes, and we were off like a shot. It turned out to be the only decent shooting we did all day. My brother had to give directions on how to get to our secret hunting spot because I'm usually asleep when everyone goes. It's really interesting how every hunter has his own secret hunting spot that no one except his dog and the editor of Field and Stream know about. Unfortunately, the editor of Field and Stream has usually told a million faithful readers.

All million of those readers were bumper to bumper heading west on Interstate 94 at 5:30 Sunday morning. The light created by this exodus of cars had awakened the ducks. Thinking it was morning, they stretched their wings, ate a little grain, shot the bird pop a little and promptly flew to the nearest game refuge. By the time we got to our hunting spot, the heater in the car was finally working. I turned to my brother and said, "How about us, just two little old men and grandpas who refused to fall it?" My brother, Pat, knowing my independent nature and sense of know-how and keeping in mind my animal-like instinct in the field, promptly fixed his sights on an interesting looking seventy year old white heron.

Pat said get out of the car. Pat said get your gun, I got my gun, Pat said load your gun and walk to that duck. I loaded my gun and walked. Pat yelled, "Duck, Duck!" and I ducked. Pat yelled, "No stupid, in the air over your head." Pat didn't have to yell anything. The call of the wild was tearing at my soul. I was violently kept from doing so. I raised my gun with confidence of a skilled hunter. In a second, a whole life flashed through my mind.

I was killing supper for my pioneer family. I would bring it home to my wife and children, patiently awaiting my return to the log cabin I had built with my own two hands. My son was by my side, studying every move I made. I was teaching him the ways of the forest, Indians lurked behind every tree, but did nothing but watch in admiration. The poised hunter, gun and body fused into one, taking careful aim. The moment had come. The moment a hunter waits for all year. I let out a terrifying scream of the hunters and I loaded my gun...with so much apathy throughout North Dakota.

You Little Pig!

Mother’s Love Works Well

by Kim Osterroos

A little pig is born. Shown at 30 seconds old, it has five to six critical hours before it has a fair hold on life. According to David Jensen, herdsman at the hog farm, “If the pigs do not get milk in this first five to six hours you can kiss them goodbye.”

There are many things which endanger a young pig’s life explained Jensen. “Litter size is a big factor. A litter size of from ten to 12 pigs is most desirable. When litter sizes get up to 15 or 16 pigs there is a larger chance for runts to appear because the sow has only 12 functional nipples.”

Disease takes its toll also. A little pig who doesn’t get his shots may contract a serious disease. Then there are always a certain few who are lying in a spot at the same given moment the sow wishes to lay there.

The runt pigs are destined for a very short life. When asked if a special feeding program could be set up for the runts, Jensen replied, “There are only five to ten runs produced during farrowing and it just wouldn’t be monkey with them.”

At six months of age, 400 pigs are sent to the hog research center. “The experiment being conducted is for my physiology thesis, other research is done at a research center,” said Jensen.

The old brood sows are sent to West Fargo for slaughter as few younger sows selling for commercial breeding. The hog supplies all the swine needed: lobs, breeds, classes, judging teams, show livestock, surgical surgery labs and any class which needs swine.

“The main purpose of having a hog farm is for education,” Jensen. Any visitor will be for the quality in SU’s hogs he sees all the ribbons taken livestock shows around the United States.

When asked how the commercial hog raisers react toward University selling hogs on market, Jensen stated he there are very few harsh foul. “The (farmers) send their here to learn how to raise livestock. If we have no herd than the one at home it is no purpose for sending it here.”

“We must either provide raiser with superior animals his herd or make him so we will find better animals to his herd up to competition a sure. I don’t think we her function unless we do a job than the farmer.”

The facilities, built after being removed from main campus, are adequate to care of the 400 head being raised there. The barn is used primarily for farrowing. Outside pens are for the boars and a summer for the sows. All of this on the farm is handled by Jensen and five to seven students. There are no full time personnel.

Jensen has been herdsman the past three and one-half years. He is working on his master’s degree in animal physiology.

Second Walk For Development Planned To Fight Hunger

By Dave Left

Huddled in the recesses of downtown Fargo, in a dark and dreary office, residents of apartments above the alley are sometimes discovered late in the night by the faint echo of a typewriter or the ring of a telephone. Set behind the desk in a small room, a group of high school students,_latelies, and a row of cars is usually parked on the street.

The freshly painted office front glistens in the narrow shaft of light that filters down. The windows are lettered in tempera paint: "Save The Sheyenne." The sign is not a front for pot or communism. In that old office, there is labor with a sense of commitment and direction. It is there that the Walk For Development is taking shape.

Fargo-Moorhead's second Walk For Development will begin at 7 a.m. October 25 at Island Park. Nearly 90 high school and college students have been working late June to organize the event. An estimated 4,000 will participate in the Walk.

Similar Walks are scheduled to take place all over southeast North Dakota and the same day in Bismarck and Devils Lake for the Walk For Development has two purposes. The first and most visible is that of attempting to create an awareness of the nature and extent of hunger at home and abroad. The second purpose, more obvious, is that of raising money for worthwhile projects.

Registration will take place at fraternity, sorority and dormitory halls. One may also register by calling the "Hungry Hotline" at 255-2142.

Volunteers are needed to man checkpoints on the day of the Walk. Faculty members are urged to participate. They should also register.

The Walk for Development newsletter will be distributed on campus in the coming week. Projects that the funds will go to for the Walk to be announced.

Literary House in Lucknow, India — an attempt to give young girls and their wives basic modern agricultural skills and fund a library.

Teen Corps — a group which utilizes youth manpower during the summer months in a variety of poverty projects in Appalachia.

Literacy House in Lucknow, India — an attempt to give young girls and their wives basic modern agricultural skills and fund a library.

The Walk for Development is affiliated with the American Hunger Foundation, a private, nonprofit, nonsectarian organization. It was established in 1961 at the suggestion of President Kennedy in an effort to involve the private sector in the fight against hunger. The AFHF is an affiliate of the UN on Hunger Campaign.

The Walk for Development is part of the Young World Development program, the world's largest privately sponsored poverty project. Beginning in 1961, the Walk for Development has been held in 31 cities across the United States, including curriculum supplements in high schools.

Early in August this year, a group of high school students, latelies, and a row of cars is usually parked on the street.

The freshly painted office front glistens in the narrow shaft of light that filters down. The windows are lettered in tempera paint: "Save The Sheyenne." The sign is not a front for pot or communism. Australian Kinsfolk Singers on N.D. Crusade

The Kinsfolk, an Australian folk singing group, will present a concert at 4:30 p.m. Monday, Oct. 20, in the Ballroom. The group is in the Fargo-Moorhead area as part of the Billy Graham Crusade for Christ, Oct. 13-26 in the Fargo Memorial Auditorium.

They have appeared before 250,000 people in live performances in Australia during the past two years, and they have been judged by TV critics as "big hits" on Australia national television.

In April, 1969, their first RCA recording went on sale.

They have appeared before audiences in the Fargo-Moorhead area as well as across town.

In performance, the Kinsfolk are all members of the same family. Their singing career began in 1964 as a "self-entertainment" venture, after they became excited on hearing Peter, Paul and Mary during a personal presentation in Australia.

Rosie, leader of the group, teaches high school music and does most of the writing and arranging of the numbers for the group. He plays guitar. Richard also a guitarist, has done advanced work in philosophy.

Marion, Tim, Rich and Rose play the double bass. Marion teaches 40 kindergarten children, but has left the classroom for a singing platform.

Bell Telephone: seeking people who can handle big jobs now ... and grow into bigger ones

What some people predicted for the 21st Century, happened to us yesterday. The communications explosion is here.

We've been expecting it. In fact, we helped make it happen ... by expanding the nation's telephone networks, laying cable under the sea, launching communications satellites, teaching computers to "talk" with each other by telephone.

It's a continuing adventure: Bell Telephone operates at the frontiers of the future, as well as across town.

Broad Perspective

We offer challenges and recognition for young persons who can sense the wholeness of today's world ... understand its unifying forces as well as its problems and differences, who are looking for men and women with ability and initiative, individuals who can grasp new situations, apply sound judgment and provide effective leadership.

If you set high standards for yourself and seek a solid future, we want to talk to you.

Personal Progress

A career gets off to a fast start at Bell Telephone. Here, you can have the opportunity to guide projects from the idea stage to their final development. And, you'll be held accountable for the results. Your assignment will largely determine your potential for a position in middle management or higher.

Useful work. Real problems. Meaningful objectives. Now is the time to find out more about this commitment to public service.

Arrange for an appointment with the Bell Telephone recruiting team through your placement office.

Chemists Do Their Thing

by Marydawn Belland

The identity crisis of the chemist is actually one of missing identity. The chemist seems to be one of the strange species that comes to the institution of higher education, enters either Ladd or Dunbar Hall and thereupon conducts unknown experiments and engages in secret projects. Emerging, he returns home. This accounts for the lack of association between the chemist and the campus social life.

In an effort to reorient chemists to NDSU life and the world of the College of Chemistry & Physics we devised the happenings in their laboratory.

Photolysis of hydrogen-carbon, a fancy term for finding the effects of the sun's radiation on drug reactions. The work on this project is being done by Dr. Eads.

A related area is the photochemistry of metal complexes in aqueous solutions. They form a net with groups of ethylene molecules around it, then react it with visible light. The purpose of this is to test the effect of traces of metal in Red River and its tributaries. A question that is being asked ... do the effects of the components of sunlight cause damage to marine and/or plant life or susceptibility to the water supply.

Amazing progress in the field of atmospheric and water pollution is being made in the reaches of the chemistry lab. Many other projects are being conducted in the field of Surface Chemistry, Coordination and Structural Chemistry, etc.

Most of these projects are viewed by the National Science Foundation with grants of up to a thousand dollars. Project anywhere from a couple weeks to a couple of life time.

TIME

The longest word in the language!

By letter count, the long word may be painstakingly microscopically overwhelmed by a long esoteric word. Yet, you'll find it in Webster's New World Dictionary, College Edition. There, you will find more useful information about words than 10 other desk dictionaries.

Take the word. In addition to its derivation and illustration through 15.5 notes, you'll find 48 clues and definitions of the word. With the help of a concrete dictionary. This dictionary is updated and used by more than 8000 colleges and universities in time you owned one. $5.95 for 1760 pages. $2.00 thumb-index.

The youth are willing to die for what they believe in," she continued. "We must decide to die by our choices and by God's choice, but not by the choice of some 'authority.'"

Martin Luther King, had a dream, and part of that dream was to find a day when the Negro could say "Free at last," Miss Anthony related. "Free at last! After the death of Martin Luther King, I said, 'God, when are we going to stop killing the truth?' We've killed Malcolm X, John Kennedy, Medgar Evers and now Martin Luther King," she said.

The key to meaningful integration is not in outward workings of society as practiced by the passage of laws, but in an acceptance of each other mentally said Miss Anthony.

"Integration is an over-used and mis-used word," she responded to a question. "It is all hung up on sex, and the integration has occurred in this area.""What we need to have is a de-segregated mentally so we won't feel threatened when a person of another race is around." She challenged the audience to know itself before it tries to know others. "Until you know yourself, you cannot know anyone else," Miss Anthony said.

Today's institutions and structures must be totally destroyed and rebuilt stated Miss Anthony. "We must be builders. The old systems will only become sour again," she added.

She placed a special challenge to the audience. She called for a commitment to find a day when the Negro would be free at last. "We must act now and not later," she added. "The blacks have a soulfulness, a special arrogance which says I have a gift for you," she concluded. "That gift is the gift of humanity."

The college you can't get into without a job.

The college is ours—Western Electric's Corporate Education Center in Hopewell, New Jersey. Like your college, ours has a campus with dorms, dining halls, labs and a library. Unlike yours, you can't get into ours without a job.

A job at Western Electric.

Our students—engineers, managers and other professionals—develop and expand their skills through a variety of classes; from corporate operations to computer electronics. To help bring better telephone service and equipment, through the Bell System.

For information contact your placement office. Or write: College Relations Manager, Western Electric Co., Room 2500, 222 Broadway, New York, New York 10038. An equal opportunity employer.

Popel is Again Victor

S. A. Popel, associate professor of modern languages at NDSU, won the North Dakota Open Chess Tournament held here recently.

Popel commented that there were 37 players at the tournament, the biggest attendance in the six year history of the tournament. Included were three players each from Minnesota, Winnipeg, Manitoba, South Dakota and Montana.

Second place finisher in the open division was Russell Thurmond, Minot Air Force Base, Charles Thayer, UND, was third.

In the amateur division Paul Shepard of Coon Rapids, Minn., took first place and Bruce Nordstrom from UND placed second.

Studying with us at Concordia College's Institute On Poverty

Moorhead Citizens Urged To Fight Poverty

In the morning sun, Malcolm X, John Kennedy, Martin Luther King, had a dream, and part of that dream was to find a day when the Negro could say "Free at last," Miss Lillian Anthony said. "We must act now and not later," she added. "The blacks have a soulfulness, a special arrogance which says I have a gift for you," she concluded. "That gift is the gift of humanity."

Instructional TV, Additional Audio-Visual Aids Provided By New Program

Several organisational changes have been made in the office of communications and University relations at NDSU.

James A. Berg has been named head of the Division of Instructional Media Services, a new program of the office of communications. Audio-visual aids, now available to the faculty and staff of the College of Agriculture, will be extended to all colleges and sections of the University through the division.

The new division will provide the University with a facility for keeping abreast of changes and developments in the field of instructional media services in areas of self-instruction, programmed instruction, computer-assisted instruction and audio-visual assistance for classroom instruction, according to Dr. Robert A. Jarnagin, director of communications.

Equipment is being installed that will centralize instructional television in the Ceres Hall TV Studio, and link several auditoriums, lecture halls and classroom on campus by underground cable. The Division of Instructional Media Services will cooperate with the Division of Educational Broadcasting in the operation and use of the facility.

Succeeding Berg as head of the Division of Agricultural Information and Agricultural Editor at SU is John J. Feight, who recently returned from two years on a University of Nebraska project in Bogota, Colombia. Feight received a B.S. degree in agriculture from Kansas State University and an M.S. degree in agricultural journalism from Iowa State University. He was formerly assistant extension editor in the College of Agriculture at the University of Illinois.

Gary W. Moran, formerly with the editorial staff of The Dakota Farmer in Aberdeen, S. D., has joined the SU staff as assistant editor for press in the Division of Agricultural Information. A native of Brookings, S. D., Moran received a B.S. degree in mass communications from South Dakota State University in June, and has worked as a staff photographer for the Fort Bragg, S. D., Record.

Gary L. Knutson, a public relations staff member for the past two years with the North Dakota Farm Bureau, has filled the position of coordinating director of high school relations. He represents the University in series of high school career days and be in charge of soliciting and promoting participation and understanding of the University among high school students, counselors and parents.

To insure CAVU*, we select our engineers and scientists carefully. Motivate them well, give them the equipment and facilities only a leader can provide. Offer them company-paid, graduate education opportunities. Encourage them to push into fields that have not been explored before. Keep them reaching for a little bit more responsibility than they can manage. Reward them well when they do manage it.

Your degree can be a B.S., M.S., or Ph.D. in: MECHANICAL • AERONAUTICAL • ELECTRICAL • CHEMICAL • CIVIL • MARINE • INDUSTRIAL ENGINEERING • PHYSICS • CHEMISTRY • METALLURGY • MATERIALS SCIENCE • CERAMICS • MATHEMATICS • STATISTICS • COMPUTER SCIENCE • ENGINEERING SCIENCE • ENGINEERING MECHANICS.

Consult your college placement officer — or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

At Pratt & Whitney Aircraft "ceiling and visibility unlimited" is not just an expression. For example, the President of our parent corporation joined P&WA only two years after receiving an engineering degree. The preceding President, now Chairman, never worked for any other company. The current President of P&WA started in our engineering department as an experimental engineer and moved up to his present position. In fact, the majority of our senior officers all have one thing in common — degrees in an engineering or scientific field.

To insure CAVU*, we select our engineers and scientists carefully. Motivate them well, give them the equipment and facilities only a leader can provide. Offer them company-paid, graduate education opportunities. Encourage them to push into fields that have not been explored before. Keep them reaching for a little bit more responsibility than they can manage. Reward them well when they do manage it.

Your degree can be a B.S., M.S., or Ph.D. in: MECHANICAL • AERONAUTICAL • ELECTRICAL • CHEMICAL • CIVIL • MARINE • INDUSTRIAL ENGINEERING • PHYSICS • CHEMISTRY • METALLURGY • MATERIALS SCIENCE • CERAMICS • MATHEMATICS • STATISTICS • COMPUTER SCIENCE • ENGINEERING SCIENCE • ENGINEERING MECHANICS.

Consult your college placement officer — or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

CAVU* might also mean full utilization of your technical skills through a wide range of challenging programs which include jet engines for the newest military and commercial aircraft, gas turbines for industrial and marine use, rocket engines for space programs, fuel cells for space vehicles and terrestrial uses, and other advanced systems.
**Abbey Road** — the Beatles

English, McMichael: "If you say about the Beatles at this date? Every new release, single or album, is dissected, inspected, sometimes rejected, usually accepted, but never neglected. Not being one to ignore tradition (unlike the new band "Abbey Road," the eponymous street which is taken from the street in London's St. John's Woods, where E.M.I. recording studios are located) I have been the birthplace of their first single. It has been the birthplace of a Jotto dig for here, because together - Sung by...

**Road Open For Interpretation**

"Oh Darling" — Paul sings of true love in a straight 1960's rock progression so reminiscent of "In the Still of the Night" and "Earth Angel. There are cappy, revue sections using some of the same words and intensity as Don't Ask Me Down."

"Octopus's Garden" — Ringo sings of a place he'd like to go (in his yellow submarine?) where "we'll be so happy... no one to tell us what to do." The lyrics are rather mediocre but it's such an optimistic song with beautiful Lennon-McCartney harmony that up-and-coming composer Richard Starkey may be forgiven.

"I want You (She's so Heavy)" — A very long, monotonous song with not too many words sung by John. It's the album's "Why Don't We Do It in the Road?" but it's four or five times as long as "Road" and that's not too bad. You might not hate this but then again you won't walk around humming it.

"Here Comes the Sun" — George's other contribution is a delicate tune with great crashing cymbals and a 12-string guitar riff right out of "Badge" by Cream on which George played. (But you know that.)

"Money" and "The End."

George's other contribution is a delicate tune with great crashing cymbals and a 12-string guitar riff right out of "Badge" by Cream on which George played. (But you know that.)

"Mean Mr. Mustard" is Lennon at his best, singing of a cheap, mean, dirty old man and his sister Pam whom we learn is "Poly-thene Pam." This short passage tribute to The Who, what with chored guitar lifted out of "Tommy."

The rest of the side two is a medley of seven songs that seem to have no cohesive theme, but most of the parts of the whole stand up very well on their individual merits. "Sun King" starts it off in gentle, romantic mood with soft harmony dominated by John. A nice touch is a chorus sung in Spanish and/or Italian.

"You Never Give Me Your Money" — Typically tender McCartney ballad, but that changes at the bridge to Honky Tonk piano, accompanying Paul’s “Lady Madonna” voice. After the bridge it becomes another melody with the line “1,2,3,4,5,6,7, all good children go to Heaven.”

Next comes “She Came In Through the Bathroom Window” which has Paul singing to a beautiful melody that will quickly become a favorite. Possibly the most gorgeous piece of music in the album is “Golden Slumbers,” a string thing with Paul singing like he did on “Yesterday.”

"Carry that Weight" is just a bridge between “Slumbers and a reprise of “You Never Give Me Your Money” and between “Money” and “The End.”

At last we’re at "The End" with Paul singing “And in the end, the love you take is equal to the love you make.”

Never thought about it that way before, but there’s a lot to think about on “Abbey Road” if you’re so inclined. Enjoy the sights along the way; getting there is half the fun.

**We get carried away when you come around... and we love it!**

(But you know that.)

**New Program Provides For Dental Research Experience**

A program in dental research is being offered by the American Dental Association to any student interested. This program makes it possible for selected undergraduate students to spend ten weeks in the laboratory of a research scientist in a dental school factory.

The program provides a sum of $700 to the student for maintenaunce during a ten week period, in addition to transportation to the institute where he will work. It further provides round-trip transportation to a conference of the students to be held in August. The conference is to provide an evaluation of the program and to allow students to communicate their experiences.

Successful candidates will be placed in the laboratories of scientists who can provide training in a field of research related to dentistry.

Since the scope of modern-day oral research encompasses almost the entire spectrum of academic disciplines, this course would be of interest to students in the biological, physical and behavioral sciences.

Deadline for applications is February 15, 1970. Persons interested in further information may contact Dr. G. W. Comita.
Odds Improve, Coed Enrollment Finally Increases

Women outnumbered men for the first time in any single enrollment increase on modern records at SU when final fall quarter enrollment brought 2,001 women and 4,590 men to campus, raising the total enrollment to a record 6,591. There were 207 more coeds and 156 more men than one year ago when the SU student population stood at 6,225.

Since the North Dakota Agriculture College (AC) became SU in 1960, enrollment has nearly doubled from 3,419 to 6,591. The number of coeds on campus has increased from 773 to 2,001, according to Burton Brandrud, director of admissions and records. Brandrud attributes the more rapid growth in the number of women to the change in status from Agricultural College to University.

Enrollment projections prepared by the Agricultural Economics Department more than a year ago estimated the 1969 fall quarter enrollment would reach 6,600.

The number of freshmen on campus rose from 1,717 in 1968 to 1,894 in 1969, an increase of 86 more men and 81 more women than were on campus a year ago.

More than 60 students are enrolled in the College of Pharmacy, Division of Nursing programs. Brandrud attributes the increased interest in nursing and gainful employment for the North Dakota State University College of Nursing examination leads to licensing as registered nurse (RN).

The College of Arts and Sciences again led all other colleges and their enrollment changes again led all other colleges and their enrollment changes. The number of students in Agriculture, 962 to 993; Home Economics, 724 to 732; Engineering, 1,223 to 1,319. The number of graduate students rose from 290 to 293.

Will the Homecoming Queen Contest Survive?

The Homecoming queen contest, a long-standing tradition on many college campuses, is under scrutiny due to changing student preferences and campus policies. This page explores the history of the Homecoming queen election, its significance, and the ongoing debates about its continued relevance.

The article begins by noting the evolution of campus queen contests, from their origins in the late 19th century as a way to celebrate campus life to their current form. It discusses the role of Homecoming crews in the contest and the impact of modern campus culture on the tradition.

The text then delves into the contemporary challenges faced by such contests, including student resistance and calls for political correctness. It highlights the efforts of university administrators to modernize the contest, such as adding a diversity of candidates and emphasizing the importance of community service.

The article concludes with a discussion of the future of the Homecoming queen contest, speculating on whether it will continue to be a part of college life in the future and exploring potential alternatives that might better meet the needs of today's students.

The text also includes references to the history of the Homecoming queen contest, including notable figures and significant events. It provides links to additional resources and websites for further reading on the topic.

Overall, this page offers a comprehensive look at the Homecoming queen contest, its history, and the ongoing debates surrounding its continued relevance on college campuses.
Upset Victory Was Upset

The Bison's crushing ground game took care of any Augustana hopes of an upset victory, as the Herd romped to a 62-14 victory last Saturday night at Sioux Falls, S. D. Five different Bison entered the scoring act, with fullback Dennis Preboski leading the way with three touchdowns.

A brilliant first quarter effort paced the Bison to an early 21-0 lead. Under the direction of Bruce Grasmke, the Bison marched 70 yards in six plays the first time they got the ball. A 23-yard run by Tim Mjos, a 21-yard Grasmke to Roller pass, and two runs by Paul Hatchett paced the drive, with Hatchett scoring on a six yard run.

The second Bison score came midway through the first period with Joe Roller crashing over from the three, climaxing a 47-yard drive which took only five plays, two runs by Grasmke, two by Roller and one by Hatchett.

After another solid effort by the defense, the Vikings were forced to punt, and Hatchett raced 27 yards with the return, leaving the Bison in excellent field position on the Augustana 35. This time it took five plays for the Bison to score, with Grasmke firing ten yards to Chuck Wald for the score.

After the Vikings struck back with a 55-yard touchdown pass, the Bison once again marched the length of the field to regain their 21 point advantage. This time the drive covered 62 yards, with Mjos going the final five yards on a pitchout from Grasmke.

The Auggies once again retaliated on a 29-yard pass from Lee Brandt to John Tollefson, making the score 28-14. After an apparent touchdown pass to Chuck Wald was nullified by a penalty, Joe McMenamy picked off a Brandt pass and returned it to the Augie 19. The Bison needed only four more plays before Mjos scored again on a three yard run. Twardy's conversion made it 35-14 at the half.

The second half saw the Bison score early in the third quarter on a two yard run by fullback Joe Roller. After a futile attempt by Augustana, the Bison marched again, with Dennis Preboski scoring his first touchdown on a one yard plunge. The touchdown left the score 49-14, and the Vikings were demoralized.

In the fourth quarter coach Ron Erhardt took a look at his reserves, as all 38 players who made the trip saw action. Sophomore quarterback Mike Bentson and his mates showed little pity for the Vikings as they marched for two more scores, with Preboski going over from short yardage in each case. Jim Twardy's second missed conversion of the year left the score at its final 62-14.

Final game statistics showed the Bison superiority. The Bison gained an amazing 481 yards by rushing, and 139 yards passing, for a net of 620 yards total offense. This was compared to 98 yards rushing and 88 yards passing for a total offense of 186 yards for the Augies.

The victory also gave the Bison undisputed possession of first place in the NCC, as Montana and UND suffered their first conference losses in last week's play. It was the 14th consecutive win for the Bison.

Defensively, the Bison were once again led once again by safety Cichy. He was credited with unassisted tackles and 94 points on the defensive chart. His effort this week left him well ahead both departments for the games played thus far.

The Bison return home next week to host UND on Saturday Dacotah Field at 1:30 p.m. Sioux appear to be the only remaining threat to a Bison championship, and the traditional rivalry insures a hard hit contest.

Faltering Sioux Bison Target

Their offense looks punchless, their defense has been vulnerable, and they haven't beaten us in four years. So why the big excitement about Saturday's game with "the other college" at Grand Forks?

Any time the Bison play the UND Sioux there is the added excitement of a 75-year-old rivalry that began in 1894 with the first football game for the two schools. The Bison won that first game by a score of 24-6, and they won the last one by a score of 14-6.

In that game last year Paul Hatchett's 161 yards rushing led an SU ground game that accounted for 246 rushing to only 17 rushing yards for the Sioux. That Bison victory did much to spoil UND's Homecoming. The Sioux will be attempting to return the favor by noting their first victory over the Bison since 1964.

It has not been a good year for UND football. Heading into Saturday's game they have a 2-3 record, including a 1-1 record in the North Central Conference. Two weeks ago the Sioux opened their NCC season with a stunning 35-26 upset over South Dakota.

The conference title hopes of UND fans received a severe jolt last Saturday when they suffered a 19-13 Homecoming loss to previously winless South Dakota State. The Sioux offense was punchless, and numerous mistakes (four passes intercepted and one fumble) contributed to their defeat.

Through much of the second half of their game against South Dakota State the Sioux did not have a senior or junior in their offensive backfield. Freshman Jay Gustafson was quarterback and freshman Mark Bellmore and sophomore Jerry Skogmo and Dan Martinson were running backs.

Both of SDSU's touchdowns came on interceptions of starting quarterback Mike Conner's passes. Entering the game Conner was the eighth leading passer in the nation. The two UND quarterbacks for the game completed only 19 of 47 passes, and the Sioux running attack could manage only 75 yards.

Because of their disastrous loss to SDSU, it's difficult to determine what the Sioux starting lineup will look like. Quarterback Mike Conner, a 4'11" 214-pound junior who set out last season because of a knee injury, has at times been a brilliant passer and a fine punter.

Conner's big problem has been overcoming his mistakes. He will undoubtedly fill the air with footballs on Saturday unless the Sioux can develop an effective ground game this week in practice.

Other offensive stars for the Sioux are freshman halfback Mark Bellmore, senior flanker Dick Kampa and center Bruce Smith. In his first varsity action in the Sioux victory over USD two weeks ago, Bellmore ran for 96 yards and threw a 37-yard touchdown pass to Kampa.

Kampa is the most versatile player on the squad. Last year he took over as quarterback after Conner's injury and completed 111 of 196 passes for 3353 yards. This year he is a dangerous flanker. UND coaches consider Smith the best center in the North Central Conference.

Defensively the Sioux are led by all-conference backer Pete Gilbert. Last year against the Bison, Gilbert intercepted 2 passes, recovered 2 fumbles and returned 2 kickoff returns for 93 yards, almost breaking away for a touchdown on one return.

There are young, unknown performers in many positions for the Sioux. They must cut down on their mistakes in order to beat the Bison.

The Sioux are seeking their 300th all-time victory. The Bison-Sioux series stands at 46 wins for UND, 24 wins for SU and 3 ties. The Bison are seeking their fifth consecutive victory over UND and their 27th straight victory on the Dakota Field in Saturday's 1:30 game.

...
His Favorite Team
Ron Corliss Muses About Bison

One of the most avid Bison followers is Ron Corliss, ticket manager for NDSU. His zealous affection for the team ever put on an SU field, but we are still capable of beating them. "We can't afford to consider the game a push-over. We are playing in one of the toughest conferences in the nation and UND is capable of surprising us."

"In 1964, the last time they beat us, we went 10-1 on the season. The Thursday night before the UND game a group of SU students broke into an UND pep rally chanting 'We're number one!' This gave the Sioux the incentive to beat us 20-13 and ruin our unbeaten season."

"I would have to point to Ken Blazie's field goal in the 1966 SU-UND battle. This series has been marked by everything imaginable except mediocrity."

"Things were different for football around here then," stated Fortier. "All the athletes were housed in Finnegan Hall which is the laundry now. We called it the pit for obvious reasons." (Ed note: The laundry has since been moved to a new building. The laundry referred to by Fortier is now the cabinet shop, the white building west of the Union.)

"Everyday after school we were bused to El Zagel for practice. When it became too dark the coach would drive the bus up to the line of scrimmage and turn on the headlights so we could continue practicing."

"Due to the small number of scholarships we were allowed to give out (25), we didn't have the quality or quantity of athletes we have today. To compound matters there was no platoning in those days. Everyone had to go both ways," said Fortier. "The coaching staff in 1957 consisted of two full time coaches and two graduate student assistants, compared to the six full time coaches and five graduate students assistants now handling the Bison."

"The Bison of today have a lot going for them," reflected Fortier. "To me the main difference is pride. SU used to be the dog as the second school. We now the AC. Through the years of the academic program the positive publicity offered by the football team we have taken on the number one unknown in the state."
Philosopher Gives Business Ethic

Dr. Paul L. Holmer, professor of philosophy at Yale University, was the first in a series of guest lecturers sponsored by the tri-college philosophy departments the evening of Oct. 1 in Stevens Auditorium.

Holmer, born and raised in Minnesota, based his lecture, "Religion and Ethics," on the concept of "Happiness."

"Happiness," said Holmer, "is an umbrella concept that keeps order in our lives and hangs the game of life together."

Aristotle wrote that in order for man to be happy it was necessary to have "wealth, health, strong body, birth, intellect, and an extreme amount of good-luck."

"If a man is going to be happy, he has to feel happy," said Holmer. "It is a state of mind."

Nationwide Fees
And Tuition Up
WASHINGTON - (CPS) Tuition and fees are up about 15 per cent over a year ago at state colleges and universities across the nation. Total student charges, which include room and board as well as tuition and incidentals, are up about seven per cent.

A study of 374 state schools by the National Association of State Universities and Land Grant Colleges noted that fees have risen nearly 40 per cent during the last six years. Some midwestern schools are catching up to eastern schools, usually higher priced.

The 7 per cent rise in total charges is higher than the Consumer Price Index (cost of living study) for the same period.
SAB Movies!

TODAY, OCT. 16: 7:00 p.m.

Creature from the Black Lagoon

A living creature from the past is found in the tangled jungle of the upper reaches of the Amazon. In the science fiction movie, the archeologists battle to capture it.

Comedy of Terrors (color)

Vincent Price and Peter Lorre take roles as bumbling undertakers who run wild to find “customers” and commit murder to “scare up” new business. The excitement begins when a “victim” refuses to stay dead.

SUNDAY, OCT. 16: 9:00 p.m.

A Thousand Clowns

Story of a T.V. writer, whose nonconformist style and personality get him into trouble with the Welfare Department; because of his off-handed way of raising his nephew. He becomes involved with a beautiful social worker who tries to straighten his life.

THURSDAY, OCT. 20: 7:30 P.M.

La Strada (The Road)

The award-winning movie, La Strada, creates a world of its own. A simple-minded waif, a British strong-man and a philosophical “food” travel the highway in Italy creating a story of every man’s loneliness and search for the meaning of life.

SUNDAY, OCT. 26: 5:00 P.M. & 7:00 P.M.

The Fox

Once again Peter Sellers out-does himself in an outstanding acting ability. His dramatic effort to get Mrs. X’s permission to join a rose chain ends in complete ribbickling chaos. Watch for the Fox.

SAB Movies!
Voluntary subscriptions from faculty and administrators were also a subject of discussion. Gary Rudolph, Board member, stated that out of approximately 400 faculty members, 40 to 50 have paid for subscriptions.

The Spectrum circulation staff will mail letters to the parents of all students asking if they would like to subscribe to the paper.

Don Homuth, Spectrum editor, suggested that many parents have little idea about what happens on campus. "We do a pretty good job of telling them what goes on. We'd like to offer a way for parents to find out more about what happens here."

Homuth also said that he had received notice from the Alumni Association's Century Club that they had offered free Spectrum subscriptions to Club contributors. Presently, complementary issues are mailed to area high schools and advertisers. The Board discussed the advisability of extending the complementary subscriptions.

Action was taken in support of a request to send five Spectrum and three Bismarck staff members to the American College Press Convention at Madison, Wis. The convention is scheduled for the end of October and is a national workshop for college publication staff members.

Robert Burgess announced that, at a State Board of Publications meeting held in Washington, D.C., Bud Sinner raised discussion concerning the possibility of moving student newspapers off campus. Board discussion reflected the fact that the fervor to censor the campus newspaper is still present at the state.

Attention, college gals! . . . Herbst hair stylists are offering a new "SHAG" cut! Easy to care for . . . stylish for . . . and looks great. Try it today.

Hip Culture Thrives In Wilds of Utah

by Jim Meck
College Press Service

HAYDIE DOME, Utah (in the Sweet River Canyon Valley) (CPS) — There is a lot of sand in Harley Dome, and not too much else, except a lot of groovy young people.

"We've been hip for some time, now," Nancy, an Indian girl from nearby Uintah Indian Reservation explains, peering through her glasses, her arm around her 16-year-old high school beau, skipping school to talk with travelers coming through the Skelley gas station. "I mean, we've been with it, you know one thing or another."

"It's true most everywhere you go. Bare feet, skinny glasses, bell buttons and Aussie hats are common from coast to coast, even in the west — to become what the locals call 'townies' imagine. The youth rebellion and its companion drugs are spreading far and wide.

"Why, we've been everywhere from Moab and Provo even to Las Vegas, it's like this all over," Nancy says. Harley Dome is on Interstate 80, a major runway from the east into San Francisco.

Tom, a high school student explains that kids in Utah are not as straight or classic, "'Hillbillies,'" he says, "are more the nationwide way of thinking. "Usually they think they're teaching us how to live, from New York or California."

The town of Moab, with 4,500 inhabitants, is the third largest city in Utah, and an important link between two major runway from the east and west. The flow of grass into Moab is something Tom knows the right places. "Why, we've been hip for some time, now," Nancy, an Indian girl from nearby Uintah Indian Reservation explains, peering through her glasses, her arm around her 16-year-old high school beau, skipping school to talk with travelers coming through the Skelley gas station. "I mean, we've been with it, you know one thing or another."
