

## COVID-19 cases and reporting procedures

**132 total confirmed positive cases (131 students and 1 employee) reported to NDSU in the past two weeks as of 9 a.m., Wednesday, September 9. Of the students, 29 are in isolation in university housing.**

**There are 175 students currently in quarantine in university housing.**

This is the number of confirmed positive cases that we know about. We are providing this information so our employees and students can be aware of the Covid-19 activity on the NDSU-Fargo campus. We are not including cases for COVID-19 positive people who have not been physically on the NDSU-Fargo campus during the previous 14 days.

Cases are reported to us a few ways, primarily through public health entities or individuals self reporting. Please see the links below for the procedures to self report.

There may be additional positive cases that have not been reported to NDSU.

NDSU does not have direct access to all the data of the people being tested. However, based on the information we have, it appears that NDSU's overall number of cases is increasing as well as the positivity rate (i.e., the ratio of positives cases to the overall number being tested). It takes a few days for the test results and notification processes to work.
