THESIS PREMISE

How do we rebuild trust?

A photograph showing several Camden County Police officers in uniform interacting with a woman in a red shirt and patterned shorts standing on the steps of a residential building. The scene is set in front of a multi-story building with a brick facade and a mailbox labeled '406'. The image is overlaid with a semi-transparent white box containing the title text.

Community Policing

Camden, New Jersey

How can design support community policing and rebuild trust through the built environment?

RESEARCH

Polis Station

Studio Gang

Polis Station History of Police Stations

1850s
FIRST STATIONS
Multiple U.S. Cities
(1800 ft²)

After decades of using spare space within other civic institutions, police departments establish their own station buildings.

1890s
ROW HOUSE STATION
Multiple U.S. Cities
(1000 ft²)

Stations are embedded in the rapidly densifying urban fabric.

CALL BOX
Multiple U.S. Cities
(1 ft²)

Call boxes appear on the streets shortly after the invention of the telephone. Police and trusted members of the community have access to make calls to the police station.

1930s
STATION FOR THE AUTO AGE
Early Prototype, Chicago
(4000 ft²)

The automobile changes the physical requirements of police stations and enlarges the area of patrol.

1960s
FORTRESS STATION
2nd District Station, Chicago
(45,000 ft²)

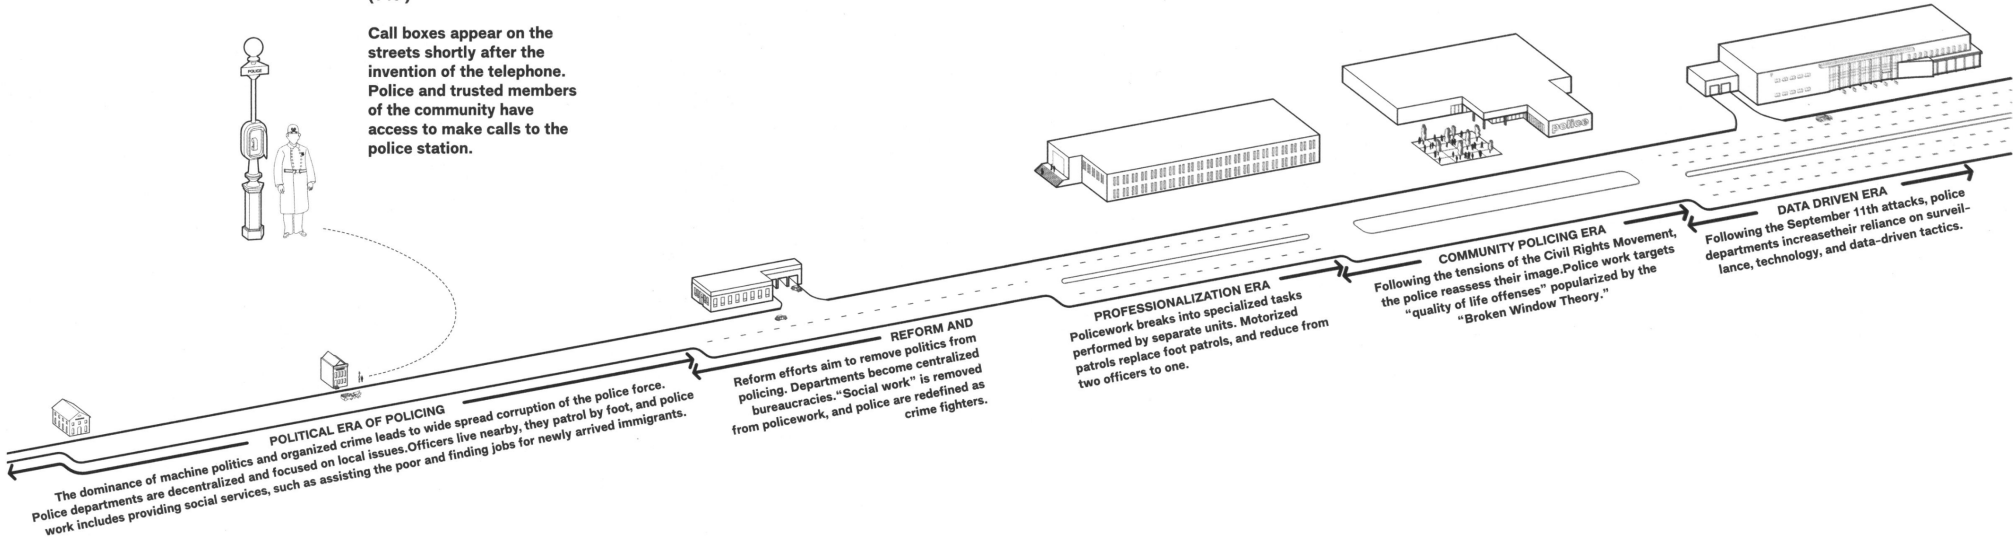

Now large hierarchical institutions, police stations grow to house multiple specialized units and administrative staff.

1980s
CIVIC STATION
24th District Station, Chicago
(35,000 ft²)

In an effort to soften the perception of the police, stations become less imposing and include public plazas.

2000s
TODAY'S STATION
10th District Station, Chicago
(48,000 ft²)

Today, Chicago's station prototype is sited on a major thoroughfare, flanked by expansive parking lots.

CALL BOX
Multiple U.S. Cities
(1 ft²)

Call boxes appear on the streets shortly after the invention of the telephone. Police and trusted members of the community have access to make calls to police station.

POLITICAL ERA OF POLICING
The dominance of machine politics and organized crime leads to wide spread corruption. Police departments are decentralized and focused on local issues. Officers live nearby, their work includes providing social services, such as assisting the poor and finding jobs for them.

**1930s
STATION FOR THE AUTO AGE**

The psychology of justice buildings:

A survey experiment on police architecture, public sentiment, and race.

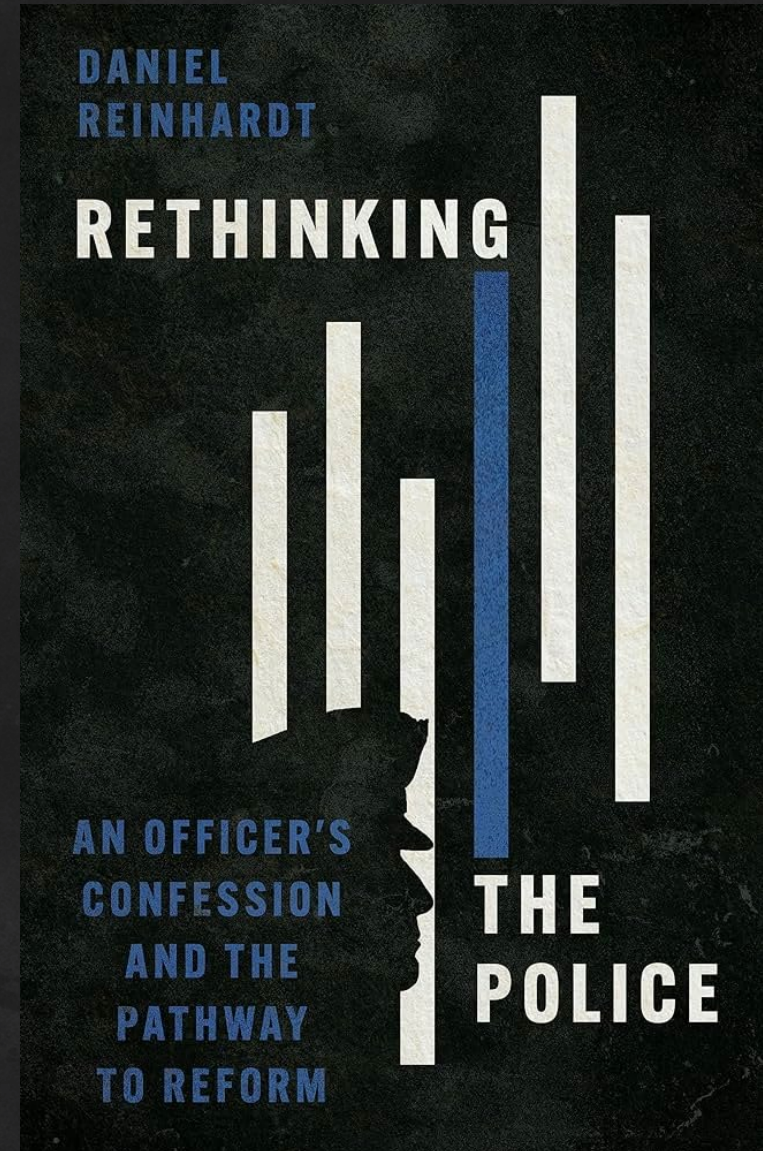

- 700 respondents
 - Black (238)
 - White (237)
 - Latino (225)
- Results:
 - Hostile architecture effects how the public perceive the police.
 - Public perception of the police goes beyond the facade of a building.

Rethinking the Police

Daniel Reinhardt

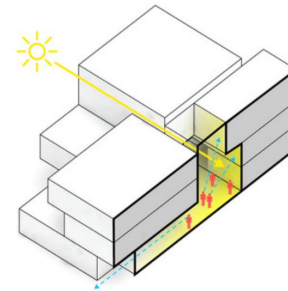

- Examines police culture and the need for reform
 - ‘Us vs. Them’ perspective
- Pushes for real community policing
- Encourages officers to engage with the community
 - Example: Volunteer Coaching

Case Study:

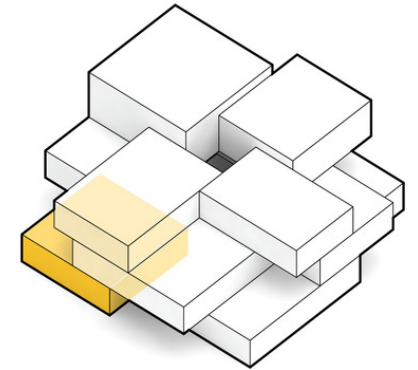

Community Spaces

NYPD 40th Precinct – BIG ARCHITECTS

ATRIUM

program areas, entrances and circulation routes are oriented towards the central atrium. This allows for complete oversight from main desk while maintaining visual relationships between all users. Clerestory windows at the upper level bring daylight into the building's core.

COMMUNITY

A separately accessible community room will be the first of its kind in the city. At the street-facing façade, small circular perforations in the concrete panels call attention to the special function of this particular programmatic block, allowing for transparency that is essential to the NYPD's plans for this new kind of public space.

Case Study:

Mass Timber Construction

Lincoln City Police Department – FFA

GOALS

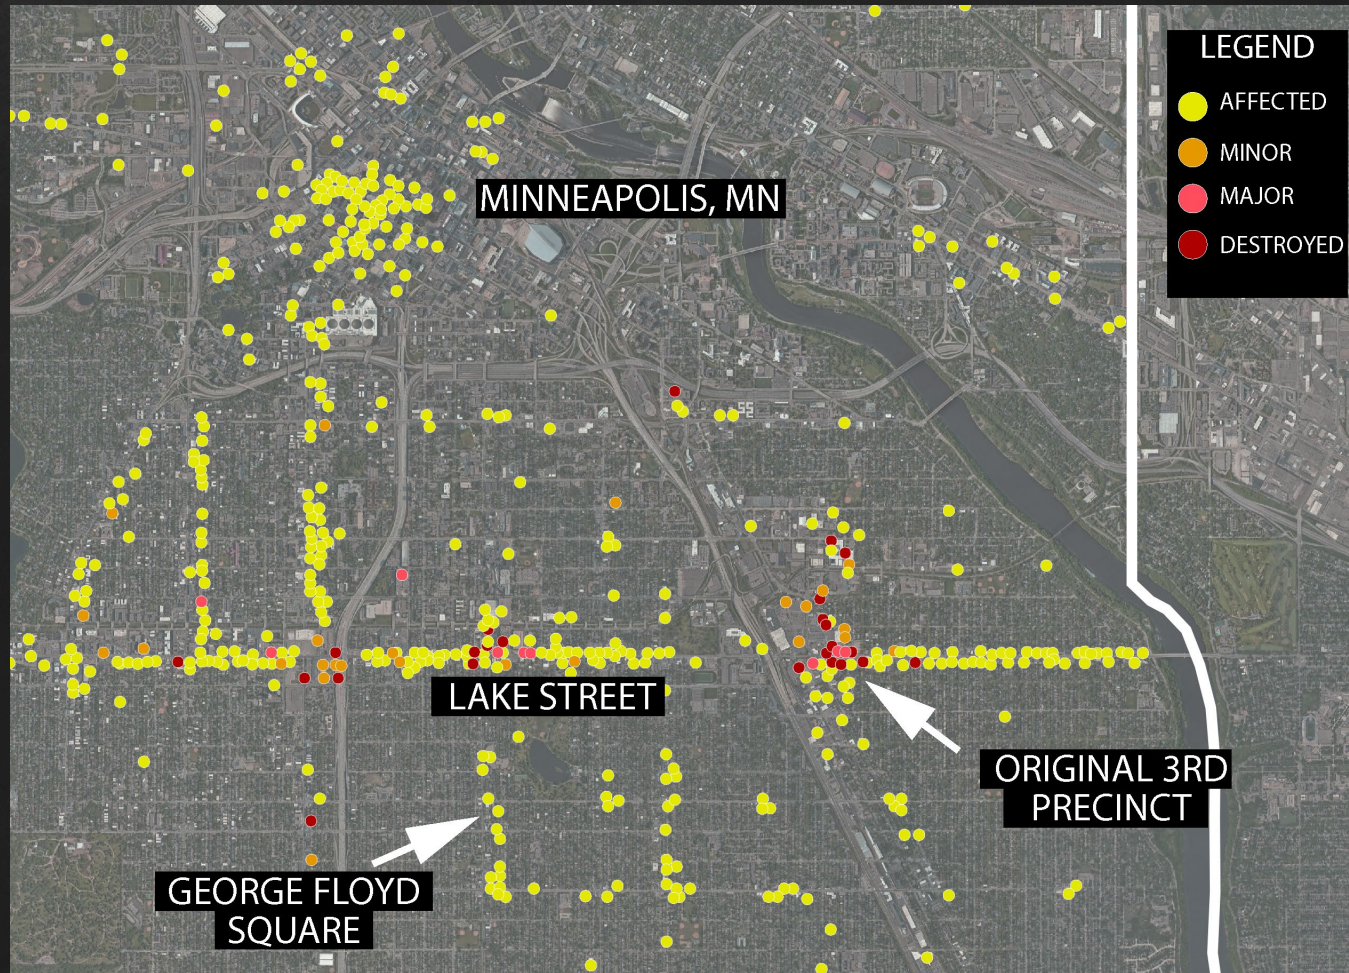

1. Embrace Mixed-Use Typology.
2. Utilize Civic Assets For Community Campus
3. Leverage Mass-Timber Construction
4. Promote Healthy Interactions within Interior

George Floyd Protests

Minneapolis, MN

02: CONTEXT

MINNEAPOLIS

For riot-damaged Twin Cities businesses, rebuilding begins with donations, pressure on government

Business owners assess damages, physical and emotional.

By Jeffrey Meitrodt Star Tribune | JUNE 6, 2020 — 8:03PM

Rebuilding after the protests

More than 400 businesses were damaged during the riots, with rebuilding costs estimated at more than \$500 million. Some of the worst damage took place on this stretch of Lake Street in Minneapolis.

MPD Third Precinct burns as protests continue following George Floyd's death

While most protests have been peaceful, some factions have left vandalism, fires and looting in their wake.
