California native finds namesake in Fargo

One might readily assume that Carmen Minard of Salinas, Calif., is attending SU because of family tradition. After all, Minard is practically a household word on campus and graces one of the largest buildings, Minard Hall.

Quite the contrary. "When I was deciding on which college I was going to choose, I knew I wanted to see someplace different

than California. I wanted an adventure," Carmen recalls. She had heard about SU through two friends from Salinas, Bob Towne, now with Young Life in Fargo, and Ed Hinkel, who is attending SU on a basketball scholarship.

One day Carmen was paging through the SU catalog and noticed the name, Minard Hall. Minard being an uncommon name in Califor-

nia, she asked her father about it.

"Oh, yes, Great-uncle Archie from North Dakota," Christopher Minard said, but his memories were vague.

After arriving on campus, Carmen immediately went to the library to search out information about her great-great uncle. She found reams of material.

Archibald E. Minard came here in 1904 as instructor in English and

philosophy. He had received bachelor's and master's degrees from Harvard and later studies at the University of Chicago, University of Wisconsin and Oxford.

He became head of the department in 1907 and dean of the newly organized School of Science and Literature in 1919.

Professor Minard is best remembered for having penned the words to the school song, "The Yellow and the Green."

Tracing her lineage, Carmen found that Archibald Minard had a brother, Asa, who had a son, Roger, who had a son, Christopher, who had a daughter, Carmen. Finding her "roots" has added greatly to Carmen's college experience.

And how does Carmen feel about SU?

"I love it here," Carmen said. "Everything is so much slower paced, and the people are unbelievably friendly. It's almost a different culture than what we have in California." Undaunted by the winter, Carmen says she loves the four seasons.

Carmen may not stay as long as her great-great uncle, but she does plan to graduate from SU with a degree in interpersonal communication.

It seems only natural that most of her classes meet in—Minard Hall, of course.

Student Carmen Minard stands in front of Minard Hall. The building was named after her great-great-uncle Archibald Minard, who was dean of the College of Science and Literature earlier this century.

Radio Society receiving messages from space shuttle

By Jenae Bunyak

The space shuttle Columbia— which orbited 150 miles above the earth—seemed far away to most, but the members of the SU Amateur Radio Society, the distance seemed

The group operated a communication receiver that picked up radio signals from the shuttle. During last week's mission, the members heard and pieces of the astronaut's

conversation.

"Looking out the window we can see the home state of one of our colleagues, Michigan," and "...crossing over White Sands in an hour..."

Ninety minutes to two hours after take-off March 22, those listening to the receiver heard the transmissions from the first orbit, although noise interference sometimes made it difficult to hear what the astronauts were saying.

"Sometimes a lot is heard and

sometimes nothing," said Fred Stevens, research director of the club and a senior in electrical and electronics engineering.

"Three to four minutes is all they (the astronauts) usually talk and if they don't happen to have anything to say when they're within the range of the receiver then, of course, nothing is heard," Stevens said.

"We thought it would be kind of a neat thing to do," Bob Barker, a sophomore in computer science, said about tuning in to the shuttle's frequency.

The receiver is set on the same frequency as the shuttle, 296.8 megahertz. This is their "chit chat" frequency, Barker said.

Nothing of importance as far as security information was discussed, but they could hear the audio used along with TV pictures Barker said.

Anything heard is recorded on cassette tape for the club's personal use and members will use the tape to learn how to cut down on interference.

Under a recently-revised communications act the radio signals, such as from the space shuttle, are not for the general public and can't be rebroadcast, Stevens said. In order to do so, one would need to get a release from the National Aeronautics and Space Administration in Houston.

Only the people that heard the original talk are able to listen to the same message on tape, Stevens said.

The receiver can pick up a good signal on three of the four orbits passing over the United States, Stevens said. The shuttle was within range only for about five minutes.

The shuttle could be heard at three times each day last week. The 11 a.m. orbit passed over Texas and continued on an arch up through Missouri, Indiana, Illinois, Ohio, New York, New Hampshire and Maine.

The 12:30 p.m. orbit passed over San Francisco, and continued over South Dakota, Minnesota, Wisconsin and New York.

The 2 p.m. orbit passed over Oregon, Montana, Wyoming, South Dakota, Iowa and the coast of Virginia.

The 3:30 p.m. orbit, which passed over California, Arizona and the southern part of the United States, could not be heard here, Stevens said.

How is the signal received? A new omnidirectional antenna and pre-amplifier sit on the roof of the Electrical Engineering and Computer Center. No commercial antenna was available for that frequency, said Ray Gassmann, a graduate student in computer science so Stevens and Dale Carlson, a junior in EEE,

Shuttle To Page 2

City officials watching Red River for signs of early spring flooding

By Jenae Bunyak

Winter seems reluctant to leave as shown by the snowfall last week, which ranged from 4 inches in the Fargo-Moorhead area to more than a foot in Wahpeton.

The precipitation for this time of year is usually "very little" according to Bob Nordland, hydrologist at National Weather Service office at Hector Airport.

The average daily precipitation is usually about 0.02 inches. Later into spring this amount increases, Nordland said.

In March the average precipitation is about 0.83 inches. As of

March 24 it was already 1.03 inches.

The Forum reported on March 24 the Red River was predicted to crest at 30 feet—13 feet above flood stage. Flood stage, Nordland explained, is the lowest point in the immediate reach of the river where some flooding will occur.

At 17 feet, only the bike paths in Fargo will be covered with water. Thus, there is "some flooding" Nordland says.

Nordland explained how the level of the water in the Red River is measured. A stilling well with a hole at the bottom contains a pipe which leads into the river.

Flooding To Page 2

Shuttle From Page 1

designed and built one out of copper wire.

As the antenna picks up the signals from the space shuttle they are amplified and travel down a cable into the VHF (very high frequency) communication receiver, Stevens said. The signals are then heard through an attached speaker.

Although the transmitter to the unit has not been used yet, theoretically they should be able to talk to the shuttle, Barker said.

"The hams are restricted according to their frequency as to who they can talk to and we have no intention of talking to them (the astronauts)". Should we do so, at the

minimum, our license would be revoked and we would be fined," Barker said.

The SU Amateur Radio Society (call letters WOHS) does other things besides listening to the space shuttle. Members operate the ham radio station, teach classes in obtaining ham radio licenses, participate in contests and "have a good time," Gassmann said.

The operators, using either voice or Morse code, have talked to people all over the world, including Bermuda, Spitzbergen, Italy, Bulgaria and French Polynesia, Gassmann said.

Flooding From Page 1

The pressure of the water causes it to well up into the pipe, causing the water in the pipe to be the same level as the river. A float with an automatic reader attached is placed in the pipe. The automatic reader then provides water level information and is checked every day Nordland said.

In the past 18 years there have been 14 floods, with the last being in 1979.

"Spring broke in with a vengeance, it brought 2 to 3 inches of rain," Nordland said.

The recent melt before this last snowfall had saturated the top 5 to 6 inches of soil, below was a layer of frost. Nordland said any additional precipitation will not penetrate and the runoff into the river will be large.

What conditions are necessary to prevent a flood this year?

"No more snow, bright sunny days, lots of wind to evaporate the precipitation, freezing-off every night," Nordland said. "No rain until the soil is dry."

Will this happen?

"The chances are about nil," Nordland said.

The most important variable in determining whether flooding will occur and the extent of it is how much rain will come, said Dr. John Enz, assistant professor of agricultural climatology of the SU department of soil science. How fast

the snow melts is another important variable.

For example when an inch of rain falls on the watershed it melts the snow and the subsequent runoff is quite large, Enz said. The watershed is the area of land where all the water drains to a certain river.

SU won't be hit too badly should a flood occur, said Dr. Jim Richardson, assistant professor of soil science at SU. Cass County Drainage Ditch No. 3, which is located at the northwest corner of campus, helps hold the runoff. Interstate 29 acts like a dike and cuts off possible flooding from the West Fargo area, Richardson said.

This area is covered by flood insurance anyway, whereas most of West Fargo is not, Richardson added.

The present water situation is adversely affecting the soil science and agronomy research plots located at the northwest corner of campus, Enz said. They are concerned about the winter wheat and the alfalfa out there.

The thaw in February created a layer of ice which kills the vegetation as it seals off the plants from air, Enz said. The water also affects the sod in the grass area which is used for a standard in experiments.

"The surface water also makes it hard for walking out there and getting to everything," Enz said.

Local prayer service held for slain Baha'is

By Julie Stillwell

Unless one has gone without food for days at a time, it is hard to know what hunger means. Freedom of speech seems commonplace until the day comes when you are afraid to speak your mind for the safety of you and your family.

And freedom of religion never seems quite as precious until members of your own faith in another country are crushed under the heavy hands of religious persecution.

Members of the Baha'i faith in Fargo-Moorhead met for a prayer service Saturday afternoon as part of a nationwide Baha'i prayer effort, commemorating the Baha'is in Iran who have lost their lives because of their religious beliefs.

Although the world's eyes are now focused on the troubles brewing in El Salvador and Poland, Baha'is who are enjoying religious freedom in the United States and other free countries are carefully eyeing the injustices being committed against the members of their religious faith in

Iran, a country where the Islamic government is the ruling power, citizens who profess the Baha'i faith are being "systematically exterminated," according to Marian Kadrie, Fargo, who gave a commentary on the situation in Iran during the prayer meeting.

Iranian Baha'is are not issued the identification cards needed to purchase food, gas, clothing and other commodities on the open market. They are forced to obtain goods through the black market at inflated prices, which they can hardly afford. They are losing their jobs—another economic sanction taken against these people.

Baha'is are fleeing the Iranian government to live in the mountains, because if they are asked by the government to recant their faith, they must do so or be executed.

Marian Kadrie spoke about the situation in Iran for people of the Baha'i faith at a prayer meeting Saturday.

It was difficult for the local Baha'is to explain just why members of their faith have constantly been persecuted by their country's government, because the very tenets of their faith are non-violence, submission to government and world unity.

The Baha'is believe a supreme being or higher power is the world's constant ruling force, and he continues to speak through a chain of prophets including Krishna, Moses, Zoroaster, Buddha, Jesus Christ, Muhammad, The Bab and finally Baha'u'llah, the "promised one of all ages," whose influence began in 1844 in Iran.

Baha'is believe in the oneness of

mankind, and they believe in the equality of men and women—something that has become almost non-existent since the Shah's overthrow.

The Baha'is have no ordained clergy or specific leaders, because when one person is in authority over a group, the independent search for truth is stifled, they say. This aspect of their belief—searching independently for truth instead of heeding the carefully chosen words of religious leaders—may be a prime cause of the Baha'is persecution.

Armine Hashemi, an SU student and member of the Baha'is faith estimates there are 300,000 Baha'is in Iran, although the numbers are decreasing with the effects of persecution.

She noted that the persecutors are killing the most educated persons in Iran. She estimates at that only 30 to 40 percent of Iranians are highly educated, and most of these are Baha'is. Education is another of their religious goals.

While the persecutions are a prayerful concern of the Baha'is worldwide, as well as persons of other faiths, they are also an accepted part of the Baha'is lifestyle, explained Houshmand Akhavan, a former MSU student who is now employed in Minneapolis.

He said the father of two MSU students was killed in Iran recently, but their faith has not decreased because of the incident.

"It's nothing new," he said of the killings that have been happening throughout the history of the

138-year-old religion.

Because their religion opposes violent self-defense, Baha'is often accept the executions as a part of the progression of life.

"This world is a stage for our souls to progress," Akhavan explained. "It is preparation for our soul. It is like an infant developing arms, legs, his faculties while in his mother's womb. He doesn't know why he is developing them then, but when he comes into this world, he knows why."

"We may not be using it now, but later we will realize why we need to do this. We accept, we believe in our religion, and persecution is part of it. To deny it, (the Baha'i religion) to let it go is selfishness. We have to sacrifice because of our faith," he said.

Hashemi illustrated this describing how the victims of execution will ask the identity of their executioner before they are killed, so they can kiss his hands.

"They are happy because they are dying for their faith. If they denied their faith, they wouldn't have it anymore."

Although the Baha'is see this persecution as a part of their religion, they are by no means complacent about it continuing.

Akhavan said members of the Baha'is faith and their friends are contacting government leaders all the way from state levels to the United Nations, asking them to be

Houshmand Akhavan

aware of what is happening in Iran and other Middle East countries. Many free nations condemned Iran and its government for its actions.

The power of prayer, however, remains the strength for the Baha'is believers.

Concluding the prayer session, Kadrie said, "I believe, without any doubt (the persecution will end). I have great hopes. We know God's will will prevail, and we will see a time of peace when all people live as brothers."

EDITORIAL

A few months ago I wrote a column about my landlord not returning my security deposit. I want you to know my roommates and I finally received most of the money due to us.

Our judgment was for three times the amount of the deposit plus court costs. Our landlord was found to have unreasonably withheld our money so he had to pay the price.

He still owes us a measly \$2.78. I fixed it so the sheriff would go back to his bank account and make one final withdrawal.

Each time the sheriff does this service for us he charges our landlord for labor, fuel and wear on the vehicle. It seems like a fair deal to me.

The majority of college students were not residents of the local Fargo-Moorhead area prior to applying at SU. This creates a need for housing these students.

The university has a rule which keeps most freshmen and sophomores living on campus while others have a choice.

Many choose to find a somewhat cozy dwelling within walking

distance of Minard. Once they've made this decision, it may draw them to their first encounter with written contracts.

Landlords know this. While most are honorable people trying to make a decent living, others are parasites trying to devise ways to seize more and more money from students' bank accounts.

Since most students have little knowledge about rental legalities they become easy targets for greedy landlords.

The easiest way for landlords to make a few fast bucks is to not return security deposits when students move. This money has been given to landlords in good faith to cover possible damages by renters.

When they keep the money for no good reason after their tenants move, they not only know their tenants are aware of this but they do not care either.

The only recourse renters have against this theft is taking each landlord to small claims court.

While this is an easy task it is fairly lengthy. And since students are

probably the most transient of F-M renters and thus live in many different places during their college careers, they become a ready, almost willing reserve of wealth to tap into using this scheme.

Students are busy people just like everyone else. Some landlords enter a kind of betting game. They know if they lose in small claims court they may be forced to refund three times the amount of the deposit.

But how many students are willing to take the time to legally fight for their money? It seems few are.

After writing about my landlord the first time I received phone calls from three other groups of SU students who had lost their deposits in the same manner from the same landlord.

I encouraged them to take the matter to small claims court. Only one group seemed willing. The others simply wrote it off.

Hey. This is almost the same as if your landlord took your wallet. It's stealing and it's easy to prove. Small claims court is the poor man's route to justice.

All it takes is about \$6 and you can take anyone to court. You have to use a lawyer. All you tell the judge your side of the story and your landlord tells his side.

If you lose, it's no big deal. You lose a few bucks. At least you do something about what was perceived to be an injustice.

Recently, I discovered my name is still listed in the Rental Housing Directory, a local group which offers free referrals to renters.

It would be helpful if the university could play a more active role in this area. Maybe some organization would like to take this job.

If local services take so little time in doing their work students surely reap the ill effects.

The university doesn't provide enough housing for all students. Excess live off campus. Since we come here primarily to get an education shouldn't it be partly the university's job to link them up with landlords?

Maybe a system could be developed in which the university acts as a third party and holds student security deposits while they live in university-approved apartments.

Since these ideas are years away from being reality your best bet as a renter is to be careful and know your rights.

Security deposits are almost always money in the bank. They can earn interest but someone else can make the withdrawal while you're not looking.

LETTERS

No. 1

I am writing the following letter because I am both amused and curious as to the assessment of fees at SU. I am a first-year graduate student at the school and a graduate teaching assistant.

As a teaching assistant my tuition is waived and all I pay is the student activity fee on a quarterly basis. The payment of that fee is the topic of this letter.

During the three quarters I have been at SU I have never paid the same fee twice. Furthermore, upon asking the persons collecting the fees to explain the reason for the variance, I have never received a satisfactory answer.

Fees ranged between \$11 and \$34. In each case I have registered as a full-time student.

At the time the \$11 fee was paid I was asked whether or not I wanted an activity card and I answered I did not.

The last time I paid fees I was told I did not have a choice and that I was getting an activity card.

I probably would not have written this letter had I not related this situation to several other first-year full-time graduate students, some of whom had the same schedule as myself.

It seems fees varied not only from quarter to quarter but from student to student for each quarter.

For instance, during the first quarter of this year three new graduate students, myself included, with identical class schedules paid \$35, \$30 and \$40.

Upon talking with several other graduate students it became fairly obvious no one knew what to expect

when he went to pay fees.

In fact, one student suggested that perhaps the cashiers used a random number generator in deciding what to collect.

This seems illogical and I would be more than happy to hear an explanation. Despite several inquiries, no explanation has been provided.

Bromel to receive 1982 Odney Award

(NB)—A bacteriology professor at SU who has been able to communicate to students her own deep commitment to science, Dr. Mary Bromel, will be the recipient of the Robert Odney Award for Excellence in Teaching.

Presentation of the award, which includes a \$1,000 gift funded by the SU Development Foundation, will be made at 3 p.m. Thursday, April 1, in the Union Ballroom. A reception will follow in Hultz Lounge. The public is welcome to attend.

Presenting the award will be President L.D. Loftsgard. Other speakers will be Dr. Bayard Sleeper, professor of bacteriology and Dr. Ross Wilkinson, associate dean of agriculture.

In a letter of nomination an alumna wrote, "At times it seemed that Dr. Bromel had so much to tell us that we could never hear it all. When the class bell rang we seldom left our seats. We were always in the middle of a fascinating topic or Dr. Bromel had just a little more to tell us about something. Needless to say, I was ecstatic about my choice

of careers, fascinated by the world of invisible creatures that I had discovered. Dr. Bromel made every day a new discovery, an exciting experience. It seemed we would never have time to learn everything she had to teach us."

A member of the SU faculty since 1968, Bromel teaches general bacteriology, pathogenic bacteriology, hematology and microbial ecology. Her areas of research vary from rumen microbiology to the water quality of rural water systems. In addition to experiment station research projects, Bromel has served as a consultant on environmental matters for citizen groups along with national and international bodies. Presently she is a colleague in a USDA agricultural research study of bacteria associated with the screwworm, a serious cattle pest.

Bromel is a member of the coordinating committee of the Tri-College Center for Environmental Studies and was a member of the Technical Task Force on Water-North Dakota Legislative Council Regional Assess-

ment Program, as well as an appointee to the N.D. Water Pollution Advisory Board. In addition to numerous campus committee assignments, Bromel has been faculty adviser for the Medical Technology Club since 1969.

Bromel received a Ph.D. in bacteriology from Wayne State University, Detroit, Mich.

The recipient of several awards, Bromel was named the first Outstanding Woman Educator by the Association of Women Students at SU in 1970; she received the Blue Key Outstanding Educator Award and was named the Outstanding North Dakota Woman in the field of Science and Medicine by the North Dakota Women's Coalition and North Dakota Commission on the Status of Women in cooperation with the Greater North Dakota Association in 1973 and in 1981 she was honored with the Blue Key Doctor of Service Award.

Plaque

From Page 4

has a monopoly on the majority of SU books.

Quarter after quarter I have waited in endless lines hoping to receive a fair price for returned books. Instead, I gain 35 percent or less of the books' initial worth.

As a result, when I read about still another attempt to squeeze an additional \$30 from my pockets and those of my family my reaction is one of extreme anger.

An estimated \$800 to \$1,000 has been spent by me on books alone.

If Varsity Mart officials were truly sincere the entire plaque would be offered at no cost as a token of appreciation for the past four years of doing business with students.

I cannot believe Varsity Mart's management has the gall to make one last sale before commencement.

Mark S. Mathern

Garfield out in front..

SU reading habits differ from nationwide trends

By Murray Wolf

A love of Garfield the cat and the Rubik's cube are about the only similarities you'll find in the reading habits of SU students as compared to students nationwide.

Few resemblances can be found

SU freshman interning in Washington

By Michelle Beauclair

Christi Light, an SU freshman biochemistry major from Devils Lake, North Dakota, has been chosen to intern in the office of North Dakota Rep. Byron Dorgan, in Washington, D.C.

Light is interning in Dorgan's office from March 8 to May 31. She is receiving college political science credits for her internship.

Light works in Dorgan's office weekdays from 9 a.m. to 6 p.m. Her job consisting of general office work and case-work, includes evaluating complaint letters from constituents. Most complaints involve social security, the veterans administration and the Burlington Northern Railroad, Light said.

"I am very impressed with the congressman I work for. The staff works long hours and does a good job solving the problems of it's constituents," Light said.

Light was selected for her internship through an application-interview process. Her application, along with references from local government officials, was screened at the state level. Finalists who pass the preliminary screening are then interviewed by Washington governmental personnel who make the ultimate decision for the internships.

"Washington is much different than I expected—very pleasant. If you can live in Fargo, you can live in Washington," Light said.

between the top 10 selling books on campuses nationwide (as compiled by "The Chronicle of Higher Education") and the bestsellers at the SU Varsity Mart. Only four books made both lists.

"Garfield Bigger Than Life" by Jim Davis tops the list here at SU. One of the few books to make both lists, the book is ranked fourth nationally.

Another Davis' creation, "Garfield at Large," is another of the handful of bestsellers both locally and nationally. "Garfield at Large"

stop.

In these parts Louis L'Amour's "Comstock Lode" is No. 2, but the book isn't among the top ten on campuses nationally. The same goes for "Color Me Beautiful" by Carol Jackson, which is No. 3 here.

Some books that are making it big nationwide but not at the Varsity Mart include Mary Gordon's novel "The Company of Women" and a couple of other volumes for cubers, "You Can Do The Cube" by Patrick Bossert and "Mastering Rubik's Cube" by Don Taylor.

"The Company of Women" is number two on campuses across the nation, "You Can Do The Cube" is third and "Mastering Rubik's Cube" is 10th. None of the three can be found in SU's top 10.

You won't find Taylor Caldwell's "Answer As a Man" among the SU bestsellers although it is fifth nationally. Popular but not in the top 10 at SU is "Brideshead Revisited" by

is sixth at the Varsity Mart and seventh nationally.

On campuses across the nation, "The Simple Solution to Rubik's Cube" by James G. Nourse tops the list. The book is fifth here at SU.

The only other book to make both lists is "What Color is Your Parachute?" by Richard Nelson Bolles. This career and job guide is eighth nationally and tenth at SU.

But that's where the similarities

Evelyn Waugh, which is sixth nationally.

Dr. Tarnower's "Scarsdale Medical Guide" is fourth at SU and not among the bestsellers nationally. Draw your own conclusion there.

"Perfect Strangers" by Danielle Steel, "Third Wave" by Danielle Thomas and "All Things Bright and Beautiful" by James Herriot are seventh, eighth and ninth at SU, but are not listed nationally.

The classic "101 Uses for a Dead Cat" by Simon Bond is No. 9 on campuses across America. Though only moving the book is absent from SU's top 10 list.

SU'S TOP 10

1. "Garfield Bigger Than Life" by Jim Davis,
2. "Comstock Lode" by Louis L'Amour,
3. "Color Me Beautiful" by Carol Jackson,
4. "The Complete Scarsdale Medical Guide" by Herman Tarnower, M.D.,
5. "The Simple Solution to Rubik's Cube" by James G. Nourse,
6. "Garfield at Large" by Jim Davis,
7. "Perfect Strangers" by Danielle Steel,
8. "Third Wave" by D.M. Thomas,
9. "All Things Bright and Beautiful" by James Herriot,
10. "What Color is Your Parachute?" by Richard Nelson Bolles.

NATIONAL CAMPUS TOP 10

1. "The Simple Solution to Rubik's Cube" by James G. Nourse,
2. "The Company of Women" by Mary Gordon,
3. "You Can Do The Cube" by Patrick Bossert,
4. "Garfield Bigger Than Life" by Jim Davis,
5. "Answer As a Man" by Taylor Caldwell,
6. "Brideshead Revisited" by Evelyn Waugh,
7. "Garfield at Large" by Jim Davis,
8. "What Color is Your Parachute?" by Richard Nelson Bolles,
9. "101 Uses for a Dead Cat" by Simon Bond,
10. "Mastering Rubik's Cube" by Don Taylor.

750cc/\$2299.

Fast Company.

750CSR

GPz750

PRICEFIGHTER.

Here's the knockout deal of the year. Brand-new 1982 Kawasaki KZ750 CSRs are going for only \$2299. That's right, \$2299! And the 750 CSR is fully equipped. You get pullback cruiser handlebars, a plush low-slung seat, and the full boulevard treatment. In the power department, there's a proven, DOHC, four-stroke twin-cylinder engine with electronic ignition and a silent camchain with automatic tensioner for easy maintenance.

The high-style, low-riding 1982 Kawasaki KZ750 CSR will turn heads with its looks and turn you on with its performance. And, it's only \$2299. Do yourself a good turn and come see us today for your new 1982 Kawasaki KZ750 CSR.

Come in and see the New 750 and 11 Spectre. All new for '82. Register to win a 4 x 4 pickup. Financing available.

The three best sport machines in the industry are indeed fast company. The new GPz550 has race-proven Uni-Trak rear suspension. The incredible GPz1100, with its sophisticated Digital Electronic Fuel Injection, is already a legendary road-burner. The middle brother of this high-performance family is the all new GPz750. It's got a personality all its own, with big-bike power in a mid-size package. Join fast company. Ride the new GPz's from Kawasaki.

3471 SOUTH UNIVERSITY DRIVE
FARGO, NORTH DAKOTA 58103
235-6459

THE ENTERTAINER

As your bicycle rusts to pieces in the rack outside and your tennis racket gathers cobwebs, be glad there are plenty of indoor activities to enjoy here in the Fargo-Moorhead area.

Most of these activities (except the alcohol-related ones) are free to students, or available at a reduced cost.

They won't take the dust off your iron, but at least it'll take your mind off "The Year That Spring Never Came."

DISTINGUISHING MARKS

Alan Marks, an internationally known pianist, is the featured attraction at 8:15 tonight in the Schritudinous Festival Hall.

Marks has a list of award and achievements as long as a financial line, so the concert promises to be a real gem among the events in the SU's Fine Arts Series.

SU students may attend at no cost,

other students and senior citizens get in for \$2.50, and all others can get a ticket for \$4. Tickets are available at the SU Music Listening Lounge or the downtown Straus store.

KOLLWITZ CONTINUES

What would happen if you were ripped from your comfortable and complacent life only to be rudely hurled into a cold, strange way of life you couldn't understand?

"Kathe Kollwitz: An Exploration of Human Destinies," the current exhibit at the SU Art Gallery, might give you some indication.

The collection of 56 prints traces some of the most socially disruptive forces of the 20th century and their effects on the people of Germany between 1897 and 1935.

This exciting exhibit will be on display through April 12 at the SU Art Gallery on the second floor of the Memorial Union.

Gallery hours are from 10 a.m. to 8 p.m. Monday through Wednesday, 10 a.m. through 5 p.m. Thursday and Friday, and 1 to 5 p.m. Sunday.

The collection can be viewed for no charge.

GOING TO POTS

The Moorhead State University Center for the Arts Gallery will be the scene of a regional invitational ceramics exhibit, now through April 9.

The works of more than 20 area potters and teachers will be on display, focusing on the theme "Covered Containers."

This unusual display can be seen from 9 a.m. to 9 p.m. weekdays and from 1 to 8 p.m. weekends.

This exhibit is also free.

WOMEN AND ART

Samples of work by local women artists titled, oddly enough, "A Celebration of Women Artists" is the attraction at the MSU Memorial Union Ballroom.

The celebration features visual art work, dance, poetry and music all executed by local female artists.

The collected works will be on display until April 1 from 10 a.m. to 5 p.m. at the ballroom.

Admission is free.

COBBER CONCERTS

Concordia College will be featuring a whole series of musical events

during the next week.

April 1 it's the Aulos Ensemble in the Centrum of the Knutson Center at 7:30 p.m. The ensemble uses antique instruments and replicas to reproduce the sounds of the baroque era. It's not Devo, but it could be interesting just the same.

The sixth annual High School Instrumental Day Festival will be held campus-wide April 3. The major event of the day will be a concert featuring a band composed of high school students and Concordia College band members, beginning at 7:30 p.m.

The annual concert of the Repertory Band will be presented April 4 in the Centrum of the Knutson Center starting at 4 p.m.

ODDS AND ENDS

All you cowboy types: don't miss Merle Haggard April 5 at the New Field House. Tickets from \$6.50 to \$8.50, buckeroos...The Plains Art Museum and Rourke Art Gallery are featuring, among other things, "Veracity," "Recent Donations" and "Ghosts"... "Tibet: Roof of the World" is in its final two days at the SU library... "Winnie the Pooh" is the featured film Sunday at 6:30 and 9 p.m. in the Memorial Union Ballroom, sponsored by Campus Attractions. It's free to SU students...The seminar "Grooming Your Hedgehog" has been postponed until further notice.

Larry Werlinger

Romanian prof finds new home in N. D.

By Marjorie Dobervich

The next time you complain about taxes and inflation, talk to Dr. Alex Maianu, associate professor, SU soil science department. After you hear the story of the Romanian-born scientist, you will kiss the ground of America and give thanks.

Maianu's enthusiasm for the United State is boundless. He animatedly discussed his new life here as he reflected recently upon the chain of events bringing him to the campus and his Waldron Hall research laboratory 18 months ago.

Observing him now, his conversation punctuated with broad smiles, it is hard to realize life hasn't always been a bed of roses for him. Comparing the many years he lived and worked under Communist domination with the quality of life here, Maianu exclaims, "It is like comparing hell with Eden!"

It's been a long journey from Bucharest, Romania, Maianu's birthplace and a city of two million people, to the prairie soils of North Dakota. The road was fraught with frustration, humiliation and downright danger.

Maianu was preparing for college when the communists invaded Romania after World War II. His dream was to study religion and philosophy but this was eliminated by the Communist regime. Instead, Marxism, Leninism and atheism were imposed.

"I had no free choice. I could not go elsewhere either because no one was permitted to leave Romania then and for about 14 years later," Maianu said.

Finally Maianu enrolled in the College of Agriculture at the University of Bucharest. In his sophomore year he found the answer in the development of soil science curriculum at the university.

"I had always been interested in science and research and this was the happy medium I had been looking for. It offered the opportunity for fulfillment I had been seeking."

During the next years Maianu devoted his energies to getting his M.S. and Ph.D. degrees in soil

science. He chose to specialize in soil reclamation.

"Romania had a very real need for soil reclamation research. It is the size of North Dakota with 24 million people. Along with many fertile soils, there are large areas of heavy, wet, sandy and saline soils. I felt I could do something for my country by concentrating my efforts in this area," he said.

Through the years Maianu persevered to build the country's soil reclamation program. He received international recognition for his efforts and invitations from 22 Free World countries to present his research findings to their universities and agricultural organizations.

As director of the National Soil Reclamation Laboratory of Romania's Academy of Science in Bucharest, supervising a staff of 35, Maianu was considered superior in his field by high ranking authorities.

He says he encountered stiff resistance when he attempted to accept speaking invitations from free world countries. The communists denied his passport to leave Romania. Eventually, the United Nations came to his rescue through the Food and Agriculture Organization and he was permitted to spend six months in the United States on an extensive tour.

When Maianu returned, Communist suspicion against him had grown. For one thing, it had been revealed to them he had openly gone to church in the United States.

Then, in 1974, a law was passed which gravely affected his future. The new proviso declared only avowed Communists could hold high positions in Romania. Maianu was in a precarious position. He would not embrace Communism and publicly renounce his Christian faith.

As a result, Maianu was stripped of his position and credentials, and ordered into internal exile in a very remote part of the country.

"I was sent to the most remote part of Romania, in the flood-plain of the Danube, much like Siberia. It was almost unpopulated, no electricity, running water, roads,

nothing. It was despair," he said, shrugging in a gesture of helplessness.

Making the best of an impossible situation, he set up a makeshift soil reclamation program to help the few farmers and fishermen there.

"You might say I was placed on hold for four years. Known as a dissident, however, was better than being labeled undesirable. When your file is stamped undesirable, you are done. You can't get a job, ever, in Romania."

Realizing every day made his situation more hopeless, he spent seven months planning his escape.

"I planned to use my knowledge of soil science to avoid detection in getting across the border."

Finally a plan was devised and he escaped across the border to Hungary and then to Austria, where he joined his sister who had escaped a day before him. He says his escape was so clean, the Communists did not miss him for about two months.

His next destination was a refugee camp near Vienna, Austria. From there a Christian organization aided him to come to the United States as a political refugee. He first located in Indianapolis, Ind.

Maianu was now able to plan a new life in a free land. For awhile he worked with the organization aiding him to America.

Eventually he renewed his old contacts with American soil scientists. As a result, he attended the 1979 annual meetings of the American Society of Agronomy.

But how did Maianu get to North Dakota?

As fate would have it, Dr. Charles Smith, former SU soil science department chairman, was at the same place at the same time. In their meeting, Maianu told him his story. He told Smith he wanted to resume his career in soil science.

The opportunity was provided later when Smith called him about a position open in the soils department. He made application and came to Fargo for an interview in January, 1980.

"So how do you get a job when your references are behind the Iron

Curtain?" asked Maianu.

With 190 research publications in 12 countries to his credit, he had to go about proving himself.

The selection process was long and painstaking. American soil scientists who knew his work endorsed him for the job. Then Maianu offered to come to SU on a probationary basis. He was selected and in July that year came to the campus as an assistant professor of soil science.

He went on to prove himself and was promoted to associate professor in July.

Maianu says he has no desire to go back to his native country, even if he could. He adds he is so much luckier than the rest of us, in one way especially.

"You take freedom and your life for granted. But in my opinion here, I know the difference."

With a faraway look in his eyes he mused, "When I was up in Romania, they put me down. When I was down in America, they put me up!"

Fight cancer with your bare hands.

The best way to guard against breast cancer is right in your hands. It's called breast self-examination. Ask your doctor to teach you how to do it. And while you're at it, ask him about mammography—a low dose breast x-ray.

For more information, call your local ACS office.

Cagers fall to Charleston College, 88-73

By Greg Seakup

The Bison went to Charleston, S.C. last weekend with hopes of coming home with a national title, but those hopes were put to rest when the Herd suffered a 88-73 loss to Charleston College in the semi-finals.

Cold shooting and turnovers did the Bison in. The Herd managed to connect on only 30 of 74 field goals for a cool 41 percent. Charleston's full-court press forced coach Amy Bentley's squad into 26 turnovers.

The game was even in the early going as Kim Brekke helped the Bison to a 18-15 lead midway through the first half. But that's when Charleston's pressing game took effect and its squad reeled off 12 straight points for a 24-18 lead they never gave up.

The Lady Cougars built that lead to 30 points and settled for a 36-28 half-time lead.

Brekke scored the first basket of the second half, but five minutes into

Lori Knetter

Kim Brekke

the period Charleston built a 14-point lead and SU could get no closer than nine points.

Lori Knetter led the Herd with 18 points followed by Shelley Oistad with 14. Brekke had 12 points before fouling out of the game.

Charleston had a four-pronged scoring attack led by Culbreath with 23 points, Brown followed with 22, Stilley had 19 and Lisa Schweers added 11.

The loss sent the Bison into the third place game against William Penn, the team which defeated the Bison for the regional title earlier this month.

Things looked good for the Bison who had a 10-point lead when William Penn center Lori Meyer fouled out of the game with 3:42 to play. But at this point the roof fell in on the Herd, which was outscored 14-2 in the final three minutes.

Costly turnovers and missed free throws by the Bison gave the Lady Statesmen the third-place trophy.

A bank shot by Brekke made up the Herd's only points in the last three minutes. Her basket gave the Bison a 76-69 lead with two minutes

showing on the clock. SU took a time out to set up a last shot, but the attempt, which never came as a pass to Knetter was deflected into William Penn's possession as time ran out.

Knetter ended her college career by scoring 28 points and grabbing a game-high 14 rebounds. Brekke followed with 14 points, Oistad added 13 and Mari Matheson had 11 for the Bison.

William Penn was led by Busch with 30 points. Meyer finished with 27 and Spencer added 13.

SU finished the season 22-10 wins-losses while William-Penn ended at 28-10.

In the championship game Francis Marion of South Carolina defeated Charleston 92-83.

Shelley Oistad

Mari Matheson

to play. A field goal by Leali Spencer and two free throws by Stephanie Beck pulled William Penn to within three points. After Brekke missed a one-on-one, Lori Busch hit a jump shot to cut the Bison lead to 76-75.

After controlling a jump ball Spencer hit the game winning shot for the Iowa team with 19 seconds

The future looks bright for Ruley and the Herd as they will lose only Knetter and Laura Jacobson to graduation.

Knetter was named to the all-tournament team, and it was announced last Thursday Brekke and Oistad were named to the North Central All-Conference basketball team.

Orders will be filled on a Best-Seat availability basis. Orders received after March 25 will be filled and tickets can be picked up at the New Field House Box Office.

Financial aids department receives loan monies

(NB)-The second installment of \$1,000 in a \$10,000 commitment by the First National Bank of Fargo to assist students with short-range financial problems has been received by SU, according to Wayne Tesmer, director of financial aids.

Used in short-term emergency

situations, the funds provide a significant reservoir towards assisting students with a variety of financial problems, reported Tesmer. More than 60 loans were made with the first \$1,000 received a year ago.

Under the program temporary loans are limited to no more than \$150 and must be awarded to full-time students who carry at least a C average.

Tesmer considers the program very successful and said his office has received many grateful comments from students regarding the opportunity to resolve their cash-flow problems.

Nikunen takes over helm of women's tennis

By Kevin Christ

The 1982 tennis season is in full swing and the Herd is being led by a new coach in graduate assistant Mark Nikunen.

Nikunen is a 1979 graduate of Mayville State and has a B.S. degree in social studies and physical education. He is currently working for his master's in physical education.

Nikunen hails from Biwabik, Minn. and taught for two years at Alvarado High School in Minnesota where he was the head golf coach and the assistant girl's basketball coach.

Five sophomores and four freshmen make up the bulk of Nikunen's unit as the Herd have only one senior in the roster in Ruth Downs.

So far this season the Herd has a 1-4 record but Nikunen thinks the

Bison will do better by the time the conference tournament rolls around.

Leading the Herd so far this season has been sophomore Mary Zorich. Zorich sports a 3-1 singles record and is expected to do well in the North Central Conference this year.

"I don't think she'll lose too many more matches this year," Nikunen said. "She and Karen Lordeman are both playing well."

Lordeman, a sophomore, now has a 2-2 record in the number two singles spot. Sue Snyder, another sophomore, has thus far netted a 2-1 record for SU.

Last year the Herd had a 4-5 overall record and won the North Dakota AIAW state title. With six players back from last year's squad Nikunen hopes to improve on last year's mark.

Nikunen sights the conference as being tough and feels the Bison will be right in the thick of things.

"Augustana is the top team in the conference," he said. "They were second in the conference last year and they didn't graduate anyone."

The next action for the Herd will be on Friday with two teams coming to Fargo. The Herd plays host to Minnesota-Morris in the New Field House at 3 p.m. and then at 7 p.m. The Bison take on South Dakota State at the Southgate Racquet Club.

Ellis working to put Bison back in the ball game

By Dan Knutson

"I love baseball! I feel it should be more of a part of the SU athletic program. I want to get it back on the foundation that it needs to be a great baseball team," said George Ellis, Bison baseball coach.

Since as early as 1909, baseball around SU has been a rather quiet sport, but with Ellis at the helm, the team should no longer go unnoticed. It seems Ellis is putting more effort into the SU baseball program than many of his predecessors. Up until 3 years ago the baseball program at SU was put under the director of graduate students who were trying to pick up a coaching credit. The game just wasn't being played in the usual Bison manner.

Why has the baseball team been unsuccessful? It can be partly attributed to cuts in the funds given to the team from the athletic department.

"We have an annual budget of a little over \$16,000 and the athletic department appropriates only \$7,500 of that," Ellis said. "The rest of the money is raised through program sales and for the second straight year a raffle for a trip to Las Vegas."

Since there is little or no money available for giving scholarships, how is it that players are attracted to the SU baseball team?

"We feel our schedule of games might bring out some of the better ball players from around the area," Ellis said. "We have perhaps the toughest schedule this season of any Division II team in the country."

What exactly is the outlook for this year's team?

"We expect great things from the team this year. Last year we set 30 new school records, most of them in hitting. This year's team will see most of the players from last year returning. We should be as good if not better than last year's team. Our only weak spot is in our pitching, but the talent is definitely there."

"It's just a matter of working with it and getting the guys to play to the best of their ability," Ellis said. "People are going to remember the Bison baseball team of 1982 after this season. We're going to be tough."

According to Ellis, the only place to practice during the winter months is in the New Field House.

With all of the winter activities going on in the Field House it's hard to get any time to do any practicing, but we practice when we can and try to make the most of our time," he said. "As soon as it warms up we'll be able to get outside and use the football field, but as for now we're just playing it by ear."

Ellis is assisted in coaching the Bison by Jim Pettersen, who has

SU baseball coach George Ellis

helped coach for the past four seasons. Pettersen works mainly with the pitching staff.

Ellis, a former collegiate wrestler, graduated from the University of Morningside in 1967. He underwent employment at General Motors as a field representative and later as a sports editor for a daily newspaper.

In 1968 Ellis returned to Morningside where he began a five-year position as athletic director. From there he went to Northern Iowa for a year and then to his current position as sports information director which he has held for eight years.

Women's athletic head taking leave

(NB)—Lynn Dorn, women's athletic director at SU will take a developmental leave, effective March 29.

The leave will allow Dorn to work towards a Ph.D. in physical education with an emphasis on athletic administration.

Dorn will begin her studies March 29th at the University of Minnesota-Minneapolis campus and plans to return to her position at SU next fall upon completion of her work.

Donna Pavilec, SU's head volleyball coach will assume the responsibilities of the women's athletic director position during Dorn's absence.

Dorn has been the women's athletic director at SU for the past three years and was an instructor and assistant coach for two years previous to her appointment as women's athletic director.

Dorn taught and coached for four years at Crookston, Minn. Central High School guiding her basketball team to two state playoffs and in other seasons headed the tennis, golf and track teams.

She is a graduate of Bemidji State University and earned her master's degree in physical education from the University of Minnesota in 1977.

SPECTRUM Photographers

Have you ever been in this situation and just happened to have your 35mm camera with you to record the historic event? If so, and your photos showed you have a fairly good eye and some talent, you may be just what we're looking for. We need photogs for general photo assignments and feature layouts. Please apply in our editorial offices in Room 369 on south-side of the Union's second floor.

SPECTRUM Reporters

If you possess a talent for writing journalistically and you love seeing your name in print, now is your chance to do it for pay. We're always looking for more reporters to keep up a continuous inflow of stories. If you're interested, please apply in our editorial offices in Room 369 on second floor south of the Union.

Yes, every time we go on vacation a pile of these things collects in a drawer. This should almost bring us up to date.
