

# Research Report Series

## List of Publications since 1980

### North Dakota Agricultural Experiment Station

In 1960, the North Dakota Agricultural Experiment Station initiated a Research Report series as a means of publishing information which, because of its technical content, timeliness, or limited distribution, is not appropriate for a general audience through the less-technical Bulletin Series.

Beginning with this issue, recent Research Reports will be catalogued annually in the Nov.-Dec. issue of North Dakota Farm Research. Listed below are Research Reports published since 1980 for which copies are still available. Single

copies are available at no charge from the Distribution Center, NDSU Extension Service, Morrill Hall, North Dakota State University, Fargo, ND 58105. When ordering, please indicate Research Report number, title, and date.

Other, less technical, AES publications are listed in the NDSU Extension Service's List of Publications. A copy of that list is available from the above address.
