computer science bubble won't burst in ND

By Bob Schillman

In the computer science and engineering fields, the hot, high-paying PS, may be a bubble in a sense. At least that's the view of Personnel Service, reviewing the growth of computer science and programs and questioning the demand for those with computer science degrees.

A study by John Hamblem titled "The Development of Student Employment: A Cross-Sectional Analysis of the Information and Computer Science Fields" was recently published and provides some insights into the current status of computer science programs and the demand for graduates.

The study found that the demand for computer science graduates is not as high as some had predicted. The reason for this is that many graduates are not finding employment in the fields for which they were trained. In addition, the study shows that the supply of computer science graduates is increasing faster than the demand.

The study also found that the demand for computer science graduates is not uniform across the country. There are areas where the demand is high, such as the West Coast and the Northeast, and areas where the demand is low, such as the Midwest.

The study recommends that computer science programs adjust their curriculum to meet the needs of the market. It also suggests that universities offer programs that prepare students for a variety of careers, not just those related to computer science.

While the study found that the demand for computer science graduates is not as high as some had predicted, it also found that the demand for computer science graduates is increasing faster than the supply. This suggests that there may be an increase in the demand for computer science graduates in the future.
Garrison Diversion is meant for irrigation

By Michele Mears

Garrison Diversion became the chief users,” he said. "There is no drought for this generation to experience. "It's different from the 1930s developed a demand for control of the Missouri River for irrigation purposes, according to a member of the project's top commission.

John Paulson was a member of the Garrison Diversion study commission that developed the final plan which was submitted to the Secretary of the Interior for approval.

He made his remarks at a Brown Bag Seminar last Wednesday. During the drought, North Dakota and other plain states were called the "Great American Desert," he said. The middle section of North Dakota needed water for crop and livestock development.

Irrigation was the key to development and drought, he said.

"Construction of Garrison Diversion was authorized in 1965 by Congress," Paulson said. This made water available to the McClusky Canal.

In the late 1960s, Congress passed the Environmental Protection Act. Garrison Diversion became the chief target of environmentalists against irrigation projects," he said, because Garrison Diversion was the last project on the list. It became more difficult to pass Garrison Diversion in Congress. Organizations such as the National Wildlife Federation had members in each state.

"Representatives from other states were subject to harassment if they supported Garrison Diversion," he said. "North Dakota stood alone in support for Garrison Diversion. The idea of Garrison Diversion was kept alive by our elected senators, representatives and governors, because it's a great benefit to agricultural programs in North Dakota," he said.

"As a congressman we never had time to sit down and vote our views," he said. "We voted on it in the final plan with very little debate." The final plan provides $100 million in North Dakota with improved water quality at a "cost affordable to users," he said. There will be development of land for wildlife and recreation areas.

The plan provides "abundant gains for all. It's not possible to satisfy all points of view," he said. "There is no drought for this generation to experience. "It's different from the 1930s."

Textiles for interior are the topic of seminar Feb. 8.

Dakota Company receives recognition for its services

Left-MG Robert G. Moorhead, AUS-Ret., AUSA National Vice-President presents Cadet First Lieutenant Mary K. Sauer (right) with the 1996 award: Best Activities to Assist the Institution.

Dakota Company received the award based on its good will programs, some of which include assisting Prairie Public Television with its fundraising and sending telephone calls for the Alumni Association’s Phonathon, he said. In the near future, the company will hold a concert after the 4th of July in front of the Old Soldiers’ Home in Bismarck, N.D., he added.

In addition to receiving the first place in the best unit category, the Dakota Company was the runner-up for the best program to enhance community relations, received honorable mention for best activities to assist ROTC units and most active company.

Dakota Company was the runner-up for the best program to enhance community relations, received "Outstanding Unit of the Month" and was "The Best Unit to Assist the Institution." The company has received national recognition for the past 15 years, and this year is no exception.

"Unquestionably, the Dakota Company is the only organization on campus to receive each national award each year for as long a period of time," according to Capt. Joseph Leggins, assistant professor of military science at SU.

This year, the company was selected as the "Best Unit to Assist the Institution," the third consecutive year the company has received this award. Dakota Company received the award based on its good will programs, some of which include assisting Prairie Public Television with its fundraising and sending telephone calls for the Alumni Association’s Phonathon, he said. In the near future, the company will hold a concert after the 4th of July in front of the Old Soldiers’ Home in Bismarck, N.D., he added.

In addition to receiving the first place in the best unit category, the Dakota Company was the runner-up for the best program to enhance community relations, received honorable mention for best activities to assist ROTC units and most active company.

Dr. Thor Hertsgaard, professor of chemistry, has been named one of the top 20 outstanding new and returning faculty at SU. His teaching has earned him recognition as a good teacher and colleague for professional excellence.

Dr. Philip Boudjouk, associate professor of chemical engineering, has been chosen to receive the prestigious award as recognition for his contributions to the chemistry department at all levels. He prefers teaching core courses in chemistry in the Classics and Natural Sciences core sequence, ensuring a well-rounded education for students.

Boudjouk has had a major impact on the students he has taught. His appointment here at SU has had a significant effect on state policymaking, as his work in chemical engineering has been used for modeling and state revenue forecasting. His research program has been adapted for use in six states and by many state agencies.

Boudjouk's research in chemical engineering has been supported by a $320,000 U.S. Air Force grant. He is optimistic that ultrasound will be used to remove impurities from high-temperature systems. His work could one day play a part in developing lightweight exterior materials that can protect spacecraft from high temperatures.

Despite his teaching responsibilities, Dr. Hertsgaard has taught 146 courses at SU, earning him recognition as a model teacher. His teaching has been adapted for use in six states and by many state agencies.

Although Hertsgaard's teaching responsibilities are significant, he also spends considerable time conducting research in agricultural economics. He has been involved in developing a mathematical model that has been used in six states and by many state agencies.

According to Dr. Hertsgaard, the student's success is the most frequent comment he hears. His research program has been adapted for use in six states and by many state agencies. He has been involved in developing a mathematical model that has been used in six states and by many state agencies.

For more information about Dr. Hertsgaard's work, contact the Department of Chemistry at SU.
Must still be conservative in purchasing cars

On prices are on their way down, but they won't stay there very long.

Last weekend, gasoline prices were down to 95 and 96 cents a gallon in San Diego, said Hamid Gholzari, director of MSU's new energy management program.

He said the current oil glut should keep prices down for the next two years, but then prices will rise again. He predicts we will be paying $5 to $6 a gallon for gas by 1995.

This is a tremendous amount to pay for a gallon of gas. In 1972, a barrel of oil only cost $2. Now it's $25, down from $34.

In our society, the availability of gas and oil is a necessity. Many of our cars are missing key features.

Another foreseeable problem involves the farmers. They're having difficulty surviving and making money now. We need to do more when they're in this pickle.

Just because prices are and will be going down, doesn't mean we can be complacent. We must still be conservative in buying cars that don't guzzle gas and homes and machinery that are energy efficient.

Jodi Schroeder

Silver Wings provides opportunity to do service work for community

Dear Editor,

Public service work can be very rewarding, especially when done with the right attitude.

Helping the Girls Scouts, MAD, Red Cross and other organizations has helped me develop into a better person.

The opportunity to do public service comes from being a member of a service organization. Silver Wings, formally known as Angel Flight, changed the scene forever for me. Many people have the wrong impression of us.

Silver Wings is a professional, educational, honorary, altruistic organization for college men and women who enjoy helping others. We also have a common interest in

Student sets writer straight on sororities and little sisters issues

To the Editor,

Jenni Bushy, I think you had better get your facts straight on the issue of sororities and fraternity little sisters.

First of all, to this mic one of the sororities is closing their doors or losing their charters as organization on this campus. We are still going strong as sororities if not in numbers.

Second of all, we were not setting the little sister programs as little sister andHonored, little sister and little sister and she and being a punk rocker associated with a fraternity house is a super imposition of nerms. Punk stands against everything that the Greek system stands for, and if they are going to parade around Fargo as punk rockers perhaps they should learn what the term 'punk' really means.

The description of punk talent as a Godsend by Jim Kennedy is

Disabilities make college a greater challenge

By Connie Storm

Attending college is a challenge even for the most well-liked person. The challenge becomes even greater if the person has a disability.

According to Pete Bower of SU's Disabled Student Services office, approximately 20 to 30 students with learning disabilities and physical handicaps utilize the services of the office.

"Our biggest programs include preparing note-takers and readers, and campus transportation," he said. "Campus escorts are quite good. It's tough for many people, elevators and power doors.

It has improved considerably in the last 10 years." He added, "It's important to have someone who is helpful, but not over-bearing. It is helpful to have someone who is committed and really wants to get to know you, and not just hand something off."

Bower said that disabilities tend to be hard to market, and sometimes not even to be dedicated to. Sometimes instructors fail to realize that disabled students benefit from their requests.

Bower said that disability awareness is important.

"It is important to let people know that they have their own needs, and how they are going to handle those needs. They need to be educated about learning disabilities and how they benefit the disabled," Bower said, "because they do have learning disabilities. They need to collaborate with someone who is helpful."
East coast native likes peace and quiet here

By Queen Speed

I don't know if my opinion of a brand new job would stand up if I were to divorce it from a personal reason, but the truth is, I just moved to a smaller, more tranquil area. I have always been a fan of the East Coast, with its fast-paced, exciting atmosphere. But after years of living in a busy city, I realized I needed a change.

I found a place in the suburbs of Boston that was more peaceful and quiet than I had ever imagined. The students at my new school are more laid back, and the atmosphere is much more relaxed. I have become closer to my students and have even started teaching a class on student-centered learning.

The job Letendre does is a busy one. Positions at SU consist of three years of college. He also does lecturing for other courses and is heavily involved in the student clinical clerkship program that provides experiences for pharmacy students. He said he always wanted to be a pharmacist and is more to heart to see what you've done and their effects. It brings us peace and tranquility.

While in Boston he was still in the pharmacy department and had a position dealing with students. The course trained here than on the East Coast, and it's been very rewarding. I have been able to teach these students how to do and their effects and their role in the world. SU is that way a role model and see what I have learned actually put into practice. It seems like a good experience. I had lived in a smaller place—a room.
Difficulty in getting loans caused by high amount of farm capital

By volcano Greene

As the North Dakota's farming economy worsens, many Fargo-Moorhead college students are being affected financially and emotionally. Financially, they may find they must work a part-time job since loans are hard to obtain.

Kimberly Ness, a graphic art major at MSU, also experienced the some frustration. "Prices and interest rates have increased the financial burden, has not daily, those not dependent on financial-aid authorities don't look at the debt that students who dealing with financial aid to give."

Coming from a family of five, Ness noted that the individuals in her family tended to pull together. At times though the stress and strain dampen the family communication, pulling them apart.

"The economy has decreased our standard of living," Slotten said. "This factor, coupled with the increasing financial burden, has definitely put a strain on our family."

"Prices and interest rates have not stimulated the farm economy at all," Slotten said. A bucket of wheat that sold for $5 is the present value for $5. Today, most farmers have to borrow money just to put the crop in.

The last three years have been terrible for farmers. Ness said. "Governor George Sinner has the qualifications to improve the farmer's situation."

Ness and Slotten said the government-funded P.L.K. payment-in-kind program, enacted by President Reagan, has helped farmers. "This program tries to eliminate surplus agriculture commodities by paying farmers to set aside a percentage of land they farmed in the last two years.

Although this program has helped, "It's not nearly enough," Ness said. "If you're dealing in thousands of dollars and farmer's debts are running into hundreds of thousands of dollars."

As a result of the staggering economy, many farmers have supplemented their income by opening a business or working part time. Those operate a small farm store or sell produce to an older sister but is now considered a vital source of income for the family."

"A lot of 50 and 60-year old farmers are losing their farms, which are everything they own."

"Farmers said, "It's not nearly enough.""

Bridges are built with toothpicks in contest

The Fargo-Moorhead Engineering Club's 12th annual Toothpick Engineering Contest will be at 7 p.m. Thursday, Feb. 21 at West Acres. It's open to any student of any age.

The object of the event is to build a model span bridge by gluing together about 500 round, wooden toothpicks. The structure's total weight can't exceed 85 grams, 1.875 pounds.

The bridges should be strong enough and built to support nine-inch metal weights while clearing a 22-inch span. During the contest weights are stacked on top of each model, and the one that supports the heaviest load before collapsing wins. In 1980, Paul Jobke of Larimore, N.D., built a toothpick bridge that supported a 1,235-pound load. That's still the load record, if not the world record, according to Charles Martin, chairman of the pre-engineering program at MSU and organizer of toothpick bridge contests for at least 12 years. Martin says he isn't sure how many contests there are like this in other parts of the country. But he's sure that 1,235 pounds is a world record, and he's tried to get that feat registered in the Guinness Book of World Records.

Singing Telegrams fit any occasion and just anyone

By Jean Hoaby

Imagine sitting in a nice restaurant, delicious food in front of you, friends around you, and a belly dancer in front of you. Surprise! It's your birthday!

Yvonne Fisher of Singing Telegrams by Yvonne has been a special part of many birthday meals. Fisher sends fun, laughter and memories to many people throughout the Fargo-Moorhead area in the form of singing telegrams.

Giving one-to-five performances a day, Fisher enhances her act through the use of costumes. According to the customer's tastes, a belly dancer, bunny, clown or jester may be hired to sing a special song for any occasion. For additional fun, balloons may also be purchased from Fisher.

According to Fisher, her musical debut was launched for her best friend. "It was her birthday," she said, "and I wanted to do something special." Fisher had thought about hiring someone to sing a telegram but thought she could do it herself. She now sings to anyone and everyone for any type of occasion. A singing telegram may be perfect for an office party, reunion or Valentine's Day. "I'm already starting to get many calls for Valentine's Day," Fisher said.

Fisher said one of her most memorable engagements was a proposal. "I was to propose to a guy's girlfriend," she said. Everyone around the table, as well as the new fiancé, were crying," she said. She had the opportunity to sing to the last survivor of the Spanish flu epidemic.

Any student—elementary, junior or senior in college or high school—may enter the contest, or receive details about entering, by writing or calling Martin, who will offer a $100 first, $75 second and $50 third prize with $25 going to best in these categories.

The contest will be held at the main entrance of West Acres in Moorhead. Entry forms should be brought there by 6 p.m. Pre-registration isn't used as an introduction session, and problem-solving sessions will be held in conjunction with National Engineers Week Feb. 17-23.

Noon hour aerobics class keeps all in shape

By Beth Forbaker

If you're tired of eating a big meal and feeling guilty about it all
then you may want to give aerobics a try.

Numerous women find noon hour aerobics an enjoyable way to stay fit.

In aerobics, the heart and lungs are strengthened, flexibility and muscular strength are improved. It provides a lot of fun with other people. "We stress fun. You should have a good time," Simmers said.

The classes are offered in two Field House wrestling rooms. Monday through Friday with each class being about 12 minutes long and go until about 12:05. "This is to allow faculty and staff time to get ready for class and then go back to work," Simmers said.

The noon hour aerobics are open to SU students, faculty, staff and spouses. The classes have been sold, according to Simmers. "A lot of people have been coming. It's been going really well," she said.

Strengthening muscles, aiding in better digestion and quality of sleep are some of the main reasons is for enjoying aerobics. It provides safe, effective weight loss and can firm and tone muscles.

"In aerobics, the heart and lungs are strengthened, flexibility and muscular strength are improved. It also relieves some of the physical effects of stress. These aren't the only benefits aerobics exercise provides. It can strengthen bones, aid in better coordination, and improve energy levels and coordination are also improved. It provides a lot of good things," Simmers said.

"People come to classes for social reasons—they can come and have fun with other people. "We stress fun. You should have a good time," Simmers said.

Music is used to provide motivation and a reason for moving. Simmers said, "I try to choose good music—music that will motivate, make you feel good, make you feel like moving."

Simmers has been teaching aerobics for about 9 years. She began at two studios in Fargo, but quit when she became heavily involved at SIU.

Last summer she taught at two athletic camps, the high school girls' basketball and volleyball camps.

The fall, Simmers helped out various SIU teams in their pre-season conditioning. The teams she worked with were basketball (both men's and women's), women's track and men's wrestling.

Simmers, whose husband is the SIU football team's defensive line coach, now teaches about nine hours a week.

The noon aerobics will continue through spring quarter with the same schedule it has now. Simmers plans to keep teaching in the summer.

Several reasons, Simmers said. One reason is for enjoyment. It provides safe, effective weight loss and can firm and tone muscles.

"In aerobics, the heart and lungs are strengthened, flexibility and muscular strength are improved. It also relieves some of the physical effects of stress. These aren't the only benefits aerobics exercise provides. It can strengthen bones, aid in better digestion and quality of sleep are some of the main reasons is for enjoying aerobics. Trips Features:
- Florida departure: Buses depart from Miami at 6:30 a.m.
- Additional city stops: Orlando for the Conference Center, Seaside Beach Resort, and the New Orleans Convention Center.
- Choice of suites or quad units with kitchenettes.
- Optional excursions: Walt Disney World and Epcot.
- Services of Travel Associates professional on-site Sun break.
- Genuine Kodak products: 4 x 6" enlargement free with each roll of 110 film, each 135 roll you bring in.
- Deep discount coupons for area bars, restaurants, and services to save you money.
- Optional Deep Sea Fishing trips & other sightseeing tours.
- Advance reservations: Not necessary, but many were done at one place by eager customers. "People seem to really enjoy it, especially the ones who have never been on a cruise," she said.
- Flavors put together by songs: "It's all about the customer," she said. "It's all about what they want, what they need, what they need to hear, and what they need to see."
'Amadeus' to be presented by Little Country Theatre

SNR - The Little Country Theatre will present the regional premiere of Peter Shaffer's award-winning play, "Amadeus," at 8:15 p.m. Thursdays through Saturdays and again Feb. 14 to 16 in Audakian Hall.

"Amadeus" depicts the life of Wolfgang Amadeus Mozart as seen through the eyes of his rival composer, Antonio Salieri. The play's director, associate professor of theater arts Don Larew, says the story is "a pretty girl full of high spirits."

Because Salieri, court composer to the Austrian Emperor Joseph II, is a graduate student, the ordering of events is "highly regarded, and Mozart is an outsider."

Other members of the court will be portrayed by Bismarck native Laurel Case, Timothy Barrett and George Castrounis, a newcomer to the Little Country Theatre stage.

The role of Antonio Salieri will be played by senior theater and history major Mark Neukom, Jamestown. Neukom has performed in several Little Country Theatre productions, including "A Doll's House" and "Once Upon a Mattress." He most recently appeared in "The Prime of Miss Jean Brodie" at the Fargo-Moorhead Community Theatre.

The production is directed by Don Larew, associate professor of theater arts, with assistance from Julie Bergman, a graduate student in English and Drama from Argusville. Larew also designed the sets.

Greyhound gives the Bison a break on Spring Break.

Round trip. Anywhere Greyhound goes.

This spring break, you and your friends are thinking about heading to the slopes, the beach or just home for a visit. Greyhound can take you there.

For only $99 or less, round trip.

Starting February 15, all you do is show us your college student ID card when you purchase your ticket. Your ticket will then be good for travel for 15 days from the date of purchase.

So this spring break, get a real break. Go anywhere Greyhound goes for $99 or less. For more information, call Greyhound.

Tickets are nontransferable and are good for travel on Greyhound Lines, Inc., and other participating carriers. Certain restrictions apply. Offer limited. Not valid in Canada.

An organizational meeting will be held for the Trap and Skeet Club

Family Life Center 320
February 6 4:30 p.m.

Anyone interested in finding out more about the Club is welcome. For further information, contact the Office of Student Organization Development and Activities, Memorial Union, Room 375.
Orchesis dancers went plum crazy in show

By Lori Lechtenberg

The Orchesis performance of "Color Odyssey" met just what the audience had expected. Colorful programs, costumes, choreography and dance were displayed.

Review

The opening scene, "Color Quest," was performed on a dark stage and highlighted by colored lights. The light and movements were achieved by Orchesis members. The outstanding effect of this first scene was the orange and purple lights that illuminated the audience. The costumes, designed by Sue Dick, were a delight to see. They ranged from feminine tutus to flapper dresses, from rubber plums and a big vanilla shake. These costumes, designed by Sue Dick and other Orchesis members, helped the mood of the concert change from hilarious to dramatic or seductive.

The opening scene was "Black Shadows," left the audience looking for her and her choreography in the rest of the show. However, when she wasn't on stage other talent was appreciated. Sue Dick was on her toes in the ballet "Blue Dreams." The "Flowers" and "Strawberry Jam" were displayed. Members of the audience were treated to jazz, tap, modern and classical ballet, all with creative titles like "Plum Crazy," "Blue Print," "Flowers and Flappers," "Blue Lagoon," "Black Shadows," "Raspberry Jam" and "Red Slash." The audience also enjoyed an audience favorite, "Flowers and Flappers." Tap through a variety of colors like "Plum Crazy," "Blue Print," "Flowers and Flappers," "Blue Lagoon," "Black Shadows," "Raspberry Jam" and "Red Slash."

The performance was soon over and members of the audience were left commenting on the excellence of the show, wishing Orchesis would perform more than one concert a year and wondering if they could get their programs home undamaged so they could hang them as posters.
Amadeus

when Mozart must contend include Count Johann von Strack, groom of the imperial chamber, portrayed by Adam Marsnik of Ely, Minn.; arrogant Count Orsini-Rosenberg, prefect of the imperial opera, played by Kenneth Chester of Rochester, Minn.; and Mozart's staunch supporter, Baron Van Swieten, portrayed by Zachary Bloomfield, native of Scio, Ohio. The two Venetian, Salieri's unscrupulous informers, will be portrayed by Brad Cook, Karlstad, Minn., and Scott Nankivel, West Fargo.

Others appearing in the production will be Rachel Folkerts Almli, West Fargo; Joey Bartram, Minot; Sandy Bonin, Fargo; Michael Sorensen, Merrifield, Minn.; David Boyd, Fargo; Rachel Kendall, Litchfield, Minn.; William, Amy McCullum, Fargo; Bev Redmond, Beachwood, Minn.; Jeni Mueller, Madison, Minn.; Diane Plakos, Fargo; page and Jay North Fargo.

Costume designer is M. Joy Erickson, instructor of theater arts. Brad Baier, a graduate student in theater arts from Kelliher, Minn., will design the lights.

Tickets are available from the LCT box office. Box office hours are from 9:30 a.m. through 4 p.m. Monday through Friday. General admission is $5, but senior citizens and SU faculty and staff are admitted for $4. SU students with activity cards are admitted free.

Herd comes back with hold intensity to win 2

By Michael Morris

The youthful Bison men's basketball

ball team got up plenty of experience

to meet a couple of nights as well last weekend, beating St. Cloud State Saturday and

Mankato State on Friday.

Saturday's game was a thriller

to the end, with both teams having

nine points in the second half.

But the Herd was ahead only 35-

34 at the end of the first half

and 48-45 at the end of the

second half.

In the third quarter, however,

the Herd outscored the Huskies 18-

14.

The Huskies' starting lineup

for the game included seven players

from the junior varsity team.

The Herd starting lineup included

only three seniors.

The Herd was more experienced,

but the Huskies were more talent-

ful.

The game was a tight battle

from the opening tipoff.

In the second half, the Herd

took the lead 55-47.

The Herd didn't hold up

throughout the game.

They went on a 10-2 run to

lead 48-38.

The Huskies came back with

a 9-0 streak to lead 47-48.

The Herd came back with

a 7-0 streak to lead 55-47.

The game ended with the Herd

winning 81-78.

The Herd was led in scoring

by Majeski with 18, Stacy

Gilreath with 14 and David Ryles with 12.

The Huskies were led in

scoring by Majeski with 30,

Stacy Gilreath with 24, and

David Ryles with 12.

The Herd had 21 rebounds

and 14 assists.

The Huskies had 22 rebounds

and 12 assists.

The Herd had 16 turnovers

and the Huskies had 13.

The Herd made 29 of 50

shots from the floor, while

the Huskies made 23 of 45.

The Herd made 14 of 17

from the free throw line, while

the Huskies made 10 of 16.

The Herd had 39-3 at home

and 14-6 overall.

The Huskies had 29-10 at

home and 71-6 overall.

The Herd won 81-78.

The high scorers were Liz

Holsen with 20, Jenna

Schulz with 18 and

Jill Schulz with 16.

The Lady Mavericks won 80-67.

The Thundering Herd

beat Mankato State 71-63 with a 7-0

run in the final 10 minutes.

The Lady Mavericks won 80-67.
