1.0 Introduction

HDR Engineering, Inc. (HDR) conducted a preliminary Hazardous, Toxic, and Radioactive Waste (HTRW) evaluation of proposed properties that may be acquired by the Flood Diversion Authority as a part of the AWD-00002 Project (Project) to increase flows during flooding in the Red River through the towns of Fargo, North Dakota and Moorhead, Minnesota. This report focuses on properties identified in Fargo, North Dakota that would be impacted based on modeled flood stage levels.

The objective of this report was to develop planning-level cost estimates associated with HTRW should future flood impacted properties be purchased and demolished as a part of the Project. Estimated costs to address HTRW related issues for the Project were evaluated in two parts:

- 1) Evaluation of identified properties within the study area (see Figure 1) for the likely presence of HTRW and to assign relative risk levels
- 2) Development of planning-level clean up and/or abatement costs.

The evaluation involved a review of historical sources such as: aerial photographs, city directories, fire insurance maps, governmental database records, and property tax records. A limited site reconnaissance was also conducted on February 28, 2012. Following the HTRW evaluation, estimated costs were developed by factoring in risk levels, property size, building size, and generalized costs for clean up and/or abatement.

2.0 HTRW Evaluation

The HTRW evaluation focused on gathering background data for the study area identified in Figure 1. This study area was evaluated during the background review and the site reconnaissance. For the purpose of this report, only the following properties will be discussed and evaluated, since they have been identified as potential buyout properties required for the Project.

Table 1. Potential Buyout Properties

Property Name	Address(es)
Oak Grove Residential Homes	Multiple (North Ter N., South Ter N., Short St N.)
Oak Grove Lutheran	103 North Ter N., 124 North Ter N., and 88 South Ter N.
Fargo Public Schools	419 3 rd St N., 414 3 rd St N.
Commercial Office Building	203 4 th Ave N.
Howard Johnson	301 3 rd Ave N.
City Hall Parking Lot	200 2 nd St N.
Mid America Steel	92 Northern Pacific Ave N, 96 Northern Pacific Ave N, and 101 Northern Pacific Ave N
Park East Apartments	1 2 nd St S.

2.1 Background Review

HDR authorized Environmental Data Resources Inc. (EDR) to conduct a governmental database search of the study area. The database search identified listings within the study area and within a 1-mile buffer that were listed in federal, state, local, and tribal records. The search identified listings associated with two sites identified in Table 1. Details of these listings for these two sites are described further in the HTRW Assessment Summary Data Sheets. A copy of the EDR report is located in Appendix A.

Historical Information Gatherers (HIG) provided HDR with copies of historical aerial photographs, city directories, and fire insurance maps. These sources were valuable in assessing former land use in the study area back to the late 1800s. The coverage of these historical sources in the study area was as follows:

Table 2. Historical Source Coverage

Historical Source	Coverage Periods
Aerial Photographs	1939, 1941, 1948, 1954, 1958, 1965, 1972, 1976, 1981, 1991, 1997, 2005, and 2010
City Directories	1928, 1934, 1940, 1945, 1951, 1956, 1961, 1966, 1971, 1976, 1981, 1986, 1991, 1996, 2001, 2006, and 2009
Fire Insurance Maps	1880s, 1890s, 1900s, 1910s, 1920s, and 1950s

Copies of these sources are located in Appendix B (Historical Aerial Photographs), Appendix C (City Directories), and Appendix D (Fire Insurance Maps). Detailed discussion on these sources is provided in the HTRW Assessment Summary Data Sheets.

Property tax records were also collected from the City of Fargo website (www.cityoffargo.com) for each of the properties listed in Table 1. Several representative properties were reviewed for the Oak Grove residential homes. Relevant information such as number of structures, age, square footage, and lot size were provided. Copies of these records are provided in Appendix E (Property Tax Records).

2.2 Study Area Reconnaissance

On February 28, 2012, HDR personnel conducted a reconnaissance of the study area, focusing particularly on properties that had been identified for potential buyout. Site access to private residences and businesses was not provided for the review. Interiors of buildings were also not reviewed during the site reconnaissance.

Observations of the study area were conducted from public roadways, public land, and lots accessible to the public. The study area consisted of a mix of residential, commercial, and industrial land uses. Residential properties were mainly located near the north end of the study area in the Oak Grove neighborhood. Commercial properties in the study area consisted of warehouses, laundering services,

motels, gas stations, office buildings, and retail stores. Industrial properties were limited to the Mid America Steel property, where public site access was prohibited. The location of the property at an elevated level to some of the surrounding streets and a perimeter fence limited the field review of the property.

2.3 HTRW Evaluation

The data collected during the background review and site reconnaissance was compiled and summarized in the HTRW Assessment Summary Data Sheets for each of the sites listed in Table 1. The HTRW Assessment Summary Data Sheets are provided in Appendix F.

The following table summarizes the findings associated with each of the buyout properties. Details regarding the determination for these ratings are discussed in the HTRW Assessment Summary Data Sheets.

Table 3. Identified HTRW and Associated Risk Levels

Property	HTRW		
	Asbestos	Lead	Other
Oak Grove Lutheran	Low, due to recent renovations	Low, due to recent renovations	None
Residential Properties	Low-Med	Medium	None
Fargo Public Schools	Low-Med	Low-Med	Medium. Potential soil contamination if soil disturbance will occur. Contaminants of Concern (COCs): PAHs and metals from former coal storage.
Commercial Office Building	Low-Med	Low	Low-Med. Potential for minor soil contamination associated with former use as RR siding. COCs: petroleum products, metals, creosote, PAHs.
Howard Johnson	Low-Med	Low	None
City Hall Parking Lot	N/A	N/A	Medium. Adjacent Tannery and foundry in early 1900s. Possible chromium, other metals, and VOCs present.
Case Plaza	Low, due to recent renovations	Low, due to recent renovations	Medium. Potential soil contamination if the lot is disturbed. COCs: PAHs, PCP, and metals.
Mid America Steel	Medium	Medium	Med-High. Historic use as a foundry and steel plant dating back to the early 1900s. COCs:

			arsenic, lead, PAHs, VOCs.
Park East Apartments	Low	Low	None

Based on the age of development in this area, with most structures built during the early- to mid-1900s, all the identified sites with structures on them had a potential for containing lead and asbestos containing building material.

3.0 Cost Estimations

Costs to address HTRW related clean up and/or abatement activities were estimated by combining the results of the assessment with other assumed costs further described in this section.

3.1 Methodology

Since the review of each property was limited (specifically the interior of structures were not observed) and personal interviews were prohibited, a risk level was assigned to each property based only on information that was gathered in historical documents and during the site reconnaissance. The risk ratings were broken into low, medium, and high. HTRW issues were also categorized as a soil, asbestos, or lead cleanup. Multiple HTRW issues were typically identified at each site. The following table provides a breakdown of values assigned to each rating and HTRW category.

Table 4. Risk Ratings

Risk Ratings	Soil Volume based on % of site (to 0.5')	Lead Abatement based on % of Structure	Asbestos Abatement based on % of structure
Low	5%	1%	10%
Moderate	25%	10%	30%
High	50%	20%	50%

Since actual bulk surveys and subsurface site investigations were not performed to more accurately identify HTRW issues for each site, the estimated cost was normalized for each property by reflecting clean up cost as a percentage of the lot size or structure(s). The following formula was used to calculate total costs for each property.

$$C = Ad + Ch + ((R_S \times A_L) \times C_S) + ((R_L \times A_B) \times C_L) + ((R_A \times A_B) \times C_A) + U$$

In this formula C represents the total HTRW clean up cost for a particular property; Ad represents administrative costs; Ch represents characterizing costs (Phase I ESA, Phase II ESA, and Bulk Survey); R_S, R_L, and R_A are the risk percentages (Table 4) that were assigned to each property (Table 3); A_L represents

the area of the property lot; A_B represents the area or square footage of a structure(s); C_S , C_L , and C_A represent clean up costs as a function of volume (for soil) or area (for lead and asbestos), and U represents the cost to remove and dispose of an underground storage tank.

3.2 Results

The following table summarizes the estimated costs for each property based on the formula shown in Section 3.1.

Table 5. Estimated HTRW Costs

Property	HTRW Clean Up Cost	% of Total Cost
Case Plaza	\$57,972	6.0%
Fargo Public Schools	\$92,083	9.5%
Howard Johnson	\$88,484	9.1%
Mid America Steel	\$440,369	45.2%
Oak Grove	\$87,122	9.0%
Park East Apartments	\$108,054	11.1%
Residential Properties*	\$6,648	0.7%
Commercial Office Building	\$22,794	2.3%
City Hall Parking Lot	\$69,698	7.2%
Total HTRW Cost Estimation**	\$973,000	

* assumes 5 residential properties will be acquired
 ** final value rounded to the nearest thousand

The data used to develop these costs are described in detailed tables located in Appendix G.

3.3 Limitations

The HTRW cost estimates provided for the Project were prepared based on a planning level assessment, where the actual presence of HTRW has not been confirmed. A full ASTM 1527-05 Phase I Environmental Site Assessment (ESA) was not performed. Phase I ESAs, Phase II ESAs, and bulk surveys are needed to refine associated HTRW costs. These assessments and surveys would quantitatively identify contaminants of concern (COC) and areas of contamination that would require clean up.

The HTRW costs were also developed assuming flat rates for oversight, removal, and disposal for lead and asbestos as a function of square footage. In actuality, these costs would vary based on materials present at each structure and whether not those materials would require abatement before demolition. Asbestos abatement may also involve pipe insulation at commercial and industrial sites. This would not fall under the calculations using square footage and may increase abatement costs. Lead abatement also varies based on the need for stabilization or full removal prior to demolition. All these unknown

factors would be addressed with a bulk survey where the properties would be evaluated by a certified inspector and materials tested by a certified laboratory. The bulk survey is a requirement by the North Dakota Department of Health prior to demolition.

The goal of this evaluation was to provide a general estimate of potential HTRW costs. This will be added to other Project related estimates to determine a total cost to implement the Project. These costs may not reflect actual costs once the Project is implemented and characterization of the properties are conducted.

Groundwater related impacts were not included in the HTRW cost estimates. It is assumed that dewatering is not required as a part of the demolition of the properties. If groundwater contamination is present, the costs associated with monitoring and remediation is highly dependent on contaminant concentrations present. This information would not be available until after the properties are characterized.

4.0 Conclusions

All the properties identified for acquisition have the potential to require clean up or abatement if the Project is implemented. The cost estimates developed for addressing HTRW issues was hypothesized based on available information at this point in the Project planning. Actual clean up costs may vary significantly if the assumptions used in developing the costs change substantially following further characterization.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/25/2011 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 10 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal registered storage tank lists

ND UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Health's UST Data (Facility & Owner Address of the Tanks Currently Recorded in North Dakota).

A review of the ND UST list, as provided by EDR, and dated 10/17/2011 has revealed that there are 24 ND UST sites within approximately 0.25 miles of the target property.

State and tribal Brownfields sites

MN BROWNFIELDS: Purchasing, selling, or developing property can present a special set of obstacles if the property is contaminated with chemicals. The Petroleum Brownfields Program is one of several programs within the Minnesota Pollution Control Agency (MPCA) designed to help people address these obstacles. The purpose of the Petroleum Brownfields Program is to provide the technical assistance and liability assurance needed to expedite and facilitate the development, transfer, investigation and/or cleanup of property that is contaminated with petroleum.

A review of the MN BROWNFIELDS list, as provided by EDR, and dated 11/01/2011 has revealed that there are 4 MN BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there are 32 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and

EXECUTIVE SUMMARY

non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 2 Manufactured Gas Plants sites within approximately 1 mile of the target property.

DETAIL MAP - 3265320.1s

- Target Property
- Sites at elevations higher than or equal to the target property
- Sites at elevations lower than the target property
- Manufactured Gas Plants
- Sensitive Receptors
- National Priority List Sites
- Dept. Defense Sites
- Indian Reservations BIA
- County Boundary
- Power transmission lines
- Oil & Gas pipelines from USGS
- 100-year flood zone
- 500-year flood zone
- National Wetland Inventory

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

North Dakota Facility Profile (ND-FP) contains facility based, environmental information for the State of North Dakota.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,

Map ID
Direction

WELLS FARGO - FARGO (Continued)

1004747459

WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

North Dakota Facility Profile (ND-FP) contains facility based, environmental information for the State of North Dakota.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

North Dakota Facility Profile (ND-FP) contains facility based, environmental information for the State of North Dakota.

Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Facility Has Received Notices of Violations:

Regulation violated: Not reported
Area of violation: Generators - Manifest
Date violation determined: 07/17/1991
Date achieved compliance: 12/31/1991
Violation lead agency: State
Enforcement action: Letter of Warning (LOW)
Enforcement action date: 09/06/1991
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: State
Proposed penalty amount: 0
Final penalty amount: 0
Paid penalty amount: 0

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

CAMDBS (Clean Air Markets Division Business System) is a national information system that supports the implementation of market-based air pollution control programs administered by the Clean Air Markets Division, within the Office of Air and Radiation. These programs include the Acid Rain Program, established by Title IV of the Clean Air Act Amendments of 1990, and regional programs designed reduce the transport of ozone. These emissions trading programs allows regulated facilities (primarily electric utilities) to adopt the most cost-effective strategies to reduce emissions at their units. Units that reduce their emissions below the number of allowances they hold -- each allowance is equivalent to one ton of sulfur dioxide or

MOORHEAD POWER PLANT (Continued)

1004536609

nitrogen oxides -- may trade allowances with other units in their system, sell them to other utilities on the open market or through EPA auctions, or bank them to cover emissions in future years. CAMDBS functions include registering responsible officials, establishing allowance accounts, reporting hourly emissions data, and transferring allowances between accounts.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ELECTRIC GENERATOR

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: X001
Waste name: WASTE OILS

Violation Status: No violations found

FINDS:

Registry ID: 110003742362

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Facility Has Received Notices of Violations:

Regulation violated: Not reported
Area of violation: Generators - General
Date violation determined: 07/13/1993
Date achieved compliance: 08/24/1993

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Facility Has Received Notices of Violations:

Regulation violated: Not reported
Area of violation: Generators - General
Date violation determined: 11/14/1991
Date achieved compliance: 10/20/1994
Violation lead agency: State
Enforcement action: FORGIVEABLE ADMN PENALTY ORDER(APO)
Enforcement action date: 07/07/1992
Enf. disposition status: Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Historical Generators:

Date form received by agency: 11/25/1994
Facility name: NEUROPSYCHIATRIC RESEARCH INSTITUTE
Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

US EPA Air Quality System (AQS) contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

North Dakota Facility Profile (ND-FP) contains facility based, environmental information for the State of North Dakota.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D006
Waste name: CADMIUM

Waste code: D007

F002

Waste name:

THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Amount (Lbs):

10890

Corrective Action Summary:

Event date:

01/21/1993

Event:

RFA Completed

Event date:

01/21/1993

Event:

CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 01/21/1993
Event: Corrective Action Process Terminated, No Further Action

Event date: 01/21/1993
Event: Migration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 01/21/1993
Event: Migration of Contaminated Groundwater under Control, Effective 2/5/1999 per revised program guidance: This code for 'No release to groundwater' should no longer be used. Previously entered NR status codes should be updated, but may remain in the database until they are replaced by more recent codes.

Event date: 01/21/1993
Event: RFA Completed, Assessment was a PA-Plus.

Event date: 01/21/1993
Event: RFA Determination Of Need For An RFI, RFI is Not Necessary;

Event date: 01/21/1993
Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 01/21/1993
Event: Date For Remedy Selection (CM Imposed)

Event date: 01/21/1993
Event: Current Human Exposures under Control, Effective 2/5/1999 per revised program guidance: This code for 'No control measures necessary' should no longer be used. Previously entered NC status codes should be updated, but may remain in the database until they are replaced by more recent codes.

Event date: 01/21/1993
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ND SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

MN CDL: Clandestine Drug Labs

This data was passively gathered. That is, the DOH asks law enforcement and other agencies to notify them of Clandestine Drug Labs (CDLs). They do not require reporting of events. Therefore the data represents only a subset of all CDLs. This data has not been verified. The DOH has made no attempt to verify that reported CDLs actually occurred. They have no knowledge if the CDL was involved in cooking or just consisted of chemicals associated with Meth production. The reports they receive are that a suspected CDL was seized.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 08/02/2011	Source: EPA
Date Data Arrived at EDR: 09/13/2011	Telephone: (303) 312-6312
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 12/13/2011
Number of Days to Update: 119	Next Scheduled EDR Contact: 03/26/2012
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/21/2011	Source: Department of Environmental Protection
Date Data Arrived at EDR: 11/22/2011	Telephone: 860-424-3375
Date Made Active in Reports: 12/22/2011	Last EDR Contact: 02/20/2012
Number of Days to Update: 30	Next Scheduled EDR Contact: 06/04/2012
	Data Release Frequency: Annually

NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 11/01/2011	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/08/2011	Telephone: 518-402-8651
Date Made Active in Reports: 12/22/2011	Last EDR Contact: 02/09/2012

	Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Public Schools

Most Recent Revision: 1993

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> CASS, ND	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	3853640020E - FEMA Q3 Flood data
Additional Panels in search area:	2752440005D - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> FARGO NORTH	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CASHEL

Soil Surface Texture: silty clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silty clay	Not reported	Not reported	Max: 4.23 Min: 0.42	Max: 8.4 Min: 7.4
2	7 inches	59 inches		Not reported	Not reported	Max: 4.23 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: FARGO

Soil Surface Texture: silty clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silty clay	Not reported	Not reported	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.9
2	9 inches	22 inches		Not reported	Not reported	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.9
3	22 inches	59 inches		Not reported	Not reported	Max: 1.41 Min: 0.42	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: CASHEL

Soil Surface Texture: silty clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture: silty clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 5

Soil Component Name: Urban land

Soil Surface Texture: silty clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Water Well Locations

Source: State Water Commission

Telephone: 701-328-2754

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Locations Listing

Source: North Dakota Industrial Commission

Telephone: 701-328-8020

A listing of oil and gas well locations in the state.

RADON

State Database: ND Radon

Source: Dept of Health

Telephone: 701-328-5188

Radon Surveys in North Dakota. Includes cluster, day care, school, home, and women with infant children

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

**POLK'S
FARGO**

(CASS COUNTY, NORTH DAKOTA)

Directory of Householders, Occupants of Office Build-
ings and Other Business Places, Including a
Complete Street and Avenue Guide

1940

Copyright, 1940, by R. L. Polk & Co.

The city of Fargo is divided into two divisions. The northern division being that portion north of the N. P. Ry. right of way. The southern division being that portion south of the N. P. Ry. right of way. All streets run north and south, and all avenues east and west. The streets in the northern division are prefixed by the letter N, and the avenues are followed by the letter N. In the southern division the streets are prefixed by the letter S, and the avenues are followed by the letter S.

The odd numbers will be found on the east side of all streets in the northern division, and on the west side of all streets in the southern division. The odd numbers will be found on the north side of all avenues in both the northern and southern divisions.

Numbers run 100 to a block on all streets, beginning with both First Avenue North, and First Avenue South, and on all avenues, beginning with First Street North, and First Street South.

In the following list the named streets are arranged in alphabetical order followed by the numbered streets in numerical order, the intersecting streets being shown. The number of each building on the street is given in numerical order, and opposite the number is placed the name of the occupants or houseowner or tenant. In the business blocks containing offices the occupants are shown by room numbers where practicable, in apartment homes the number denotes the number of the apartment. In all streets both sides of the street are included in one list. The profession or business of individuals or firms is given only at their respective place of business; to find occupation of others refer to Alphabetical List of Names.

The symbol © following a householder's name indicates that we have received information during the canvass that the house is owned by some member of the family, but as the publisher cannot and does not guarantee the correctness of the information furnished, nor the complete absence of mistakes no responsibility for errors can be or is assumed, nor can the publisher furnish further information than that shown.

FARGO HOUSEHOLDERS DIRECTORY (1928)

609

POLK'S FARGO

(NORTH DAKOTA)

Street and Avenue Guide and
Directory of Householders

1928

Copyright 1928, By R. L. POLK & CO.

The City of Fargo is divided into two divisions. The northern division being that portion north of the N. P. Ry. right of way. The southern division being that portion south of the N. P. Ry. right of way. All streets run north and south, and all avenues east and west. The street in the northern division are prefixed by the letter N, and the avenues are followed by the letter N. In the southern division the streets are prefixed by the letter S, and the avenues are followed by the letter S.

The odd numbers will be found on the east side of all streets in the northern division, and on the west side of all streets in the southern division. The odd numbers will be found on the north side of all avenues in both the northern and southern divisions.

On referring to this directory it will be found that the named streets and avenues are arranged in alphabetical order, and the numerical streets and avenues in numerical order as, 1, 2, 3; regardless of location.

Numbers run 100 to a block on all streets beginning with both First Avenue North, and First Avenue South, and on all avenues, beginning with First Streets North, and First Street South. For an example, if you desire to find 101 Third Street North, you would find it at the intersection of First Avenue North. If you desire to find 101 Sixth Avenue North, you would find it at the intersection of North First.

FARGO DIRECTORY OF HOUSEHOLDERS (1940)

**POLK'S
FARGO**

(CASS COUNTY, NORTH DAKOTA)

Directory of Householders, Occupants of Office Build-
ings and Other Business Places, Including a
Complete Street and Avenue Guide

1940

Copyright, 1940, by R. L. Polk & Co.

The city of Fargo is divided into two divisions. The northern division being that portion north of the N. P. Ry. right of way. The southern division being that portion south of the N. P. Ry. right of way. All streets run north and south, and all avenues east and west. The streets in the northern division are prefixed by the letter N, and the avenues are followed by the letter N. In the southern division the streets are prefixed by the letter S, and the avenues are followed by the letter S.

The odd numbers will be found on the east side of all streets in the northern division, and on the west side of all streets in the southern division. The odd numbers will be found on the north side of all avenues in both the northern and southern divisions.

Numbers run 100 to a block on all streets, beginning with both First Avenue North, and First Avenue South, and on all avenues, beginning with First Street North, and First Street South.

In the following list the named streets are arranged in alphabetical order followed by the numbered streets in numerical order, the intersecting streets being shown. The number of each building on the street is given in numerical order, and opposite the number is placed the name of the occupants or houseowner or tenant. In the business blocks containing offices the occupants are shown by room numbers where practicable, in apartment homes the number denotes the number of the apartment. In all streets both sides of the street are included in one list. The profession or business of individuals or firms is given only at their respective place of business; to find occupation of others refer to Alphabetical List of Names.

The symbol © following a householder's name indicates that we have received information during the canvass that the house is owned by some member of the family, but as the publisher cannot and does not guarantee the correctness of the information furnished, nor the complete absence of mistakes no responsibility for errors can be or is assumed, nor can the publisher furnish further information than that shown.

FARGO HOUSEHOLDERS DIRECTORY (1928)

609

POLK'S FARGO

(NORTH DAKOTA)

Street and Avenue Guide and
Directory of Householders

1928

Copyright 1928, By R. L. POLK & CO.

The City of Fargo is divided into two divisions. The northern division being that portion north of the N. P. Ry. right of way. The southern division being that portion south of the N. P. Ry. right of way. All streets run north and south, and all avenues east and west. The street in the northern division are prefixed by the letter N, and the avenues are followed by the letter N. In the southern division the streets are prefixed by the letter S, and the avenues are followed by the letter S.

The odd numbers will be found on the east side of all streets in the northern division, and on the west side of all streets in the southern division. The odd numbers will be found on the north side of all avenues in both the northern and southern divisions.

On referring to this directory it will be found that the named streets and avenues are arranged in alphabetical order, and the numerical streets and avenues in numerical order as, 1, 2, 3; regardless of location.

Numbers run 100 to a block on all streets beginning with both First Avenue North, and First Avenue South, and on all avenues, beginning with First Streets North, and First Street South. For an example, if you desire to find 101 Third Street North, you would find it at the intersection of First Avenue North. If you desire to find 101 Sixth Avenue North, you would find it at the intersection of North First.

ASH—From S Terrace north to Red River, 5 east of N First

HIG Project No. 121561

Conducted For

HDR, Inc.

701 Xenia Avenue S., Suite 600

Golden Valley, MN

Client Project No.

The Fire Insurance Maps Plus Report (FIM+ Report) is a summary of research conducted by Historical Information Gatherers, Inc. (HIG) for the locations of fire insurance maps and similar land use maps for the property noted above under Site Location ("the Site"). The **Results Summary** section provides a numbered list of each map publication that has been prepared for the general area of the Site. **Site Coverage** and **Research Notes** give details related to the maps researched by HIG for this report. Complete information about how to access the map collections is included in the **Map Detail** pages which follow the Report Summary. All FIM+ Maps provided by HIG are based on source material which has passed into the public domain (not protected by copyright). The information in this FIM+ Report regarding map publications was compiled by others from numerous sources and HIG cannot warranty its accuracy. HIG has edited data from these sources when it was believed to be erroneous based on research conducted by HIG.

FIM+ Report and FIM+ Maps ©2010 Historical Information Gatherers, Inc. The purchaser of this report is permitted to include copies as supporting documentation for their professional services for the Site. All other rights reserved.

Site Coverage Notes:

Coverage Provided - Copies of maps for the Site are provided in a separate file.

Coverage Available - Coverage of the Site does exist and can be obtained from other sources. See the **Map Detail** section of the **FIM+ Report** for known locations and formats.

No Coverage - The Site was not included in the extent of the publication.

Coverage Unknown - Detailed information regarding the coverage area of the publication was not readily available to HIG researchers.

Map Format Information

Fire insurance maps may be found in a variety of formats including paper, microfilm, or digital, which could be in color, grayscale, or black and white.

Paper fire insurance maps are usually original color publications, though a few were produced in black and white. Updates to these maps were drawn on paper, cut to fit the area to be updated, and then glued to the original. It is sometimes possible to see the original map lines and text through the overlying update. Some of the paper map collections listed in the FIM+ Report are reproductions which are grayscale or black and white. If paper maps are known to be reproductions, this information is included in the FIM+ Report.

Microfilm reproductions of fire insurance maps are almost always in grayscale format, although it is frequently referred to as black and white. A very small amount of color microfilm of fire insurance maps has been produced and is noted in the FIM+ Report when applicable.

Digital copies of fire insurance maps may be in color, grayscale, or black and white, depending on the original source material and the scanning equipment used.

- *Color* scans generally capture all the information depicted on the maps.
- *Grayscale* scans generally capture most the information depicted on the maps and may also allow a researcher to distinguish color variations because each pixel in the image is one of 256 shades of gray.
- *Black and white* scans have no color variations. Because of this, some data from the original map has been lost either by being so light that it disappears from the image altogether, or by being so dark that parts of the image become very dark and unreadable.

Scan quality: Color and grayscale scans may allow the researcher to see and interpret data that was present on the original paper map which underlies the pasted on revisions that were glued to the original map pages; black and white scans have lost this along with other details.

Scan files: Common file types for digital maps are PDF, JPG, SID, TIF, ECW, and JPG 2000, some of which require special software for viewing. Black and white scans have a very small file size while color and grayscale images are generally much larger.

Map Type: Fire Insurance maps were prepared for insurance underwriters to assess risk. They have very detailed information about building structures, tanks, and production processes in commercial facilities, and may show lot lines. Real Estate Atlases (sometimes called Plat Maps), are frequently mistaken for Fire Insurance maps as they have a similar look of showing building footprints and lot lines, but they show far less detail. Panoramic Maps may be a drawing or photograph mosaic from a bird's eye view.

Description of Major Collections

HIG's Public Domain Fire Insurance Maps

By utilizing its exclusive database, *Copyright Records of the Sanborn Map Co. 1923-1992* and through additional copyright research, HIG has built a digital collection of fire insurance and other similar maps which have passed into the public domain. The collection includes maps from numerous publishers including Sanborn, Rascher, Hopkins, Baist, Foote, Robinson, and more. Images include color scans of original maps or grayscale scans of microfilmed maps which have been digitally enhanced for readability. Digital images and reprints may be ordered from HIG.

<http://www.historicalinfo.com>

Library of Congress

The Library of Congress Geography and Map Division (LC) has the largest collection of original color fire insurance maps for the United States, produced by a number of different publishers. It is composed primarily of maps submitted for copyright along with working (revised) copies donated by the Census Bureau and others. A small number of maps have also been purchased by the library. In 1981, the LC published a book which listed the library's holdings at that time entitled *Fire Insurance Maps in the Library of Congress: plans of North American cities and towns produced by the Sanborn Map Company: a checklist*. Maps produced by other publishers were not included in this book. More than 400 volumes of fire insurance maps have been added to the LC collection since 1981; these have not yet been catalogued. In addition to printed maps, the LC also holds complete collections of Chadwyck-Healey and University Publications of America microfilm and subscribes to the Proquest digital collection, all of which are discussed below.

Chadwyck-Healey microfilm

Chadwyck-Healey, Inc. microfilmed the Library of Congress collection of fire insurance maps produced by the Sanborn Map Co. beginning in 1983 and released the imagery in 2 editions. The first edition covers maps dated 1867-1950; the second edition covers maps from 1950-1970. The maps are organized by state in the same order as the LC checklist published in 1981, excepting that the two editions of microfilm are separate. This grayscale microfilm is widely available in libraries for viewing, but is not available for sale to the general public. The first edition is more commonly available than the second.

Proquest's Digital Sanborn Maps

Proquest created a collection called *Digital Sanborn Maps 1867-1970* which is a collection consisting of black and white scans of the Chadwyck-Healey microfilm. Libraries and government agencies can subscribe to the Proquest collection, but not businesses or private individuals. Proquest subscriptions are by available by state and the subscribing library can also choose whether or not to allow users remote access to the collection. A number of libraries throughout the country subscribe to all 50 states but not all allow remote access to the Proquest collection. All subscribing libraries permit public access to the Proquest collection on a walk in basis. Many libraries permit registered users to access the Proquest collection remotely via the internet. Requirements to be a registered user vary from library to library. Proquest's description of this collection is found at:

<http://www.proquest.com/en-US/catalogs/databases/detail/sanborn.shtml>

Sanborn Library, LLC

The Sanborn Library, LLC was created by Environmental Data Resources (EDR) after its acquisition of the Sanborn Map Co. in 1996. Their collection consists primarily of black and white scans of Chadwyck-Healey and University Publications of America microfilm, with some additional coverage obtained from libraries or through the continued updating of maps. Some original color maps are still in the collection, but a catalog of holdings is not publicly available. Theirs is the single largest collection of maps produced by Sanborn. The collection is not directly accessible, though scanned images and reprints may be ordered through EDR.

<http://www.edrnet.com/index.php>

University Publications of America microfilm

In 1993, prior to its acquisition by EDR, the Sanborn Map Company allowed University Publications of America (UPA; now owned by LexisNexis) to microfilm their holdings. This collection, entitled *Fire Insurance Maps from the Sanborn Map Company Archives*, contains maps which are typically revised to a later date than the Chadwyck-Healey collection. This grayscale microfilm is available for purchase by the general public. It is sold by the roll, with discounts available for whole states. Information about purchasing this microfilm is available at:

DISCLAIMER

The City Of Fargo provides property information to the public "as is" without warranty of any kind, expressed or implied. Assessed values are subject to change by the City Of Fargo. In no event will the City Of Fargo be liable to anyone for damages arising from the use of the property data. You assume responsibility for the selection of data to achieve your intended results, and for the installation and use of the results obtained from the property data.

Assessment records are for the sole purpose of identifying the land being taxed. In some cases to attain efficiency, Assessment Department legal descriptions may be shortened yet will retain sufficient information to identify the land. Since tax statements and records are not deeds and may contain abbreviated descriptions, they should not be used as a basis for a survey or a legal document and should not be used by surveyors or others as the primary source of a property description.

Appendix F- HTRW Assessment Data Sheets

Provided in Enclosed CD

HTRW Assessment Summary Data Sheet

Property Name:	Oak Grove Lutheran School
Property Address:	124 North Terrace 103 North Terrace 88 South Terrace
Parcel #:	01-2200-01191-020 (segments 1-3)

General Property Information	
Property Age:	1921 (124 North Terrace), 1924 (103 North Terrace), 1924 (88 South Terrace)
# and Type of Structures:	Three main structures are located on the campus
Structure Construction:	Mixed brick, metal, and wood
General Land Use:	Religion-based school

Governmental Database Search Results
No listings for the property or adjacent properties.

General Information from http://www.oakgrovelutheran.com/parents/about.php
<ul style="list-style-type: none"> • The school was established in 1906. • Jackson Hall was built in 1923. • The Junior High was added in 1978. • Major flooding in 1997 caused extensive damage to the campus but the school was rebuilt and re-opened later that fall. • Jackson Hall was renovated in 2005 and a concourse added between that building and the Darwin Gorder Gymnasium. • May 2006 – Fossum Hall and Auditorium was demolished to make room for a new Fine Arts building. • 2008 – Darwin Gymnasium was completely renovated and Ellig Center for Health and Wellness was added. • 2009 – Major flooding again caused overwhelming damage to the grounds, Benson Hall and Jackson Hall. The school was renovated and re-opened in the fall of 2009.

City Directory

Oak Grove Lutheran has been in existence since at least 1928. It has been listed under the following addresses: end ('e') [of North Terrace], 120, 124, 125, 130, 137, & 138 North Terrace. It was originally called "Oak Grove Seminary."

Fire Insurance Map

1880s	No Coverage
1890s	No Coverage
1900s	No Coverage
1910s	No Coverage
1929	The property is listed as Oak Grove Ladies Lutheran Seminary. A main building is shown near Ash St N. Two smaller buildings, one for classes and one a dormitory, is located along the north side of North Terrace at Ash St N.
1950	A structure with a dormitory and gym is now seen near the center of the property. The property is now listed as Oak Grove Lutheran Seminary.

Historical Aerial Photographs

1939	A large rectangular building and several smaller structures were located on the property. The remainder of the property appears to be moderately to heavily vegetated.
1941	No significant changes.
1948	Another large building is constructed to the west of the other structures.
1954	An athletic field is added along the north side of the property.
1958	No significant change
1965	Another large building is constructed along the north side of the property.
1972	No significant changes
1976	An addition may have (photo resolution poor) been added to the south side of the original building.
1981	No significant changes
1991	Another addition is added to the north side of the original building.
1997	No significant change
2005	No significant change
2010	Courtyard is cleared of trees and replaced with paved parking lot. Changes to some of the buildings on site are also noted.

Site Reconnaissance Observations

The property was occupied by a large school campus containing three separate buildings. The eastern most building consisted of three attached structures and was identified as the gym and health and wellness building. A hall and performance art center was located along the west side. A large courtyard and parking areas were in the center of the property and along the west side. Soccer fields and stadium stands were noted along the north side of the property near the Red River. Emergency/back up generators and minor outdoor storage of materials was noted along the north side of the performance art center. Large brick flood walls were observed around the perimeter of the property. The exterior of the building and the entire facility appears to have been updated or renovated recently.

Summary of HTRW Related Issues Costs

Based on review of available data, the property has been owned by the Oak Grove Lutheran Seminary since at least the 1920s, and continually been used as a school/seminary. Though the original structures were built during the 1920s, several additions have been made on the property, as well as almost a complete renovation of the campus following floods during the late 1990s and 2000s. The likelihood of encountering contamination is considered low.

HTRW related costs for this property is considerate a low potential for the abatement of asbestos containing building materials and lead paint if it has not been removed already during the renovations.

HTRW Assessment Summary Data Sheet

Property Name:	Oak Grove Residential Properties
Property Address:	North Terrace N. South Terrace N. Short St. N.
Parcel #:	Numerous IDs

General Property Information

Property Age:	1900s to 1930s, 1952 (612 Short St. N.)
# and Type of Structures:	47 residential homes
Structure Construction:	Brick, wood, concrete, and vinyl siding
General Land Use:	Residential single family

Governmental Database Search Results

No listings for the property or adjacent properties.

City Directory

North Terrace N.: Private homeowners indicated in all coverage years, with the exception of :

- Hans On business services at 61 North Terrace N. (2009)

South Terrace N.: Private homeowners are indicated in all coverage years, with the exception of :

- Paulson’s Sound Service sound system at 27 South Terrace N. (1996)
- Fargo Floral Co. 9-15 South Terrace N. (1928, 1934, 1940, 1945, 1951, and 1956)

Short St. N.: Private homeowners are indicated in all coverage years.

Single family and multi-family homes were present throughout the majority of the properties over the coverage years.

Fire Insurance Map

1880s	No Coverage
1890s	No Coverage
1900s	No Coverage
1910s	No Coverage
1929	The properties are occupied by single family and larger multi-family dwellings. The Swedley Floral Co. is shown along South Terrace N. near Elm St. N. Several dwellings are shown on the east side of Short St. N.
1950	No significant changes.

Historical Aerial Photographs

1939	The majority of homes are already present along North Terrace and South Terrace. There is less housing density where odd numbered homes from 3 North Terrace to 21 North Terrace were not yet constructed. One to two homes are located in this area. Homes are present along the south side of South Terrace. A large square field or building is present in the vicinity of 7 south Terrace.
1941	New homes were constructed (3 North Terrace to 21 North Terrace). A large field observed in 1939 appeared to have two structures on it, similar to a large shed or green house.
1948	A large building is constructed near the current alignment of Short Street and where an open field was previously noted.
1954	No significant changes noted.
1958	No significant changes noted.
1965	No significant changes noted.
1972	No significant changes noted.
1976	No significant changes noted.
1981	An additional large rectangular building was constructed directly south of formerly noted sheds/greenhouses.
1991	Lower Terrace N. has been constructed and now divides the buildings noted on the south side of South Terrace N. Two residential homes appear to be located at the end of Lower Terrace N.
1997	Additional structures are added along the south side of Lower Terrace N. The nearby open field appears to be cultivated and this area may be a greenhouse.
2005	Homes between 73 South Terrace N. and 33 South Terrace N. have been removed. The green house business noted previously has been removed along with all its associated structures.

2010 Two homes remain along Lower Terrace, as well as the five eastern most homes shown along Lower Terrace. All these homes have been removed as of 2012.

Site Reconnaissance Observations

The properties consisted of residential, multi-storied, single-family homes with detached garages. Homes in the area appeared to be constructed around the same time. Remodeling and upgrades were noted at many of the homes in the area. Houses appeared to be well maintained. Snow cover was heavy in this area and may have prevented the observation of soil, vegetation, etc.

Summary of HTRW Related Issues/Costs

Based on review of available data, homes in the area were constructed during the 1900s through the 1930s. Though asbestos containing building material was not used in the original construction, any upgrades or additions may have included them. The likelihood of encountering asbestos or lead related to demolition of these residences is considered low. The home located at 612 Short St. N. constructed during the 1950s may have asbestos containing building materials.

HTRW related costs for these properties could include a low to moderate potential for the abatement of asbestos containing building materials and lead paint if the buildings are demolished.

HTRW Assessment Summary Data Sheet

Property Name:	Fargo Public School [Kitchen]
Property Address:	419 Third Street N. 414 Third Street N. (known address)
Parcel #:	01-1540-01500-000

General Property Information	
Property Age:	1935
# and Type of Structures:	41,325 sq. ft. single story warehouse building
Structure Construction:	Mix (Brick, cinder block, concrete)
General Land Use:	Commercial warehouse

Governmental Database Search Results
<p>Fargo Public Schools District</p> <ul style="list-style-type: none"> ○ Resource Conservation and Recovery Act (RCRA) Conditionally Exempt Generator (<100 kg of hazardous waste per year). Listed waste codes: D001 Ignitable hazardous wastes, carbon disulfide, benzene, ethane, 1-1 feet oxybis-(I), formaldehyde, hydrofluoric acid, methanol, pyridine, dimethyl benzene ○ FINDS- Listed in the RCRA database, North Dakota Facility Profile, and Integrated Compliance Information System. <p>Adjacent listing for:</p> <ul style="list-style-type: none"> ● Automotive Maintenance Service (located 100 feet southwest) <ul style="list-style-type: none"> ○ Inactive Underground Storage Tank (UST) listing. No known violations or leaks.

City Directory

- Since 1996, Third Street N. has been the Fargo Public Schools Warehouse/Central Kitchen.
- From 1971-1991, this location was Plainsco wholesale (plumbing and heating fixtures).
- From 1940-1966, the address of 419-421 Third Street N. was the AM Radiator and Stand Sanitary Corp & Amstan Supply Division of Am Radiator & Stand Sanitary Corp (plumbing suppliers).
- From 1934-1940 no business was listed under 419, however; Moll Jos P (most likely a residence) was listed under 415 and Cochran-Sargent Co (plumbers/supplies) was listed under 414-416 Third Street N.
- From 1928-1934, no business was listed under 419, however, Garden City Feeder Co. (agricultural implements) was listed under 416 and Cochran-Sargent Co was listed under 414 Third Street N.

Fire Insurance Map

1884	The property was occupied by a church on the west side of the parcel and a small unmarked warehouse and shed on the east side. Railroad tracks run along the north side of the property and the surrounding area is occupied by dwellings and warehouses.
1896	Only a single dwelling is located where the church was. The remainder of the property is empty.
1905	Two dwellings are now on the west side of the property.
1916	The two dwellings have been removed and replaced with three adjacent sheds. Two are marked as "coal shed" and one "lime and cement warehouse." A building materials yard and warehouse are on the east side.
1929	Another coal shed has been added to the west side. The building materials yard is now called "T.F. Powers Co. Contractors Yard," and another warehouse is added to the property.
1950	The property is now occupied by a single warehouse structure that covers almost the entire property. It is labeled "Cochran- Sargent Co. Plumbing Supplies."

Historical Aerial Photographs

1939	The property was adjacent to the railroad line along the south side. Structures on the property consisted of a single square building right next to the tracks. Open land was to the east and residential properties directly to the south. Similar large buildings are to the west along the railroad. Small commercial businesses were noted to the southeast along the railroad spur.
1941	An addition was added to the single building on site in the area of the former open land. The building had doubled in size.
1948	Unchanged
1954	Unchanged
1958	Unchanged
1965	Residential and commercial properties adjacent to the south and southeast have been removed. Open land or a paved surface noted in this area.
1972	Two buildings were constructed in the adjacent open area.
1976	Unchanged
1981	Unchanged
1991	Unchanged
1997	Unchanged

2005	An L-shaped addition is added to the existing building along the southeast side.
2010	Unchanged

Site Reconnaissance Observations

The property consists of one large warehouse building with a small, fenced parking lot/loading bay in the southwest corner of the lot. The property is fenced along the north side where it abuts the railroad tracks. A narrow alley runs along this area between the building and the railroad tracks. No storage of materials was observed outside.

Summary of HTRW Related Issues/Costs

Based on review of available data, the property has been used as a warehouse since the building was constructed in 1935. Prior to that coal sheds were present along the west side of the property for at least 13 years between 1916 and 1929. Though most of property is covered by either a building or paved lot, soil contamination from prior coal storage may be present since environmental regulations were not in place when the warehouse was built. If demolition of the building or exposure of the underlying soil is planned, the likelihood of encountering contaminated soil is considered moderate.

HTRW related costs for this property could involve testing, removal, and disposal of soils containing Polynuclear Aromatic Hydrocarbons (PAH)s and heavy metals (moderate potential). The property also has a low to moderate potential of requiring asbestos and lead abatement if additions or upgrades were made to the interior or exterior of the structure.

HTRW Assessment Summary Data Sheet

Property Name:	Commercial Office Property (Downtown Community Partnership)
Property Address:	203 Fourth Avenue N.
Parcel #:	01-2160-00080-000

General Property Information	
Property Age:	1966
# and Type of Structures:	3,575 sq. ft. single story commercial office building
Structure Construction:	Brick and vinyl siding
General Land Use:	Commercial office space

Governmental Database Search Results
No listings for the property.
Adjacent listing for: <ul style="list-style-type: none"> • Automotive Maintenance Service (approximately 250 feet west) <ul style="list-style-type: none"> ○ Inactive Underground Storage Tank (UST) listing. No known violations or leaks. • Fargo Public Schools District (adjacent to the north) <ul style="list-style-type: none"> ○ Resource Conservation and Recovery Act (RCRA) Conditionally Exempt Generator (<100 kg of hazardous waste per year). Listed waste codes: D001 ignitable hazardous wastes, carbon disulfide, benzene, ethane, 1-1' oxybis-(I), formaldehyde, hydrofluoric acid, methanol, pyridine, dimethyl benzene ○ FINDS- Listed in the RCRA database, North Dakota Facility Profile, and Integrated Compliance Information System.

City Directory

Since at least 2006, this property was the Downtown Community Partner Organization. In 2001, there was no listing of this address in the City Directory. Between at least 1971 and 1996, this property was either the Valley Pizza Co. or Shakey's Pizza Restaurant/Parlour & Ye Public House. Prior to 1966, there was no listing of this address in the City Directory.

Fire Insurance Map

1888	The property is vacant with the exception of a railroad siding running through. Adjacent businesses to the north along the railroad line include the Red River Valley Brewing Co. and Fargo Brewery.
1896	No change to the property. The Fargo Brewery is now Gate City Roller Mills.
1905	No change to the property. The Mill has been removed.
1916	No change to the property.
1929	No change to the property.
1950	No change to the property. The adjacent property to the west is owned by TF Powers & Co. and is labeled as a contractor yard.

Historical Aerial Photographs

1939	The property contains a railroad siding running through (north-south) that branches off the mainline (east-west). No structures appear to be on the property, but many smaller structures lie adjacent to it. They are associated with a business along the main branch.
1941	No significant changes.
1948	No significant changes.
1954	No significant changes.
1958	Increased activity is evident on the property, but no structure has been added. The railroad siding may now be inactive or its use is decreasing.
1965	The railroad siding has been removed, evidenced by the construction of Second Street N. along portions of its former alignment. The neighboring structures associated with the adjacent property have all been removed. One large building is present to the west. The property appears to be a paved lot.
1972	The property is occupied by a square building surrounded by a paved lot.
1976	No significant changes.
1981	No significant changes.
1991	No significant changes.
1997	No significant changes.
2005	No significant changes.
2010	No significant changes.

Site Reconnaissance Observations

The property consists of a single office building in the northwest corner of the intersection of Fourth Avenue N. and Second Street N. The property is surrounded by a paved lot and occupied by a small office building.

Summary of HTRW Related Issues/Costs

Based on review of available data, the existing office building is the only structure that has been on the property since at least 1888. Prior to that, the property was a part of a railroad siding corridor that followed the alignment of the current Second Avenue N. south towards the Mid America Property. The structure was built in 1966 and has been used for office or commercial space since that time.

HTRW related costs for this property could include a low to moderate potential for abatement of asbestos containing building materials and lead paint due to the time when the building was constructed. A low to moderate potential of soil contamination may also exist since the property was a railroad corridor nearly 80 years.

HTRW Assessment Summary Data Sheet

Property Name:	Howard Johnson Motel
Property Address:	301 Third Avenue N.
Parcel #:	01-2160-00060-000

General Property Information	
Year Built:	1961
# and Type of Structures:	Two story, F-shaped footprint 60,733 Sq. Ft
Structure Construction:	Concrete

- Richtmans Printing (401 Third St. N.)
 - Resource Conservation and Recovery Act (RCRA) Non-Generator: This former handler does not presently generate hazardous waste (as of Sept 1989). No violations. Former listed waste included: D001 ignitable waste and F005 spent non-halogenated solvents.
 - FINDS- Listed in the RCRA database
- Fargo Public Schools (419 Third St. N.)
 - RCRA Conditionally Exempt Generator (<100 kg of hazardous waste/yr). Listed waste codes: carbon disulfide, benzene, ethane, 1-1-oxybis-(1), formaldehyde, hydrofluoric acid, methanol, pyridine, and dimethyl benzene. No violations.
 - FINDS- Listed in the RCRA database

City Directory

Since at least 1966, this site has housed a motel/hotel under a variety of names (Town House Motor Inn, River Inn, Quality Inn & Suites, and Howard Johnson Hotel); a number of different restaurants (Sidestreet Grille & Pub, Ristorante Isabella, The Downunders Pub & Downtowners Club, Fireside Restaurant/Room, and the Embers Lounge); and more recently (2006-present) has housed racing and gaming businesses and financial offices.

Fire Insurance Map

- 1888 The property is occupied by approximately 10 separate dwellings. A small print shop is indicated on a parcel on Third Avenue N., between Fourth St. N. and Third St. N.
- 1896 There is a slight rearrangement of dwellings on the property. A print shop and an associated dwelling on a previously mentioned parcel have been removed and no structures remain.
- 1905 A new dwelling was added in the empty parcel. No other significant changes were noted.
- 1910 No significant changes.
- 1922 No significant changes on the property. The Pontoppidan Scandinavian Evangelical Lutheran Church and an auto repair and paint business are shown adjacent to the west.
- 1950 An auto and electrical supply business is now on the property between Third and Second St. N.

Historical Aerial Photographs

- 1939 Third St. N. ran through the center of the property. The western half consisted of the eastern half of a city block with light coverage of trees and residential homes. Similar land use was present on the eastern side, as well as an open field in the southern half. An abandoned railroad spur is visible from the main railroad line to the north. The spur appeared to run along the eastern edge of the property and down towards the Mid-America Property.
- 1941 No significant changes.
- 1948 A single rectangular building is constructed where the open field was noted.
- 1954 An unpaved parking lot is added along the north and south sides of the property, where it was formerly vegetated.
- 1958 Several semi-trucks are visible parked along both sides of the building. The entire city block directly southwest of the property has been removed and no structures remain.
- 1965 The section of Third St. N. running through the property has been removed. The western portion or the entire F-shaped motel has been constructed. The resolution of the aerial photograph is not clear enough to discern. The adjacent city lot that was cleared has a large building, currently the government building.
- 1972 The property consists of an F-shaped building surrounded on the west, south, and east sides by a paved parking lot.
- 1976 No significant changes.
- 1981 No significant changes.
- 1991 No significant changes.
- 1997 No significant changes.
- 2005 No significant changes.
- 2010 No significant changes.

Site Reconnaissance Observations

The two-story motel was surrounded on the west, south, and east sides by a paved parking lot. The motel rooms were in a U-shaped section of the building with a courtyard inside this area. A restaurant was attached to the motel along the southeast side. The entire property appeared to be actively used for commercial purposes.

Summary of HTRW Related Issues/Costs

The property appeared to be mainly residential parcels with possibly 1-2 small commercial parcels present from the late 1800s up to when the motel was constructed during the 1960s. It is unknown if the motel has ever undergone renovations. Based on when the building was constructed, asbestos containing building materials and lead-based paint could have been used and may still be present on the property. The likelihood of encountering these regulated materials is considered low to moderate if the building is demolished.

HTRW related costs for this property may require abatement of asbestos containing building materials and lead paint (low to moderate potential) based on the time when the motel was constructed.

HTRW Assessment Summary Data Sheet

Fire Insurance Map

1888	Female boarding houses and hotels are seen along the south side of the property. The northern portion is vacant. Adjacent businesses to the east along the Red River include a lumber yard and grain elevator.
1896	No change to the property.
1905	No change to the property. A Monson Fargo Tannery is now next to the Red River and adjacent to the east of the property. A linseed mill is south of the tannery and contained coal sheds and two Aboveground Storage Tanks.
1916	No change to the property. The Linseed mill is gone.
1929	No change to the property. The Tannery is now Minn-Kato Foundry & Manufacturing Co.
1950	The property now has a dwelling labeled "curling rink." Adjacent businesses next to the Red River have been removed. Coal storage is no longer indicated in this area.

Historical Aerial Photographs

1939	The property is mostly vacant with some small buildings/residences along the south side.
1941	Commercial buildings or high density residential buildings are on the site.
1948	No significant changes.
1954	No significant changes.
1958	No significant changes.
1965	The property is now a paved lot. All structures have been removed.
1972	No significant changes.
1976	No significant changes.
1981	No significant changes.
1991	No significant changes.
1997	No significant changes.
2005	No significant changes.
2010	No significant changes.

Site Reconnaissance Observations

The property consists of a paved parking lot adjacent to the east of the Fargo City Hall. The lot contained numerous parked vehicles during the reconnaissance and covered approximately two city blocks. No structures were on site. The lot was paved and overhead lights were situated throughout the lot.

Summary of HTRW Related Issues/Costs

Based on review of available data, the parking lot was constructed some time between 1958 and 1965. Prior to its construction, the lot contained several structures that ranged from residential property to light industrial. No potential issues with land use on the property were identified. Contaminant migration from neighboring properties (i.e. tannery and foundry) at some point in time was likely even though these businesses were downgradient from the property. Persistent flooding and a shallow water table has likely resulted in reverse flows from the river with the potential for leaching and transport of contaminants on and off site.

HTRW related costs for this property would include a subsurface investigation to verify if any metals and solvents typically associated with these businesses are still present on site above clean-up levels. Since the parking lot was converted some time during the 1950s and 1960s, an investigation was not likely completed. Due to the length of time since these operations were closed (approximately 100 years), the likelihood of encountering contamination that would require clean-up is considered moderate.

HTRW Assessment Summary Data Sheet

Property Name:	Case Plaza
Property Address:	117 Northern Pacific Ave. N. One Second St N.
Parcel #:	01-1540-01090-000

General Property Information	
Year Built:	1908
# and Type of Structures:	Single 3-story building 33,000 total square feet
Structure Construction:	Brick (all sides)
General Land Use:	Renovated Office Building

Compliance achieved by December 2005.

City Directory

Parcel data indicates the Case Plaza's address as 117 Northern Pacific Avenue N. (its historic address), however, research has found that the current address is One Second Street N. Between at least 1966 and the present day, no listing for 117 Northern Pacific Avenue N. existed in the City Directory. But **from** at least 1928-1961, 117-121 Northern Pacific Avenue was the Case J I Company (farm equipment). Between at least 1991 and the present day, the Case Plaza Building has existed at One Second Street N. and housed numerous offices (insurance/finance, government, and similar offices). No listing for One Second Street N. existed in the City Directory prior to 1991. In summary, between at least 1966-1986, no listing for either address existed in the City Directory.

Fire Insurance Maps

- | | |
|------|--|
| 1888 | <i>Fargo Lumber Company</i> -Lumber yard with several railroad spurs feeding into the property. Two small coal sheds and one long dressed lumber shed was shown, as was outdoor storage of lumber. <i>Fargo Roller Mills</i> , a grain mill, is on the same parcel to the east near the river. |
| 1896 | <i>J.A. Chesley's Lumber Yard</i> - new ownership, but the same layout. The <i>Fargo Roller Mills Co.</i> was still in the same place. |
| 1901 | No significant changes. |
| 1910 | The lumber company had been removed and replaced by <i>J.I. Case Threshing Machine Co.</i> (farm equipment). The Case Plaza building has been constructed and contains coal bins along the northeast corner. Large interconnected rectangular sheds are north of the Case building and labeled "separator sheds." The <i>Fargo Roller Mills</i> is now labeled <i>The Fargo Mill Co.</i> |
| 1929 | The coal bins had been removed and replaced with a boiler. The separator sheds are now labeled "Machinery Warehouse." <i>Fargo Mill Company</i> has expanded to include what appeared to be a grain elevator west of the main building. |
| 1950 | There were no significant changes to the Case property. The <i>Fargo Mill Company</i> is now owned by the <i>Interstate Seed Co.</i> No additional changes to the structures had occurred. |

Historical Aerial Photographs

- | | |
|------|--|
| 1939 | The Case Plaza building was at the site along with two long rectangular buildings to the north and another large building and smaller structure to the east. |
| 1941 | No significant changes. |
| 1948 | No significant changes. |
| 1954 | No significant changes. |
| 1958 | No significant changes. |
| 1965 | No significant changes. |
| 1972 | No significant changes. |
| 1976 | The photo is blurry, and the presence of two long rectangular buildings is unclear. |
| 1981 | Two long rectangular buildings and a smaller structure have been removed from the site. |
| 1991 | The area where removed structures were located had been paved and was used as a parking lot. |
| 1997 | The eastern building had been removed and only the Case Plaza building remains. It was surrounded by a paved parking lot. |

2005	No significant changes.
2010	No significant changes.

Site Reconnaissance Observations

The property is an office building surrounded to the north and east by a paved parking lot, in the northeast corner of the intersection of Northern Pacific Ave North and Second St. N. No outdoor storage of materials was observed on site. Adjacent properties include commercial and industrial businesses.

Summary of HTRW Related Issues/Costs

The Case Plaza Building was built in 1908 and used for the manufacturing of farm equipment until at least 1961. The building was renovated and converted into office spaces by 1991. It is assumed that any lead paint or asbestos-related material was abated when the building was renovated. Former land use as a lumber yard in the early 1900s and farm equipment manufacturing may have caused contamination to the soil and groundwater in the area surrounding the Case Plaza Building. Since it is paved, the likelihood of encountering or disturbing any contamination, if present, is considered low.

HTRW related costs for this property could potentially include abatement of asbestos and lead (if still present) on the property. If the pavement is removed and the soil is disturbed, the likelihood of encountering contamination is considered medium based on historic activity on the property.

HTRW Assessment Summary Data Sheet

Property Name:	Mid America Steel
Property Address:	92 Northern Pacific Avenue N. 96 Northern Pacific Avenue N. 101 Northern Pacific Avenue N.
Parcel #:	01-3508-00850-000 01-2112-00021-000 01-3508-00800-000

General Property Information

Property Age:	1957 and 1975 (92 NP Avenue N.) and 1957 (106 NP Avenue N.)
# and Type of Structures:	Approximately six separate structures
Structure Construction:	Mix (brick, cinder block, concrete)
General Land Use:	Steel foundry, manufacturing, commercial

Governmental Database Search Results

Mid America Steel Inc.

- Inactive Underground Storage Tank (UST) listing. No violations reported.
- Resource Conservation and Recovery Act (RCRA) Conditionally Exempt Generator (<100 kg of hazardous waste per year). Listed waste codes: D001 Ignitable hazardous waste and F003/F005 spent non-halogenated solvents.
 - Previous small quantity generator status in October 1990.
 - Records/reporting, general, and used oil violations reported in September 2005. Compliance achieved by December 2005.

 - Finds - Listed in the RCRA database

City Directory

Parcel data indicated that Mid America Steel was also listed under 96 and 106 NP Avenue, however, no listings for either occur in the City Directories.

92 NP Avenue

Since at least 1981, this site has been Mid America Steel. From at least 1928 to 1976, this site was the Fargo Foundry Steel & Manufacturing Co.

101 NP Avenue (not a listed address in Property Tax records)

Since 1986, there are no listings for this address in the City Directory. From 1981-1986, this site was Mid America Steel Inc.'s warehouse. **From** 1956-1976, this site was the Fargo Foundry Steel & Manufacturing Co. In 1951 it was vacant. From 1928-1945, this site was the Fargo Mill Co., Inc., a flour manufacturer.

Fire Insurance Map

1888	Property contains five railroad spurs running across the property with two servicing the site. The property contains several small structures, including a lumber shed and planning mill, and large wood piles labeled as the TD. It is a Green Lumber Yard.
1896	Formerly noted structures were removed. The J.I. Case agricultural implements structure located along the southern edge of the property. The Pacific Lumber Co. shed now located in the NW corner of the property (NP Avenue & Second Avenue intersection) and several smaller lumber piles noted. Remainder of the site is generally vacant.
1901	Expansion of operations at Pacific Lumber Co. (now called North Star Lumber) - more sheds and outdoor storage of lumber. The agricultural implement business was expanded with more structures (now Hoyance Thresher Co.). Miracle Pressed Stone Co. is located in the southeast corner of the property. A stock and shipping yard is shown. The Fargo Foundry Co. is located in the northeast corner of the property. The site consists of a single structure with a machine shop, boiler shop, and foundry. A note says that the operation is "not in running order as yet."
1916	First Street N. is completed separating the Fargo Lumber Company (formerly North Star Lumber) from the east side of the property. The Fargo Foundry Co. is still present and the structure has expanded slightly to the east. A stock yard replaced the area once occupied by Miracle Pressed Stone Co. The agricultural implement business now has several more sheds that are labeled for scrap iron and junk. There is also an outdoor iron scrap yard.
1929	The stock yards and agricultural implement businesses are now replaced by the Fargo Iron & Metal Co., which is a scrap iron yard with a warehouse and several structures/areas labeled as "junk."
1950	More structures WERE added to the Fargo Foundry Co. Structures labeled for steel fabricating, machine shop, boiler house, and foundry across the site.

Historical Aerial Photographs

1939	The property was between Northern Pacific Avenue N. and Main Avenue. Numerous buildings/structures were located throughout the site. Several railroad spurs were visible running off the main railroad line, which divides the property, towards the structures on site. Outdoor storage of materials was present.
1941	A small road is completed through the property connecting Northern Pacific Avenue N. and Main Avenue.
1948	Unchanged
1954	Unchanged
1958	Unchanged
1965	Unchanged
1972	Second Street N. extended south and separates the property from adjacent businesses to the west. Former railroad spurs were no longer in use.
1976	Unchanged
1981	Unchanged
1991	Unchanged
1997	There were changes to buildings along the west side of the property. One building was removed and a new one constructed in portions of the former footprint. A small addition was also made to an adjacent building.
2005	Unchanged
2010	Unchanged

Site Reconnaissance Observations

The entire property was fenced or located in an elevated area, which restricted observations during the site reconnaissance. The property consisted of several large warehouse structures along Northern Pacific Avenue N. Other smaller structures were noted along the railroad line, which runs through the southern end of the property. Outdoor storage of materials, such as metal pipes and beams, were noted throughout the majority of the site. A large compressed air tank was noted near one of the larger structures and a stack of approximately 8-10 drums were observed stored on their side outside a building. Large trucks and machinery were also noted on the property.

Summary of HTRW Related Issues/Costs

Portions of the property have been used for steel manufacturing since at least 1901. It appears that Mid America Steel took over the entire property around 1981. Historic site use included an onsite foundry, welding, fabricating, and a scrap metal yard. No major violations have been reported at this site, but based on the current and historic land use for steel manufacturing, the following conditions could be associated with the site, creating a large potential clean up and liability: slag tanks, slag piles, coke oven, acid tanks, liquor tanks, sludge lagoons, undocumented landfills, and the like.

This site has a moderate to high potential for HTRW related costs for clean-up, since contamination there is likely. The associated costs would likely be significant, based on the size of the site and the nature of activities. More information regarding actual operational activities is needed to fully assess the risk at this site.

HTRW Assessment Summary Data Sheet

Property Name:	Park East Apartments
Property Address:	One Second St. S.
Parcel #:	01-2112-00050-000

General Property Information	
Property Age:	1972
# and Type of Structures:	122-unit apartment building. Four-story building totaling 145,788 sq. ft.
Structure Construction:	Mixed brick and wood
General Land Use:	High-density residential

City Directory

Since at least 1976, this site has been the Park East Apartment Building. Prior to 1976, no listing for this address exists in the City Directories. However, it appears that this area (the full blocks and intersection of Second Street S. and Main/Front Street) has housed Geller Auto Parts Shop, Fargo-Detroit Ice. Co. Repair Shop, and residential or vacant properties. These properties had addresses such as, 10, 12, 20, 22, and 24 Second St. S.

Fire Insurance Map

1888	A line of structures is in the property along Front St. (now Main St.). The majority of them are hotels, with some warehouses indicated. Small dwellings are scattered along the southern end of the property. A stable is shown near the intersection of Second St. S. and First Ave. S.
1896	No significant changes
1905	Stores such as billiards, grocery, meat, and a restaurant now occupy the structures along Front St.
1916	Commercial businesses continue to dominate the structures along Front St. and residential homes are seen along the southern end of the property. A large structure labeled "transfer" is present where the stable was located.
1929	The transfer structure has been removed. A mix of commercial and residential properties remains the same.
1950	No significant changes.

Historical Aerial Photographs

1939	The property was a mix of residential properties (southern portion) and commercial buildings that lined the south side of Main St. (northern portion).
1941	Unchanged
1948	Unchanged
1954	Unchanged
1958	Unchanged
1965	The course of the Red River has changed with the meander to the south of the property, straightening out slightly and moving east by two city blocks because of the construction of a dike. Residential homes have been removed from the southern portion of the property. Commercial properties along Main St. remain.
1972	Park East Apartment units have been constructed and consisted of 5-6 interconnected buildings. Commercial businesses to the west have been removed.
1976	Unchanged
1981	Unchanged
1991	Unchanged
1997	Unchanged
2005	Unchanged
2010	Unchanged

Site Reconnaissance Observations

The property was occupied by a large apartment building consisting of several connected buildings that were four stories high with wood balconies. A large paved parking lot was in the center of the property. Rows of garages were also noted along the south and east sides of the property, along with additional outdoor parking areas. No outdoor storage of materials was noted.

Summary of HTRW Related Issues/Costs

Based on review of available data, the Park East Apartments were constructed in 1972. Prior its construction, the property was occupied by a mix of commercial businesses (along Main St.) and residential properties since at least 1888. Flooding may have been an issue in this area, because during the 1960s the houses and businesses were removed and a dike built along the Red River. Potential contamination associated with this property is considered low.

HTRW related costs for this property includes a low potential for requiring abatement of asbestos containing building materials and lead paint based on when the apartment units were constructed.

* based on bid from Legend Techniacl Services, Inc.

** Disposal of friable asbestos containing building materials to the Fargo Division of Solid Waste 2301 8th Ave N Fargo, ND

Disposal Costs

Disposal Assumptions

	Soil
Removal	150 per hour
Oversight	75 per hour
Transport	200 per truck RT
Disposal*	35 per ton
Weight of cubic ft. soil	80 lbs
Typical capacity of dump truck	10.8 tons

* Based on disposal to Fargo Division of Solid Waste 2301 8th Ave N Fargo, ND

	Est. Hours	Removal	Oversight	Transport	Tons	Disposal
Case Plaza	6	900	450	3,622	196	6,846

Assumptions

- Administrative Includes the management portion of the project, which involves communication and coordination with the client, contractors, agencies, etc.
- Characterization Includes the cost of sample collection, laboratory analysis, and reporting. When soil sampling is recommended, drilling costs are also included.
- Soil Removal Includes the estimated cost for oversight, removal, hauling, and disposing of contaminated soil at a landfill
- Lead Abatement Includes the oversight, removal, and disposal cost of lead containing building material identified during characterization
- Asbestos Abatement Includes the oversight, removal, and disposal cost of asbestos containing building material identified during characterization
- UST Removal Includes the oversight, removal, and disposal cost associated with removing an underground storage tank

Risk Ratings	Soil Volume based on % of site (to 0.5')	Lead Abatement based on % of Structure	Asbestos Abatement based on % of structure
Low	5%	1%	10%
Moderate	25%	10%	30%
High	50%	20%	50%

Estimated HTRW Costs

Property	HTRW Clean Up Cost	% of Total Cost
Case Plaza	\$57,972	6.0%
Fargo Public Schools	\$92,083	9.5%
Howard Johnson	\$88,484	9.1%
Mid America Steel	\$440,369	45.2%
Oak Grove	\$87,122	9.0%
Park East Apartments	\$108,054	11.1%
Residential Properties*	\$6,648	0.7%
Commercial Office Building	\$22,794	2.3%
City Hall Parking Lot	\$69,698	7.2%
Total	\$973,226	

* assumes 5 residential properties
